

Bayou Creek Ranch

3RD ANNUAL PRODUCTION SALE

Thursday, October 7, 2021

One O'Clock in Jacksboro, TX

BAYOU CREEK RANCH

— RED ANGUS —

Welcome to the Bayou Creek Ranch 3rd Annual Fall Production Sale; we are pleased that you are interested in Red Angus genetics. We do not take this opportunity to share our program lightly. We strive to promote the elite genetics of the Red Angus breed and deliver those to our producers. We focus on producing cattle that are structurally sound, uniform, and adaptable with extraordinary performance.

We are a family owned operation with ranches in Jacksboro, Texas and Lone Grove, Oklahoma. The Swan and Lewis families have a great passion for the cattle business. Agriculture has always been a part of our lives in one way or another. Over the past 5 years we have made key acquisitions to build the foundation of our cowherd. These investments have enabled us to build a more versatile donor battery that embodies the fundamentals of efficiency and maternal strength. Moving forward there will be countless full sisters to many of the top selling bulls over the past two years that will follow in the footsteps of their prolific dams, paving the way for the next generation of Red Angus genetics at Bayou Creek Ranch.

Kent Shankles oversees the operations at our ranch in Oklahoma. He and his crew have logged a lot of hours in preparation for this year's sale. We appreciate the dedication, knowledge, and commitment that they have invested in our program.

Please join us on Wednesday, October 6th for a pre-sale viewing of the cattle and dinner at JR's Chophouse in downtown Jacksboro, Texas. The sale will be on Thursday, October 7th at 1:00 PM. Our sale includes a powerful set of age advantage bulls and a tremendous set of registered fall calving females. If you have questions about the sale, please give us a call, we would love to visit with you about the cattle. Thank you for your interest.

Sincerely,

Ken and Becky Swan, Jeff and Kori Lewis

INNOVATION

— AgMarketing, LLC —

Fellow Cattlemen, Cattlewomen, and Red Angus Enthusiasts,

Welcome to the 3rd Annual Bayou Creek Ranch "Only the Best" Production Sale, one of the premier opportunities to purchase proven, predictable, and profitable Red Angus seedstock this fall. It has been an honor to work with the Swan and Lewis families, along with their talented staff over the last two years. Bayou Creek Ranch is fully committed to producing functional, long lasting, problem free Red Angus cattle that offer added value to their customers and positively impact their respective program. This offering exemplifies their motto, "Only the Best", as they have rigorously culled and put these bulls to the test time after time through the development process. A disciplined approach to their management practices and breeding program has resulted in this years' offering.

Genetic progression is taken very seriously by everyone at Bayou Creek Ranch. A constant focus on the next generation is the mentality that Jeff Lewis and Ken Swan embrace. They are always searching for the next breeding piece that will elevate their program and ultimately improve the product that they raise and supply their customer base with. Through key transactions, Bayou Creek Ranch has established one of the most consistent and proven cow herds in North America. In 2017 they introduced several key females to the donor roster at Bayou Creek Ranch. PIE Cascade 561, PIE Lakota 046, PIE Fayette 1160, PIE Stormy 541, PIE Janet 1065, PIE Tilly 9117, and TKP Marigold 0147 have been pillars in the donor program at Bayou Creek Ranch. While their presence is strong and meaningful, daughters and granddaughters of these matriarchs have begun to fill their tracks in production.

Large sire groups with many full and maternal brothers has enabled cattlemen to add consistency and uniformity to their programs through genetic advancements. The bulls are developed in an 80-acre pasture at the ranch in Lone Grove, Oklahoma. By maintaining a slower more precise development, these bulls are true athletes that are ready for heavy service. We confidently say that these bulls will endure more seasons in the breeding pasture. The bulls have had DNA submitted and will sell with genetically enhanced EPD's to facilitate you in making a more educated decision during the buying process. Actual ultrasound data was recorded by David Aborn of Image Livestock Service to aid in your selection.

Consider this your personal invitation to join us on October 6, 2021 in Jacksboro, Texas to view the offering at the Jack County Fairgrounds between 12 PM and 6 PM. Dinner will be served at 6:30 PM at JR's Chophouse on 119 North Main Street in Jacksboro. The sale will begin at 1 PM on October 7 at the Jack County Fairgrounds. If you are unable to attend the sale in person, a live broadcast with real-time bidding will provided by Superior Livestock. Please feel free to contact Jeff Lewis, Kent Shankles, or any of the sale staff prior to the sale to discuss the offering. We look forward to seeing you on Thursday, October 7 in Jacksboro, Texas!

Enjoy the cattle,

Jeff Lewis Kent Shankles Jeff Anderson

WEDNESDAY, OCTOBER 6, 2021

Bulls and Females will be available for viewing at the
Jack County Fairgrounds from 12:00 PM- 6:00 PM
Join us for dinner at JR's Chophouse at 6:30 PM

on. Chad Gordon: (580) 678-1918, Blake Tucker: (308) 660-3963

TERMS & CONDITIONS

Cattle will sell under the standard Terms & Conditions as recommended by the Red Angus Association of America. All sales are final, and the cattle will become the property of the buyer when the auctioneer says "SOLD".

SALE LOCATION & DIRECTIONS

The sale will be held at the Jack County Fairgrounds. Address: 1072 State Hwy 59 - Jacksboro, TX 76458.
Take State Hwy 59 North 1 ½ miles from Jacksboro. Fairgrounds are on the right.

HERD HEALTH

All bulls and females in the sale are on a complete herd health program. Both the bulls and heifers have received Vista 5 (VL5), Vision 7, LongRange in the spring of 2020, Safeguard in the fall of 2019, and Multimin.

RETAINED BULL INTEREST

Bayou Creek Ranch will retain 1/2 semen interest in all bulls but will be selling full possession. The buyer will also receive full salvage value of their purchase.

BREEDING SOUNDNESS EXAM

All bulls will be fertility tested and trichomoniasis tested prior to the sale and guaranteed to be breeders.

LIVESTOCK TRANSPORTATION

We are offering free delivery on all purchases over \$15,000. We will be happy to arrange delivery at standard rates for all other purchases.

LIABILITY

By participating in any event planned and controlled by Bayou Creek Ranch, you agree to the following:

- Bayou Creek Ranch events are provided with no special warranty either express or implied. The Organizers, including but not limited to Bayou Creek Ranch, its employees, Jeff and Kori Lewis, Ken and Becky Swan, Innovation AgMarketing, LLC, the City of Jacksboro and the Jack County Fair Association, assume no liability for any loss, theft, damage, or injury to property or persons, including death, whether arising in contract, negligence, equity, or otherwise.
- You assume all risks when participating in Bayou Creek Ranch events. All participants must obey all rules and regulations of Bayou Creek Ranch and the laws of the State of Texas. Participants must comply with all requests made by employees and agents of Bayou Creek Ranch. Bayou Creek Ranch reserves the right to eject any participant who does not comply with this section, and further, refuse entry to any participant. Refunds for any reason are at the discretion of Bayou Creek Ranch.
- All participants agree to indemnify and hold harmless Bayou Creek Ranch and The Organizers listed without limitation for any and all legal action arising from or related to a Bayou Creek Ranch event.
- All participants expressly give Bayou Creek Ranch authorization to use and post any photographs, videotapes, recordings, or any other record of our events, including full names of any participants, before, during, or after the event for promotional use reporting to the media, and to publish on our website or blog. Participants are not entitled to compensation for Bayou Creek Ranch's use of their name or image.
- We are not responsible for any typographical errors.

Bull Development

The bulls are developed in an 80-acre pasture at the ranch in Lone Grove, Oklahoma. The bulls are developed slowly with a 15% fiber ration at a rate of 1% of their body weight. After 180 days the bulls are moved to a higher energy ration. They have been maintained at a rate of 1-1.5% of their body weight in order to prevent structure and foot issues. By maintaining a slower and more precise development, these bulls are true athletes that are ready for heavy service. We confidently say that these bulls will endure more seasons in the breeding pasture. The bulls have had DNA submitted and will sell with genetically enhanced EPD's to facilitate you in making a more educated decision during the buying process.

Bull Guarantee

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard terms and conditions of the Red Angus Association of America, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

**Please contact Jeff Lewis at (940) 229-1465 or (903) 918-6988
for further questions about how Bayou Creek Ranch can add
value to your operation.**

Ultrasound Data

The ultrasound data was collected on August 25, 2021 by David Aborn of Image Livestock Services. He is a certified technician through the Ultrasound Guidelines Council (UGC; see www.ultrasoundbeef.com), approved to submit images to central processing labs and wished to have their names published in this list. David Aborn (406) 596-0445.

**On August 25, 2021 78 Bulls averaged 1313 Pounds Ultrasound Weight
Act. REA of 15.12 | Act. BF of 0.19 | Act. IMF of 3.69**

The bulls that carry the Bayou Creek Ranch brand will add terminal value to your calf crop and in turn contribute to your bottom line!

Special Thanks

We would like to thank our sponsors Martindale Feed Mill and Stillwater Milling Co. for providing our sale day meal. We are proud to partner with these progressive companies in our operation.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid.

This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction.

There are two places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "click to bid". Your computer must have Flash Media Player installed for this website to view the auction.

If you have any questions, please call the Superior Productions office at 800-431- 4452.

*If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.

WWW.SUPERIORLIVESTOCK.COM

A Guide to EPD's

- HB** HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the postweaning period. (Pounds/Low Value)
- MILK** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Genetics Backed by GGP

The GeneSeek Genomic Profiler (GGP) products and services empower decisions in selecting, raising and selling elite cattle, enhancing profit and protecting your reputation for high-quality seedstock. Beef genomics is evolving fast. GGP provides advanced, wide range DNA testing for the real world of cattle production.

Using genomic-enhanced EPDs for selection of young breeding stock provides a level of precision and reliability that's never been available to producers before.

Bob Weaver
Kansas State University

Efficient selection of seedstock replacement heifers

Never before has such power been so practical. As breed associations add the GGP uLD to their DNA services, you can genomically screen and select replacements for your herd while adding value to heifers you sell.

- **Profile replacement heifers** – Use genomics to select the best and sell the rest
- **Raise elite cows** – Superior nucleus cows are the source of superior bulls
- **Market quality heifers** – Sell heifers with GE-EPDs helpful to commercial cattle producers
- **Verify parentage** – Confirm parentage of heifers for registration and marketing

The best 50K ever – Effective, affordable power to select, manage and market sale bulls

An ideal tool to test a crop of bull calves, the new GGP 50K is the most advanced 50K ever. Highly accurate. Highly affordable. Very versatile with built-in parentage and genetic-health screening. Nearly all major breed associations offer the GGP 50K as their workhorse profiler for routine use.

- **Genomic-assisted selection** – Identify the best bull calves for sire development or AI studs
- **Profiling bull calves for sale** – Affordable accuracy with GE-EPDs adds value in the sale ring
- **Reputation builder** – Verify quality for local customers and distant buyers
- **Fits modern methods** – Uses markers enhancing new “single-step” GE-EPD calculations

Setting a gold standard for the best of the breeds

The most powerful commercial seedstock profiler, the GGP HD150K is ideal for AI studs, donor dams and elite bloodlines. With its strategically chosen content, running the GGP HD150K on elite bloodlines improves imputation accuracy of pedigree genotypes.

- **Smart Design** – Contains 150,000 markers, filling in genetic details other tests miss
- **Modern** – Works synergistically with other GGP products in the “single-step” system
- **Imputation standard** – GGP HD150K data on parent and grandparent animals can sharpen GE-EPDs on their progeny
- **Unique content** – Impactful new markers for cattle performance, reproduction and quality

Bayou Creek Ranch

THE BULL OFFERING

THE BULL OFFERING

LOT 1 - BYU FULLBACK 0302 ET

Bieber Rollin Deep Y118 has been one of those rare sires that truly elevates the breed. When we had the opportunity to purchase a flush on the legendary Bieber Tilly 399W, we knew that it was an instance that could not be passed by. We are proud to present BYU Fullback 0302 ET, a son of the \$132,500 PIE Fullback 7005 and backed by the proven matriarch, Bieber Tilly 399W. Bieber Rollin Deep Y118 is noted as one of the most influential sires in the Red Angus breed, with over 1500 progeny recorded with the Red Angus Association of America. The Rollin Deep daughters have been admired by seedstock and commercial producers from coast to coast and border to border. 0302 is a red hided strong aged herd sire prospect that we believe has the genetic strength and elite phenotype necessary to enhance future generations of Red Angus genetics. 0302 is a sale feature and a bull that we have high hopes to incorporate into our extensive embryo transfer and AI program.

THE BULL OFFERING

LOT 2 - BYU FULLBACK 0303

Without a doubt, BYU Fullback 0303 is one of the most phenotypically eye-appealing and impressive Red Angus bulls ever produced in the Bayou Creek Ranch program. His dam, PIE MS JR 0323, is a leading female in the donor pen at Bayou Creek. 0303 is the natural calf of PIE MS JR 0323. He is a big ribbed, bold centered, square hiped, thick ended herd sire prospect that is built with genuine base width and longevity from the ground up. A dark red hide color further compliments his eye-appeal and fundamental functionality. BYU Fullback 0303 is the heaviest weaning weight calf from the class of 2020. We believe he is a true herd changer and combines the elite form and function that we strive to produce in every mating at Bayou Creek Ranch. 0303 boasts a WW Ratio of 114 with an adjusted weaning weight of over 900 pounds. He also recorded a 111 YW Ratio with an actual yearling weight of 1400 pounds. A full brother of 0303, BYU Fullback 9348 ET was purchased by Mr. Joe Stiles in our 2020 sale. 0303 is a herd sire prospect that we anticipate making a big impact in any program that employs his service.

LOT 3 - BYU FULLBACK 0309 ET

BYU Fullback 0309 ET and BYU Fullback 0374 ET are flush mate brothers sired by the \$132,500 resident herd sire at Bayou Creek Ranch, PIE Fullback 7005. This pair of stout made, rugged, powerful herd sire prospects are backed by one of the most proven females in the donor pen, PIE Fayette 1160. PIE Fayette 1160 is most widely known as the dam of the influential PIE One of a Kind 352, the herd sire for Glass Ranch Red Angus and Power Plus Genetics. PIE One of a Kind 352 has been used across the country with astonishing success, recording nearly 800 progeny with the Red Angus Association of America. Joe Stiles and Don McCauley purchased full brothers in 2020 to this rugged pair of flush brothers.

BYU Fullback 0310 ET is a maternal brother to the widely popular PIE Stockman 4051, one of the featured herd sires for Pieper Red Angus, Bradbury Cattle Company, and Bieber Red Angus that topped the Pieper Red Angus Bull Sale in 2015. One of Stockman 4051's most widely recognized son is the \$155,000 PIE Quarterback 789, the high selling bull from the 2018 Pieper Red Angus bull sale that was selected by 9 Mile Ranch of Washington. 0310 offers a moderate birthweight of 68 pounds and spreads to nearly 700 pounds of adjusted weaning weight. Maternal brothers to 0310 are working for Nichols Ranch, Guillory Sylvon, William Shankles, and Davis Bell Ranch, LLC. 0310 is a dense made, thick ended herd sire prospect that is a great option to add pay weight to any calf crop.

THE BULL OFFERING

LOT 39 - BYU JUST RIGHT 0354 ET

PIE JUST RIGHT 540
SIRE OF LOTS 39-47

BYU Just Right 0348 ET and BYU Just Right 0354 ET are flush mate brothers that initiate the PIE Just Right 540 sire group. Bold ribbed, deep sided, thick ended, and loaded with style from end to end would best describe this duo. The dam of 0348 and 0354 is the highly proven TKP Marigold 0147 donor dam that has produced countless high sellers and individuals of influence within the Pieper program. A maternal brother by PIE Cinch 4126 works in the Diamond C North Dakota program for Chase Furstenau. Two maternal brothers were purchased in 2020 by Stiles Ranch. 0348 charts among the top 20% for YW and top 9% ADG. He came to the weaning pen with 800 pounds of adjusted weaning weight and continues to impress all that have seen this set of bulls in the flesh. 0354 is the more suitable calving ease option of the brothers as he offers an impressive CED and BW EPD that ranks him among the top 39% and 25% respectively. This pair of brothers are sure to impress even the most critical on sale day with their added mass and density!

BYU Just Right 0323 ET is a standout son of arguably one of the most proven donor dams in the business. He is a maternal brother to the \$75,000 PIE The Cowboy Kind 343 AI Stud that is employed by McEntire Red Angus of Sweetwater, OK. BYU The Right Kind 9322 ET is another maternal brother to 0323 that sold in 2020 to Kirby Elenburg of Bridgeport, Texas. 0323 is a dense made, bold bodied, deep flanked herd sire prospect that charts balanced performance data and came to the weaning pen with over 620 pounds of pay weight. It is no secret that his now deceased maternal brother, The Cowboy Kind, has secured his place as one of the elite breeding bulls in the breed.

BYU Just Right 0359 ET is one of the elite calving ease prospects to sell this fall. He is sired by PIE Just Right 540 and backed by the impressive PIE Lakota 046 matriarch. Two maternal brothers sold in our 2020 sale and were among some of the most powerful bulls to ever carry the BYU prefix. 0359 is a maternal brother to the widely popular PIE Stockman 4051, one of the featured herd sires for Pieper Red Angus, Bradbury Cattle Company, and Bieber Red Angus that topped the Pieper Red Angus Bull Sale in 2015. One of Stockman 4051's most widely recognized son is the \$155,000 PIE Quarterback 789, the high selling bull from the 2018 Pieper Red Angus bull sale that was selected by 9 Mile Ranch of Washington. 0359 ranks among the top 7% ProS, top 5% for CED, top 9% BW, top 13% HB, top 1% CEM, top 11% Marb, and top 18% YG. He offers a moderate 76 pound actual birth weight and tipped the scales with an adjusted 743 pound pay weight at the weaning pen. Recommended for use on heifers.

The Stockman name resonates with Red Angus royalty, and the influence of the family name is strong with BYU Stockman 0387. Maternally he is supported by a time-tested daughter of PIE Gridmaster 589, who at 13 years of age is still proving herself as a valuable member of the herd. We like the combination of calving ease and growth that 0387 brings to the table, going from a ratio of 86 at birth to 105 at weaning. His EPD profile is equally as impressive with a top 1% CEM, top 13% CED, top 15% CW, top 19% WW and top 25% YW.

Finding a bull that can compare to the combination of calving ease and added growth that BYU Stockman 0414 exhibits will be difficult. His 70 pound actual birth weight is outshone by a massive 964 pound weaning weight and 1325 pound adjusted yearling weight. He has come forward as a powerful, growth leader that will transmit added pay weight to his calf crops.

We have admired the heavy muscle design and length of spine that 0383 has processed since a young age, in fact his moderate 73 pounds at birth only adds to the value we see in him. Phenotypically he reflects many breeding goals for us at Bayou Creek Ranch. He is a dense bodied, wide based, easy fleshing and tough constructed bull that has the structural integrity that can support an extended breeding tenure.

Continuing the trend of maternally driven Reckon 296D sons is this big scaled February son that descends from the Lakota cow family. With a moderate 75 pounds at birth and desirable calving EPD numbers we feel like he could be a good option for producers that still want some added calving ease in the cowherd without sacrificing performance. He could also be a good option if your intent is to add some red meat yield to a calf crop with rankings in the top 3% of the breed for YG, top 21% REA and top 23% FAT.

The lead off son of RED U2 Reckon 296D, and one that is extra dimensional regardless of your vantage point, being big ended and widely constructed. A large set of testicles, big feet and heavy bone structure are just added features to note after inspecting him from a muscle and width standpoint. As a product of our embryo transfer program, you can go back seven generations in his maternal lineage and still recognize the Fayette matriarch, which means consistency is bred thick into his blood. The added maternal cow power and performance resonate strong with BYU Reckon 0311.

When we purchased RED U2 Reckon 296D from the Unger Family of Coaldale, Alberta we had high hopes for him to inject extra density, compactness and true beef characteristic, you will find his ancestry is scattered with some of the most influential Red Angus cattle in North America. He has not let us down after several years as a member of the herd sire battery here at Bayou Creek Ranch we realize he has surpassed that expectation. Take note here, as BYU Reckon 0400 is a product of the program, and backed by a mainstay cow.

A prime example of what we strive to produce phenotypically, BYU Reckon 0400 is long sided and attractive, correctly built from the ground up. His slick hair type and dark pigment align perfectly with our regional requirements and the conditions that bulls in this part of the country are required to work in.

If you're in the market to add a herd sire who will add maternally focused and easy keeping females to the replacement pen then we feel BYU Reckon 0368 could be a good candidate. With the support of his PIE Payweight 418 dam, he calved at 68 pounds and has developed into a no fuss, no holes bull prospect. A maternal brother sold to Dan Selz in our 2020 Annual Production Sale.

PIE Janet 8011 is one of the oldest daughters of the influential PIE Just Right 540 sire, meaning she will be one of the first to hit her prime years of production. From what we have seen as his progeny develop they will be members of our cowherd for years to come, meaning this is an opportunity for your program to move forward alongside of ours. Backed by the Janet 1065 donor that had to prove herself the hard way through years of sale featured progeny.

This one comes from right out of the heart of the herd, and is the result of our embryo transfer program, therefore you can trust her genetics are what we are looking to lead our program into the future. She is an own daughter of PIE One of A Kind 352, and maternally you will find a leading Lakota bred daughter of the infamous HXC Conquest 4405P, a sire who is leaving a huge mark on the Red Angus breed through the influence of his daughters. Apart from an intriguing phenotype you will find a very impressive EPD profile that features top 3% rankings for both WW and YW, top 4% ADG, top 17% Milk, top 3% CEM, top 20% YG, top 10% CW, top 15% REA and top 14% Fat. There is exponential upside to BYU Marigold 9021 ET.

You will have noticed we aren't offering many females out of our super sire, the \$132,500 PIE Fullback 7005, however here is one of those very limited opportunities. Paternally the pedigree of BYU Tilly 8250 is exciting, but it's the maternal side that might be just as advantageous for her new owner. Bieber Tilly 399W is one of the Red Angus breeds most prolific breeding pieces, with 83 registered progeny in the Red Angus database and a long list of influential progeny that work for herds throughout North America. This will be a female we regret to let go of on sale day, we haven't had nearly the opportunity to tap into her breeding prowess, with that being said, take the opportunity to invest into a young cornerstone type female.

A great opportunity is presented here to invest into a female that stems from some of our most potent and prolific genetics. A result of our ET program and the combination of some of our most valuable members of the battery, being the \$132,500 PIE Fullback 7005 and TKP Marigold 0147. We cannot stress enough how valuable the pedigree is of BYU Marigold 9032 ET, two of her maternal brothers lead off the impressive set of PIE Just Right 540 sons in this year's offering. We have made great investments to create this opportunity for you to tie into a young female that a cowherd could be built around.

A royal pedigree accompanies this featured member of the sale offering. When we set out each year to put together a sale group we know we must commit only the best so that our customers have the same opportunity for success, with that being said, here she is. The cow family that builds the foundation for BYU Abigail 8038 is regarded by many as the most impressive and prolific in the entire Red Angus herd registry, the Six Mile Lakota 112Y cow has etched her name in the history books. 8038 is impressive in her own right, being long bodied, wide pinned, and has the added presence and look that the special ones always have. We think the true value of this Red U2 Mission 61W daughter will be quickly realized once she hits the donor pen for her new owners.

As you read through the offering of females it will not take long to realize we at Bayou Creek Ranch have focused on aligning the most consistent cow families in the breed, these females are backed by several generations of recognizable pedigrees. BYU Suffeina 8063 is no exception to this fact, and her ancestors have proved their worth for Red Angus operations around the United States. Her sire TLC King Of Spades 137 is bred in the purple, and consistently generates daughters who have been successful in both the showring and production. An impressive specimen in her own right, 8063 impresses her audience being extra capacious, bold bodied and expressive muscled.

A daughter of the \$25,000 Bieber High Roller C553 who in her first year in production raised a son by RED U2 Reckon 296D that sold to the Stiles Ranch in our 2020 Annual Production Sale. We like her potential to go on and keep generating for her new home just like she has for us. With SVF Gangster on the maternal side of her pedigree we feel confident that PIE Bonnie Bel 7259 is going to be around for the long haul.

This Cat. 3 Red Angus female should not be discredited because of her lack of status, she like the rest of the offering has surpassed our strict selection criteria and is good looking, sound structured and nice uddered. Her mother has been a very productive member of both the Bayou Creek and Pieper's cowherds.

THE FEMALE OFFERING

LOT 132 - PIE STRAWBERRY 2199

A female that will be of influence in our herd through her several daughters we have retained, this being the only reason she will be available for sale on October 7th. With the build of longevity that 2199 was blessed with, we believe there are plenty more productive years ahead for this descendant of the infamous Strawberry cow family. You will struggle to find many mature cows that can match the balance and fleshing ability of this Red Lazy MC Redman 20X daughter.

Daughters by Andras New Direction R240 are what build the legacy he is going to be remembered for, they are some of the most balanced, easy keeping and functional females in the breed. Tam 5063 is cut from the same mold that has built this reputation, and at 6 years of age she is in the prime of her productive years, meaning the return on investment here could be rather quick.

PIE Robin 487 is an own daughter of the \$28,000 LSF Saga 1040Y, the sire of some of the most phenotypically balanced and attractive females you will ever see. Robin 487 is no exception, and comes with the added advantage of injecting some performance into her progeny, her growth traits include a top rankings for WW, YW, ADG, and HPG.

Backed by a successful production record that has existed at both Bayou Creek Ranch and the Pieper Ranch there isn't much guess work left in this equation, just a high productivity female that still has plenty of generating years ahead of her. She has aged gracefully and because of the females we have retained in herd, feel that it's only fair to give you the same opportunity we have received.
