Welcome to our 4th Annual Production Sale! Consider this your personal invitation to our annual event. I can't say thank you enough to our past customers for your continued support. I try to visit with as many of you throughout the course of the year to hear not only about the cattle, but also your families and life outside of this business. We have come through a year that can be described as nothing short of gut wrenching; unprecedented to any experience we have had in this lifetime. Yet, true to form we dealt with it like true Americans and powered through it.

You know, the more I think about it, it's the same resilience, determination, adversity to adapt, and power through-it attitude that we demand of our cattle. We've always had the mind set that our profitability depends on your profitability. I don't know how to say this without sounding cliché, but I can get behind this set of cattle like no other set that we have ever offered.

After last year's sale I told Jered that we, as your seedstock supplier, need to make more good ones, if we are going to stay in this business. Rest assured, that is our mindset. For those of you that know me I'm harder on our own cattle than someone else's, but that's how you make progress. The cattle have performed after weaning as good as ever. Our weaning weight as many of you experienced, were 50-75 pounds lighter than normal but as we have been weighing every 60 days their genetics have come through. As many of you know EPD's are not the sole selection tool around here, and that's what they are, a tool. There are traits that are not measured by a person sitting in a cubicle, without any skin in the game, that have huge economic impacts to the cattleman's bottom line and we pay attention to those also.

The cattle speak for themselves. We will have ultrasound data, yearling weights and a few updates on homo black and homo polled status on a supplement sheet. We will start delivering the bulls in April sometime. We realize you're busy that time of year so please don't think you have to take delivery when we call. It's my favorite time of year because I like to visit with you, if it works out. The bulls have a first year breeding season guarantee, as I've said before, we can't fix a problem if we don't know about it. The bred heifers were brought home from grass the first of November. They will have all their scour shots, boosters and be repreg checked before the sale, therefore they will be ready to load at the conclusion of the sale.

Thank you for your consideration in our program. Please stay after the sale and enjoy a prime rib sandwich and some refreshments. Feel free to stop by or call anytime, we would love to visit about the offering.

Sincerely,
CHRIS EFFLING

Cattlemen and cattlemen, it gives us great pleasure to welcome you to the 2021 edition of the CK Cattle and Wager Cattle Production Sale! This will be the family's fourth event and it will include the absolute best and deepest set of herd sire prospects that they have ever bred and assembled for your appraisal, followed by a great sort of be heifers from the heart of the program. The industry has been blessed with optimism in the last quarter of 2020 and the predictions on the first two quarters of 2021 are significantly brighter than they ever have been for those of us in the food grade protein business.

In Highmore, the forecasted outlook is always optimistic regardless of the world situation we live in or good or bad market reports. The "keep your head down and leave your focus on the end goal approach" has worked for this family operation over the years and it's not going to change. As many of you that are repeat customers know and understand, these cattle are ranching stock that are aggressive in the workplace. The bulls from this program get out and get cows bred and award the commercial investor with a set of vigorous, fast growing stock that pound the scales at the Dakotas' finest commission marketing venues and have been received well on the video further west. Also, CK Cattle and Wager Cattle have an enhanced customer service feature with a ranch direct transaction on your feeder cattle at weaning time. They will exhaust all resources to insure you a competitive or market topping bid/buyer on your cattle, so do not hesitate to research this option by phone, email, or in person with Chris before, during, or after the sale. Simply put, "the hustle" doesn't stop after you invest in a bull or bulls at CK Cattle and Wager Cattle.

This program was initiated with one female, Melody, that was flushed to one bull, Dream On, and the rest is history. The influence of that donor dam and that initial mating in super ovulation saturates the core of this entire operation. In the beginning it was based on phenotype with strict culling on head shape, udder quality, fertility, structural integrity and the quality followed. The implementation of the right power, Upgrade, followed up with Profit, with continued pressure applied to the traits that are essential to a profitable cowherd and breeding program. There's been some "new light" shed on the program with the introduction of ES Right Time FA110-4 two years ago to the pastures of Highmore. This sire group has been met with intense reception as some of the first heifer calves were successfully marketed early fall commanding some record figures, and this set of sons in this offering are the head turning kind that will influence any discriminating seedstock or progressive commercial enterprise's bottom line in positive fashion.

The opportunity to acquire Right Time semen was removed from the open marketplace, so the only way to capitalize on his service if you didn't tie into the semen when it was available, is through a son. This sire group's number profile is as good as his important phenotypic presence and that will improve as well as the data is submitted. As this program moves forward, the intention will never be to breed cattle on paper like so many do today, but it will be to continue to mold and shape the ideal beef machine both physically and numerically, within reason. Rest assured of one thing, Chris Effling understands phenotype and structure with the best of them and he's just one of few people that can assist with improvement of the entire beef business when the data gets processed, for years to come.

The bulls have remained the main focus, but this year's set of bred females needs some attention as one will be able to tell from the pictures in this book and the sale videos will support. Several of these are from some of the most productive females in the program with incredible phenotype, impeccable structure, with significant genetic value. Significant pressure was applied during A.I. this year and some fell to the next cycle or two post A.I., however that doesn't change the value these females have at their introductory productive phase. The service sires behind this set of females from A.I. to cleanup are top shelf. The Solution Angus stud is most definitely do CK a great job for a low birth weight sire with zero calving issue, awesome physical build for the number profile he offers on paper. He is a turn out bull that you will be hearing more from for years to come on the Simgenetic side. We invite serious attention to this set of females, don't miss out.

This family has been friends of ours for two decades, they have never wavered from the end goal. The cattle are proven, documented, and sorted in the most discriminating fashion known to the business, they are real world ranch stock that will take care of your bottom line. The diversified, proven, profitable use of these cattle works as well on the heifer mates retained as it does the steer mates that weigh up the end dollar value. Make plans to be with us in Highmore February 13, 2021 at 3:00 PM and invest in your program's future.

TERMS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed.

TRUCKING

Courtney Lovett: 402.984.3133
Dick Coleman 765.461.0954

NUTRITION

Jordan Holt: 605.380.1209

HEALTH & WINTERING

Bulls can stay to the first of May when they will have a breeding soundness exam, along with leptospirosis, pinkeye, and hoof rot vaccine. Bred females will need to leave as soon as possible after the sale due to close proximity of calving. Any female left and calved at CK/Wager facilities will not be guaranteed a live calf. Prairie View Vet Clinic: 605.695.4086

RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction. Insurance will be available sale day.

ANNOUNCEMENTS

Announcements made sale day and from the auction block during the sale take precedence over printed material in the catalog or other printed material associated with this sale. Anyone attending this sale, attends at their own risk. Breeders or any of the sale force will not be held responsible for any injury while attending this sale.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

INSURANCE

Insurance will be available sale day. We suggest a mortality policy, especially if you plan to leave your bull(s) to be wintered until May 1, 2021. We will pay 1/2 of the insurance premium if you wish to purchase a policy. Please visit with Ray Trudeau at the clerking desk if you have interest in insuring your purchase. Ray Trudeau - Martin-Trudeau Insurance 605.770.5170.

ADDITIONAL INFORMATION

Ultrasound data, yearling weights, gain test results, scrotal circumference measurements and Homo Black/Homo Polled testing results will be available sale day. Many of the donor dams to the cattle selling will be available for viewing sale day.

CK AND WAGER SIRED CALVES TOP THE MARKET!

***Over the last three years 155 CK and Wager Simmental, SimAngus, and Angus bulls scanned with an Average REA of 13.37 and an Average IMF of 4.14.
25 Hereford bulls scanned with an Average REA of 12.5 and an Average IMF of 3.21***

Look for this powerful set of bulls to follow suit!
Ultrasound Data and Scrotal Measurements will be available on prior to sale day and online at DVAuction.com

SIMMENTAL & SIMANGUS™ THE BULL OFFERING HEREFORD

BULL GUARANTEE

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the American Simmental Association and the American Hereford Association, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

BULL BUYER VOLUME DISCOUNTS

- 3% off total purchase price of 3 Bulls
- 4% off total purchase price of 4 Bulls
- 5% off total purchase price of 5-9 Bulls
- 10% off your total purchase price of 10+ Bulls

DELIVERY

Free delivery within 300 miles on all bulls and we will assist in finding delivery options to other parts of the country!

EMBRYO TRANSFER PROGENY

Bulls without a WW Ratio are the result of embryo transfer. Their respective breed associations do not recognize them as having a contemporary group so they do not have a WW Ratio.

SEMEN INTEREST

1/3 Semen Interest retained in all bulls, unless otherwise noted.

LOT 1 - FRKG CKCC PLATINUM 009H ET

Over the years Chris and Kristi have forged a path of dedication to success, reputation, and integrity. A stud like Platinum doesn't surface every year. He is an elite individual who stands out, even amongst his siblings who prove that excellence will be a constant in this lineage. This big, square ended and backed stud is as athletic on the move relative to the amount of power and shape he offers as any I have ever laid eyes on. His bold, deep body mass blends smoothly into his extended front third. He is flawless in his basic build, with exceptional foot quality and depth of heel. Platinum is without a doubt a herd sire prospect that will experience heavy use in herd at CK Cattle and Wager Cattle. Here is the unique opportunity to invest in one of the true power bulls to surface within the last decade. ***Terms will be announced on sale day.***

The first of 2 full brothers to the lead off lot that would be fitting for any seedstock producer or commercial rancher. This trio's dam has a knack for performance and power herself and does an exceptional job transmitting that into her progeny. This stud is flawless in motion, proud, big bodied, loose centered, and boasts substantial beef shape.

A snip nose brother to wind up the trio that brings even more frame and extension to the family gene pool. He's the long, big framed one that still maintains an attractive physique through that front third. This bull will contribute so much good to anyone's bottom line.

THE YEARLING BULLS

LOT 4 - KTE MR PROFIT 0668H ET

The pair of brothers from the 2018 AJSA Percentage Champion Female by the senior stud, Profit! If you like your stock with extra length, smoothness, and something that will weigh, don't let the fact that their dam was a show heifer stand in the way of your better judgement. Their dam has withstood the pressure and the environment and is the kind that definitely out produces herself in every aspect of production. She is an absolute calf raising beast that leaves nothing and no one to question her ability. Look them over but don't overlook them and miss the boat. Pounds pay!

Pandora is, without question, the absolute best direct daughter of the great Driver in existence. There's a pile of productive, calf raising, dollar generating daughters in the country sired by Driver, but we love and appreciate the Pandora line at CK Cattle! Her son by Profit is a powerhouse that is awesome structured with substantial body, look, and presence in the bull pen. He leaves everyone to point him out and ask, "What is he?" You will be able to find him when you visit us, and he will be one that many of you will find on your shortlist sale day.

LOT 11 - WAGR MR PROFIT 0082H

Here would be the full brother to the dam of the trio of lead off bulls in the catalog for the offering. Big sister set the stage for you to take notice in a stud that would work for any discriminating breeder or to be a substantial asset to a progressive commercial outfit that may focus on the cow herd and marketing of high-end replacements. He definitely has the credentials and type that deserve notice on sale day, a simple must see.

This is another Profit influenced by an Eclipse bred dam. A stout featured homozygous black and homozygous polled bull that should sire the right kind of stock to perform in whatever phase of production one wishes to enhance. We cannot discuss hoof quality and athleticism enough when you set out to replace your older bulls, so make sure one such as 0058H is on your list.

0055H is a homozygous black and homozygous polled herd sire prospect that is backed by some of the breeds oldest and most proven genetics. He is from a dam that hosts both ABS vintage sires, Goldmine and Ranch Hand. The influence of those two sires is known for longevity and leaving daughters that are significant in production while remaining in the herd for years on end. He has the length and shape necessary to add pounds to your next calf crop.

This stud may be one that could sire some red stock on the right cows as he is heterozygous black. He is further supported by the likes of Vision and Melody on his dam side, but let's visit about the moderate sized bull and note his soundness and flexibility off both ends of his skeleton. Also, he is one with great feet and legs, with added rib shape and muscle to burn.

The Profit x Hammer blend is one that was and still is proven annually in our program. Bulls bred like 0626H are bred for power and beef business shape so that you can take advantage of the extra product and performance they are known for.

THE YEARLING BULLS

We partnered on an IVF cycle with Hartman in Embryos on Snow on the great Serena and did her to Cash Flow with optimum endpoint results as you will find in this duo of full brothers. They are not homozygous polled, but they are homozygous black and sure enough homozygous high quality as they should be when from an influential cow such as Serena. These creatures are mammoth featured with more than meets the eye for substance and shape. They should be enhancing assets to any facet of beef production!

This direct son of Revenue is from one of two popular and potent Angus cow families in the TR program up the road in Harrold. The Rosie descendants have been only rivaled by the daughters from the prolific 3208N. He is certainly a deep sided, square ended, good back shaped individual with awesome feet and legs. His agility is like none other to further insure your curiosity come sale day.

KMJ REVENUE - SIRE OF LOT 19

LOT 20 - CKCC LD MR HAMMER 0901H ET

Here's a trio of Hammer sons from an incredible SimAngus, Profit sired dam that is a surefire generator! One of her daughters would have been a \$25,000 sale feature in Hartman's female sale as well as countless high selling steers and other females alike for Doris Cattle. These three brothers are very uniform in build and kind. So, if you are a SimGenetic breeder wanting to enhance extra features without sacrificing shape, growth, or skeletal integrity, then these would be of serious consideration for just that. The dam factor is enough to make one very intrigued by the opportunity itself, so take some serious time to evaluate and for the commercial cattlemen with a need for several bulls, strongly consider tying these three together and make your neighbors want to cut the fence to share in what lies ahead.

The star headed, lone Hammer Time from a 20-20 sired daughter of Serena. 0600H is a homozygous polled Purebred that will add heterosis to a functional set of Angus based cows.

LOT 29 - CKCC RIGHT TIME 0639H

The Right Time sire group will be one of the most sought after of the bull run in 2021 as his semen was taken off of the open market. This good individual that ranks in the top 15% of the breed for WW is from a cow that we selected from the famed R&R program of Chamberlain. He gives us a pedigree that is somewhat nearly outcross in nature, with the exception of the distant Dream On influence on the top side. However, this herd sire prospect is big backed, big ended, big ribbed, with a very clean sheath, and an awesome set of feet and legs.

0653H is another low percentage SimGenetic bull that has the needed data to turn heads on sale day. This good footed, bold bodied herd sire is ultra-flat and smooth through his front third. He offers a modest enough birthweight that he could be favored for use on well-managed heifers. He posts a charts top 4% for ADG, top 10% for YW and Terminal Index, along with a top 15% ranking for marbling and a top 20% ranking for the pay weight at weaning time.

The influence of Broker on the bottom side of this Embrace son adds to the beef bull look and shape of this red hided stud. Pounds pay!

THE YEARLING BULLS

LOT 72 - CHEZ MR SOONER 0817H ET

The Hereford division at CK Cattle is backed by a strong maternal foundation. 0817H and 0819H are sired by the maternal legend, DM BR Sooner, and from the influence of RV Golden Lady 5064. 0817H and 0819H are stout, wide based, heavy muscled Hereford bulls that will add heterosis to any set of Angus based cows. 0644H is the Laramie 619D son that is from the line-one influenced pedigree of JCS 0144 Dominette 4659. Look to the Hereford division if you are interested in producing a heavy weaning set of baldy calves.

This pair of sisters by Profit from the famed 54Z2 Donor dam are of significance in this set of bred females for certain! Both are loaded with look, build, huge feet, great bone work, with added depth and true body shape and shear dimension. The maternal brother to these females, Edge, was selected as the 2019 NWSS Grand Champion Percentage Simmental Bull. Two maternal brothers are features in this year's offering as Lots 42 & 43. 9729G sells with and estimated calving date of 3/27/21 to the P.E. sire TT Gritt 694G (ASA: 3614416). She was AI bred as well to MR CCF 20-20 (ASA: 2964446).

The baldy from the Hammer x 1X combination would be the maternal sister to the great "Bobbi" in the offering. "Bobbi" topped the CK Proven Female sale, commanding a \$40,000 hammer price to Freking and Fawcett. Nearly equal body mass and substance to that of her famed proven sister, so why wouldn't you, the progressive breeder, want to add this to your cow arsenal? She sells safe in calf to the proven sire of competitive champions, HPF Quantum Leap Z952 (ASA: 2649657) with a 5/18/20 service date. Keep in mind, Quantum Leap is deceased, and semen is very limited.

9026G leads off the Innovator sire group. This well-designed female offers substantial herd building cow family to back the statement. Influenced by Melody, this up headed, deep, sound, good built individual is for real. Sells with an estimated due date of 3/22/21 to Hook's Eagle 6E (ASA: 3253742) with a 5/21/20 A.I. date. She too was P.E. to R5 Solution E111 from 6/6/20 to 8/1/20. Likely safe A.I.
