

44th Annual
NORTH AMERICAN INTERNATIONAL
LIVESTOCK EXPOSITION

THE
Entire Herd Dispersal

OCTOBER 1, 2018 • 1:00 PM
at the farm in New Castle, Kentucky

Sale Schedule

SATURDAY, SEPTEMBER 29TH

Cattle on display at the farm

SUNDAY, SEPTEMBER 30TH

Let the celebration begin! Cattle will be on display at the farm and join us for dinner under the tent at 6:00 pm

MONDAY, OCTOBER 1ST

9:00 am Cattle on display at the farm

11:30 pm Lunch Served

1:00 Tingle Farms Dispersal Sale

We have never attempted any endeavor with the intention of arriving at success by merely going thru the motions. To the contrary, we are always found sliding in sideways in a cloud of smoke from giving 1000% of ourselves.

Paving a new path in our cattle business was no different. The first year we showed at the NAILE after an eight-year break, we took five head. We placed last five times. We didn't get mad or blame the judge, fellow breeders, the weather, the feed, the government, the Farmers Almanac, the water, where we were stalled, the sign of the moon, or who we did or did not know. And no disrespect to the winners of that day; we didn't view the champions as the 'end all' to the cattle industry. In fact, we don't even remember who won. We couldn't see that far from the other end of the line up.

What we did bring away from that show was the realization of true analyzation of our own cattle. We began to list the traits we believed contributed to functional cattle with longevity and were pleasing to the eye.

It is an understatement that we are quite competitive! Anyone that knows us well will confirm that. However, we use the spirit of competition to drive us to improve those traits necessary to propel our herd to the next level of production. While the feeling of your animal being slapped by the judge of the day as a champion is indescribable, that has been a bonus, not the main focus. We have always felt that exhibiting was the best way to market our genetics and build customer relationships. For us, cattle are our living, not a hobby. So to achieve our marketing goals, we made the decision to take large numbers of contemporary groups who exemplify the genetic consistency we worked so hard to achieve. Was it a lot of work? Yes! Was it successful? Again, yes!

Our plan to have some production sales was also achieved. So now on to the next part of the plan. We all agreed from the beginning that when we felt our herd was at its pinnacle, from a business standpoint it would be time to let them go. While we love each and every animal, this is our business and we have treated it as such. There was much discussion to do it last year, but the decision was made to have one more production sale. So it is important for each and every one of you who read this letter to understand that this dispersal was part of a business plan from the very inception. It is something we have not only worked incredibly hard for, but something we are immensely proud of. We are the proudest, however, of the name we have branded with discernment, integrity, leadership and above all, honesty. We are beyond exultant to present to you the herd we have so painstakingly and intentionally built at every level from the ground up.

So on October 1, 2018, we will celebrate! We will celebrate great cattle, accomplished genetics, hard work, a lot of sweat, prudent planning, boundless pride, dedication, risk-taking, bumps-cuts-bruises, life, death, laughter, tears and family time that is priceless.

So come on over and join the celebration!!

Yours,

*Venedia and Joe, Chelsey and Derek
Rylie Jo, Justin, Lizzy, Brady, & Brock*

INNOVATION

— AgMarketing, LLC —

Fellow Simmental Enthusiasts

We invite you to join us in New Castle, Kentucky for the Tingle Farms Complete & Total Dispersal on October 1, 2018. The Tingle family has spent years developing their program into one of the most elite sets of SimGenetic females in North America. The impact that the cow families at Tingle Farms have had is noteworthy, but what is truly exciting is what the females throughout the catalog are capable of doing for their new owners. The influence of some of the most prolific cow families in the business will highlight the offering. Hope Floats, Glimmer, Miss Awe, Elsa, and Ester, are just a select few foundation females that are responsible for countless National Champions, high sellers, and individuals of importance throughout the industry. A program that has been premier breeders and exhibitors on the nation's largest stages, several times... a testament to the operation.

The people behind the cattle have devoted their lives to them and there is no question that it constantly shows through. The entire family has invested countless hours, day after day, into the cattle with the main goal of improving the genetics for the next generations. Although the TINGL prefix will no longer be utilized to register future generations of SimGenetic cattle, the impact that the previous generations will carry a lasting impression on the breed through other progressive programs that these genetics will influence.

We look forward to see you in New Castle, Kentucky on October 1st for the Tingle Farms Complete & Total Dispersal sale. Prior to the sale if you have questions about the offering please feel free to contact the Tingle family or stop in and see for yourself just how deep this offering of females truly is. CCI.Live will broadcast the sale and videos of the offering will be available leading up to sale day.

Enjoy the cattle,

Exit 32, Ramada Inn: (502) 633-9933

Exit 35, Holiday Inn Express: (:502) 647-0109

AIR TRAVEL:

We are 45 minutes from Louisville International Airport/Standiford Field and just over an hour from Cincinnati/Northern Kentucky International Airport.

TERMS AND CONDITIONS:

All of the cattle selling are being sold as-is. Every effort has been made to provide up to date breeding information on all the females selling. For updated EPD's and information please visit www.simmental.org. Announcements made sale day from the block during the sale take precedence over printed material in this catalog. Sexed semen is not 100% accurate; therefore sale management cannot guarantee the gender of resulting calves from the result of any sexed semen purchased in the sale.

LIABILITY:

Neither sale management nor auction personnel assume any liability for accidents that may occur to the animal or genetics after it is sold. All persons who attend the sale do so at their own risk and owner or sale personnel assume no liability for accidents.

SETTLEMENT:

All of the cattle selling must be paid for in full prior to being loaded out or picked up. All Cattle must be loaded out by October 31, 2018. Terms of sale will be cash or check. Buyers will also be responsible for shipping cost for frozen genetics in addition to the cost of their purchase. All foreign transactions are to be settled within 10 business days via bank wire transfer ONLY. All sales are in U.S. dollars. Buyer is responsible for all wiring fees. International and domestic wire instructions available at (530) 913-6418 or graham@innovationagmarketing.com

SALE DAY ANNOUNCEMENTS:

A supplement sheet will be available sale day with updated information, corrections, and additional information. This sheet and any announcements made sale day and from the auction block during the sale will take precedence over printed material associated with this sale. Although every precaution will be taken to protect the safety and comfort of visitors, neither the sales management, auctioneer, or owners assumes any responsibility in the matter and disclaims any liability, legal or otherwise, in the event of accident or lost property.

BIDDING:

All animals will sell to the highest bidder. Any disputed or challenges regarding bids will be settled by the auctioneer, and his decision will be final.

INSURANCE OF PURCHASES AND RISK:

All animals are at the owner's risk and become the property of the buyer as soon as declared sold by the auctioneer. Insurance available through Jamie Secondino-Krieger: (812) 208-0956

HERD HEALTH:

The cattle will be ready for immediate shipment with interstate health papers. All International buyers will be responsible for any and all costs associated with health papers, import papers, and transportation costs to the border or point of export.

SEMEN & EMBRYOS:

Please be sure to bring your semen tank on sale day. All of the semen and embryos in the sale are stored on site and will be available for pick up once settled for at the conclusion of the sale. Any and all shipping and handling charges incurred will be the responsibility of the buyer if the frozen genetics are not picked up on sale day or on location.

ONLINE VIEWING AND BIDDING WILL BE PROVIDED BY

SALE VIDEOS SHOT AND PRODUCED BY

Let the celebration begin with Hope!

Tingle

There are really no words to express the impact Hope has had on our breeding program, and ultimately, our lives. When Joe found her at 10 months old, he envisioned matings that would not only improve our herd; but have a positive influence on the Simmental breed. The maternal forces of JF Ebony's Joy 479P and STF Desa Rae warranted Hope's capacity for transmitting those traits for which she is so famously known. After seeing Hope in person, a breeder told us not to take what he was about to say personally, but in his opinion; our picture of Hope didn't do her justice. He got no argument from us. She is as magnificent as she is different, and as different in her structure as she is consistent in her production. Her length and mass are jaw dropping. The seamless extension of her neck from the top of her shoulder blends into a perfect balance of power and femininity. That is the best description we could muster. Beyond that, you just have to stand next to her to fully appreciate her presence. Her earnings have exceeded any expectations we ever thought possible for a cow. Many of our achievements would not have been possible without Hope. She has built facilities and purchased cattle. She has pinned our place on the map in this industry. For we are just a working farm family, but we have HOPE. We have never taken her or the opportunities she has provided for granted. She has afforded us many lasting relationships for which we are the most grateful. The many hours of study and discussion for her matings and the anticipation of each of them hitting the ground to take off in her footsteps has been nothing short of pure joy. You will see the influence of Hope sprinkled through our herd in countless ways. We could go on and on, but it's time you viewed for yourself. As you study the pedigrees and videos, we think you will agree when you turn the page, that she has outdone herself time and time again.

THE INFLUENCE OF ONE OF THE BREED'S GREATEST...

Hope Floats

THE HOPE FLOATS COW FAMILY

THE HOPE COW FAMILY

LOT 1A - TNGl HOPE'S DESIRE A572

TNGl HOPES DESIRE A572 - RES. DIVISION - 2014 NWSS

TNGl MS DESIRE D200 - LOT 1A DAUGHTER

These 'fantastic flushmates' are part of the most elite contemporary group Hope ever produced. We introduced a dozen of them at the 2013 NAILE. They not only made an impression in the showing, they drew a lot of attention back in the barn. They were consistent and impressive and they were alongside their soon to be 2014 NWSS Champion Bull maternal brother, TNGl Grand Fortune Z467. The more these flushmates matured, the more we liked them. Reluctantly consigning the first one, Design A589, to "The One" Sale in Denver, she was a \$28,000 top seller to Hudson Pines; who then also purchased ½ interest in her flush mate 2014 NWSS Bull Calf Champion brother, Pave The Way A587, that same year. These two were followed by a Back to the Basics \$25,000 high seller, Attraction A585, to the Stehr family of Oklahoma. Charm A583 commanded high selling bred honors at the Field of Dreams sale for \$12,000 to the Trennepohl family. In keeping with family tradition, Desire A572 claimed a high seller honor at The One Sale in Denver with the Manske family of Oklahoma winning the \$26000 bid for ½ interest. Whether you choose 1A, 1B, 1C or 1D, the preparation that leads to inevitable success has been done. So the hardest decision you have to make is not to take one of these girls home, it's WHICH one to take home.

Hopes Influence brings a different element to the table. Made with the most likeness to her dam, Influence sets herself apart with the same length, mass, and beautifully extended front one third. In fact, we have often done a double take in the pasture she is so similar to Hope. A different stroke of genetics lends this great young donor endless possibilities. We have only begun to dip into the depth of her productivity; so we offer her to you with great anticipation of the superior progeny we know she is capable of producing! Raise your hand if you want greatness!

THE SPARKLE COW FAMILY

LOT 2A - TNGL GLIMMER X368

TNGL EVNS INDULGENCE E282 - LOT 2 GRANDDAUGHTER

TNGL UPPER HAND B757 - LOT 2A SON

TNGL RAMBLIN MAN - LOT 2A SON

Lot 2 - What a prolific phenom Sparkle T720 has been. Purchased as a calf, Joe's attention was once again drawn to a heifer by way of her maternal side. Feeling that Sparkle's dam, HPR-GWF Promise Me Purple M088, was ahead of her time, he insisted on purchasing Sparkle T720. So of course, we did. We never looked back. Known for her easy fleshing ability, her progeny are also easy to look at. She had the honor of producing the first Grand Fortune female, TNGL Sparkle B770, who not only succeeded in the show ring, but has also produced winners in her own right. One of T720's most notable females is TNGL Emerald C851 purchased by the Wheatland, Michelson, Serhienko and Gilchrist entities of Canada. She has definitely proven her worth as an elite donor. We couldn't be happier for our friends north of the border! Commercial cattlemen are quite partial to T720 bulls as they have consistently produced low birthweights and added pounds to their end product. Sparkle T720 is not only consistent in her production, she is an overachiever in the income column. And we don't mind overachievers at all! Neither will you.

PE 11/1/17-2/1/18 TO TNGL GRAND FORTUNE Z467 (ASA: 2654876)

Lot 2A - We can state, without hesitation, that Glimmer X368 is one of the most complete cows we have ever owned. After her successful show career, Glimmer X368 settled into the donor pen alongside her dam, Sparkle T720. Not to be outdone, she also started producing the kind we were content in selling. Her Upper Class flushmate progeny, TNGL Obsession B758 and TNGL Upper Hand B757 immediately caught everyone's eye as calves. Hudson Pines purchased 1/2 interest in Obsession at five months old. Case Gabel, Colorado, purchased 1/2 interest in her flushmate, the 2015 Reserve NWSS Junior Bull Calf Champion, Upper Hand. Then add flushmate sibling TNGL Ramblin Man C835, the 2016 NWSS Reserve Junior Bull Calf Champion, and you have a trifecta of skeletal correctness, easy fleshing ability, and tremendous rib and depth combined in a neat package on a great foot structure. Joe and Mary Mellenkamp, Kentucky, invested in 1/2 interest of Glimmer's baldy Bullseye heifer, TNGL Glimmer C860. She knocked one out of the park with her first calf out of Fortune 500, TNGL MKF Shakedown E264. Cary Wiley, Indiana, has found success many times with TNGL Glimmer E313. And the best trait of X368 and her progeny is there is no care involved. They maintain their fleshing ability! We always said Glimmer could exist on air and still put on pounds. What a pleasure she has been. This, our fellow cattlemen/women, is what our industry needs – carefree cattle with a profit!

LOT 2B - TNL OBSESSION B758

LOT 2B - TNL OBSESSION B758

TNL FIXATION E326 - LOT 2B DAUGHTER

Unique. From day one we have used one word to describe Obsession. What a breeding piece!! When Ryan Haefner was looking thru our weanlings he easily targeted Obsession. So different in her makeup and so correct in every aspect at five months old. We had no thought of parting with any of her at that age, but Ryan's eye for quality certainly confirmed our belief in her and her genetically prolific family. Obsession could serve both our and Hudson Pines breeding programs well as we both had vision of offering progeny that were correct from every angle, consistent in their production, and just plain pretty. Ron Gilliland, California, felt the same as he purchased Hudson Pines partnership half at their dispersal. At only four years old, Obsession has a lifetime of fulfilling that vision. What an opportunity to start a breeding program or enhance an existing one.

TNGL A GEMSTONE A527 - LOT 3 DAUGHTER

TNGL A COVER GIRL D217 - LOT 3 DAUGHTER

The celebration of Miss A

'MISS A' In March of 2010 we consigned three heifers to the Tennessee Agribition. Upon arrival we were all on the same page of making the trip to market and sell. However, it was only a short time after set up and prepping the heifers for viewing, that (once again) Joe targeted in on a heifer. In fact, she was a five-month-old heifer consigned by our long time friend, Ross Foxworthy and his partner the Helregel family of Lone Pine Cattle. We had been admirers Ross's China cow family, in particular the outcross pedigree of China Marie. So we came home with a baby who Chelsey tagged as 'Miss A'. As Miss A developed we became even more enthralled with her. She stood second in class only once, which included a show career finale at two years old as 2012 NWSS Champion Cow/Calf Pair with her first calf TNGL Awe Struck Y417. Miss A's progeny have been sale toppers and show stoppers! Her Milestone female, TNGL A Gemstone A527 was purchased as a top seller in the 2014 NAILE sale by Ferguson Show Cattle and Windy Ridge Simmental and they have never looked back. Gemstone has exploded into the Simmental/SimAngus world and is one of the most sought after donors in the breed today. Miss A's impressive 2016 NAILE and 2017 NWSS Bull Calf Champion TNGL Imprint D989 certainly made a name for himself with his foot size and impeccable structure, and the amount of mass and rib shape he effortlessly carries. Yes, Miss A can do it all. She will certainly always have her own special place in our hearts. She will win yours, too.

CARRY AN EMBRYO, IMPLANTED 12/6/17 TNGL TRACK ON B748 (ASA: 2911629) x E/T ESTER 020 (ASA: 2783736) NON-SEXED PREGNANCY DUE 9/14/18 **Owned with Foxworthy.**
Offering 1/2 Embryo Interest and no possession

And yes, you will be Awe Struck when you see this girl. Miss A did it right on her very first calf! She was so impressive as a calf that Ross Foxworthy invested 1/2 interest back into this heifer. We certainly have enjoyed this trip with Ross. A successful show career isn't Awe Struck's only claim to fame. She is rivaling her dam's production as a donor. There is no question of Awe Struck's profitability with her progeny always bringing a premium. She transmits her tremendous power with style every time. Without a doubt, her Grand Fortune son, TNGL OBR Fortune 500C, now owned by Ty Warren, is making his mark across the board! An investment in proven genetics and profit is a no brainer. Grab this opportunity to leave your customers completely "Awe Struck".

LOT 3B - TNGL A DELIGHT C852 - 2016 SIMMENTAL BREEDERS SWEEPSTAKES 3RD OVERALL PUREBRED FEMALE

This Miss A 'C' model has been nothing but a delight. With another successful show career added to the Miss A legacy, Delight's production is also following in her famous dam's footsteps. This youngster deserves your utmost attention. If you are looking for a complete package, we believe you will find it right here. Blessed with structural correctness from every standpoint and the maternal strength to carry her through any program; Delight is an open book. You can write her future any way you like. Better pay attention on sale day!

THE ELSA COW FAMILY

LOT 4 - GCF MISS ELSA W11

The celebration of Elsa

Elsa has methodically stamped out great progeny from every mating. Her females possess a look that people are just drawn to. Their attractiveness is compiled of a tremendous hip structure, put together with an impressive rib shape, a front 1/3 that is powerful enough to carry their hip, but blends smoothly throughout. Sounds great? It is! It is no surprise her offspring top sales and showrings alike. Her sons are just as impressive. Jock and Brenda Beeson of Western Cattle Source, Nebraska, recognized all those qualities when they purchased Elsa's 2015 NWSS Reserve Sr Bull Calf Champion, TNGL Track On B748. What an impact he has made. His mating with Miss A produced Imprint D989 and with Sparkle B770 for Kayla Jackson's Indulgence E282 show winner in Tn., only to name a couple. Elsa was certainly a wise choice for us and she will do the same for you.

THE ESTER COW FAMILY

LOT 5 - E/T ESTER 020

The celebration of Ester

We suppose you have noticed by now that we don't do ordinary. Purchased as a calf from Cole Elrod and Alex Tolbert, Ester is anything but ordinary. What a specimen she is to study. You will need to view her video more than once to capture her total package. And the best part? She transmits all of it every time in every mating. She is so versatile. She is capable of producing fancy show winners or soggy, easy fleshing, low birthweight, pound producing herd bulls that commercial cattlemen drool over. And as an easy keeper herself, she is not a strain on the budget. Just put her in the pasture and she will take care of the rest. She is a profit-making machine! Everyone needs one of these, so get your bidding nod ready!

\$\$\$\$ Dollar signs should be the only footnote required for 421Z. She has turned a profit every year, and isn't that the name of the game? This Cut Above cow has just flat produced. Her most recent accomplishment, TNGL Reflection D918, attracted a crowd of admirers this past January in Denver. His first calves have hit the ground and we are beyond excited for you to see them. We took the leap of faith on 421Z as a heifer and have proven her worth as a donor. Should be pretty easy from this point on – all you need to do is raise your hand.

Lot 8 - We partnered with our friends at Hudson Pines on this Gabby/Uprising heifer as we both saw a need to introduce some new genetics to both programs. This young donor prospect certainly has all the attributes to flourish at any level in any herd. Moore Land and Cattle felt the same need as they purchased Hudson Pines partnership interest at their dispersal. Enchantress' youth makes her as attractive as you could hope for to start or be a replacement in the donor pen. Pay attention to this one!

Lot 10 - Lucille has been able to produce progeny that have both balance and style. And as we all know, this ability is one that is not always predictable. Lucille has carried this forward time and time again; so if you are looking for style, balance, symmetry and productivity, then turn your attention to Lucille and raise your hand.

lot 9A & 9B - These Red Lady 300W flushmates are at the top of the list of our favorites. Hence, they moved to our donor pen and have certainly met our expectations. Their production of solid males and females are the type you want to keep as herd bulls and cow herd replacements. A third flushmate, TNGL Proud Lady A524, was purchased as a calf by Lindsay Mitchell of Ontario, Canada. We couldn't be more proud of the job she is doing for Lindsay. Her flushmate sisters will do the same for you. All you have to do is buy and enjoy.

THE FALL CALVING *Females*

The Fall Calving division is one to pay close attention to. Although less in numbers, there is no denying the depth that this set of females offers. They are a young set of cows that are in great condition and doing it on their own with nothing more than the green grass that we have been blessed with this summer. These females are backed by generations of fault free, functional females. This meaning just what it implies, this set of cows are expected to calve unassisted, breed back, and maintain optimum flesh all while raising a big stout calf. You will notice a handful of females in this group are carrying ET pregnancies from top matings directly from the heart of the extensive embryo transfer program. These females were not meant to be sacrificed as recip dam's, but rather happened to be in sync with fresh transfers dates and we felt the need to have the opportunity to implant as many proven matings as we could, even if that meant sitting some of these young females out a year when it came to raising a natural calf of their own. When we lost a lease in December of 2016 we also lost the luxury of larger numbers of commercial recip cows readily available. We have always believed in the genetics and know they are capable of raising heavy, stout calves!

Udder quality and structural correctness has been a prerequisite to be retained in herd at Tingle Farms. The young cows in this particular group have the capabilities to be utilized at the highest level and we are ecstatic that they will have a positive impact on the new programs that attain the privilege to own these great females in the prime of their lives. Take your pick, we believe in these females and the genetics that stand behind them!

THE **SPRING CALVING** *Females*

The Spring Calving females are the largest section within this exciting offering that has been the backbone of the cowherd since its installment in the late 1980's. They are stout made, wide bodied, three-dimensional, and built to last. We urge you to study the pedigrees of the females and the cow families that support them. Many will trace to females of significance within the breed. There will be a select few Angus females throughout the offering that were hand selected from top programs across North America that we felt would be valuable additions to our SimGenetic sector of creating elite percentage cattle.

There are a few later calving females that have May calves that will sell at side. These females were not exposed back to a bull, being that they had fallen outside our spring calving window and were slated to be in our fall herd. Although selling open, you'll notice the quality of the calves they these females are nursing and what they are capable of producing. Take this opportunity to roll them into a progressive fall calving program; you'll be satisfied with the results!

In New Castle, Kentucky there is no denying that we believe in our genetics. We are proud of the type and kind of cattle that we have produced over the years. Sure, we know that good bulls come from good cows, but we truly believe great herd sires come from proven cow families. Many of the AI and Natural Service sires that we utilized carry the TNGL prefix. Imprint, Grand Fortune, Reflection, Ramblin Man, Fortune 500, and Shakedown are the bulls most heavily utilized as service sires across the offering. The reason we used these bulls is simple... their mothers, grandmothers, and sisters. The genotype, phenotype, and structural integrity are represented throughout this sire battery. Several of the dams of these herd bulls will sell, along with countless full and maternal sisters that will come through the ring on October 1, 2018. This is a true opportunity to acquire rock solid genetics that are carrying the service of herd building genetics!

IDEAL
PRODUCTIONS
www.idealvideoproductions.com

Ideal Video Productions was hired to professionally video all of the sale cattle. Hunter Soape came to New Castle, Kentucky from August 31 to September 1 to video the Donors, Spring Bred Females, and Fall Bred Females. The Open Heifers are being videoed on September 22. The videos will be available for viewing on the Ideal Video Productions website in lot order.

SELLS OPEN WITH A ET BULL CALF AT SIDE

ELITE ET CALVES AT SIDE OUT OF

Primo x Hope Floats

Hope Floats has been the cornerstone of the Tingle program since Joe made the decision to purchase Hope as a heifer calf several years ago. During her tenure in the Tingle program, Hope was responsible for National Champion bulls and females, high sellers, and countless herd impacting individuals of influence that have wrote their own chapters in the history books. Hope was the \$38,000 1/2 interest donor in the 2016 "Pave The Way" sale and boasted a track record of average over \$22,000 on her female progeny sold. This is a tremendous opportunity to purchase an own son or daughter of the legendary "Hope Floats" female sired by the Angus sensation, Colburn Primo. The two heifer calves are ultra sleek made, flawless built, and the kind that will excel on the tan bark. The bull calf is stout made, thick topped, and backed by generations of powerful cow families. A rare and unique opportunity that can only be found in a dispersal sale!

THE OPEN HEIFER *Calves*

Throughout the course of the last several years there has been many heifer calves that have gone through this show barn that have left and went on to their new owners to find tremendous success at every level. Many of the top show heifer prospects have originated from top cow families and continued to make an impact on the operations that selected them for their combined phenotype and genetic make up. Sure, there has been a fair share of 5-figure females that carry the TNGL prefix that have found purple, entered the donor pen, and produced high sellers for the programs that selected them. We're proud of those females for the influence that they have been able to have, but keep in mind there has been more females that brought \$3,500 to \$7,500 that have won their class or division at the NAILE, the NWSS, a State show, a Regional show, the AJSA Summer Classic, and State Fairs across the country.

Accurate representation matters when it comes to making a highly successful show heifer, especially as a bred and we firmly stand behind this theory. These females are being offered sooner than we ever have. Realize that although some are January and February born, there will be a fair share of later born females that are awfully green, but have the same or more potential as some of the truly elite females we have EVER offered. Study the potential, the pedigrees, and the future that these girls offer. We whole-heartedly believe there are Nationally complete show heifers and breed leading donor prospects in this pen of cattle. You'll also notice the large number of Grand Fortune daughters and his influence that saturate the Open heifer calf offering. They are simply a younger year model of the top-notch fall and spring bred females that have created a stir.

We didn't picture because of catalog deadlines and felt that the video representation of these females will speak volumes. Videos are scheduled for September 22 on the open females and will be posted the week leading up to the sale. Thank you to all of the families that have either led a Tingle Farms open or selected an open prospect to serve as the foundation-breeding piece in their respective programs. We are excited to watch this set of females write their own chapter.

THE GENETICS *Selection*

Through extensive Embryo Transfer and Artificial Insemination our donor pen and herd sire battery have been the most integral part of program and enabled us to capitalize, build, and perfect the foundation of our cow herd. You will notice many of the young females throughout the fall and spring herds are the results of this segment of our program. The embryos in this offering are proven and from the most consistent donor dams. Take notice that there are full sib and maternal sib matings to Denver and Louisville Champions, high sellers, and of course individuals of influence within the breed. Additionally, the pregnancies in this division will offer exceptional opportunity for a quick return on investment!

THE HERDSIRE PROSPECT

LOT A - TNGl MKF SHAKEDOWN E264

Shakedown is a true product of the program, with multiple generations of Tingle Farms influential individuals supporting his impressive phenotype. His sire is the calving ease specialist, TNGl OBR Fortune 500C, who is working in the OBR program in Texas for our good friend Ty Warren. His Grandsire is a past Denver Champion and easily the most influential sire that was ever produced in New Castle, Kentucky! On the bottom side of his pedigree the lineage is just as strong, as his dam is the young and productive Glimmer C860 that is a highlight of this very offering. His maternal granddam, also a role model donor female that has been a constant producer, and finally his maternal great granddam is none other than the great Sparkle, one of the most prolific females ever utilized in the donor pen and quite possibly one of the highest dollar generating females that will sell on October 1st. Study the pedigree that this +13 CED superstar offers, combined with a 130 API. Balanced number profile, extreme quality, and all combined in a well balanced, calving ease package that cannot be denied! Shakedown is a true herd sire prospect and we are confident he will make a substantial impact on whatever program is the winning bidder!
