P R O D U C T I O N   S A L E

**WEDNESDAY, FEBRUARY 23, 2022 • 1PM • PIPESTONE, MINNESOTA**

# Welcome

TO THE ANNUAL CHESTNUT ANGUS PRODUCTION SALE

*I would like to welcome and thank each and every one of you for coming to our Annual Bull Sale. Our success comes from you, and I'm truly thankful for the relationships that my customers, family, friends, and neighbors have given me, that makes this cattle business and agriculture community so strong. I would like to thank my Wife Sherri, as well as Wesly, Dawson, Justin, and Kayla for all of the hard work and dedication they put into this operation day in and day out. I would also like to thank those whom have helped out along the way. I don't think people realize the amount of time and people it takes to put things like this all together.*

*I would like to welcome each and every one of you to our Annual Production Sale. It was great to experience the new and wonderful facilities in Denver and this year, we were very fortunate to have exhibited the Grand Champion Pen of 3 Bulls, as well as the Grand and Reserve Champion Pen of Heifers at the National Western Stock Show! Coming off of this excitement, we have brought to you what we feel is an outstanding set of bulls and bred females to this year's sale! There are bulls within this offering that excel in a wide variety of traits keeping you all as customers in mind. These cattle are powerful, functional, and are the kind to go on and be profitable for your operation no matter what your specific goals are.*

*The door is always open for you to stop by, we would be happy to answer any questions that you may have and how our genetics can influence your program.*

**ALL REGISTERD ANGUS BULLS HAVE BEEN GENOMIC TESTED THROUGH ANGUS GS, AS WELL AS PARENT VERIFIED AND TESTED FOR ALL NECESSARY GENETIC DEFECTS!**

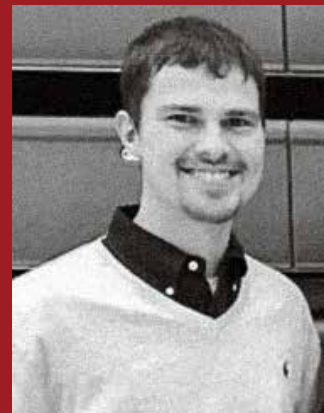

*Glenn Johnson*

## INFORMATION

### SALE LOCATION

2242 90th Ave, Pipestone, MN 56164

### SALE DAY CONTACTS

*Glenn, 507.820.1502*

*Wesly, 507.215.7348*

*Justin, 507.696.1133*

### AUCTIONEER

*Seth Weisbaar, 605.210.1124*

### SALE MANAGEMENT

*Innovation AgMarketing LLC*

*Graham Blagg, 530.913.6418*

*Tim Anderson, 605.682.9343*

*Jered Shipman, 806.983.7226*

*InnovationAgMarketing.com*

### MARKETING REPRESENTATIVES

*Chris Effling, Special Assignment, 605.769.0142*

*Tony Heins, Cattle Business Weekly, 701.400.4435*

*Donnie Liddy, Cattle Business Weekly, 605.695.0113*

*Andrew Swanson, 507.829.4133*

*Cory Thomsen, 605.730.2397*

### TRAVEL

*Crossings by GrandStay Hotel & Suites Pipestone*

*915 7th St SE, Pipestone, MN 56164 · 507.562.1100*

*Joe Foss Field Airport · Sioux Falls, South Dakota*

*50 Miles from Sale Site*

### DELIVERY & YARDAGE

*Bulls will be available for load out sale day after complete payment has been made. After March 15th Chestnut Angus will begin delivery of sale bulls within reason, visit with Glenn and Wesly Johnson for more information. Bulls that do not have prior arrangements made will be charged \$5/day after March 15th for yardage.*

### ANNOUNCEMENTS

*Announcements made sale day and from the auction block during the sale take precedence over printed materials associated with this sale. Anyone attending this sale attends at their own risk. Chestnut Angus and sale force will not be held responsible for any personal injury for attending this sale.*

### TERMS & CONDITIONS

*All cattle sell under the terms and conditions of the American Angus Association. Terms available sale day.*

### EPDs

*The EPDs listed are Spring 2022 numbers. Please note that EPDs may change from the time the sale catalog is printed until registration papers are transferred.*

### BULLS SELLING

*Chestnut Angus is retaining one-third semen interest on all bulls. Additionally, the supplement sheet will outline special terms & conditions and/or any changes in retained semen interest in any of the bulls selling.*

### INSURANCE

*We recommend serious consideration is taken about insuring your herd bull purchases. Insurance will be available sale day via Martin-Trudeau Insurance. Ray Trudeau, 605.770.5170.*

### SEMEN CHECK AND ULTRA SOUNDING

*All bulls will be semen tested and ultra-sounded prior to sale day, results will be made available via a supplement sheet posted on Innovation AgMarketing website and the Chestnut Angus Facebook Page.*

### HERD HEALTH

*We have a no exceptions approach to Johnes testing and prevention here at Chestnut Angus via annual, whole herd testing. If a suspect animal is identified they are culled from the herd immediately along with their calf.*

### VIEW & BID ON DV AUCTION

# DVAuction

# Dear Cattlemen & Women,

*The history following Chestnut Angus may not mimic the typical legacy ranch story that you will find behind many of the programs operating at the same caliber. There was not a cowherd that was passed down generation after generation, nor was there a breeding and marketing program set up for Glenn, Sherri and their sons to walk into. What you see today as the CN brand has been built solely through a dedication to performance Angus seedstock and fulfilling the needs of a growing customer base. The upward trend of success and accomplishments of this family owned and operated program have arisen because of the unwavering approach they have taken to a selection criteria that yields results, regardless of the wandering trends of the cattle business.*

*Inevitably it is pounds that drive dollars in this business, and whilst many of us share a passion for the beef industry, just like that of the Johnson Family, it's becoming increasingly important to focus on the profitability of your program as margins tighten and input costs skyrocket. With this in mind, we realize there are many options out there that provide registered seedstock of value, but we suggest you take serious thought about the addition of Chestnut Angus genetics to your program, regardless if you raise registered or commercial cattle. This offering is driven by maternal power; you will notice the accumulation of the Angus breeds most legendary cow families on the bottom side of each bull's pedigree, along with sire groups that represent the forefront of the breed from a genetic and performance standpoint.*

*The 2022 National Western Stock Show marked a milestone in the trophy case for Chestnut Angus, bringing home the coveted Grand Champion banners for both the Bull and Female Pen of Three shows. While showing approval is not the focal point of the breeding decisions in Pipestone, the true beef quality that is consistently generated in each calf crop has been able to bridge a boundary that many operations cannot. Each member of the champion bull pen will sell, right alongside six of the other bulls that garnered crowds to the impressive new set of pens in the Mile High City. Whilst the bulls that made the trip to Denver sell between lots 1 & 10, do not disregard the quality of livestock that sell with higher lot numbers. We can attest there are dynamic genetic options and herd sire prospects of serious quality all the way through this book, including two scale mashing commercial Angus bulls and three Simmental influence options that would even qualify for sale highlight status in leading production sales of their respective breed.*

*When it comes to finding an operation to entrust your cowherd's future in, Chestnut Angus; Glenn, Sherri, Wesly & Dawson Johnson and the family like crew they associate with, deserve your consideration. The program they have built and continue to aggressively foster, offers strong foundations for a long-term relationship to navigate the task of creating the most nourishing and favorable protein known to man. We at Innovation AgMarketing are honored to stand beside and represent such a progressive seedstock operation, please feel free to reach out to any member of our team, or the Chestnut crew with any questions or queries any time leading up to February 23rd.*

*We look forward to seeing you in Pipestone,*

*Graham Blagg • Tim Anderson • Jared Shipman*

<b>85</b>	<b>882</b>

*Chestnut Growth Fund 571 leads off the most dynamic bull crop in the history of our program, the class of 2022 have been an impressive group in many different fashions, at the scale, in the flesh, on paper, at the backdrop and in the pasture. We are excited to present you these Growth Fund sons, and 571 continues to prove his case as the forerunner among his contemporaries. He excels as a growth leader of the group weaning off his VA First Round mother, Chestnut WJ Beauty 6120 with 882 pounds of pay weight, but it's the stylish presentation of his dense muscle mass, wide back shape and robust body shape that have elevated him to the next level in our mind. From a performance standpoint, genomically he sits among the elite 5% of the breed for weaning and top 10% at a year, phenotypically we would rank him among the top 1%.*

*481 is the Growth Fund son that goes back to a young Brooking Asset daughter that has begun to build quite the reputation for herself with a 106 weaning and 127 marbling ratio. In his own right, 481 ratioed a 111 at weaning time and continues to push the envelope at the scale, we love the square and powerful outline he was built with. Combine this power with the ability for ease of stride, flexibility at the ground and the maternal quality that comes built in, you can trust that his influence on a calf crop will be profound, especially come pay day when his progeny goes to market.*

85	858

*Growth Fund 281 came to the pen at weaning time with just shy of 900 pounds of pay weight, pretty impressive, especially when you consider that his dam is only a three-year-old. We love the combination of phenotype and EPD predictions that the Growth Fund sons possess, they are stout in their feature, rugged about their structural design and powerful in their muscle shape. 281 finds maternal support through a Kramers Enforce daughter that ties together the influences of PVF Insight and VA First Round, sires of maternal excellence in the Angus Business. We predict progeny of lot 3 will mash down the scale and be heavier muscled than the rest of the cohort.*

*Chestnut Eyes OnYou 331 offers a fresh pedigree to our program, however many of the members of his pedigree have already proven their value in programs across the nation. He has a build that is extra satisfying in terms of muscle shape and width and came in off the cow at a whopping 900 pounds to ratio an impressive 113. We are impressed with the band full of sons we raised by E G Eyes OnYou, this one even reads for some improvements in calving ease but like the rest of his brothers comes with some extra punch. You will notice the influence of Beast Modes dam Baldridge Isabel Y69 as a maternal grand dam. If you enjoy curve bending performance cattle that carry extra muscle then serious appraisal is due here. 331 was also a member of our Champion Pen at the 2022 National Western Stock Show.*

CHESTNUT EYES ONYOU 331

MEMBER OF CHAMPION PEN

CHESTNUT REDEMPTION 81

*It's no secret that the sons of Chestnut Redemption 38 were crowd favorites last year, in fact his son, United topped our 2021 sale at \$70,000 and we are excited about the early reports of his progeny. In 2022 Chestnut Redemption 81 has emerged as the leading son of this sire group, at the scale he ratioed a 115 at weaning time, and genomically sits in the top 5% of the breed for weaning and top 10% for yearling weight. He also ranks in the top 15% of the registry for rib eye area and dollars up with impressive profitability indexes of +163 \$B and +284 \$C. If you're searching for a bull that will add pounds to your bottom line and red meat yield on the rail then the infusion of 81 in your breeding program would be very logical.*

**\$125,000 PATERNAL  
GRANDDAM OF LOTS 8 & 9**

We are excited to present Chestnut Atlantis 61, a herd sire prospect that we ourselves have huge plans for in the future of our own cowherd. Seldom do individuals come along that possess the unique combination of style and maternal with power and performance as this direct son of Square B Atlantis 8060, the Rainfall son that has gone on to be a generator of the right kind. It comes to no surprise based on the generations of maternal prowess that lines his pedigree. Square B Atlantis 8060 is sired by the \$460,000 S A V Rainfall 6846 and backed by the \$125,000 pick of the Connealy Angus females, Elbanna of Conanga 1209, making him a maternal brother to widely popular and proven Connealy Confidence Plus as well as Connealy Equity. At birth this January born weighed a mere 76 pounds but exploded towards weaning to ratio an impressive 123 and bring 930 pounds to the weaning pen. February 23rd the opportunity to invest in this herd sire prospect will sell, however that is just the beginning of the first chapter in the story 61 is set to write. **TERMS & CONDITIONS ANNOUNCED SALE DAY**

*Chestnut Atlantis 231 conforms to the trend we have seen in these Atlantis sons, cattle that bring together high-performance growth traits and breed leading maternal value. We admire the extra deep side and easy fleshing ability of lot 9, and we predict that beyond the incredible growth he brings to the table, he will sire females that sort themselves to the replacement pen. Particularly when you consider the several generations of maternal power you receive built in from the Beauty cow family that support the Chestnut Undisputed daughter who raised 231. 231 was a member of our Champion Pen at the 2022 National Western Stock Show.*

MATERNAL BROTHER TO LOT 12

*Look at the extreme curve bending growth pattern that Growth Fund 551 brings to the table, seldom will you see the spread from a top 4% calving ease to top 10% weaning and yearling weight traits. A very impressive combination that nominates him to a new league when it comes to a herdsire prospect that will generate profits for producers that sell calves in the fall. His +91 \$Weaning index is among the elite 3% of the database and the cow family he stems from has been a standout producer for us here in Pipestone.*

DAM OF LOT 13

*With just shy of 900 pounds of pay weight when he ran across the scale at weaning time, Growth Fund 371 has always been towards the front of the class. We think a lot of the massive phenotype he sports; he is constructed with muscle shape and density in mind. You will find him to be one of the burliest herd sire prospects to sell on February 23rd and not only do we think he will add pounds but you can trust in the cow family that his daughters will stem from as the Blackbird Susan tribe has been a mainstay in our program. He is a maternal brother to the \$22,000 Chestnut Strut sold to Krebs Ranch.*

DAM OF LOT 14

*Chestnut Growth Fund 401 is a direct son of one of the most notable and highest productivity females in the history of our program, the Chestnut Wetonka WJ 63 matron that recently sold on Embryos on Snow – Denver for \$33,000 to Dustin Kittle of Tennessee. She is also the dam of Chestnut Redemption 38, our high selling bull in 2019 and the sire of our 2021 sale stopper, Chestnut United. The addition of Growth Fund to the pedigree has only added to the impressiveness of 401's EPD profile and the prestige of his pedigree. Here you find a combination of the best we have to offer.*

\$17,000 MATERNAL BROTHER

*We continue the trend of these bold sprung, power bulls sired by the Select Sires leading man, Deer Valley Growth Fund. Not only is there power paternally, but on the bottom side of his pedigree you will find a Up Start 760 daughter that has already delivered the goods with a \$17,000 Redemption son that sold to the Bayer Family of Wisconsin last year. He mashed down the scale with 905 pounds of weaning weight and tabulates with expectations for his progeny to be just as impressive come marketing time.*

*Growth Fund and out of the Peg cow family, if you agree with our breeding philosophies of consistency is key then the purchase of Growth Fund 681 will make for a happy customer. Several maternal brothers have been past sale highlights and sold into cowherds of progressive cattlemen, and the track record of Peg 679 features a 105 weaning and yearling ratio on her four bull calves to date.*

*If you're looking to add massive amounts of pay weight to your bottom line then you have come to the right place with Growth Fund 601. Ranking among the top 2% of the breed for both weaning weight and yearling weight, top 5% \$W, top 10% \$F, top 25% \$B and top 15% \$C he comes with impressive predictions to potentially add more pounds to a calf crop in a single generation. It's not by chance either, the infamous Wetonka cow family makes up for the maternal power in this instance, and a maternal brother to 450 was a highlighting Redemption son that sold in 2021.*

## CHESTNUT GROWTH FUND 301

*Chestnut Growth Fund 301 puts together the best of both worlds, whilst he may not read as a sleep all night heifer bull, he still sits among the top 30% of the breed for BW with a 0.3 figure, however the highlight of his predictions comes when you turn to the massive +88 and +161 weaning and yearling figures that rank him among the most elite of the breed. We appreciate cattle with a curve bending growth pattern, but 301 takes this claim to the next level. A great option for those that want to add breed leading growth without making sacrifices for birthweight.*

**441** rounds out the Deer Valley Growth Fund sire group, he maintains the consistent combination of high-quality phenotype, performance and genomic predictions that we have come to find so often in his sons that we had born in 2021. A set of dollar indexes that will rival the best of them as well as maternal support from the Beauty tribe, a bull that will yield results and profits.

## LOT 22

We love the build of these Square B Atlantis sons, they come packed with extra muscle shape and dimension, and when it comes to comparing from a width stand point he excels. This leading son of the sire group has density that starts at the ground, and his triple digit yearling figure is understandable when you realize the true performance he stems from himself. Generations of the Beauty cow family build his maternal lineage, and there is no question that means power in the blood. We know that the progeny generated by Atlantis 91 will be impressive looking and the type that buyers will be fighting over.

CHESTNUT ATLANTIS 381

An eye appealing and long spined son of Square B Atlantis that stems from the influence of a young Barstow Cash granddaughter. He weaned off the second calver with 866 pounds of pay weight and has always been an impressive herd sire prospect that is expressive in his muscle pattern, tight in his sheath and square and wide in his pin set. We think his ability to raise market topping steer calves is just as likely as the one to generate replacement females you won't want to let go of.

CHESTNUT TRUE NORTH 841

## LOT 27

*Chestnut True North 841 presents himself as a very versatile option for an operation that is searching for a herd bull that can deliver a performance driven set of genomic predictions, real world performance and a balanced phenotype that would generate female progeny that are built with longevity and maternal in mind. 841 reminds us of his father Square B True North 8052 in regard to his easy fleshing body type, easy on the eyes profile from the side and outstanding foot quality. There is cow power on both sides of the pedigree here, as 8052 is a maternal brother to the Confidence Plus promotional sire, and on the bottom side you will notice an upstanding Knock Out 204 daughter that stems back to the Sandy tribe.*

**LOT 25 | CHESTNUT ATLANTIS 771** A data set that reads for big improvements in growth and performance accompany this Atlantis son. He sports figures that sit top 4% for weaning weight, top 10% yearling weight and top 3% MW so it's safe to expect he will add to your bottom line if you sell your calves by the pound. His extra good looks come from the inclusion of C&C McKinley in his pedigree, and a generation further back the maternal quality is driven by Connealy Danny Boy.

**LOT 28 | CHESTNUT STUNNER 971** Chestnut Stunner 971 is a product of the program, with CN prefixes on either side of his direct pedigree you know he is backed by cattle that have been hand selected for quality. He is a ranchman's bull that's number profile is just as balanced as his quality phenotype. His sire, Chestnut Stunner 639 continues to impress both here at the Deschepper Ranch of South Dakota by consistently siring cattle with more performance and growth than their contemporaries.

*The combination of Ridl Roosevelt and the Wetonka cow family has certainly yielded the results once again here with 451. You would recognize similarities in the pedigree with one of our proudest breeding accomplishments to date, Chestnut Redemption 38. We love the design of this late January born stud, he is so powerful up high, and even from the point he recorded an impressive 876-pound weaning weight we realized that his pounds are made up of true shape and muscle, not just excess body cavity weight. He is sharp featured and attractive from the side too.*

75	844

Another Strut son with performance at the forefront of his highlighted traits, he goes back to the Peg cow family, a tribe that has built the backbone of the CN program. Whilst performance remains number one, the older born Chestnut Strut 71 adds some extra look to the equation, something we place lots of value in because we enjoy good looking livestock and ready for longevity.

We combined some of the most potent herd sires we have run in the pedigree of 251, you will notice the inclusion of both Chestnut Strut and Chestnut Knock Out 204. Lots of growth will be found with the service of lot 38, his tubulations reflect the same claims with top 10% weaning weight, 5% yearling weight, top 5% RADG. We place importance on genetic tabulations but when it comes to real world data it's even harder for us to ignore, with that in mind check out the 910-pound weaning weight of this stud, that allowed him to ratio a 118 off his first calving mother. Serious additions of pay weight will be the end point here!

*We purchased KR Incredible 8166 from the Krebs Ranch of Gordon, Nebraska as an outcross pedigree, performance driven, maternally powered and eye appealing herdsire to offer our clients and cowherd a fresh option for success. The five sons of his that sell as Lots 45-49 prove that he consistently upholds the expectations we had for him. We think you will appreciate the growth pattern of these 8166 sons, they have proven to be the ranchman's kind in design and follow in their sires' footsteps with impressive length of body, appropriate foot shape and build of longevity. As you have come to expect from our program, the maternal pedigree that backs all of these sons is highlighted by cow families that have provided the goods for generations here in Pipestone.*

We initiate this group of calving ease sires with a son of Merit Sting 7047E that not only tabulates for calving ease but came into the world with a mere 66-pound birthweight. Whilst he may have come small that isn't how we would describe his growth pattern since as 311 has kept up the pace with the rest of his contemporaries. You will notice the inclusion of the Brooking Bank Note sire as the maternal grand sire here, he is noted for tremendous udder quality, ease of fleshing ability and longevity.

70	766

R5 Solution E111 has become a go to calving ease herd sire for us at Chestnut Angus and the Effling Family of South Dakota. Even though his progeny come small and easily his service brings no jeopardizing weight per day of age and performance. In the case of 671 we think him going from a -0.6 to triple digit yearling figures is pretty impressive, and the moderate 70-pound birthweight he had proves the proof in the pudding.

62	802

We think Chestnut Solution 621 is one of the most impressive outcross calving ease sires we have raised to date! Not only does he sit with the most elite 1% of the breed for birth weight at -3.1 but he excelled in the pasture and at the side of his Royal Stockman 326 sired dam to wean off with more than 800 pounds of pay weight to ratio a 106. When you view him in person we think he impresses with a design that is bold yet square, with an eye appeal and structural design we deem as ideal. We think that bulls with the pedigree, data set and build of 621 offer a world of good to the beef industry and can be implemented in various different production models to provide the kind that yield profit for producers.

You can entrust these sons of Solution E111 to be potent additions to the herd sire battery, with resulting progeny that will surprise in regard to their growth pattern after a very easy entry to the world. 631 came unassisted and light, at only 60 pounds we were impressed with how he has come to develop into a herd sire prospect that is functional and balanced, the no fuss type that will get the job done!

CHESTNUT TURNING HEADS 51

LOT 54

A great calving ease prospect that provides a surefire option for use on heifers and for operations that are low input in terms of husbandry. Whilst he may sit within the top 10% for both CED and BW, he is curve bending towards weaning and yearling. Chestnut Turning Heads 51 also sits in the top quarter of the breed for RADG, only further proving that not only is his service going to supply calving ease, the progeny will come to the scales with some performance. You may recognize his sires name as the \$40,000 high selling bull from 2020 sale that went lead the Angus sire batteries for the Wheatland and

CALVING EASE BULL

Michelson programs in Canada, he was recently slapped Reserve National Champion Angus Bull at the 2021 Canadian Western Agribition.

BW	ADJ. WW
81	779

Whilst we focus on the Angus business at the root of our cause, is a passion of good livestock, regardless of breed composition. 861J comes from the limited sampling of Simmental genetics we incorporated into the breeding season of 2020, a son of the \$400,000 Purebred sire, Profit and out of and impressive HOC Mr. Broker half-blood female. The growth pattern of Profit 861J allowed him to run right with the contemporary group and his  $\frac{3}{4}$  breed percentage allows for the further injection of hybrid vigor on an Angus based cowherd.

Angus enthusiasts will see CNWJ Profit 721J on sale day and wish he came with a AAA registration number; we love the extra rugged feature and explosive muscle pattern of this three-quarter blood Simmental stud. The Profit sire group is renowned for adding mass and shape, and generating females with awesome look and structure. There is lots of upside quality here, he comes from the influence on S A V Brilliance maternally and one further generation back you will find the legendary, Remington Lock N Load 54U.

A direct son of the Triple Crown winning and proven generator of the right kind, HOC Mr. Broker. This half-blood will produce stock that work on either end of the spectrum, at the scale or in the replacement pen, you can ask many respected cowboys across the nation of the influence these Broker cattle have in their cowherd, it's a story that only continues to impress as the years go on.

# commercial

## BRED HEIFERS

### 70-72

We have compiled three groups of commercial, Angus based, black hided bred heifers to offer. They are not split by quality, but arranged only by their calving date and all three groups off a consistent calving blanket and service sire. A strong emphasis was made on the selection for fundamental production traits and a focus on longevity through feet, legs, udders and disposition. By following this selection criteria, we feel like each group offers females that will mature into a phenomenal set of production cows. These females were raised out of raised out of Chestnut Angus bulls and have been developed with both production and reproduction in mind. They are bred to be tough and are supported by females that have been required to survive and thrive through the ever-changing environments we see on the Northern Plains. The initial group of 10 bred heifers are due to calve within the first ten days of March, they are carrying pregnancies by the high selling Chestnut Redemption 38 (AAA 19242590), our curve bending, beifer bull that sired United. The next 10 will calve at the end of March and the first days of April, and the final group of 7 will calve when the weather is nice in the middle of April.
