Dear Cattle Friends,

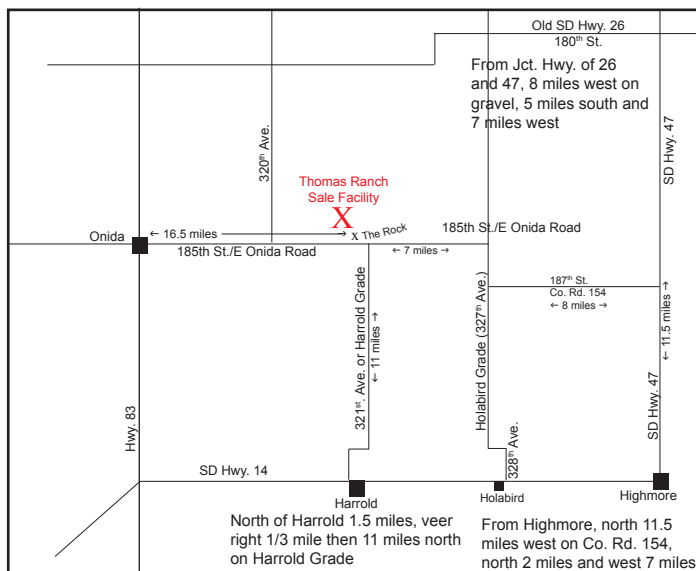

On behalf of all of us here at Thomas Ranch we would like to welcome you to our 48th Annual Production Sale. We would like to thank you for taking the time to look through our sale offering. Anyone who puts on a sale knows the countless hours and hands that it takes to put it all together. Without the help from our families, friends, employees and customers none of this would be a reality. As producers we have a great responsibility to manage the land and tend to the livestock. As all of you know it is a dynamic task that can be extremely rewarding and overwhelming as 2019 proved to all of us.

2020 rings in a new decade and I think its safe to say we are all ready for some prosperity for cattlemen and women in America. Beef is the number one protein of choice in this world. It's been proven that when folks all over the world have more disposable income the first purchase they buy is better protein (beef). The USA has the best farmers and ranchers in the world and when given a choice of beef, consumers all over the world choose American Beef.

This new decade will bring its own set of challenges. As we are going to print with this catalog the world is experiencing COVID-19. Sporting events, school closings, businesses closing or employees working from home. The world has been changed but we all know that this too shall pass and we Americans will come out stronger and better for it. We just need to hold on and see this through.

The bulls and heifers are all developed here at the ranch under the guidance of Dr. Dan Herold from Hubbard Feeds. We strive to grow these cattle and not fatten them. Our goal is to have cattle with sound feet, longevity and to be profitable for our customers. They are fed a 50-meg ration with the goal of gaining 3 to 3.25 pounds per day. Whether you are looking for calving ease bulls or power herd bulls to add weight at weaning we have the bulls to fit your needs in each of the breeds. There are many 1/2, 3/4 and full brothers. Sort through the bulls and their data and find what's good for your cowherd. If we can help you in your selections, don't hesitate to give us a call.

We will again be doing a video auction with CCI.LIVE. Videos will be available on all bulls by April 1, 2020. Thomas Ranch guarantees sight unseen purchases, volume discounts and an unconditional 1st breeding season guarantee. Angus bulls sell at 1:00 followed by Sim-Angus, Red Angus, Charolais and the heifers. Our goal here at Thomas ranch is to provide our customers with long lasting breeding bulls and/or heifers that you can be proud of.

The Thomas Family Welcomes You.

**FERTILITY TESTING** - All bulls will have passed a fertility test before delivery. Any bull picked up sale day is guaranteed to pass a semen test. Thomas Ranch will pay for semen test costs on any bulls hauled sale day.. Scrotal measurements will be available sale day.

**HEALTH** - All bulls and heifers were preconditioned in August with Bovishield Gold, Vision 7/Somnus and poured with Ivermectin. Boostered at weaning with Bovishield Gold, Soludoze with 7 way, somnus, C&D type ACE and mycoplasma and repoured with Ivermectin. Repoured in December with Clean Up and injectable Dextomax.

Heifers were also given a Bovishield 5 VL5. They were repoured in March with CleanUp.

Bulls will be furnished with interstate health papers as needed  
All registered Angus bulls are AM, NH, CA, OS and DD FREE by DNA test or pedigree unless noted in the catalog. All registered Red Angus bulls are OS FREE by DNA test or pedigree.

**DELIVERY** - Thomas Ranch will offer free delivery on bulls beginning May 1 to South Dakota and surrounding states. A \$50 bill will be given for each bull hauled between April 14 through April 20, 2020. After May 1, 2020 bulls left at the ranch will receive a \$3 per day feed charge. Bulls left between the sale and May 1 will be fed free of charge.

Can't attend  
the auction -  
we've got  
you covered!

## General Sale Information

### MOTELS

#### Pierre

Best Western Ramkota .....	605/224-6877
Kelly Inn .....	605/224-4140
Governor's Inn .....	605/224-4200
Comfort Inn.....	605/224-0377

**EPDs & Ultrasound** - EPDs printed in this catalog for the Angus offering were current as of March 6, 2020. Ultrasound information (%IMF & REA) are adjusted numbers. Fat is an actual measurement.

**VIDEOS** - Videos will be available at [www.thomasranchcattle.com](http://www.thomasranchcattle.com) and on CCI.live around April 1, 2020. Videos done by Focus Marketing Group.

**LUNCH** - Please come and enjoy a complimentary noon lunch at the sale facility Tuesday, April 14, starting at 11:30 a.m.

**TERMS** - The terms of the sale are cash or check payable at the sale facility unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released or transferred.

**ORDER BIDS** - Buyers unable to be present may contact us for assistance. Bulls sent on order by management will be guaranteed to meet the buyer's acceptance. Buyers may also contact the Auctioneers or ringmen for assistance or register through CCI.live

**ANNOUNCEMENTS** - Errors discovered in the catalog will be corrected by announcements from the auction block at sale time, and such corrections will take precedence over the printed material in the catalog.

**VOLUME DISCOUNTS** - 5% on 5 or more bulls purchased, and 10% for 10 or more bulls purchased. Any credits will be deducted before volume discounts are figured.

**BREEDER'S BULL GUARANTEE** - Bulls selling for more than \$3000 are guaranteed for 90 days from first turnout against breeding injury. If a replacement bull is available, he will be provided. If a replacement bull is not available, credit will be given in next year's Thomas Ranch Bull Sale. Credit will be for the purchase price less volume discounts and salvage value of the injured bull to be used for the purchase of one replacement bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made prior to Oct. 1, 2020. This is not a mortality insurance policy.

**INSURANCE** - Mortality insurance will be available sale day through Martin-Trudeau Insurance. Any deviations from the above statement will be worked out between the buyer and Thomas Ranch.

**ACCIDENTS AND LIABILITIES** - All persons attend the sale at their own risk. The seller and sales management assume no liability, legal or otherwise, for any accidents occurring in, on, or about the premises.

Getting signed up is easy.

1. Visit the website at [www.cci.live](http://www.cci.live). If you are a first time user click on create account. Remember to keep your email and password. If you forget your password, click the reset password button.
2. After you create an account, you can request buying or bidding credentials. Upon approval you will receive a text from us saying that you have been approved by CCI.live. You are approved to buy and bid at any CCI.live auction unless further credential are requested by a specific auction.
3. After you have been approved, getting a buyer number for a sale is very simple. You just visit the sale page for that auction and click the BID ONLINE button. Then there will be a GET BUYER NUMBER button that will automatically sign you in for that auction and give you a number.
4. Use the CCI.live app on your phone, tablet or desktop computer. It is responsive and works just as well on any device provided you have good internet service.

# INNOVATION

AgMarketing, LLC

The privilege is all ours to welcome you to the annual bull sale at Thomas Ranch. For decades this ranch and the family behind it has supplied the high plains region and states beyond with desirable seedstock and commercial herdsires that have went to the most progressive cattlemen and ranchers in the business. The cattle offered between the covers of this book also represent the next generation of production females for the ranch that will carry out the same duty as the donor dams and natural calving females that raised them.

The Angus offering is comprised of the most current and proven sires in the breed. Many of these sires represent true spread genetics with either double digit CED or negative BW and spread to trait leading weaning or yearling predictors with exceptional carcass merit and weight holding indexes. This Angus roster includes the sire of the recent sale topping \$201,000 Krebs Ranch high seller, KR Rally. The Rally cattle are met with size, substance and true ranching value on physical appraisal but yet are still competitive on paper. If one has the opportunity to evaluate the Angus dams that back the Angus and Sim-Angus herd sires, they would find the reason why consistency thrives in this offering on the black hideds bulls. The Simgenetic cattle have also been generated by true spread sires that are substantially proven industry wide. They are met with equal performance indicators and moderate birth weights like their Angus contemporaries. The heterosis value is strong in the Simmental and Sim-Angus bulls and it's needed to compliment your ranch's bottom line. Both breed demographics are saturated with proven cow families and long-haul genetics top and bottom.

Charolais would be the breed most synonymously affiliated with the TR success story. They have built this program on physical appraisal and selected the most elite cows throughout the evolution of the breed over the past several decades. Thomas Ranch has maintained a dominant presence in the breed and a reputation for bar raising quality. The productive white hideds cattle have dominantly been selected for type, kind, skeletal integrity, fertility and udder quality within the wire that distinguishes the pastures on the ranch. Basic, fundamental ranching evaluation with stress on structure, balance and productivity developed this segment of the program, hence the simple reason of their substantial value to many that have invested over the years. The sire lineup on the Charolais bulls are unrivaled in terms of quality and merit like the past high selling Carbon Copy whose sons were a big feature at the recent Doll Ranch bull sale. These cattle are flexible and versatile at every angle.

Red Angus cattle have walked the pastures here for some time with this segment of the program designed with impeccable evaluation of type and quality. Cow families like Cita and many other high profile, breed leading donor females highlight both sides of the lineage for the TR Red Program. Several Red Angus bulls have left the ranch and went on to be high impact sires for their new owners like Red Sky and Red Zone that earned their fame and tenure in the western Kansas program known as Smoky Y. Sires like Damar Next have had a notable impact here as well as the other studs that impact the top side of the pedigrees in this offering. Like the other 3 breeds, these red cattle have value to those that desire the benefits of the Red hideds cousin to the black hideds industry dominator.

Consider this your open ended invitation to the Annual Bull Event in Harrold, South Dakota. Integrity, reputation, experience and grit continue to build the ranch and these bulls have done and will continue to do the same for those of you that have invested and plan to invest in the Thomas Ranch program. If you like good cattle, great people and the beef business, you will be seen April 14th in South Dakota.

**You Get Extra Performance with Thomas Ranch Genetics  
Here's How This Year's Thomas Ranch Angus Offering Stacks Up!**

	USA Breed Average EPDs	2020 Thomas Ranch Offering Average EPDs
Calving Ease Direct EPD	6	<b>7</b>
Birth Weight EPD	1.2	<b>1.4</b>
Weaning Weight EPD	54	<b>68</b>
Yearling Weight EPD	96	<b>115</b>
Milk EPD	25	<b>26</b>
Marbling EPD	0.54	<b>.45</b>
RibEye EPD	0.55	<b>.44</b>
\$M	56	<b>59</b>
\$W	53	<b>65</b>
\$F	83	<b>88</b>
\$B	129	<b>129.4</b>
\$C	222	<b>226</b>

You Will Notice New EPDs This Year as Well! Here's What They Mean

**Maternal Weaned Calf Value (\$M)** – An index, expressed in dollars per head, that helps predict profitability from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Traits included are calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight and foot quality.

**Weaned Calf Value (\$W)** – An index, expressed in dollars per head, that helps predict profitability from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Traits included are birth weight, weaning weight, milk and mature cow size.

**Feedlot Value (\$F)** – An index, expressed in dollars per head, to help predict profitability in the feedlot. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade. Traits contributing directly to the index are yearling weight (gain,) carcass weight and feed efficiency.

**Beef Value (\$B)** - An index expressed in dollars per carcass, to help predict profitability for postweaning and carcass traits. Traits included are yearling weight, dry-mater intake, marbling, carcass weight, ribeye area and fat.

**Combined Value (\$C)** – An index, expressed in dollars per head, includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. Remaining cull heifers and steer progeny are assumed to be sent to the feedlot. EPDs directly influencing a combined index are Calving ease direct and maternal, weaning weight, yearling weight, maternal milk, heifer pregnancy and docility.

► KR Rally was our \$60,000 joint selection from the 2018 Krebs Ranch bull sale with RBM Livestock. We sought the extra power, length and substance that he could offer both our programs. He was the lead off stud in that 2018 Reserve Pen of 3 Bulls in Denver and one of his first sons, KR Storm, just commanded a \$201,000 hammer price and in turn was the high seller of the 2020 edition of the Krebs Ranch Bull Sale. That accomplishment in itself is another reason this sire group needs to be utilized in the business. This sire group is very representative of the top side of their pedigrees coming from Rally that's still a trait leader for WW and YW performance values and holds his own in the top 20% of the breed for \$B and top 25% of the breed for YW. A true rancher's sire group that command attention to those that rely on shear weight and substance.

▶ The single most popular AI sire in the Angus breed for a multitude of years. He has ranked in the top 10 most heavily used Angus bulls over the last four years with inventory always in short supply. 1682 is the proven sire of choice for a dead on, proven combination of calving ease and performance. He transmits an insane amount of body and muscle shape to his progeny and his daughters continue to thrive towards the top end of their contemporaries in production. Payweight 1682 will go down in industry history as one of the most well rounded, and highly documented bulls in history. He's simply the king of efficiency, maternal ability and total profit.

► The production history offered by his dam and maternal granddam will only enhance the daughters that we keep and that you choose to retain. His ability to add scrotal circumference only enhances fertility in both bull and female progeny. The length, scale, substance and documented performance lead us to utilize this sire in order to pass the advantages of growth and carcass merit along to our commercial base.

► Quite possibly the most proven son of the breed influencing Summitcrest Complete with his own page in Angus history for siring the \$190,000 Casino Bomber. We like the 002's for their length, extension and rancher appeal for shape and center. These cattle are proven for direct calving ease, low birth with extreme vigor and gainability. As a whole this sire group has done everything we expected and more. Proven and reliable performance and value added stock.

▶ Substantial power and performance values lead us to this stud. A sire that commands a top 1% ranking for both WW and YW that would be supported by an 862 pound WW with a WR of 114, but yet one that continued that pace to a year with a YR of 115. Real world facts, real world merit, with the real world scale squashing pay days in mind. These cattle are the kind.

*Sire of Lots 61 - 63*

DL Sonic 2086 was our selection from the 2018 Lewis Brothers Angus Annual Bull Sale. A real-world spread bull that ranks top 25% of the breed for CED, top 15% BW, top 4% WW, top 4% YW, top 20% Marb and top 10% \$W. An own grandson of the great KG Solution 0018 and backed by the maternal influence of SAV Angus Valley 1867 and SAV Final Answer 0035. The Sonic sons have proven to be moderate birth weight bulls that offer tremendous performance and practicality.

We have selected multiple bulls to utilize within that offer a balanced approach from birth to weaning and beyond. Monumental would echo that phrase with a dominant marbling, trait leading post in the top 2% of the breed followed up with some incredible indexes. We admire the 2017 "People's Choice" Champion of the 2017 Denver Carload Show for his extra length of body while moving with added athleticism and width. The Monumental sired progeny have been well received as they dominate the highlight reel of many production sales across the country. Value added, carcass and performance herd bulls sell within this group.

Weaning Weight EPD	67.8	<b>72.6</b>
Yearling Weight EPD	101	<b>108</b>
Milk EPD	21.6	<b>21.3</b>
Maternal Weaning Weight EPD	55.6	<b>57.6</b>
Marbling EPD	0.01	<b>.31</b>
Back Fat EPD	-0.11	<b>-0.06</b>
RibEye EPD	0.82	<b>.81</b>
All Purpose Index (API)	123.8	<b>123.8</b>
Terminal Index (TI)	68.9	<b>74.9</b>

**SIMMENTAL GUIDE TO EPDS**

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs the difference between two sire's EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15 pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed.

**\$Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. **All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. Using API and TI: First, determine which index to use; if you're keeping replacement use API, if not, TI. Then, just as with EPDs, zero in on the unit differences between bulls. The difference can be used to determine how much a bull is worth compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years. A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

► Profit is the \$400,000 record selling bull at the 2015 Hartman Bull Sale. He's Pilgrim's greatest son. His dam, Panarama 204Z, is one of Broker's very best daughters. The Profit sire group is sure to add substance, quality, and real-world performance to any calf crop. There is no denying the impact that Profit sons have made on the industry, with countless sons being sent to stud. The daughters have continued to impress through all stages of production, offering excellent udder quality. We have used TR MR Profit 6726D ET with great success and continue to be impressed with the heterosis that this sire line can inject into a calf crop. Pounds pay, and this set of bulls is sure to add to your operation's bottom line.

**RED ANGUS GUIDE TO EPDS**

**Red Angus Bulls**

**HerdBuilder (HB)** A maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)

**GridMaster (GM)** A terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)

**Calving Ease Direct (CED)** Predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**Birth Weight (BW)** Predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**Weaning Weight (WW)** Predicts differences in 205-day weaning weight (Pounds/High Value)

**Yearling Weight (YW)** Predicts differences in 365-day yearling weight. (Pounds/High Value)

**MILK** Predicts differences in weaning weight attributed to the milking ability of the animal's daughter. (Pounds/High Value)

**Calving Ease Maternal (CEM)** Predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**Marbling (MARB)** Predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**Ribeye Area (REA)** Predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT** Predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

## **You Get Extra Performance with Thomas Ranch Genetics** **Here's How This Year's Thomas Ranch Charolais Offering Stacks Up!**

	USA Breed Average EPDs	2020 Thomas Ranch Offering Average EPDs
Calving Ease Direct (CE) EPD	5.3	<b>5.1</b>
Birth Weight EPD	0.3	<b>0.3</b>
Weaning Weight EPD	31	<b>33</b>
Yearling Weight EPD	57	<b>61</b>
Milk EPD	10	<b>7</b>
Terminal Sire Index (TSI)	203	<b>203</b>
Carcass Weight	20	<b>20</b>
Marbling EPD	0.1	<b>.03</b>
RibEye EPD	0.69	<b>.64</b>

### Charolais Guide to EPDs

**Calving Ease Direct (CE):** It predicts the average difference in unassisted births with which a sire's calves will be born when bred to first-calf heifers. (A higher value indicates greater calving ease)

**Birth Weight EPD (BW):** The expected difference in average birth weight (pounds) of progeny. Birth weight reflects pre-natal growth. (A lower value indicates the difference in average birth weight)

**Weaning Weight EPD (WW):** The expected difference in average weaning weight of calves. The evaluation reflects the genetic influence on pre-weaning growth rate.

**Yearling Weight EPD (YW):** The expected difference in average yearling weight of progeny. The evaluation reflects genetic influence on both pre-weaning and post-weaning growth rate.

**Maternal Milk EPD (Milk):** The genetic ability of a sire's or dam's daughters to express in pounds of weaning weight in her calves due to her maternal ability through mothering instinct and milk.

**Terminal Sire Index (TSI):** Is a formal method of combing many EPD traits into one single value. The TSI represents a dollar index per terminal progeny produced, ranking them for profit potential. Example: If Sire A's index is \$191.00 and Sire B's index is \$200.00, then we would expect Sire B's offspring to average \$9.00 more net return than Sire A's offspring.

**Carcass Weight (CW):** Expressed in pounds and is a predictor of hot carcass weight at age constant endpoint.

**Ribeye Area (REA):** Expressed in square inches and results in larger ribeye's and lower yield grades.

**Fat Thickness (FAT):** Expressed in inches, decreased fat should result in lower yield grades.

**Marbling Score (MARB):** A primary component of USDA Quality grade, selection for increased Marbling Score should result in cattle with higher quality grades at the same age endpoints.

▶ The substantial impact this sire has had within the breed and within the industry is remarkable. His name shows up substantially in Charolais pedigrees on both sides of the lineage. His impact as a sire of look, smoothness, length and profile build took the breed and our program to the next level. The number of industry acceptable and awarded, both sires and dams, cattle that built his pedigree are simply unrivaled. One of the easiest things we can do, is to continue to offer these elite Firewater sons as we go to the next generations of donors in our programs.

▶ This Rhinestone son from the potent Carbine is blazing his own trail just like his maternal brother Outsider, except he is more diverse in his use profile. The past high seller here at TR was selected by Doll Charolais, ND and Wilgenbusch Charolais, SK. His first sons recently highlighted the Doll bull sale as they commanded a ton of attention from one of the most critical audiences of commercial ranchers that utilize Charolais genetics. Dolls have used the bull extensively on their two-year-old females and are very pleased with their end results. Wilgenbusch has marketed his semen for over \$250/unit. The demand and fan base of this young sire will only continue to expand breed wide; we are confident that you will like them as much as we do.

▶ Here's the initial outcross sire we discovered for our program from the very reputable RBM Livestock. The Bergh's have been intense hustlers at all levels of the beef business, from starting cattle to feeding cattle, retaining ownership, to being one of South Dakota's leading seedstock providers, they know and they get it. The 5100 dam of this stud is the backbone and is what allowed Bluegrass to compliment this herd sire in such a positive way. He has been a heavily used bull in the breed, and rightfully so if you ever laid eyes on 5100, especially in her prime. We believe in and like what this sire has done.

▶ Sire of Lots 188 - 200.

▶ Outsider has had as much impact on the Charolais breed as TR Firewater did and still does today. Outsider is known nationwide and in multi breed facets, an industry changer and daily buzzword when discussing superior built, exquisitely attractive females in the breed. He has also went on to sire sons that have an additional stout cow family backing them that are forging their way through the breed as some of the most exciting young sires. You cannot discount or pass negative judgement on a bull of this magnitude, yes, you're entitled to state he may not work for your program, but one cannot deny his positive impact and the incredible persona he carries throughout the business.

► Outkast is the Outsider from Dari that has done the job! The Diablo influence is very strong in this 2017-2018 National Champion and Triple Crown Winner. Bone, shape, foot size and looseness of build is what carries this sire to the next level. The outcast cattle have been bad to the bone with a whole new level of look and presence with added substance and shape compare to their contemporaries.

His dam, 7610E is an exciting two-year-old female that is sired by RBM TR Rhinestone Z38. He is balanced numerically, with added shape, structural integrity and real-world performance. EPDs rank him among the top 35% of the breed for WW.

The Reserve Champion Pen of Three Bulls, 2020 National Western Stock Show. Sired by Fire Water and Carbon Copy.

Carbon Copy being selected Grand Champion Bull at the 2020 National Western Stock Show. Carbon Copy was also selected the 51st National Charolais Show Champion Bull in Louisville.

Charolais Bulls

Mardy Knodel. Mardy works with the cow herd and in bull development. He's been with Thomas Ranch for 18 years and there's nothing he can't do!

Landon, Paton, Jessie, Dilly and Tony Coyle. The Coyle family are Angus and Charolais cooperators and Dilly helps with special projects around Thomas Ranch.

Cagney, Kenidey, Kristi, Chris and Chesney Effling. The Efflings are Charolais cooperators and have been a part of our extended family for many years. They all help with special projects both on the road and at the ranch.

Holden, Brett, Laura and Reagan Tostenon. Laura is the office manager but is also available for outside special projects.

Bill Gortmaker lives at the ranch. He helps with the cattle and farming but primarily keeps things running smoothly.

Sasha, Bandon, Bevin and Brigston Bertsche. The Bertsche are Charolais cooperators. They live at the ranch and Brandon works with cattle and farming.
