

THE MORIONDO FARMS AND MM CATTLE CO INAUGURAL
SPRING TURN-OUT SALE
MARCH 6, 2021 AT 1:00 PM
at the ranch in Mount Vernon, Missouri

Fellow Cattlemen and Women,

We would like to invite you all back out to the farm March 6, 2021 for our first annual spring turn out sale. There's a deep selection of working Angus and SimAngus bulls to come and lay your eyes on.

The Bulls are in good shape, and we're excited about this set to kick off the spring season! Both the Angus and SimAngus bulls have breed leading sire groups in each pen to choose from. Time tested genetics along with some of the new blood lines have made for an excellent set of year and a half old bulls. Take a look at the feet and legs on these bulls and see that they are built for the long haul!

As we're finishing up our catalog, we're in the midst of the 9th coldest streak in Missouri history. Some things change, but some stay the same. In this case the constant is the farmer going sleepless nights and long days to keep baby calves warm, and cattle fed. The resilience of the American farmer is what we are founded upon and is a constant that will never be changed. Let us be your constant, Moriendo Bulls will allow you to reap the benefits of our programs investments, with calf crops that have more pay weight, and a set of females that help build the future of your cow herd. Come by anytime or give us a call.

Stay safe and God Bless

Mark Moriando

Larry & Rita Moriando

Lucas Reinhart

Spring is upon us and optimism for the beef business is in good order. There is a load of momentum built into the market place in the right direction for all classes of beef cattle. Yes, the grain market has surged since the end of the 2020, but it does generate interest from the diversified agriculturalist to drive the market place and create competition in the energy sector. When the cycle was at its highest, oil, gas, ethanol, and inputs were high, but the margins were greater as well. You have the opportunity to appraise a set of bulls at Moriondo Farms that are suited for the times and so we welcome you to the inaugural Spring Edition of Mark and Larry's effort to continue to make beef better for their operation and yours.

Sure, it's a diversified agricultural operation that has been built like the ideal American Dream, at Moriondo Farms. Larry started in a humble setting but took advantage of the limited tool chest and turned it into a thriving operation. As they build and expand the cowherd and land base, rest assured that this is the passion and vision that have always maintained and improving the product that they sell to you also improves their operation for the goal to continue. Like many of you that are already customers and those of you looking into becoming a customer, the foundation here in Mt. Vernon is entrenched in the commercial sector of the industry. The family has strong ties with feeders like Billy Hall, feeder cattle marketers like Jackie Moore and his family and staff, and cooperating relationships with some of the nation's highest quality bull providers in order to be able to assist you with the full scope of your bottom line. Mark continues to strive to improve the real world data aspect in regard to performance and carcass without sacrificing phenotype, calving ease, and payweight at weaning time in which most of you will market your product. We feel that this set of bulls like those that have proceeded in the fall offerings are those kind and the genetic improvement is already in line for the years to come.

If you enjoy doing business with true, salt of the earth people, then we invite you to join the good family on the first Saturday of March for 2021 and every year after this on this very date. If you wish to obtain any information on the bulls offered, we invite you to reach out to any of the Moriondo Family or staff, as well as the team members of Innovation Ag Marketing for that needed assistance. Thanks for the interest and as always, enjoy the cattle.

Enjoy the cattle,

Four handwritten signatures in black ink, arranged horizontally. From left to right, they appear to be: 'John', 'Larry', 'Shirley', and 'Anderson'.

Saturday, March 6, 2021

Cattle available for viewing all morning
12:00 PM - Lunch & Refreshment
1:00 PM - Spring Turn-Out Sale

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have excellent, high-speed internet. To get started, simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information, Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone. You can also register over the phone by calling 800-431-4452.

Click-To-Bid. This is Superior's newest way to buy cattle! Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for.

VIEWING THE AUCTION

If the sale is being broadcast on SLA-TV then, it will be available on DISH Network channel 997. Please note that there is a short delay if you are watching the auction on television, so be sure to call in at least one lot ahead of the lot you are interested in bidding on. Regardless of the television channel the sale is being broadcast on, all auctions will be broadcast live on the internet at www.superiorclicktobid.com. Some auctions will ONLY be broadcast online. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". If you just want to watch the auction without bidding online, you can do so by entering the auction as a guest. Guests do not need a username or password to watch the auction. Your computer must have Flash Media Player and Java installed to view the auction online.

For more information or if you need assistance contact Blake Tucker (308) 660-3963.

OUR GUARANTEE TO YOU AND COMMITTMENT TO SERVICE

Unless otherwise noted, all of the breeding age bulls have passed a breeding soundness exam and are fertile to the best of our knowledge at the time of sale. In addition to the standard Terms and Conditions of the American Angus Association and American Simmental Association, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee of functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside of genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine the best course of action and reserve the right on a case by case situation to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided, we will issue a credit to be used in a future sale for the full purchase price less the salvage value of the animal.

**ALL BULLS SELLING ARE VIRGIN BULLS AND HAVE BEEN TRICH TESTED
AND PASSED A BREEDING SOUNDNESS EXAM.**

We offer free delivery on bulls in Missouri, provided the buyer is able to make arrangements to receive the bull when delivery is made to your area, usually within a few weeks of the sale. Due to fuel costs and time restraints, we may consolidate trips. If you are unable to receive the bulls when delivery is scheduled to your area, you need to make arrangements to pick up your bull at the farm within two weeks of sale date. Each animal will be at purchasers own risk as soon as sold. Bulls will be cared for free of charge for 2 weeks following the sale should you have to pick them up.

VOLUME DISCOUNT

**3-4 Bulls – 3% Discount | 5-9 Bulls – 5% Discount | 10+ Bulls – 10% Discount
\$50 Discount if bulls are picked up within 1 week of the sale**

THE SIMGENETIC BULLS

LOT 1 - MMR CCLC EAGLE G926

There isn't a better spot to kick off our 2021 Spring Turn Out bull sale than with MMR CCLC Eagle G926, the 5/8ths son of Hook's Eagle 6E, he is powerfully built, stout featured, big footed and rugged structured. Seldom do we have percentage bulls come along that process the elite beef bull qualities of G926 and combine them with such a standout EPD profile. He ranks within the top 2% of the ASA database for post weaning profitability (TI), top 1% WEAN, top 1% YEAR, top 5% ADG, top 10% MWW, top 4% CW and top 2% REA. Regardless of whether you inspect this homozygous polled and black stud at the scale, in the pen or on paper, you will be impressed.

Big muscled, big bodied, wide based, thick topped and packed full of red meat. If you're in the business of marketing beef cattle that need to be powerful and profitable then you need to make sure you inspect this son of Hook's Eagle 6E. Homozygous black, homozygous polled and raised by a high value daughter of NLC Upgrade U8676, G920 is backed with maternal power. He tabulates with a top 2% ranking for TI, top 15% API, top 5% REA, top 10% MARB, top 10% CW, top 3% WEAN, top 3% YEAR, top 5% ADG.

We couldn't be happier with the job that Hook's Eagle 6E has done with producing rugged built, flat jointed, good footed and attractive ranch man approved bulls. If you're looking for beef bulls that will add quick profit to the bottomline of your operation then take notice of these Eagle sons. MMR CLCC Eagle 918G is sensible about his calving ease traits, productive about his performance traits and impressive when looking at his profitability indexes. He sits in the top 15% of the database for API, top 15% for TI and top 20% for Marbling.

MMR CLCC Eagle G951 came small at birth, however that was the only time he was behind the pack, as he has quickly developed into an impressive, homozygous polled, homozygous black Percentage Simmental sire prospect. The quickest way to add pounds to a calf crop is through length of body, and this is where G951 excels, couple that with his extra shot of frame, attractive outline and sound feet and legs we think he makes a valuable addition to many sire batteries. He charts favorably for performance with a top 4% rank at WEAN, top 4% YEAR, top 5% ADG, top 10% MARB, top 10% API and top 3% TI.

If you like your bulls to look like men among boys, then G908 is a good place to start your list. The sire appeal of MMR CCLC United G908 is unrivaled, the same term can be used to describe his growth pattern. This homozygous polled, homozygous black, half blood has quickly arisen as a standout, even with his light 73 pound birthweight. You will not find many other herd sire prospects who have the extreme curve bending growth traits of this powerhouse, raised by a daughter of Mr. NLC Upgrade U8676.

The W/C United 956Y mating on our NLC Upgrade U8676 daughters has proven to be as reliable as any. Not only do these sons tabulate for high growth and carcass traits, they are faultless in their construction and consistently the cowman's type. We think the sibling sisters that are retained in our replacement pen are equally as impressive. MMR CCLC United G905 is a half blood Simmental who tested homozygous for both the black and polled genes. On paper he registers a top 10% ranking for both WEAN & YEAR, top 15% ADG, top 1% CW, and top 25% TI.

Genetically and phenotypically geared for performance. Without doubt the heaviest sire prospect to run over our scales for the 2021 Spring Turn-Out. A homozygous black and polled, W/C United 956Y son whose progeny will yield a premium when it comes to sell by the pound. This flush to the CCLC Miss Upgrade B4057 donor has proven to be dynamite. He ranks top 2% for WEAN, top 1% YEAR, top 2% Average Daily Gain and top 1% CW. He reads with a top 15% tabulation for TI.

Surefire calving ease prospect that is built just how sleep all night heifer bulls need to be, long bodied, smooth shouldered and angular in his construction. MMR Black Granite 9G32 is a quarter blood Simmental who came into the world with a very moderate 71-pound birthweight, however he didn't allow his contemporaries to out shadow him come the next time they ran over the scales. Check out the genomic chart that accompanies this curve bending, growth patterned herd sire prospect, top 2% CE, top 10% BRTH, top 40% YEAR, top 25% ADG and top 2% MCE.

Payday is making a true impact on the business and leaving behind a tremendous string of daughters.

MISSOURI SHOW-ME SELECT REPLACEMENT HEIFER PROGRAM

The Show-Me-Select® Replacement Heifer Program uses the latest research on health, nutrition, genetics and reproductive science to ensure Missouri counties continue to be national leaders in providing quality beef. The program focuses on Missouri's farmers and is dependent upon active participation from regional extension livestock specialists and local veterinarians, each of which are critical components of the agricultural sector of this state.

This program is unique in that it is an educational program targeted at improving production efficiency through increased use of existing technology, coupled with the marketing component.

Program Objective:

Improved heifer development programs through a Total Quality Management strategy
Increased marketing opportunities for and added value for Missouri-raised heifers
Creation of reliable sources of quality replacement heifers based on management, reproduction and genetics

Genetic Requirements:

Sire requirements: Eligible sires must have known ID, be registered by their respective national breed registry, and have complete EPD (opens in new window) information. Sires will be evaluated for qualification in the program based on the EPD provided by their respective breed registry and not on EPD produced by progeny registration in any other breed or hybrid registry.

Angus minimum Calving Ease EPD of 7.0

Simmental and SimAngus minimum Calving Ease EPD of 14.0

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

An attractive, heavy muscled, and powerful hipped son of Wilks Payweight 6311. The Angus breed needed these Basin Payweight 1682 derived cattle to promote functional footed, big bodied and maternally powered, beef bulls. We think MF MM CCLC Payweight 9189 offers exactly what our customers desire, a growthy yet functional herd sire who will work for several seasons and add payweight to a cowman's bottom line. His EPD profile ranks 9189 in the top 20% for WW, top 10% YW, top 35% RADG, top 25% SC, top 25% MW, top 10% DOC and top 25% \$W.

When we purchased a group of elite young Angus females from the Hoffman Ranch of Thedford, Nebraska we had high expectations of their ability to introduce many of the breeds most potent cow families, MF MM Prime Cut 9800 is a prime example of these cow's worth. His dam carries the Blackcap Empress family name, a highly influential cow family for many of the most progressive operations in the country. 9800 is a son of the HA Prime Cut 4493 AI sire, who is backed by the infamous Blackcap cow family, if maternal power ranks high in your selection criteria then we think your attention is well warranted here.
