**HERD REDUCTION SALE PART II**

Monday, October 15, 2018 - 1 PM

Brownell, Kansas

## *Sale Schedule*

**Monday, October 15, 2018**

9:00 am - Cattle on display

12:00 pm - Lunch served

**1:00 pm - C-Bar Red Angus Roses Sale**

Friends,

It seems it was only a short time ago that I was describing what our plans with the phase one Roses herd reduction sale was about. Actually it was only about 5 months ago so not all that much has changed except the weather. On Memorial Weekend we started getting rain and I don't think I have ever seen it so green all summer long as it was this year. Our cattle have had a great summer and I am pleased to be able to offer them to you in true grass condition. I think they have had the right conditions to be able to express what they are capable of and I look forward to showing them to everyone.

The Durst's at Cross D Genetics developed the bred heifers through the winter. They AI bred them for us and were shipped a day later where they went straight out into big relatively bare pastures. With only a little hay supplement for 10 days, I am extremely pleased with the breed up on them. We will be selling them straight out of the pasture and will be bringing them to the barn only a couple days before the sale. I invite you to come and inspect them before hand, the pasture they are in is a really pleasant place to see and the heifers are super gentle.

Heifer calves have all been weaned for 45 to 60 days by sale time. Many have been worked with by Jacinda and are ready to go if you desire a show heifer for your youngsters. I encourage you to talk to Jacinda if you have a special interest in finding a super gentle heifer for a beginner, she will be able to steer you in the right direction. Some of the heifers that we believe have great potential, as donors have also been broke so they should be easy to work with for years to come.

We will only be retaining a small number of donors, bred heifers, and heifer calves to continue the C-Bar herd. Sisters, Daughters, and pregnancies from the remaining C-Bar core genetics will be offered in this a sale. Through this small core we plan to offer more opportunity to our young partners to grow and become a bigger part of the C-Bar program. Cindy and I will be able to redirect our energy, time, financial and physical resources to do a better job for our partners and customers as well as take more personal time away from ranch duties.

When I was a young man I worked hard and fast, as I gained experience I worked with a better plan, and still with success I gained a greater focus and worked smarter. When more resources became available I worked harder, as I grew older it became difficult to work hard and fast so I worked longer. Now I've realized that harder, longer, faster is not possible and I must be wiser and share the load.

Sincerely,

*Steve & Cindy Maier*

*Red Angus Enthusiasts,*

Welcome to the C-Bar Red Angus “Roses” Herd Reduction Part II. It is with great enthusiasm that we present to you one of the largest and most elite offerings of Red Angus females to sell in the United States this fall. Steve Maier has spent his lifetime building a cowherd based around the fundamentals of proven cow families, balanced phenotype, breed leading EPD’s, and superior carcass traits. This combined make a well-rounded individual, rather than the constant chase of popular trends and fads that lead to single trait selection. Balanced, comprehensive genetics that have stood the test of time and will continue to generate for their new owners has been the focus of the C-Bar program since its establishment. This is a set of females that are built from the ground up with emphasis on the key traits of economic importance in the cattle business; longevity, fertility, and structurally sound cattle that offer calving ease, real-world performance with visual appeal, and carcass merit.

The philosophy at C-Bar Ranch is that the only way to improve future generations is to test the past and present. With a newly instated feeder calf buy back program, Steve and his family will be able to collect data on their program’s genetics, improve the accuracy of the EPD’s and support their customer base all at the same time. This feeder calf buy back program will allow advancements in the genetics and result in an improved product for the valued customer. An extensive Embryo Transfer program will be focus moving forward, with new cooperators now on board to raise more ET calves than ever before. However, this will create great opportunity for buyers to acquire cattle and genetics that have never been offered up before. Countless bred heifers, young donor candidates in production, and open show heifer/donor prospects will be offered for sale on October 15th that in prior years would be sent to the replacement pasture with no price tag ever being put on them.

With tremendous enthusiasm in the Red Angus breed, growing in numbers and popularity by the day, let this be an avenue to secure breed-leading genetics to advance your program for the future. Many of the females will sell safe AI to the hottest and most proven sires in the breed, while some of these females are also full sisters and maternal sisters to the AI sires.

Consider this your invitation to Brownell, Kansas on October 15th as we offer up the most exciting set of Red Angus genetics that C-Bar has ever offered. Videos of the entire offering will be available compliments of Ryan Heter, in the weeks prior to the sale at DVAuction.com. Please feel free to contact any of the ranch or sale staff if you have questions regarding the offering. We look forward to seeing you on sale day!

Enjoy the cattle,

## SALE LOCATION

For the most accurate directions to the sale please use the following coordinates

Latitude: 38.7258

Longitude: -99.7263.

A302 has been the cover girl for the C-Bar program since Seth Leachman captured this photo. A302 and her impressive first heifer calf in this photo created a stir from the initial time that it was printed and continues to raise questions whenever it is referenced. Competitive on the tan bark would be an understatement when describing the show career of A302, but aside from the success her biggest feat has come in production. A302 has been a prolific embryo producer that has the ability to inject the same poise, symmetry, and dimension into her progeny. This is a true sale highlight and we are excited to offer the opportunity to invest in an embryo package sired by the \$46,000 1/2 Interest Red U-2 Reckoning 149A. A302 offers so much quality and maternal power with breed leading numbers to accompany her overwhelming presence. Textbook udder quality, superb structural integrity, and the fore rib and center body shape that all Red Angus breeders strive for. This could be a huge return on investment for the winning bidder on sale day as the resulting mating very well be the next promotional AI sire or breed leading donor. We are proud to offer our very best in "Roses" Part II as we continue to reduce. Come join us on Monday, October 15th as we celebrate great times in the beef industry and specifically the Red Angus business!

# The Stony Cow Family

A305 and her sister, A302 have been standouts throughout every stage of their lives. As calves they were the ones that constantly drew in the added attention, and as females in the prime of their production careers they continue to be the ones that visitors to the ranch gravitate towards this dynamic duo. A305 is the powerful donor dam of this future pair of matriarchs that are sired by breed legends Andras New Direction and PIE One of A Kind. These females offer unparalleled phenotype, genomics, and are backed by the potent Stony cow line. This pair of females offers tremendous spread from birth to yearling and possess the key traits of uniqueness that their dam exemplifies. New Direction has been a surefire candidate to infuse body mass, dimension, and marbling in an outcross pedigree. PIE One Of A Kind has been a trustworthy sire to inject power and real world performance. This pair of up and coming donor prospects is sure to follow in their dominant donor dam's footsteps.

# The Stony Cow Family

Here is a trio of females are full sisters in blood to the \$60,000 1/2 Interest C-Bar Legit, the high selling bull in the 2018 C-Bar Ranch Bull Sale this past March. Legit was the most elite scanning bull that we have ever raised, and ranks among the top 1% of the breed for Marbling, top 1% for GridMaster, and top 4% for REA. Legit is quickly becoming a carcass icon in the beef industry and we couldn't be more anxious about the potential that he offers to our feeder calf buy back program. These flush sisters from the W909 donor dam are sure to catch your attention. Particularly we admire these females for their unsurpassed volume, depth, and rib capacity, while offering a functional and sound structural base. They are much like their prolific donor dam in terms of the maternal power that they tie together in a feminine and well-balanced phenotype. It is difficult to cut loose of females that offer this much earning potential, carcass merit, and real-world performance, however in the event of scaling back our program to make the day to day tasks more manageable it is a must to let females like this leave. Consider this a true buying opportunity that will allow you to escalate your program to the next level in a single generation!

LOT 11

5L Independence - Sire of Lots 11 & 12

Stony W909 has been a staple in the donor pen and there is no denying the impact that she has had, as well as the matrons that have come before her such as P7500. By combining the chart topping carcass and calving ease focused 5L Independence with the maternal stability and easy fleshing body type of the great Mulberry daughter, W909, it has yielded an exceptional pair of females that will excel in a wide array of different breeding scenarios. The females offer elite genomics with a time-tested cow family to support them.

865F has been a standout since the calves were pulled in from the pasture. This is a female that we feel has a bright future and we are anxious to watch her make an impactful difference for her new owners. She offers an elite numeric profile, a stunning presence of balance and eye-appeal, and does so without sacrificing structural integrity, power, or performance. Her sire is the Canadian bred stud, Reckoning, that was raised in the U-2 program and was sold to the famed 6 Mile Ranch outfit. We anticipate this female to find great success on the tan bark, but whole heartedly believe her true value will come once she enters the production phase of her career. Keep in mind; she is a maternal sister to the \$60,000 1/2 Interest C-Bar Legit!

C-Bar Legit 133E – \$60,000 Maternal Brother to Lots 13-15!

The Independence sire group has taken the breed by storm for the last couple sale seasons because of their versatility, quality, carcass merit, and calving ease genetics. These flush sisters are maternal sisters to C-Bar Legit, the high selling bull in the 2018 spring bull sale selling to Kolle Red Angus of Inez, Texas. They are long sided, attractive made, and offer exceptional number profiles to accompany their phenotypic balance and quality. A must see of prospects here that are capable of generating at the next level!

# The Stony Cow Family

LOT 16

The influence of Mulberry females across the breed is certainly difficult to deny. They offer a certain influence that encompasses a strong maternal aspect that is transmitted to their progeny. W909, W914 and W928 are the prime example of matriarch females within the C-Bar donor pen. Sired by the legendary Mulberry 26P and backed the great Stony P7500 female, this trio of flush sisters have left a lasting impact. Most recently, W914 produced the \$60,000 1/2 Interest C-Bar Legit, the carcass superstar!

Here is a pair of elite heifer calves sired by the \$46,000 1/2 Interest Red U-2 Reckoning. 867F is a younger female that offers a world of quality and show ring potential. Although she is one of the greenest females in the offering, we believe her upside potential may be unmatched when it comes down to it. Superb on her feet and legs, flat shouldered, bold ribbed, and square hiped. This female also has the best disposition of any female in the offering and is a prime candidate for a young person that is looking to begin their career!

Her older full sister, 825F, has the look, balance and symmetry to make a play on the tan bark, but ultimately her value will come in production. Study the added substance of foot, bone, and genuine shape that this female offers. The common denominator between the pair is that regardless of where they end up, we believe they will make a true impact on the program!

818F is without a doubt a true sale highlight! Sired by the great Brown Legend, an own son of the iconic Patricia Rose donor dam, and backed by a hard working two-year old female that is the result of the proven Contour x W909 mating. 818F is the definition of a brood cow in the making! Study the genuine rib shape, body dimension, and substance that she possesses. Her traditional Angus head and neck set further enhances her feminine presence. Her structure is flawless, while her ability to remain so natural and poised on the move does not go unnoticed. Be sure to have this one on your list to look up sale day, we believe she has a BIG future ahead!

Here is another Legend sired female from the Stony cow family. Her dam is another outstanding two-year old that found her way to the donor pen. 602D is a maternal sister to the 2018 Spring Bull Sale high seller, from the W914 cow line. She ranks among the breed elite for GridMaster, CED, BW, and all Carcass figures of importance. This female offers not only an exceptional phenotype; she too boasts breed-leading genomics that are sure to offer her new owner exceptional mating versatility.

What an opportunity to acquire a proven donor dam from the heart of the C-Bar program that has been a consistent and steady producer since she was inducted into the donor pen. W7927 was acquired from the famed Brown program and is a descendent of the \$3 Million L7730, the matriarch of the Abigrace cow family. She has produced top tier bulls and females that have highlighted previous events at the ranch. Prior to her tenure in Brownell, Kansas she produced Brown BLW Olympian C5814, which was a highlight in the 2016 R.A. Brown bull sale for Brown's and B&L Red Angus of Oklahoma. Study the moderate framed, three-dimensional rib shape, and overall substance that this matron offers. She offers an impressive 17 CED, charting in the top 5% of the breed, while offering a top 3% REA, top 12% Marb, and a top 19% Herd Builder. We believe with her phenotype and number profile she possesses exceptional mating flexibility. This female is capable of generating high-end females and bulls alike and we feel she is in the prime of her life with a tremendous amount of upside to offer to her new owner!

What a pair of brood cow prospects here! From the prolific W7927 donor dam, this duo of maternal sisters is backed by the breed's most respected pedigrees. 743E is sired by our purchase from the established Hueftle Cattle Co. program, HXC Insight 5508C. His dam is the prolific 108Y and he is sired by the Westwood One stud. She boasts tremendous spread from a negative BW to triple digits at a year! 756E is sired by New Direction and boasts an impressive set of data as well, with several top 10% rankings for carcass focused numbers. We believe this pair of bred females are backed by a true power cow that has the credentials to move even the most progressive program forward. Pay attention to the versatility that these females can offer!

# The Abigrace Cow Family

Some may argue that this was the most successful flush of females born in the spring of 2017, and we wouldn't dare argue. Sired by the breed leading carcass and calving ease super star, 5L Independence, and backed by a female that needs no introduction to the business, Abigrace T715. T715 is standout member of the tried and true Abigrace cow family that originated with the \$3 Million producing Abigrace L7730! This set of bred females are backed by generational cow power that has stood the test of time and produced countless females and herd sires of influential status within the breed.

LOT 23

LOT 24

There are certainly slight differences in these females, but one thing is for certain, the opportunity that they offer to the new owners on October 15th is unrivaled. There are definite donor caliber females in this offering, and we wish that we had the land resources and time to put them to the test ourselves, but that is just not the case. Consider this a monumental opportunity to have a shot at the next generation of influential females from the Abigrace L7730 cow family

Weaning weight not taken within weaning age parameter, therefore listed as Category 2. Female is red hided.

This duo of females are full sisters to the Pieper Red Angus herd sire that was a past high seller at C-Bar, El Grande. Their dam is the potent T715 donor and sired by the proven El Dorado, that has left behind an exceptional set of females that are making a statement in production for many top producers across the country. Last year a sister to this very pair of females was selected for \$1,750. She was green in her condition, but had the right pieces. Josh Tolbert of Oklahoma identified her true quality and trusted in the potential of the cow family. She was campaigned by the Corns family of Kansas this summer and was a crowd favorite and class winner in one of the toughest divisions, which produced the Reserve Grand Champion Females of the show at the NARAJE in Hutchinson, Kansas. All it took was trusting in the pedigree and seeing the quality of structure that she offered. There will be many instances during this sale where similar situations will occur, be sure to study the pedigrees, the phenotype!

227Z is another direct daughter from the T715 cow family which produced countless influential bulls and females working in top programs across North America. Her sire is the SAV Potency stud that many acclaimed to be the most fault-free and complete individual in the 2011 Schaaf Angus Valley Bull Sale. Potency boasted an impressive 112 WW Ratio, 109 YW Ratio, and 111 REA Ratio with a 16.6 ADJ REA! On top off all of the data, his lineage is backed by the strong and maternal cow family, which traces to the fresh and great phenotype producer LLA Georgina 419. When you consider that this female combines the Abigrace L7730 and Georgina cow families, it becomes a major investment opportunity! AI BRED 4/12/18 TO HXC ALLEGIANCE 5502C (RAAA: 3494126). 878F is sired by Allegiance 5502C, the sire of the \$60,000 C-Bar Legit! Her dam, A329, is a full sister to A326. Sired by SAV Pioneer and backed by the prolific T712 donor who is from the L7730 cow family. This April prospect is sure to be a big league producer like the matrons that have come before her from this very cow family.

# The Abigrace Cow Family

C-Bar Abigrace Y11 - Dam of Lot 32

725E is a dynamic bred heifer that is an own daughter of the late Y11. She is sired by the breed-leading Andras New Direction and from arguably one of the most impressive donor dams to ever grace the pastures of Brownell. She combines a negative BW EPD and spreads to triple digits at a year, while ranking in the top 9% for CW, and top 12% ADG. The upside of this female is unlimited and with her reputable pedigree, proven genotype, and balanced number profile we anticipate she will make her way to the donor pen wherever she is newly employed.

Andras New Direction R240 - Sire of Lot 32

9 Mile Franchise 6305 – The \$105,000 Maternal Brother to Lot 32!

# The Abigrace Cow Family

C-Bar Abigrace 636D  
Dam of Lots 33 & 34

3SCC Domain A163  
Sire of Lots 33A & 33B

Abigrace 636D is a hard working two-year old female that along with her sisters are the future of the C-Bar program. By reducing cow numbers, simplifying the workload, and taking time to focus on our evolving feeder calf buy back we have put a tremendous amount of faith into the young donor arsenal that will supply the cooperator herds with quality matings to be transplanted. 636D is a full sister to the \$105,000 9 Mile Franchise and from the potent Y11 cow family. Her presence much resembles a young Y11; as she possesses phenomenal udder quality, rib shape, and fleshing ability, while boasting off the charts data across the board and remaining feminine, and angular. Here are two packages of three (3) embryos from the up and coming superstar, 636D, which are sired by the dynamic Domain stud that offers breed leading carcass merit. This mating will yield elite carcass cattle that offer real world performance, foot and udder quality, and most impressively, visual eye appeal. Be sure to study the potential that this mating is sure to offer, these embryos are what the future of C-Bar is all about!

From the potent and late Y11 cow line comes an intriguing heifer calf that we believe has the credentials to carry on the family traditions. 822F is the natural heifer calf of the full sister to the \$105,000 9 Mile Franchise 6305. Her elegant dam, 636D, is the red hid full sister to 6305 that is smooth shouldered, bold ribbed, perfect structured, and possesses text book udder quality. She has impressed all of the early visitors to the ranch and we believe will follow in the footsteps of her proven dam. 822F is long sided, bold centered, and built flawlessly at the ground. Her poise and added dimension is nothing short of impressive, especially when coupled with her pedigree of influence and balanced numbers. 822F is a donor in the making and we are anxious to watch her make an impact for her new owners program!

# The Abigrace Cow Family

C-Bar Abigrace 635D  
Dam of Lots 35 & 36

5L Bourne 117-48A  
Sire of Lots 35 & 36

5L Bourne just might offer one of the most impressive phenotypes of any Red Angus bull we've seen. Unsurpassed mass, dimension, thickness, and genuine upper rib shape accompany his carcass merit and calving ease abilities. 635D is another rookie to the donor pen that we struggle to contain excitement about. Much like her sister she is flat shouldered, angular and feminine about her front third, and transitions into a bold, three-dimensional rib cage with the structural integrity that we demand. Longevity is one of the major attributes of the legendary Abigrace cow line. This mating is sure to excite any and all progressive Red Angus enthusiasts!

Carrying the Lot 36A Pregnancy

514C is a Saga sired black-red carrier daughter of the 227Z Potency daughter from the T715 cow family. She boasts impressive growth data to go hand in hand with her carcass figures, and elite pedigree. This female is young and in the prime of her life. Another top brood cow prospect from the famed Abigrace cow family. She is carrying an embryo from the up and coming 635D donor that is a red hided full sister to the \$105,000 9 Mile Franchise 6305! This unsexed pregnancy is sired by the 5L Bourne and sure to offer breed-leading calving ease, low birth, high growth, and superior carcass merit! A quick return on investment here.

# The Abigrace Cow Family

An exciting flush of sisters sired by two proven, breed-leading AI sires makes for tremendous buying opportunity. It is in our very best efforts to offer the best, and this is a prime example of the quality represented on October 15th. W9100 is the Heritage sired daughter of P7905 that is the direct daughter of the legendary L7730. W9100 has done a tremendous job for the C-Bar Ranch program and we firmly believe her to be one of the truly elite members of this notable cow family. Andras New Direction sires the first pair of daughters from W9100. With a balanced number profile, this duo is equipped with the potential to serve as program enhancing brood cow prospects that offer phenotypic excellence, true rib shape, and longevity. The larger flush, which yielded 4 daughters is sired by the own son of the legendary Patricia Rose 102Y, Brown BLW Legend A1965. These females chart equally as impressive numbers with several top percentile rankings. Regardless of which female from these two powerful flushes that your eye prefers, rest assured that the dominant lineage that supports them will continue to shine through in future generations of Red Angus seedstock

# The Abigrace Cow Family

A364 is responsible for producing one of the most decorated bulls in the recent history of the Red Angus breed, C-Bar Blake's Bonanza! Bonanza went on a dominant run on the show road, where he first won his division as a calf at the NWSS, then the next summer was crowned Grand Champion Red Angus Bull at the 2017 Iowa State Fair, making him the 2017 National Champion Red Angus Bull. His success soon didn't end, as he then dominated the field in Minnesota, first winning the title of Grand Champion Red Angus Bull before being named the Supreme Grand Champion Bull Overall Breeds. He capped off his career in January of 2018 when he was slapped Grand Champion Red Angus Bull on "the hill" at the National Western Stock Show in Denver. This victory made him the 2018 National Champion Red Angus Bull. The two-time, back to back National Champion Red Angus bull was then sold to our good friends at Niobrara Red Angus of Nebraska. What a ride! A364 has done it again, and we are proud to offer three maternal sibs and one full sib to the great Bonanza. The Brown BLW Legend stud that needs no introduction sires the maternal sibs to Bonanza. These females are sound, big ribbed, wide centered, and built to last. The full sister to Bonanza reminds us of him at this age, ultra smooth, sound, and impeccably well balanced. We truly believe that A364 is following in the footsteps of her powerful dam, S602. Here is another prime opportunity to add cutting edge genetics to your outfit!

71E is owned by our grandson, Kolton Cunningham and from his young and productive 551C female, that is an own daughter of A361. This female is sired by Independence and boasts impressive numeric values across the board. Another great opportunity to invest in the power of S602 genetics!

Here is another opportunity to inject the influence of the powerful S602 into your programs genetic base through the maternal powerhouse, 209Z! 209Z is the full sister to the popular C-Bar sire, Contour. She is a moderate, wide centered, big pinned, stout made female that is near perfect in her rib shape, depth of heart and flank. The trio of females represent the type and kind of progeny that 209Z has been noted for. 7115E is sired by the time-tested El Dorado and is a female that boasts balanced numbers to accompany her stunning looks and functional structural base. 7202E and 7203E are sired by the outcross carcass super star, Spur Franchise of Garton, the sire of the \$105,000 9 Mile Franchise 6305. The two Franchise daughters boast a top 3% GridMaster, top 6% YG, top 13% CW, and top 1% of the breed for REA! Carcass focused, strong maternal genetics, and quality phenotype... what more could we ask for!

264Z created a stir in May when she was the high selling donor in the May herd reduction sale at \$13,000 selling to Nancy Bowling of Bowling Ranch in Oklahoma. 264Z was admired for her added length of spine, ultra feminine and refined head and neck set, three-dimensional rib shape, and flawless structural build. This calf set of "F" model females are sure to create the same excitement that their mother did this past spring due to their advantages in maternal power and balance. The \$46,000 Reckoning stud, who has been a hit across North America, sires the first three females from 265Z. These three are big ribbed, thick topped, wide based, and have the same poised look of their donor dam. They balanced up on paper to accompany their inherited good looks! The next two are sired by the outcross Australian sire, Marble Bar, who leads the pack down under in four traits of economic value. He is a true calving ease super star that also offers growth, scrotal, and carcass merit. Marble Bar is a complete pedigree outcross to fix feet issues, while enhancing areas such as growth and carcass. Look to these ultra complete 264Z daughters to add the influence of Abigrace!

# The Abigrace Cow Family

411B is a key player in the donor arsenal and her influence has been and will continue to be felt through future C-Bar events. Here is an exciting and large flush of Independence daughters that are sure to turn heads sale day. This same mating yielded the 2017 C-Bar Bull Sale Lot 1 and high seller, C-Bar-RJ Transcend 106D, that was selected by our friends at Niobrara Red Angus. They not only are the cattle from this mating leaders for calving ease and major carcass traits of economic significance, but they too are backed by generations of proven and predictable cow families. The Independence sire group continues to impress across the country and this is a set of females that we feel have bright futures and will contribute a great deal to their new programs.

# The Abigrace Cow Family

C-Bar Abigrace 417B - Dam of Lots 64 - 66

The carcass and performance superstar Spur Franchise of Garton sires this trio of heifer calves. He ranks among the top 1% for Marb, top 1% YG, top 1% REA, top 3% GM, top 14% YG, top 16% WW, top 13% ADG, and top 6% MPG. His elite number profile combined with the maternal influence of the impressive Abigrace T715, tracing to the \$3 Million L7730. T715 is the dam of the Pieper owned El Grande sire. 417B is an up and coming female in the donor pen with a bright future. These females have major potential as trait leading females blending carcass merit, phenotypic appeal, and longevity through the maternal strength they are supported by.

# The Abigrace Cow Family

LOT 69

Z7869 is the Conquest sired direct daughter of the great L7730, arguably one of the most influential females the Red Angus breed has ever seen. This set of daughters from the Z7869 cow family is sure to catch your attention. The bred female by Brown BLW Legend A1965 boasts a balanced number profile, with a top 12% BW, top 14% Marb, and top 3% HPG. She is a high volume female that offers exceptional fleshing ability and dimension. TJS BUF CRK The Legend Z025, is sire of 7357E. He boasts a top 5% GM, top 2% WW, top 2% YW, top 4% ADG, top 6% YG, and top 8% REA. Tremendous growth and carcass merit back 7357E. The September born 7363E is sired by Brown BLW Legend A1965, with the influence of Patricia Rose there is no denying the maternal power that she and her full sister bred female offer. The influence of Z7869 should prove valuable to any program that adds these breeding pieces to their program.

Y8 has been an exceptional producer during her time in producer at C-Bar and R-J Farms. She is an own granddaughter of L7730 who needs no introduction to the Red Angus breed, and sired by HXC Jackhammer 8800U. Her balanced numbers include a sensible BW EPD with a triple digit YW. She too offers a super maternal pedigree both top and bottom side! *AI BRED 12/22/17 TO C-BAR BLAKE'S BONANZA (RAAA: 3517515)*

7362E is a top Evolution daughter from the L7730 cow family. As a direct granddaughter of the maternal legend herself, this female offers the credentials necessary to be a highly productive brood cow. Her sire has been noted for his ability to sire high caliber females that offer excellent udder quality, longevity, and fleshing ability. *Weaning weight not taken within weaning age parameter, therefore listed as Category 2. Female is red hidied.*

Jolene Z243, a true power cow! Some would attest that this female is phenotypically the most impressive female in Brownell, Kansas. . . we wouldn't argue! Unbelievable mass, dimension, and substance, Jolene Z243 is a brood cow! She is moderate framed, sound footed, and built to last. It's hereditary and clearly runs in the family! In the spring of 2017 a bull calf was born, not just any bull calf. He was special. When the fall rolled around we knew he had the potential to be a big league AI sire. He was dubbed "Big River", and he was as unique of a bull that we have ever raised. Big River is the \$50,000 PIE One Of A Kind son that is out of Z243. Now a member of the Genex line-up, Big River continues to make waves across the breed. This bred heifer is a flushmate to Big River and a female that we feel is a true sale highlight. Donor quality build, cow family, and numbers as she ranks among the breed's elite for growth. She has a look that resembled her donor dam at that stage of her life. If you're seriously searching for a female to take your program to the next level, then 714E warrants a hard look! AI BRED 4/18/18 TO 9 MILE FRANCHISE 6305 (RAAA: 3555188). PE 5/1/18-7/31/18 TO C-BAR CREEDENCE 131D (RAA: 3534624). PROBABLE SAFE AI.

8128F and 8137F are spring born prospects from the powerful PIE One Of A Kind x Z243 mating. Full sister to the Genex stud, Big River, this pair of sisters is the type of females that we strive to produce. Elite pedigree, proven cow families, balanced number prole, and phenotypic excellence! They are stout, robust in their rib shape, and loaded with thickness, yet still possess that ultra maternal look of their dam. Although they were born on a cold day and lost the tips of their ears, don't let aesthetics so minuscule distract you from the earning potential that these female offer. You've seen their big sister and she is a good indication of how they will mature, and you have certainly seen their dam.... But just wait till you see the full brothers that will debut in this coming winter.... Get on board with Z243; she is the matron that a program can be built around!

5L Defender has emerged as one of the breed's most elite carcass sires, boasting top percentile rankings that chart him among the most dynamic and proven sires. This female is sired by the carcass oriented and low BW sire, yet backed by the ultra maternal and powerful donor dam, Z243. By combining the quality of each side of her pedigree the results have proven to yield a balanced genetic gem that is capable of enhancing the bottom line of any outfit! AI BRED 4/18/18 TO C-BAR BIG RIVER 119E (RAAA: 3791207). PE 5/1/18-7/31/18 TO C-BAR CREEDENCE 131D (RAA: 3534624). PROBABLE SAFE AI.

5L Defender 560-30Z - Sire of Lot 77

# The Jolene Cow Family

LOT 81

HXC Jaylo LB136  
Dam of Lots 80 - 82

The foundation of the Jaylo, Jolene, and 502R cow family, LB136 is truly a breed icon and is responsible for countless generations of influential Red Angus genetics. The LB136 x B571 mating has resulted in 301N, the dam of ABS sire, HXC Jackhammer, as well as HXC 502R. 502R is the dam of the impressive \$23,000 Patricia Rose at Benji and Lori White's in Oklahoma. Patricia Rose is the dam of Brown BLW Legend, a leading AI sire in the Genex line-up. There is no denying the impact of the LB136 cow family and the legacy that she has created. Here is your opportunity to invest in the future of your breeding program by adding her influence. The first is a daughter of the carcass superstar, Spur Franchise of Garton. 754E ranks in the top 1% for GM, top 15% WW, top 12% YW, top 12% ADG, top 1% Marb, top 1% CW, top 8% YG and top 1% REA. One of the truly elite carcass females in the entire offering! Andras New Direction is the dam of 785E, who also is balanced numerically, with a top 14% GM, top 14% WW, top 10% YW, top 9% ADG, top 5% Marb, and top 3% CW. Much like her contemporary group, she is big ribbed, easy fleshing and offers a strong maternal look. The final of the three sisters is by HXC Allegiance, the Pledge son that is designed to infuse breed leading growth, marbling, and phenotype. She may boast the most impressive data of the sisters as she is in the top 2% GM, top 4% WW, top 5% YW, top 11% ADG, top 1% Marb, and top 2% CW. There is no denying the quality, structural integrity, and pedigree that these females offer. As an added bonus the numeric align and create a truly well rounded breeding piece that can help elevate your program to the next level!

# The Mimi Cow Family

LOT 84

DAMAR Mimi W085 is a household name within the Red Angus breed and beef industry in general. The phenotypically flawless Mulberry daughter from the famed Tarmilly cow family, W085 is responsible for countless National Champions, high sellers, and influential breeding pieces across the country. 458B is the Evolution daughter of W085 that was shown by Autumn Hellerud with great success, winning her division at the National Western Stock Show. She is elegant, attractive, stout boned, big footed, and square hiped. Visitors to the ranch are quick to point out 458 in the pasture due to her captivating presence. Here is a trio of sisters by the multi-trait leader 5L Independence. This set of females is lead off by 8108F, arguably the most elite show heifer prospect we have offered to date. Long fronted, up-headed, neat chested and the right sweep to her lower third, spring to her upper ribcage, and an ultra attractive set to her hip and hind leg. We admire the impact that 458B is beginning to make as she follows in the footsteps of her dominant donor dam, W085. If you're serious about making a plan on the tan bar, then be sure to pack your leather halter, these three deserve to wear one!

5L Independence 560-298Y - Sire of Lots 84 - 86

# The Mimi Cow Family

Damar Mimi W085 – Maternal Granddam of Lots 84-90

Cow families are critical when it comes to advancing a program and we are firm believers in this philosophy. This pair of sisters combines the good from several of the foundation females that help build this program. 404B is the Anticipation sired daughter of the great Mimi W085 that was a highlight in the May sale, Roses Part I. C-Bar Anticipation 101W is the Ole's Oscar sired son of the \$3 Million L7730. There is no denying the power in the blood on the bottom side of the pedigree that backs these females. 757E and 764E are sired by the 5L Defender stud, who has emerged as one of the breed's elite carcass sires. He injects carcass merit, genuine power, rib shape, and capacity into his progeny. These females rank among the elite in the breed for the following traits; top 6% GM, top 4% Marb, top 7% YG, and top 7% Fat. Elite carcass cattle that are backed by the influence of L7730 and W085!

DFRA Tarmily N512 – Maternal Granddam of Lots 91-92  
The dam of the iconic Damar Mimi W085!

LOT 91

What an exciting pair of fall born yearling females from the prolific W085 cow family! Their dam, 404B, was a featured donor in Roses Part I. Sired by Spur Franchise of Garton, these females offer truly elite growth and carcass figures as they chart among the most elite in the breed. Franchise has left behind a set of daughters that exemplify maternal function with superb udder quality, breed leading EPD profiles, carcass merit, longevity, and a strong maternal appearance. His most notable son is the \$105,000 9 Mile Franchise that is working in the Pieper program of Western Nebraska. These females are ready to breed to the bull of your choosing, think of the possibilities and directions one could go!

Offering 3 conventional embryos. Guaranteeing 1 pregnancy if implanted by a certified technician.

LASO Leanna B114R is a new and exciting female in the C-Bar program that was selected from our good friends at Lautenschlager & Sons Red Angus in Washington State. Leanna is the \$60,000 valuation donor dam that has generated countless sons and daughters working in programs across the west, including LASO Bravado at Lee Red Angus in Idaho. Many astute cattlemen have claimed her to be the most impressive Basin Hobo 79E daughter they have ever laid eyes on, we wouldn't argue! This dark red, hug centered, sound built, attractive female is one that we knew was special from the first moment. Leanna boasts an impressive top 5% Herd Builder, top 8% CED, top 6% BW, top 2% Milk, top 5% Stay, and top 11% Marb. A balanced and elite female that is backed by the calving ease and longevity factors of production which are so important to the bottom line of any operation. The double-bred Right Kind stud, Ultimatum, sires the first set of embryos! He is an elite carcass sire that ranks in the top 1% for GM, top 1% WW, top 1% YW, top 4% ADG, top 1% Marb, and top 14% CW! His sire is the 5L Bourne bull that many producers have utilized with great success. This mating combines the strong maternal and calving ease genetics of Leanna with the carcass and growth powerhouse Ultimatum!

Offering 3 conventional embryos. Guaranteeing 1 pregnancy if implanted by a certified technician.

The second set of embryos from the prolific Leanna female are sired by El Dorado, the Anticipation x W914 son that has done an exceptional job in countless programs across the country, including 9 Mile Ranch, Lautenschlager & Sons, and 5L Ranch. He combines the influence of L7730 on the top side with the powerful Stony cow family on the bottom. El Dorado charts in the top 9% for GM, top 19% CED, and top 6% Marb. He is well noted for his ability to sire phenotypically correct cattle with added substance, style, and quality. He has been responsible for high sellers including El Grande, now employed in the Pieper program. This mating is sure to yield exciting results!

5L Independence - Sire of Lot 94

5L Defender - Sire of Lot 95

PIE One of a Kind - Sire of Lot 96

New Direction - Sire of Lot 97

Here is an exciting set of bred females from the \$60,000 valuation donor dam, Leanna B114R. She has been considered the most elite Basin Hobo 79E daughter ever produced by many reputable cattlemen that we respect. Leanna charts among the top 5% in the breed for HB, top 8% CED, top 6% BW, top 2% Milk, top 5% Stay, and top 11% Marb. With her balanced profile and breath taking phenotype her presence in the donor pen has served and a tremendous opportunity to create the balanced Red Angus genetics we are striving to produce for our customer base. The genetics that back these females are well accepted by our bull customer base because the cattle perform both in the pasture and when their calves enter the feedlot. With four exciting sires backing these exciting females there is unlimited earning potential as they enter production. The first female is sired by the carcass and calving ease stud, 5L Independence, and she ranks in the top 15% HB, top 6% CED, top 4% BW, and top 5% Marb. A truly elite number profile backs this female to accompany her phenotypic quality. 5L Defender sires 7103E and she too offers tremendous potential as she charts in the top 9% for CED, top 6% BW, and top 3% for Marb. 7208E is the extra three-dimensional and broody One Of A Kind sired female that offers unmatched performance as she charts top 10% HB, top 8% WW, top 5% YW to accompany her carcass merit with a top 16% for GM and top 10% CW! The mating versatility that she offers is limitless and we believe she will follow in her dam's footsteps. 7209E is the final of the four bred female and we think she is awfully special, being sired by the Andras New Direction, who needs no introduction to the breed. She offers an impressive negative BW figure with a top 15% CED, top 6% CW, and top 19% Marb.

# The Blockana Cow Family

LOT 99

C-Bar Evolution 107Y  
Sire of Lot 99

Blockana 9144 A33 was the high selling bred heifer at the NILE Red Angus sale in 2014, from the famed Feddes program in Montana. 713E is the first of the females and sired by the great C-Bar Evolution 107Y. She is admired for her balanced traits, symmetry and eye appeal. 710E is the sister by 5L Independence and has been a true standout in the entire group of bred females. Study the angulation through her front third, and how she transitions back into her fore rib, center body and flank with the attractive hip and hind leg. Ranking in the top 30% for 8 different traits further enhances her balance from the profile. A top pair of females in the sale from the great Blockana cow family!

Here is a big ribbed, easy fleshing female sired by one of the most popular sires ever produced in the Six Mile program. Signature endured a successful career on the tan bark across North America and is now making his mark as a true breeding bull! Her dam is from the prolific Joplin cow family that made such an impact in the Damar program. Her dam is the C-Bar Anticipation sired female that is a daughter of the great 501L female. An exceptional pedigree backs this young brood cow prospect.

This Brown BLW Legend sired female is backed by the A196 donor dam that is a member of the famed Bonnebell cow family. This heifer calf traces to a maternal granddam that needs no introduction to the Red Angus breed, DFRA Bonnebell N327. A true matriarch that is noted for generating consistently at the highest levels, N327 has produced countless high sellers and embryos from her have commanded as much as \$2,600 per embryo at the National Western. A top prospect with a bright future!

CARRYING ET PREGNANCY IMPLANTED 6/2/18. ESTIMATED DUE DATE 3/11/19.

507C is a full sister to 509C, another top black-red carrier female that highlights this division of the offering. Strong maternal genetics on both sides of her lineage combined with the breed leading number profile make her a sure fire revenue generator. She charts top 13% GM, top 8% WW, top 6% YW, top 7% ADG, top 9% ME, top 14% Marb, top 6% CW, and top 5% REA. This female is carrying an embryo from the 3-star Genex calving ease stud, 3SCC Domain and out of the powerful black-red carrier full sister to the \$105,000 9 Mile Franchise 6305. A surefire way to incorporate the influence of Y11 and advance the maternal, carcass, and performance aspect of your program in a single generation.

# TERMS & CONDITIONS

## **1. BIDDING**

The Auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

## **2. TERMS**

Terms of sale are cash unless satisfactory credit arrangements have been made with Sale Management prior to sale.

## **3. PURCHASER'S RISK**

Each animal becomes the risk of the Buyer as soon as sold, but it shall be the obligation of the Seller to see that animals are fed and cared for free of charge to Buyer, until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

## **4. ANNOUNCEMENTS**

Any changes from information of any kind in this catalog will be announced from the auction box and such announcements shall take precedence.

## **5. HEALTH**

All animals are eligible for interstate shipment, except as otherwise announced. Interstate health papers will be furnished for each animal requiring tuberculosis and brucellosis tests in accordance with Federal Regulations.

## **6. DEFAULT**

In the event the Buyer defaults on payment, the Buyer shall be responsible for all costs, including attorney's costs, incurred by Sale Management or Seller in connection with collecting, or attempting to collect, payment due.

## **8. CONTRACT**

The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

## **7. BREEDING GUARANTEE**

All animals are guaranteed by the seller as outlined in the Red Angus Association of America Code of Ethical Sale Practices.

## **9. LIABILITIES**

All persons who attend the sale do so at their own risk. The seller, the sale manager, and the auction facility assume no liability for accidents that may occur. It is to be clearly understood that the sale manager and their representatives act only as a medium between the buyer and seller.

## **10. SIGHT UNSEEN PURCHASE**

All purchases made on order or over the internet with C-BAR Red Angus are 100% satisfaction guaranteed upon delivery.

## **11. BREEDING INFORMATION**

All of the females were pregnancy checked by embryo technician Dr. Gray of Cross Country Genetics on 9/13/18. Probable Safe AI means just as it implies. Too close to call means that there is potential that the female may be safe to her AI date or the pasture exposure sire. All other expected due dates are listed.
