

THE MORIONDO FARMS AND MM CATTLE CO.

ANNUAL PRODUCTION SALE

NOVEMBER 6, 2021 AT 1:00 PM

at the ranch in Mount Vernon, Missouri

Fellow Cattlemen and Cattlewomen,

It is with great excitement we invite you all back out to the ranch for our annual production sale here in Mount Vernon Missouri! We are very excited about this set of cattle, we will be offering up 140 stout age advantage, fescue adapted, bulls. Along with, for the first time a select set of registered females. Then to close out the day we will offer some super fancy spring bred heifers and pairs from Moriondo Farms and a select set of bred females from our customer and friend Wes Spinks, at Spinks Ranch.

The SimAngus division of bulls is as deep and complete as we have offered to date. When you get in the pen with them, there is no question the power, structure, and raw performance is standing there right in front of you. You can also go to the paper and see the performance, these bulls yield out some great birth to weaning/yearling spread's, with very competitive all-purpose indexes and terminal indexes. These boys have been genomic tested, and parent verified. They are ground pounders, and we expect nothing less from their offspring. There are some exciting mating's in the SimAngus and Simmental offering, by breed leading sires TJ Teardrop 783F, Camp Campbell E737, TJ Frosty 318E, CCR Cowboy Cut 5048Z, and Hook's Eagle 6E to just name a few. These powerhouse bulls are ready to add pounds to your program.

The Angus division is centered off progressive yet proven breeding, pairing progressive bulls with proven females. We like the blend we get from these cattle. Highlighting the angus division will be bulls sired by Sitz Alpine 11076, Musgrave 316 Stunner, Sydgen Enhance and HA Value Added 7578 to name a few. Calving ease, maternal marvel's, along with growth and grid performers is what you will find when you get through the angus bulls, a very diverse set of bulls that can make a difference in any program.

The registered females have been something we have wanted to offer for a few years now and went ahead and put them in the offering. These females will give you a glimpse into the future of our cowherd and our program. Phenotype and Genotype will be a roll in our cattle, and these females represent that very well. A select group of fall yearling heifers, spring bred heifers, and a 3-year-old donor that is very special to us.

The commercial bred females speak for themselves, all have gone through the guidelines of the show me select qualifications as for pelvic measure and tract score, have been selected to be the top heifers out of our programs. Spinks Ranch purchased the high selling angus bull from our spring sale and turned in with his Brangus cross heifers, they should make one fancy set of momma cows one day, don't miss out on those. The Moriondo bred heifers will be of SimAngus origin and ready to make productive momma cows for years to come. There is also a super nice set of Fall first calf pairs that will knock your eyes out and give you expectations for what is to come on the spring bred females.

We would like to thank all our previous customers for their support and look forward to meeting new ones! We are customer based here and like to hear customer input on what they are looking for in their breeding bulls, we understand everyone has a different program and we want to be able to assist you in any way we can. We continue to strive to get the most out of our animals in the most cost-effective way, in these times we can't afford to pour input into cattle that don't perform or increase performance. When you think Moriondo Bulls think performance, progression, and longevity. We are a program that stands behind our bulls and stands with our customers, we believe in the product and look forward to working with you.

God Bless,
Mark Moriondo

Larry & Rita Moriondo
Mark, Maranda, Mila & McCoy Moriondo

Welcome,

It is indeed a privilege to welcome all interested cattle enthusiasts to the Fall 2021 version of the Moriondo Farms annual bull sale. Mark and Larry have put together an outstanding, trendsetting stock for your evaluation and appraisal on November 6. Bulls and females will be offered this year with the return of the commercial female offering as well. It's a fescue based offering with a ton of good built in for any program anywhere in the country but especially for those in the fescue belt.

The family reputation locally, regionally, and those that know of them on the national scene, is worldly and outstanding. This family is without a doubt some of the very best people in the business and in life in general. They are hospitable, customer serviced focused, benevolent beyond belief, and are very intense when it comes to improving and hustling their program to the upper most level to benefit their loyal and future customers and clients in every single entity that fuels this well-maintained machine. Larry and Rita started with very humble and hungry beginnings and along the way their success has never let them waiver from those simple memories of where they started or where they came from. They have instilled that into the kids they raised and when one works with Mark, one knows those values are deeply instilled.

Mark is very aggressive, very mature, and light years in front of those in the business in the similar age demographic. He sees the big picture, the scope, and understands the business as well as anybody. He knows that his operation needs to achieve premiums when they retain ownership to the rail and so he passes those same advantages to you, the customer by the genetics they offer through two bull sales a year and the private treaty sales as well. Mark has made himself be a student of the business and realizes that what is underneath the hide impacts the entire world population one head at a time, so each and every head counts. Grade, yield, performance, maternal instincts, and skeletal integrity are a must for survival in this sector of protein production. Big strides have been made to improve each and every year to bring you the very best the industry has to offer. They want to earn your business and keep that business for generations to come, so take advantage of the opportunity in the cattle and genetics offered here to GROW with a first-rate family and operation.

The cattle that amongst the pages of this sale book are without a doubt the absolute best that this operation has assembled to offer at public auction. One will notice the dominating values these cattle have on paper. The rankings amongst the contemporaries are very noteworthy and are up for strong consideration by any discriminating cattleman or cattlegirl. The overall physical quality is certainly strong and just expect things to ONLY continue to improve in the offerings to come.

Folks consider this your invitation to one of the elite seedstock providers in the state of Missouri, the 4-State region, and quite possibly the nation. Be a part of the drive, the initiative, the vision that this outfit has for improving that product that hits the plate. Come join the team and become a part of something that's awesome.

Enjoy the cattle

Three handwritten signatures in black ink. The first signature is 'Mark Moriondo', the second is 'Larry Moriondo', and the third is 'Rita Moriondo'.

1:00 PM - Spring Turn-Out Sale

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have excellent, high-speed internet. To get started, simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information, Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone. You can also register over the phone by calling 800-431-4452.

Click-To-Bid. This is Superior's newest way to buy cattle! Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for.

VIEWING THE AUCTION

If the sale is being broadcast on SLA-TV then, it will be available on DISH Network channel 997. Please note that there is a short delay if you are watching the auction on television, so be sure to call in at least one lot ahead of the lot you are interested in bidding on. Regardless of the television channel the sale is being broadcast on, all auctions will be broadcast live on the internet at www.superiorclicktobid.com. Some auctions will ONLY be broadcast online. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". If you just want to watch the auction without bidding online, you can do so by entering the auction as a guest. Guests do not need a username or password to watch the auction. Your computer must have Flash Media Player and Java installed to view the auction online.

For more information or if you need assistance contact Blake Tucker (308) 660-3963.

OUR GUARANTEE TO YOU AND COMMITTMENT TO SERVICE

OUR GUARANTEE

We guarantee that all bulls sold through our sale are fertile to the best of our knowledge. If a bull is injured anytime in the twelve months following the sale, that makes him functionally infertile, we will provide a replacement bull or issue a credit in following sales, equal to the purchase price minus the salvage value received for your bull. This is not a life insurance policy. The guarantee is in addition to the sale terms and conditions of the American Angus Association which apply also.

CUSTOMER SUPPORT

We believe in the cattle we are producing here and believe in the cattle that you are producing at home. When the time comes for you to market your calves, however that may be, if interested call myself and let me know your plans with your cattle and see if we can assist or bid on your calves however you may sell them. Extending every dollar in the cattle business is how it is made, and we would love to help if we can

Top third of the business for CE and WW with mean busting BW, YW, REA, and TI. We love how this calf is bred! It reads fundamentally sound and practical as it ties a lot of what is good in this business. Upgrade was one of the changers of the Simmental breed in the last 20 years, Emblazon was utilized by most Angus breeders at one time or another to blend phenotype, fleshing ability, and moderation of size. Together it is generally harmonious with shape, eye appeal, good udders, and big calves at weaning time.

MISSOURI SHOW-ME SELECT REPLACEMENT HEIFER PROGRAM

The Show-Me-Select® Replacement Heifer Program uses the latest research on health, nutrition, genetics and reproductive science to ensure Missouri counties continue to be national leaders in providing quality beef. The program focuses on Missouri's farmers and is dependent upon active participation from regional extension livestock specialists and local veterinarians, each of which are critical components of the agricultural sector of this state.

This program is unique in that it is an educational program targeted at improving production efficiency through increased use of existing technology, coupled with the marketing component.

Program Objective:

Improved heifer development programs through a Total Quality Management strategy
Increased marketing opportunities for and added value for Missouri-raised heifers
Creation of reliable sources of quality replacement heifers based on management, reproduction and genetics

Genetic Requirements:

Sire requirements: Eligible sires must have known ID, be registered by their respective national breed registry, and have complete EPD (opens in new window) information. Sires will be evaluated for qualification in the program based on the EPD provided by their respective breed registry and not on EPD produced by progeny registration in any other breed or hybrid registry.

Angus minimum Calving Ease EPD of 7.0

Simmental and SimAngus minimum Calving Ease EPD of 14.0

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

This impressive, young 3-year-old female comes to your appraisal with a heifer calf at side. A direct daughter of the Genex stud CCR Payday 0320C allows her to best the field amongst her contemporaries on paper. She offers top 3% Milk with top 15% Stay, and compliments the maternal with top 20% WW, top 25% YW and maintains indexes in the top half. What a genetic combination that is only enhanced with the proven influence of the great Final Answer on the bottom side. We know that you will appreciate her high-quality udder, impeccable feet and running gear, with substantial base width, dimension, and body. She's the right kind with the bells and whistles, opportunity presents itself for the taking.

We think that you will appreciate the Teardrops as much as we do. They seem to be well accepted wherever they roam, and this is another prime example of why. The Main Event influence is very strong, and it just makes it better from a phenotype standpoint. Main Event is quite possibly the best phenotypic stud to come out of Triangle J in the last 20 years and that influence is strong through the Teardrop cattle. This one is top 20% WW, YW, Milk, and balanced in every other trait you need to consider.
