## RED ANGUS

### *Welcome from Maple Oaks Red Angus*

It is our pleasure to welcome you to our 3rd Annual Bull and Female Sale. We would also like to take this opportunity to thank the many customers that have supported our program over the years and invested in our genetics. It makes us very proud to hear of our customer's satisfaction and many success stories as our Red Angus cattle have gone on to enhance many other herds.

We made a very conscious decision to invest in Red Angus approximately 15 years ago as a seed stock producer. We travelled the United States and Canada to learn about and invest in world class Red Angus genetics so we can bring some of the "Best of the Best" to our customers. We believe you will see many of those genetics within our offering, including the likes of the one and only Red Soo Line Annie 7249, Red Six Mile Signature, Red Six Mile Sakic, Silveiras Mission Nexus 1378, Pie One of a Kind 352, Benchmark Transition 10-14, Red Basin EXT 45T5 and so many more. We study the animals well beyond their EPDs and are excited to have the opportunity to pass these genetics on to you.

We have been hit hard by the drought and have had to buy and feed fescue hay all summer. We have virtually no pasture so we are having to sell many we would normally retain. We focus on our females and are confident the young females will grow up to be beautiful, productive females with depth of body, great udders and a beautiful presence.

Regarding the bulls, we did not have our sale last fall so we carried over the bulls and are offering an impressive group of strong, powerful, productive two year olds, along with 18 month, and yearlings. The bulls are exposed to real world conditions and are bred with multiple trait selection in mind. They are grown slow and get a lot of exercise. They run on approx. 30 acres, no feedlot like environment. They are exposed to the Ozark hills, fescue grass, creeks, rocks, cedars, ponds, etc. They have access to clean water and free choice AMP-T mineral at all times. Their dispositions are terrific, are up on all vaccinations, have passed their soundness exam, are BVD and PI tested, and are ready to go to work! They are also backed by exceptional cow families and should sire tremendous offspring. Buy with confidence!

Thank you for reviewing our offering. If we can be of assistance in any way, please feel free to contact us. We can discuss the bulls, the females, your needs and find the best animals suited for your operation. We look forward to seeing you on sale day!

*Sincerely,*

Ray & Susan - Maple Oaks Red Angus

314-630-0332

*Fellow Red Angus Enthusiasts.*

It is with great pleasure that we welcome you to the Maple Oaks Red Angus production sale! Ray Paslawski has devoted his efforts to assembling one of the most elite sets of Red Angus females anywhere in the country. With a disciplined selection criteria and a resilient focus on building from the most prominent cow families in the breed, a strong foundation has been build at Maple Oaks Red Angus.

With unparalleled enthusiasm in the Red Angus breed there is no better time to invest in the future of your cowherd. The females being offered from Maple Oaks are fescue adapted, forage efficient, highly maternal matrons that are backed by breed leading genetics throughout North America. The bull offering is comprised of a stout, rugged set of service-aged bulls that are ready for heavy service. The bulls have been developed in a large paddock setting to ensure structural integrity and efficiency. These bulls have been developed slowly with longevity in mind, and they are fertility tested and ready to go to work for you!

Maple Oaks Red Angus has remained progressive in their quest to improve the next generation of Red Angus genetics by intensely utilizing Artificial Insemination and Embryo Transfer. Many of the cattle in the sale are sired by the breeds most proven and consistent AI sires, while being backed by prolific cow families. A deep set of spring bred females, fall pairs, and open heifer calves will be offered, along side a select group of strong herd bull prospects.

Consider this your invitation to join us at the state of the art Springfield Livestock Marketing Center in Springfield, MO on September 22, 2018. The cattle will also be on display the evening before the sale for your appraisal. Video footage of the offering will be available online at [www.DVAuction.com](http://www.DVAuction.com) and [www.InnovationAgMarketing.com](http://www.InnovationAgMarketing.com) prior to the sale. If you have any questions regarding the offering please feel free to contact any of the auction staff, we'd be happy to visit with you!

*Enjoy the cattle.*

WWW.INNOVATIONAGMARKETING.COM

## ACCOMMODATIONS

Courtyard by Marriott – Springfield Airport: (417) 869-6700  
Holiday Inn Express: (417) 887-8500  
Drury Inn & Suites: (417) 863-8400

## TERMS & CONDITIONS

Except for those stated in the terms and conditions within, there are no warranties, either expressed or implied, as to the merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction. The warranties and guarantees set forth in the "Terms and Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy for the Buyer, or any party claiming through Buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities. All cattle in this sale are offered according to the laws of the State of Missouri. The right to bid, as provided under law, is reserved for all sellers unless otherwise announced.

## BIDDING

The Auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

## TERMS

Terms of sale are cash unless satisfactory credit arrangements have been made with Sale Management prior to sale. In the event the Buyer defaults on payment, the Buyer shall be responsible for all costs, including attorney's costs, incurred by Sale Management or Seller in connection with collecting, or attempting to collect, payment due.

## CERTIFICATE OF REGISTRY

A transferred certificate of registry will be furnished to the Buyer for each animal.

## PURCHASER'S RISK

Each animal becomes the risk of the Buyer as soon as sold, but it shall be the obligation of the Seller to see that animals are fed and cared for free of charge to Buyer, until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

## HEALTH

All animals are eligible for interstate shipment, except as otherwise announced. Interstate health papers will be furnished for each animal in accordance with prevailing State/Federal Regulations.

## BREEDING GUARANTEE

- a. All animals are guaranteed by the Seller to be breeders, with the exception of:
  - i. Calves less than 12 months of age.
  - ii. Animals shown by purchaser after sale. The breeding guarantees, if any, shall be such as agreed upon between Seller and Buyer.
  - iii. Gross negligence or willful misconduct on the part of Buyer.
- b. Bulls are guaranteed breeders if not allowed to run within the herd until at least 14 months of age. Any bull that either:
  - i. Settles one-third or more of the healthy cows he serves.
  - ii. Is the sire of 20 or more animals.
  - iii. Settles cows by natural service and passes a fertility test made by a competent veterinarian during any six-month period of trial (provided on page 40 of "Options and Privileges of Return or Adjustment," this section) shall be considered a breeder. Any guarantees with respect to the ability to freeze semen shall be by separate agreement between the Buyer and Seller.
- c. Safe in Calf Females have been examined by a competent veterinarian and are so guaranteed.
- d. Served Females are believed to be in calf but are not so guaranteed.
- e. Pasture-exposed Females have been exposed but are not guaranteed to be in calf.
- f. Open Females have not been served and are so guaranteed.

## ANNOUNCEMENT

Announcements from the auction block shall take precedence over the sale catalog and/or any additional printed information regarding animal(s) sold.

## LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

## ONLINE BIDDING

We are pleased to bring you real-time internet bidding and a live broadcast of this sale through DVAAuction.com. If you are unable to attend for any reason, you may bid online at www.dvauction.com. Please be sure to create an account and get approved for bidding prior to the start of the sale.

Annie 7249 - Dam of Lots 1 - 3

THE SONS OF  
*Annie 7249*  
(2007 – 2016)

There is simply no denying the impact that Annie 7249 had and continues to have on the Red Angus breed as a whole. She was the definition of a true power cow and left a lasting legacy behind. Annie 7249 was campaigned with great success, being named Reserve Grand Champion Female at the World Red Angus Forum in 2009. After that major victory, Annie went on to be named Reserve Senior Champion Female at the 2009 Canadian Western Agribition. She also was the Reserve Grand Champion Female at the 2009 First Lady Futurity with her calf Red Soo Line Annie 9222. She was sold in the historic Soo Line Dispersal to Wildcat Creek Ranch in Kansas before making her way to the Maple Oaks Red Angus program.

Annie was one of the best cows to ever walk the pastures of Maple Oaks Red Angus and her impact will be everlasting. Dark red in color, flawless in her phenotype, and one of the most phenotypically intriguing females we have ever laid eyes on. Yet, she didn't stop with her good looks, because her ability to generate at the highest level was certainly present.

This trio of sons is a prime example of what Annie 7249 was capable of. Six Mile Game Face 164Y is the exciting calving ease sire from the famed Six Mile program in Canada. There is no doubt that these bulls are backed by lineage that is rich in tradition and history. Their sheer substance, rugged build, docile temperament, and "world class" genetics make them legitimate herd sire candidates for even the most discriminating cattleman. The toughest decision you'll have to make on September 22 in Springfield, MO is which of these full brothers best compliments your breeding program! Also see daughter of Annie offered as lot 29 and granddaughters as lots 58 & 59.

Game Face - Sire of Lots 1 - 3

LOT 1 - MAPLE OAKS GAME FACE 925C

Dark red in color, massive in kind, and loaded with quality! 925C is without a question a true sale highlight and one that we feel confident is deserving of the "lot 1" role! He is athletic in his basic build, smooth made, robust in his rib shape, and stands on a large and correctly shaped foot. His 66 lb. actual BW makes him a logical choice to utilize on heifers as an AI sire, while his quality and pedigree is sure to make him a herd impacting sire! This bull is the most phenotypically like Annie, he carries his head high and proud and portrays the presence Annie had standing in the pasture. A must see on sale day! *Maple Oaks to retain 50% ownership in semen rights.*

**LOT 2 - MAPLE OAKS GAME FACE 998C**

998C is another standout among the bull offering. Of the trio of full brothers, he is the moderate, good-looking option that offers length of spine, balanced phenotype, and the feet and legs needed to endure heavy travel. Longevity is built into the pedigree of these three herd sire prospects! Imagine the daughters he will sire and the females they will develop into... the herd building kind! *Maple Oaks to retain 50% ownership in semen rights.*

Here is a top Cowboy Cut son that is backed by another prolific cow family. His dam, Six Mile Countess is a role model type female that is massive through her mid rib, sound footed, and great uddered. 2113D is a stout made, well-balanced bull that will add value to your calf crop!

EXT 45T5 - Sire of Lot 6

### LOT 6 - MAPLE OAKS HIGH VOLTAGE EXT

Wow, a true genetic gem and without a doubt one of the most popular outcross bulls to sell this fall! 0166D is a stout son of the EXT 45T5, a potent sire that we were fortunate enough to acquire the last 7 units of exportable semen. Well known in North America, and especially Montana, he is noted for consistently siring world-class cattle including the 2013 NWSS Champion, Benchmark Better Beef. He is a descendent of NBAR Emulation EXT, one of the most widely used Angus bulls in the breed with over 60,000 progeny to his name. A phenomenal dam backs 0166D, 7172, whom has been a standout in production at Maple Oaks Red Angus with an MPPA of 106. EXT 45T5 has sired many of our top females and bulls, stamping them with the same practical, dark red, well balanced look that we admire. 0166D is no exception to the mold, dark cherry red in color, bold ribbed, deep sided, and loaded with power from end to end. This herd bull prospect is a must see on sale day and one that is sure to add pounds to your next calf crop!

Redemption - Grandsire of Lot 7

### LOT 7 - MORA REDEMPTION 3169D

MORA Redemption 3169D is a grandson of one of the most elite breeding bulls in the breed, Brown JYJ Redemption Y1334. He is the own son of the great Jolene W16 dam and is sired by the legendary P707. Strong maternal and calving ease genetics back this powerful herd sire prospect. His On Target dam is backed by the influence of the great Cherokee Canyon bloodline. Strong genetics back this herd bull and we believe with his 78 lb. actual BW he is a strong calving ease prospect!

459D is another top Night Watch son that is massive in his design, robust in his rib cage, and loaded with power from end to end. He too is backed by a prolific dam that originated in the prominent Six Mile program, home to many of the breed's top females. His dam, Vidalia 459Y, is a daughter of Wildcard 7052. 7052 is an own son of one of the most dominant cows to ever come out of the Soo Line program, Baneberry 5238, a female that tallied \$64,000 in progeny sales as a two year old raising a set of twin bull calves on her own. A prominent and strong maternal pedigree backs 459D!

A few years back we selected pick of the Champion Pen of Three females at the NWSS from fellow Missouri Red Angus breeder, Dan Lacy of Lacy's Red Angus. That female was a daughter of Legacy 6097 and a female that we felt would add tremendous value to our program. This mating to the breeding calving ease and marbling super star certainly did not disappoint! With a -2.8 BW EPD that spreads to a 93 at a year, this curve bending herd sire prospect has numerous top 15% rankings. A heifer bull prospect here with a 68 lb. actual BW!

Independence  
Sire of Lot 12

LACY ANNIE 7096 451, dam of Lot 12 was a member of the Champion Pen of Three Heifers at the 2016 NWSS

**LOT 13  
MAPLE OAKS TRANSITION  
7186E**

7186E is the first of the 18-month old bulls and without a question one of the standouts in this offering! He is the number 1 bull in this division for YW, with a 114, while spreading from a 0.9 BW EPD! He started with an actual BW of 84 lbs. and weaned off at an impressive 847 lbs.! A true performance bull that is from a potent cow line, as his dam 186U has produced the lot 1 bull in our last two bull sales! Much like his maternal brothers, he is rugged in his build, wide based, thick topped, and loaded with power from end to end. He is a sound footed, athletic option that will add pay weight to your calf crop, with top 4% WW and top 8% YW EPD's, ranking him among the breed's most elite performance bulls. Study the genuine power and dimension in 7186E on sale day!

22E is a top son of the great Red U-2 Renown 193C, a son of the prolific Red U-2 Reckoning 149A. With highly sought after lineage on the top side of his pedigree, this performance focused prospect offers an impressive triple digit YW EPD, ranking among the elite 11% of the breed, not to mention ranking in the top 5% for CW as well. This added performance and carcass focus is further enhanced by his strong maternal side from the bottom half of his pedigree. His prolific Mulberry dam is just that, and a female that we feel has done an exceptional job time after time. Unique genetics with a sensible 74 lb. actual BW can be found here!

Beemer - Sire of Lot 21

What a way to start off the yearling bull offering with another top son of the great Basin EXT 45T5! We cannot say enough about the progeny that we have had from this breed leading sire. He is a true herd changer that is dark red in color, loaded with volume and capacity, while being genuine in his muscle shape and sound built. 4112E is backed by truly "World-Class" genetics, including: EXT 45T5, Ole's Oscar, and JBOB Expectation to name a few. This prospect ranks among the top 2% of the breed for GridMaster, top 1% for WW, top 3% for YW, and top 1% for MARB. Cutting edge genetics with an elite phenotype make 4112E one of the most unique options in the entire offering to enhance the direction of any program!

0132E is another son of the great Basin EXT 45T5, and backed by one of the most eye-catching females to walk the pastures of central Missouri. He has been a true standout from day one, with an arrogant head carriage, athletic build, and flawless structural build. He is big footed, heavy muscled, and offers superior length and capacity from end to end. He boasts a top 10% finish for GridMaster, WW, YW, CEM, MARB, and CW! An elite number profile to accompany his big league phenotype makes him one of the true highlights of the entire event!

A heavily saturate Six Mile pedigree makes this prospect that much more desirable when you consider the individuals that grace his pedigree. Sired by Six Mile Signature 295B, the dark red stud that took the breed by storm commanding \$600+ per unit! On the bottom side, he is backed by the famed Countes cow family and Red Mile Sakic 832S, the sire of the proven sire of champions, Firestorm! Dark red, deep bodied, sound built, and one that consistently catches your eye, a must see on sale day!

451E is another Mission Nexus son that we like a great deal. Moderate in his frame side, thick topped, and square hipped. He is very three-dimensional in his muscle pattern and one that is loaded with volume and capacity from end to end. He was born with an actual BW of 64 lbs. and still weaned off at nearly 600 lbs.! He offers balanced numbers with a chart topping REA figure that ranks him within the elite 2% of the breed. A heifer bull candidate!

The influence of the great Soo Line Annie has graced the Red Angus breed and Maples Oaks Red Angus in nothing but a positive way. Her dominance in production began early and she commanded the respect of all that had the privilege to see her in person. On September 22, the opportunity will present itself to own a direct daughter of the late Soo Line Annie 7249. Sired by the high performance Flying W Xtra 111X, this dark red matron is one that has done a tremendous job in production. She was left open with full intention to flush, and no intention to offer for sale. However, in the event of hosting a production sale in 2018, it was felt fitting that the very best was offered... well, here she is! Her elegant presence, three-dimensional rib shape, and squareness of hip is truly unique. Aside from her phenotypic attributes, this female is backed by lineage that is truly second to none. The opportunity to own a direct descendant of the great Annie in her entirety will be yours!

*Sells in her entirety... Open & ready to flush!*

**LOT 30 - MORA TAYLOR 0167D**  
 0167D is a standout among the fall calving female and one that will catch your attention instantly. She is moderate in her frame size, massive in her rib shape, and offers the low input look that we admire. Her dam is a beautiful uddered female with heavy milk flow, strong fertility, and consistently produces at the top end. She is sired by the Maple Oaks herd sire, Six Mile Beemer 160B and backed by a Trendsetter daughter. Be sure to notice the famed individuals that grace her pedigree, such as MRLA New Era 87Y, the 2013 NWSS Reserve Grand Champion Bull, paternal grandam, Six Mile Lassie 377P, one of the all time greatest donors in the breed. She is without a question the money making kind, and this mating to Red'n Conquest is sure to be a quick return on investment! *PE MORA RED`N X CONQUEST 4141D (RAAA: 3705353) 12/1/17 to 2/27/18. This impressive Night Watch daughter is one that excels from a performance and substance standpoint among the group. She ranks among the top 8% of the breed for WW, top 14% for YW, and top 7% for CW. She is safe to the 795C bull, which is the result of the Six Mile Game Face x Soo Line Annie mating that has proven to be successful. A high anticipated mating here! *AI BRED 11/29/17 BROWN JYJ REDEMPTION Y1334 (RAAA: 1441805) PE MAPLE OAKS GAME FACE 795C (RAAA: 3518772) 12/12/17 to 2/27/18. Due approx 10/22/18.*

LOT 36 - MORA NW SYNCHRONICITY 7137C

**LOT 37 - MORA WAYLON SACRED DANCER**

A featured lot amongst the fall calving group, and there is no denying the elegance, shear power, and brood cow potential that 278C possesses. Sired by Waylon, a herd sire that has done big things for Maple Oaks Red Angus, and backed by a "no miss" cow family, this female has the lineage to be a steady source for income! She ranks among the top 7% for WW, top 12% YW, top 29% ME, and top 7% MARB. Performance, efficiency, and elite carcass...all wrapped into one! If that's not enough to convince you of her elite status, notice that she is confirmed safe to the one and only Annie's Game Face 795C! Just imagine the possibilities that are in her future!

*AI BRED 11/29/17 MAPLE OAKS CREATOR 08C (RAAA: 3518790) PE MAPLE OAKS GAME FACE 795C (RAAA: 3518772) 12/12/17 to 2/27/18. Due early November.*

**LOT 51 - MAPLE OAKS MRS GRANDSLAM 4141**

The Grand Slam progeny have worked extremely well in the Maple Oaks program. 4141E is a prime example of the type and kind of cattle that he is notorious for. Her Brown Redemption dam offers breed-leading figures with the influence of the Soo Line program on the bottom side of her pedigree. Her real world rib shape, sound build and easy fleshing body type suggest her longevity. Study the quality here!

This breathtaking daughter of the great Red Six Mile Sakic is sure to be a favorite among sale attendees. Her attractive silhouette, balanced phenotype and structural integrity are enough to convince even the most critical of her relevance. Study the cow family and you will quickly realize her true potential may come later in life once she enters production, as she is from one of the most dominant cow families in North America. The Windsong cow family needs no introduction to the beef business. This female has a bright future and one that is sure hard to cut loose!

Six Mile Beemer was selected for his maternal strength, proven cow family, and unparalleled quality of build and body type. He has bred true and the progeny continue to speak volumes for the breeding bull that Beemer has become. 556E is a prime example in the flesh! Her Mulberry influenced dam is a tremendous young female that did an excellent job during her freshman season in production, but since she was one of the younger spring born females, it was decided to roll her into the fall group. She offers balanced growth, carcass, and maternal traits on paper solidify the impact that this female is capable of!

POWER in the blood here! This Night Watch daughter known as, 3277E, is backed by the best cow family to ever grace the pastures at Maple Oaks Red Angus, the late Red Soo Line Annie 7249. There is no denying that her impact has been monumental within the program and the breed as a whole. Several of the last direct sons to ever be born will also be offered in the sale on September 22. 3277A, one of Annie's most valuable daughters is the dam of this October born female. The future of this female is bright and the lucky new owner of this female will have a piece of the legacy that her dominant grandam has left behind!

A pedigree is a powerful piece of the puzzle when it comes to breeding cattle. Strong, proven, predictable lineage is something that is critical to the success of any program. Here she is... a truly unique female that we are excited to offer for your appraisal on September 22 in Springfield. Her sire is the great Silveiras Mission Nexus, a bull that has become rare and hard to find semen on. While her dam is the result of the Detour x Annie 7249 mating that could be one of the best matings ever to the great Annie. This beauty is a donor in the making, and one that we felt needed to be in the sale because it is our constant attempt to offer up our very best and most proven blood lines. Another great opportunity to inject the late Annie's legacy into your cowherd!

A great way to lead into the spring bred female division with this powerful daughter of the great PIE One Of A Kind! One Of a Kind has taken the breed by storm since he initially hit the scene as a featured lot in the Pieper Red Angus annual bull sale, when he was selected by Power Plus Genetics of Hobart, OK. Superior muscle shape, structural integrity, and a fundamentally correct structural base support this breed leading AI sire. 503 is a direct daughter of One Of A Kind and backed by a Detour sired daughter that did an excellent job during her rookie season in production. This dashing female was AI bred to the great Six Mile Game Face and exposed to the EXT 45T5 son that walks as Maple Oaks known as Ringo 925D. A true sale feature! **AI BRED 5/30/18 SIX MILE GAME FACE (RAAA: 1447630)**. **PE MAPLE OAKS EXT RINGO 925D (RAAA: 3705303) 6/12/18 to 8/10/18. LIKELY SAFE AI. 70 days bred on 8/10/18.**

3154E is another female that comes from the influence of the great Brown JYJ Redemption. Her dam is from the Summit cow family and is sired by Six Mile Timberlake, a bull that has done a tremendous job in the programs that have utilized his service. Her dam is a functional, wide bodied, powerful made female. She offers a negative BW EPD and spreads to triple digits for a YW figure. **AI BRED 5/30/18 SIX MILE GAME FACE** (RAAA: 1447630). **PE MAPLE OAKS EXT RINGO 925D** (RAAA: 3705303) 6/12/18 to 8/3/18. 45 days bred on 8/10/18.

Kongo - Service Sire to Lot 76

**NON-OWNED SERVICE SIRE**

If a female is bred to a non-owned bull, at the time of natural service exposure, a lease agreement will be required for registration of the resulting calf. The exceptions to this rule are:

- a. If the bull was owned by a member of the family or an employee of the recorded owner of the dam.
- b. If the cow was bought bred from the recorded owner of the service bull.

**OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT**

a. All claims for adjustment or refund must be made in writing either within six months of the sale date or not later than six months after the animal reaches 18 months of age, with the exception of claims involving defects of parentage.

b. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm/ranch of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months trial following the return of the animal in which to prove the animal is a breeder. If at the end of six months the Seller is unable to prove the animal is a breeder, the Seller, at the option of the Buyer, shall replace the animal with another of equal value or refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expenses incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Buyer; except that the Seller shall be responsible for transportation cost in the excess of the distance between the Buyer's farm/ranch and the location where the sale took place. If the Seller proves the animal to be a breeder, it shall be the obligation of the Buyer to take delivery of the animal and pay all expenses incurred for transportation.

c. If a female sold as "safe in calf" proves not to be in-calf, the Buyer may receive service from the bull previously used. If the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm/ranch of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to be a breeding fee or an allocation of the purchase price to any unborn calf). Any expense incurred for transportation shall be the responsibility of the Buyer, except that the Seller shall be responsible for transportation costs in excess of the distance between the Buyer's farm/ranch and the location where the sale took place.

d. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to be a breeder.

e. If a female sold as "open" proves to be with calf, the Buyer may return the animal to the farm/ranch of the Seller prior to calving for a refund of the full purchase price or for replacement with another animal of equal value, whichever is acceptable to the Buyer. It shall be the obligation of the Seller to bear any expense incurred for transportation.

**GENETIC DEFECT AND PARENTAGE GUARANTEE**

a. The parentage of all animals sold by the Seller is guaranteed to the extent that the animal is by the sire and out of the dam that is indicated on its registration papers.

b. All test results confirming an animal's genetic defect status must be disclosed to potential buyers prior to that animal's sale.

c. All cattle have met the RAAA requirements for registration as pertaining to genetic defects. In particular, animals containing a known genetic defect carrier in their two generation pedigree (parent or grandparent) without an intervening tested free animal have been tested for said genetic defect.

d. Refund of the animal's purchase price or replacement with an animal of equivalent value will be considered satisfactory settlement in the case of incorrect parentage or genetic defect information provided at the time of sale.

e. In no event will Seller be liable for any special, incidental, indirect, consequential (including without limitation; lost profits, lost value of progeny, embryos and/or semen, interruption of business), or punitive damages, even if Seller has been advised of the possibility of such loss or damage.

f. The Buyer will notify the Seller in writing immediately upon suspicion or verification that parentage or supplied genetic defect information is in error.

g. In cases of a returned animal: all expenses related to returning the animal to the Seller will be incurred by the Buyer, and the animal being returned must meet health requirements of the Seller's state.

**OWNERSHIP, POSSESSION AND SELLER'S RIGHTS TO FUTURE USE THROUGH FROZEN GENETICS**

a. It is common practice for sellers to retain an ownership interest in animals so that they may later use: bull(s) through artificial insemination, or females through embryo transfer.

i. Therefore, the percentage of ownership that is being offered for sale must be clearly stated in the catalog, sale supplement sheet and/or announced from the auction block.

ii. Likewise, the buyer's rights to possession of the animal(s) and ultimate salvage value of the animal being sold, as well as any semen or future embryo rights retained by the seller must also be stated.

**RIGHTS AND OBLIGATIONS**

These terms and conditions of sale constitute a contract between the Buyer and Seller of each animal. Any subsequent sale or resale of an animal constitutes a separate transaction.

**IDENTIFICATION**

Seller offers each animal with readable tattoos corresponding to its registration.

## Below you will find descriptions of the EPD Data listed in this sale catalog.

**EXPECTED PROGENY DIFFERENCE (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**ACCURACY (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

**HERDBUILDER (HB)**, is a tool developed to aid producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny. Significant influence is placed on the maternal traits of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, YG and growth EPDs also impact the HerdBuilder Index.

**GRIDMASTER (GM)**, the Gridmaster Index is used for the primary goal of maximizing profitability of feeders in the feedyard and on the rail. Marbling, YG and growth EPDs are of primary importance in the GridMaster Index.

**CALVING EASE DIRECT (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**BIRTH WEIGHT EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**WEANING WEIGHT EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**YEARLING WEIGHT EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**MATERNAL MILK EPD (MILK)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**MAINTENANCE ENERGY (ME)**, predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month.

**HEIFER PREGNANCY (HPG)**, predicts the probability of heifers conceiving to calve at two years of age.

**CALVING EASE MATERNAL (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**RED ANGUS' STAYABILITY (STAY)** EPD is a selection tool to improve overall cowherd efficiency through reducing replacement rate. Cows that stay productive, are problem free and last longer mean a larger percentage of heifers can be cash cropped, instead of developed as replacements. STAY predicts the probability of a bull's daughters remaining productive until at least six years of age.

### CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**MARBLING EPD (MARB)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**YIELD GRADE (YG)**, predicts differences in USDA Yield Grade score and is expressed in USDA Yield Grade units.

**CARCASS WEIGHT EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**RIBEYE AREA EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**12TH RIB FAT THICKNESS (FAT)**, predicts differences for carcass fat depth over the 12th rib, as expressed in inches.

## RED ANGUS BREED AVERAGES

HB	GM	CED	BW	WW	YW	Milk	ME	HPG	CEM	Stay	Marb	YG	CW	REA	Fat
