W/C
Werning Cattle Company

41ST ANNUAL PRODUCTION SALE

FEBRUARY 8, 2022 | NOON | EMERY, SOUTH DAKOTA

WELCOME

This is my 41st attempt to put pen to paper and welcome you to another W/C Production Sale. We are so blessed and most appreciative for the opportunity to invite you to our sale. It is exciting for us to share with you our continued commitment and dedication to making cattle better. We are confident you will find them even better this year, and we invite and encourage you to come and see for yourself.

As you know our consistent genetics are a large part of our five-decade herd history. It all started back in 1971 when the first Simmental semen was used. That first bull was the great Signal- he produced great females to start us on our way. Other great Simmental bulls followed, but we were also working on our Angus base with bulls like Rito 72 and Rito 149. As I look back, I feel so fortunate that many of the bulls we used proved to be tremendous performance and maternal sires. I still remember those great Rito 72 females from the mid 70's. They were so productive and eye appealing.

Our successful past and present, as well as our future is 100% related to our mama cows. If the mothers are good- it is all good!

This year's offering will again include the multiplied progeny of our leading lady donor cows. Our extensive transfer program has enabled us to create the opportunity for you to select from groups of genetic full brothers and sisters. If it were not for embryo transfer, we could not and would not be sharing all these treasures that are the very nucleus of our genetic vision. Our passion and commitment for the future begins with every sunrise.

The bull offering is highlighted with true performance prospects sired by proven W/C herd sires. We have

again added new exciting sire groups that will satisfy new and longtime customers. Selling true performance leaders that will increase your weaning weights, yearling weights, and feedlot gains. The popular age advantaged bulls are the biggest and best set yet- tough, stout, athletic bulls with power, performance, and ready to go to work.

The elite bred females represent generations of maternal excellence. Few herds can match the proven pedigree history that these W/C ladies possess. We have been building these maternal pedigrees for the last 50 years. These W/C ladies are genetic factories ready made for your operations- many of donor quality. We are offering our entire 2020 bred heifer crop quality in volume.

Our sale traditionally produces breed leading herd sires that go on and have mass appeal nationwide that generate great semen demand. With that said, the prices paid for bulls does vary greatly, but the majority- 75% of our bulls sell for under \$7,000. There will be tremendous performance genetic values available at all price points.

We take our role in the beef business seriously. We thank you for the trust you have in our ability to supply profitable performance genetics for your herd. It is our privilege to serve the greatest beef producers in the world. We thank each and every one of you for your business and friendship. It takes special people to love this business- people that work with their hands and talk from the heart. We welcome your visit to our ranch anytime. Our sale facility has been a tremendous addition to our operation and we invite you to gather with us for a great beef dinner before the sale. We thank you for your interest in the W/C genetics and we invite any and all questions.

Dale Werning

THE WERNING FAMILY

DALE & JOAN • SCOTT, ASHLEY, CREIGHTEN & THATCHER • WILLIAM, JILL, KINLEY & KHLOE • JARED & KASSI

What an honor it is to stand aside a multi-generational, family owned and operated program to present this 41st edition of the Werning Cattle Company Production Sale. The Werning program has been an instrumental force in the seed stock business and there is no doubt that the W/C prefix has been directly linked to as many notable individuals in the Simmental breed as any, they look forward to continuing this trend in an upward direction, well into the future.

It's without question that trials and tribulations have been faced over the four plus decades that the Werning Family have been marketing Simmental influenced genetics, however it is the same morals and values that the program was initially built upon that have allowed for it to stand the test of time. Deep faith has been instilled in the basic principles of beef production, a focus has been put on maternal power and longevity, no shortcuts have been taken when it comes to building these cattle flawless at the ground first and then making selections thereafter. Trends may come and go, but the breeding principles at the W/C remain on a consistent pathway to building beef cattle that are designed to cross industry fads, ones that can work in a diverse range of climates and production scenarios and ultimately increase the productivity and in turn profit margins of a producer. While there have been several individuals that have surfaced over the past forty plus years who have seen the limelight from a national and even global crowd, it's the ones that have left a legacy among the cowherds of the loyal supporters and friends of this program that fire the passion this ranching family has for the business.

The unwavering approach to looking out and for the customers' needs first will continue to be at the soul of the marketing program here in Emery. This program is a result of first building a product that ensures customers are at the forefront of the market, and then through serious investments of time and genetics, continuing to provide them with the building blocks that solidifies this position generation after generation. The Werning family realizes that their number one commitment is to the bottom line of their customers.

A special opportunity presents itself from lots 200-339. After a dry year, and several years of building the cowherd numbers, the decision had to be made to offer a larger group of bred females than in the past. After much deliberation the tough decision was made to completely disperse the entire group of 2020 born bred heifers through this 41st Production Sale, with this comes the opportunity to dive deep into the soul of the cowherd. The Werning program has aggressively continued to pursue the utilization of embryo transfer to propagate the most elite members of their cowherd at an advanced speed, meaning the opportunity to secure full and maternal siblings to some of the Simmental breeds most potent individuals knocks on February 8th. Many of the females that highlight this offering would have never been given the chance to leave the ranch if it wasn't for the mentality that drove this decision to be so difficult, the fairest opportunity for the customers is to offer everything.

We look forward to the opportunity to host you at the ranch, South of Emery, South Dakota. Again in 2022, this annual marketing event will be one of the prime transaction points of the nation's most elite seedstock, and the consistent theme of fundamentally exceptional Simmental cattle will be felt just as strong as ever. As you begin to consider the investments you will make in breeding stock for this coming year consider the addition of not only Werning genetics to your program but tying into a family operation that has proven over generations that their biggest commitment, is to the success of their customers.

It is with pleasure and kindest regards that we present the Werning Cattle Company- 41st Annual Production Sale.

Enjoy the cattle,

VIEWING OF CATTLE

Cattle can be viewed at the farm any time before sale day.

INSURANCE

We take every precaution for the care and safety of your purchases. Yearling bulls can be kept free of charge at our risk until April 15th. Insurance available sale day.

SEMEN INTEREST

Werning Cattle Co. will be retaining at least one-third revenue sharing semen interest in all bulls selling. This means if we would like to collect semen on the bull for our own use, we would have the option to do so. Also, if semen is sold we would retain one-third revenue. The new owners of the bulls will have full possession and full salvage value.

TERMS

Terms of the sale are cash, check, or credit card payable immediately upon conclusion of the sale and before animals will be removed. 4% user fee for credit card payment.

VOLUME DISCOUNT

Purchased by one firm, discount starts with your 3rd bull as follows: 3 bulls = 3% discount; 4 bulls = 4% discount; 5 bulls = 5% discount; etc. 10 or more bulls = 10% discount. No discount on bred heifers.

FEEDING + DELIVERY

All bulls selling for \$3500 or more will be kept free of charge until April 15th. At that time we will semen test, give prebreeding shots, pour, worm, and freeze brand. We will then arrange delivery to you. We offer free delivery to South Dakota and surrounding states. We will help with travel coordinations beyond these boundaries. W/C will take responsibility of injury or death loss while the bull is in our care.

We would appreciate pick up or delivery arrangements of the bred heifers to be made within a few days of the sale.

\$100 Discount if you take your bull sale day.

FALL CALVING OPERATIONS

With our growing number of fall-calving customers, we are now offering those of you to add \$500 to the purchase price of your bulls and we will feed them until the fall.

Delivery will then be arranged.

ON ORDER PURCHASE POLICY

If you are interested in some of the cattle selling and are unable to attend the sale, we can purchase the cattle for you on order. We guarantee your satisfaction, or you don't own them. Please call early so we have time to visit about the offering.

GUARANTEE

The bulls are semen tested and guaranteed to be breeders. Any problem you have with our bulls is our problem. We will do our best to correct any problems that may occur. If a problem does occur we offer a suitable replacement if we have one available or credit towards a future purchase. The bred heifers are pregnancy checked and guaranteed to calve within the time period printed.

LIABILITY

All persons who attend this sale do so at their own risk and owners or sale personnel assume no liability for accidents.

BULLS

LOT 1

The pair of baldy faced sons of Bankroll 811D that come with immense power and shape, generations of cow power and have been impressive at every stage of development. The combination of the \$205,000 W/C Bankroll 811D with RAB Ms Marty Y9207 has proven again to be surefire, a full brother has already entered the Lee Cattle program through our 2020 Production Sale. This pair of brothers were chosen to lead off this 41st Edition of the Werning Cattle Production Sale because we think they epitomize the values we set out for, to produce seed stock that directly and quickly increase the value of a calf crop with improvements in pay weight, phenotype, longevity and carcass traits. Bulls that will work in a range of scenarios and will add a genetic twist maternally, a dynamic way to start off the impressive class of 2022.

W/C Bankroll 8035J is homozygous polled and would read the same for phenotypic quality if you could test for it, we absolutely love this half-blood's build! He is the perfect combination of body length, shape and density. He has matured with impressive testicular development, head and neck masculinity and ruggedness of feature. Top off his impressive outline with a perfect baldy face and a pedigree that includes one of the most impressive S A V Pioneer daughters you could find, D W Hazel 036X. If you are interested in what his daughters would look like, take the time to inspect the impressive set of maternal sisters by Lock N Load that highlight the bred beifer offering as lots 283-287.

The full brother to the \$202,000 high selling bull in the 40th Anniversary sale that sold to Gustin and Griswold, W/C Bank On It 273H! This purebred Bankroll 811D son may only be an April calf but that has been disguised by his elite growth pattern and maturity pattern. We love the stoutness of feature, squareness of build and intriguing head and neck set of this future breeding piece. He is the result of combining generations of potent cow families that are responsible for serious returns on investment for those that have entrusted their influence.

YEARLING BULLS

A pair of extremely intriguing brothers that stem from some of the most memorable animals we have had the pleasure of hosting on the ranch. By combining the dam of Fort Knox, in K-LER Dolly's Queen 609D and the Kroupa Pukwana purchase, the infamous 'Chinstrap' bull that combines Bankroll and Rita 5406, we have generated some impressive bovines. Both parents were phenotypic outliers in their own right, and the heritability of this elite build has proven to be potent through to this next generation. This is a pair of 5/8ths, homozygous polled and black brothers that need to be seen in person to grasp the upper echelon build they have been blessed with. Elite quality, backed by the best in the business, cow families that lead the business are the foundation here.

The combination of the \$205,000 W/C Bankroll 811D and K-LER Dolly's Queen 609D has already been immortalized by several individuals of notoriety, most famously, the first edition being W/C Fort Knox 609F, the high selling bull in the 38th edition of this Production Sale at \$180,000. Fort Knox has become a force in the breeding program for the W/C and those that invested in him, including the talk of the town, red baldy highlight from last year, Bet On Red. An individual with a strong case as to being one of the most unique, purebred generating animals in this offering.

LOT 8

W/C Bankroll 817J personifies exactly why we think 811D is one of the most potent Simmental bulls we have ever been fortunate enough to raise and propagate, his surefire ability to click with purebred Angus females to increase mass, muscle shape, performance and eye appeal is unmatched. This half-blood comes to the scenario with a data set that is hard to match, when it comes to real world numbers he came into the world at 83 pounds to ratio a 97, and then flipped to the other end of the spectrum with weaning and yearling ratios of 114 and 117, respectively. His adjusted yearling weight is a whopping 1523, a number that is among the upper echelon in our program's history. Genomically his figures align with the excellence he has proven in the real world, and when

it comes to sorting females phenotypically, his PVF Insight mother rises to the top, the Bankroll x Insight mating works every time.

LOT 9

A direct son of Bankroll that comes with some extra chrome all over; he goes back to a high powered, purebred Angus cow from the Bar 9 program, that's sired by ICC Pay Raise 4886. When 813J came to the weaning pen he impressed with 814 pounds of weaning weight to ratio a 113. Numerically he tabulates for this same leading growth trend sitting among the top 3% of the breed for weaning weight and top 10% for yearling weight. The terminal index is also a high point of his data set where he sits among the elite 15% of the registry.

LAZY H ROSIE F89
Dam of Lot 10

A direct son of Bankroll 811D that carries purebred papers and comes from the heart of the embryo program, meaning there is a standout female that stands behind him. His mother is Lazy H Rosie F89 is the Relentless daughter that goes back to 3028A, a full sister to Angel 2870Z. There is more than just a performance bull for sale here, he comes with generations of cow power to support him.

LOT 11

A purebred son of Mr Right Now E1538 that we appreciate in regards to his squareness of hip, rugged hind leg design, looseness of body shape and eye appeal. Maternally you will notice a Bankroll 811D daughter, his influence will be one we keep turning to for years to come, his sons and daughters alike are as well received as any sire group we have ever used and we think they will lead our program securely into the future, particularly as his daughters begin to prove themselves in production.

THE BRAND FOR RESULTS

W/C

RANCHER APPROVE

A big set of consistently extra bold and big ribbed sons of the all-time high selling bull in our program W/C Bankroll 811D and out of a standout Hoover Dam donor cow, each of this group of brothers are homozygous polled and stacked for cow power. Maternally you will also notice the influence of an awesome Bon View New Design 1407 cow that came out of the historic River Hills program, the cow power that comes with these brothers is rich with good udders and perfect feet and legs. We love the extra punch you see in their hip and back shape, plus the length of spine and awesome look from the side. As a group they are complete from end to end and have been blessed a structural build indicative of extended breeding tenures on the cowherd. The dam of these bulls produced a \$17,000 LNL son that sold our 2020 sale. If

you're searching for either an individual or a group of full brothers that come with the best of both worlds in regard to adding pay weight and the opportunity for replacement type stock then take the time to find these men.

FORT KNOX 609F X 174Y

FLUSH BROTHERS

A trio of purebred, Fort Knox sons, the past high selling and proven sire of high sellers that breeds with the same unique combination of power and structure that he became so famed for the Spring of 2018 when he sold. These homozygous polled herd sire prospects are flush sons out of the 174Y donor, a full sister to the most recognizable female in the Simmental business, 8543U. Check out the unique way that they combine above average predictions for both yield grade/ribeye area and marbling, traits that often work conversely.

LOT 21

We think the opportunity to secure this purebred breeding piece deserves consideration from seedstock producers that align with our phenotypic goals. W/C Fort Knox 6350J is ultra-unique in his design, he combines all the extras that are hard to obtain, particularly when tied together in one animal like you have in this purebred package. Extra big footed, heavy structured, expressive stifted, soft haired, extended about his front third and the curvature to his back shape is impressive. Maternally he is a direct son of a Remington Lock N Load 54U x Miss 534R cow that lives up to the fame of that pedigree in terms of her quality.

W/C Fort Knox 805J is a homozygous polled, 5/8ths son of the past high selling Fort Knox 609F that stems from the influence of Loaded Up 1119Y through the AHLB Fate 805F female. He is long spined and smooth in his muscle pattern, with a big set of running gear. He excels for the Milk and MWW traits sitting in the top 4% of the breed. For both weaning and yearling weights he sits in the top quarter of the entire database and top 10% for ribeye area.

W/C FORT KNOX 609F
\$180,000 Sire of Lots 18-24

LOT 23

A son of Fort Knox 609F that tested homozygous polled and is of purebred status, he trends towards a curve bending growth pattern and could be an option for well managed heifer projects. Maternally you will notice an outcross Kappes bred cow that has proven to be a worthy investment for our program.

	BW ADJ	82	WW ADJ	760	YW ADJ	1340	SCROTAL	37	ADG	3.62		

This baldy is sappy middled and powerful from behind, he is a cowman's type of bull that will add pounds yet still provide maternal to generate top class replacements. W/C Doctors Orders 9759J comes with a 5/8ths Simmental breed make up and is out of a first calving Mr SR 71 Right Now E1538 daughter that has set him off on the right step! Not only did he go from a 96 birthweight ratio to a 106 weaning ratio but he tabulates for incredible curve bending genetics too. Sitting top 25% for CED and BW that flip to top 10% Wean and Year figures. Check out the top quarter of the breed API number and impressive top 10% TI, a bull that will potentially add profitability to your calf crop.

An absolute sale standout, in the history of Werning Cattle Company W/C Lock Down 9729J has recorded some of both the heaviest weaning and yearling weights at 907 and 1578 pounds, respectively. This son of the staple herd sire W/C Lock Down 206Z replicates as closely to his sire at the same level of maturity as any son, and that's a serious compliment now that we are approaching a decade of his progeny in the cowherd. Leading the class of 2022, 9729J ranks among the elite 1% of the breed for both weaning weight and yearling weight and we foresee making a quick and massive addition to the pay weight of a calf crop. The impressive thing to keep in mind is the curve bending way their weight comes as the BW and CED numbers for this blady stud are still better than breed average. Pounds pay and this could be one of the most potent opportunities to add pay weight that we have ever offered in any edition of our production sale!

A baldy faced power bull that will be sure to add valuable pounds to his progeny is a single generation. The Lock Down cattle no longer need to prove their worthiness as over the past decade his progeny have consistently risen to the top, gaining the respect of cattleman, nationwide. This 5/8ths stud is built rugged and stout, he ranks top 20% for both weaning weight and yearling weight, top 10% carcass weight, and top 35% TI. His dam is the pinnacle of power in the blood, a Cornerstone 32C back on the infamous 534R.

LOT 31

The single opportunity to acquire a son of Loaded Up 1119Y in this impressive group of yearling bulls. You will notice that W/C Loaded Up 9206J shares the maternal power of lot 1 and 2 being out of the same RAB Ms Marty Y9207 donor female. In his own right, this 3/4 blood, homozygous polled stud draws a crowd, because he is so intriguing to the eye. We love his long and extended outline, one that starts with a perfect blady face and finishes with a perfectly laid in tail head to a wide and stout pin shape. At the ground you will find a set of big and square feet, dense and rugged bone work and a running gear that is flexible, up above is the big rib shape and aggressive muscle shape that we constantly set out for. We think the sky's the limit here as phenotypically he is sure a unique creature, and pedigree wise he provides some mating flexibility.

W/C Double Down 9105J takes on the job well of representing the Double Down 5014E sire group, here we have a natural born purebred bull out of the W/C RJ Miss 8543 6105D donor dam. Meaning there is a direct and close tie to the highest grossing cow in the history of the breed along with added growth that the United sire constantly proves to inject. The curve bending growth trends of 9105J are impressive, including a below average 83-pound birthweight that exploded to ratio 107 and 112 at weaning and yearling, respectively.

W/C CEO 735J may be one of the youngest herd sire prospects we will sell on February 8th, but you would struggle to notice that when you compare him to the rest of the cohort. His impressive growth pattern has allowed for him to catch up to the pack at the scale house, and genomically you will notice that trend as he reads for top 10% rankings across weaning, yearling and average daily gain. Furthermore you will notice carcass traits of excellence in the CW, yield grade and rib eye area traits. A cowman's-built bull with the performance to impress any performance-oriented operation.

This burly three-quarter blood has a pedigree that is stacked for performance. W/C CEO 603J comes from a long line of business influencing bulls across the Simmental and Angus breeds, including CEO, Bullseye and Pioneer and with this notoriety comes consistency in the blood. We love the powerful body shape this baldy brings to the equation, we predict his progeny to be easy feeding and explosive in their muscle shape.

LOT 36

W/C CEO 961J is a purebred son of the high-performance leader, CEO, however when it comes to uniqueness of feature he stands out among the crowd. We love how stout his bone design is, the way his neck ties high at the top of his blade and the extra body shape and depth he has been composed with. He is solid black hided comes with some moderation, we fore see his daughters being prime producers, and you will notice the inclusion of a matron in our cowberd that has been a producer for over a decade now as his mother.

LOT 38

A pair of intriguing purebreds that combine some of the newest members of influence in our breeding program, being direct sons of W/C VIP 005G and out of the full sister to Fort Knox, W/C Miss Werning 899F the \$55,000 half interest purchase of our friends at Gustin Cattle Company. Homozygous polled by pedigree, these two bring some serious power to the equation, if may have been the earlier maturing of the pair bringing an impressive 810 pounds to the weaning pen but credit to the younger of the pair is due, as 5613J caught his brother at a year adjusting to almost 1240 pounds. This pair deserve serious consideration from seedstock and commercial cattlemen alike, as they offer quality far beyond just increasing pay weight and performance.

W/C Right Now 1198J has a pedigree spangled with the best we have to offer here in Emery, he is the lone black bided yearling son of the infamous W/C Miss Angel 2870Z in this offering, and we think is a pretty special individual. This purebred is a direct son of the curve bending king, Right Now E1538 who has helped develop a strong EPD profile for 1198J alike. Across the board you will notice top 15% or better for BW, CED, MCE, Doc, YG and REA. He came to the weaning pen with close to 800 pounds of pay weight and has an adj yearling weight of 1481. In the flesh it's hard to deny the looseness of build and flexibility of spine in this stud, combine that with a wide pin set, eye appealing front third and powerful stifle and he is no doubt a sale feature.

W/C Revolution 65G is the \$140,000 valued son of Right Now that was selected by longtime friends of the program, Windy Creek Cattle Company. In this first calf crop it was quickly realized that his value as a breeding bull was worth all the hype, and this pair that lead off the sire group present themselves as high performance, extra growth studs that will inject serious dollars into the pocket of producers. Not only is the topside of the pedigree stacked with notoriety but perhaps even more power comes from the maternal side that features the W/C Miss Werning 751E, an Executive Order x Husker x 534R who has several featured sons in this offering including lots 58, 59 and 85. Big time purebred herd bulls here that are breed leading for performance!

W/C Revolution 65J will make a trip to South Dakota well worth it if you're hunting for a purebred herd sire that is homozygous polled, homozygous black and is backed by some of the most valuable cow families in the breed. This beast is a direct son of the infamous Miss Werning 534R matron that has been the root of our program's success in the Simmental business. Her timeless generating potential is proven again with this initial mating to W/C Revolution 65G, showing there are still success stories tying directly to her influence. Lot 52 came off his recipient dam with 800 pounds of weaning weight, and continued in an upward manner recording a projected yearling weight of 1428 pounds. There are highlights scattered through his EPD profile and phenotypically he is a sight to behold.

REVOLUTION

FLUSH BROTHERS WITH LEADING PERFORMANCE

W/C Revolution 65G has evolved as a surefire injector of performance, he was the high selling Mr SR 71 Right Now E1538 son from his rookie calf crop, and between the ones we have here in Emery and those that will highlight the Windy Creek Production Sale you will realize that his influence is going to be one we will continue to entrust for serious pay weight additions. These 3/4 blood flush brothers go back to a Lock down x High Regard donor cow that is a remodel producer and past generator of sale feature bulls.

LOT 56

W/C Revolution 570J may round out this powerful set of W/C Revolution 65G sons but don't they sometimes say, you have to keep the best till last? We see massive quality in this homozygous polled and black purebred, and to top it off he comes with the backing of some of the most consistent and potent cow families on the ranch. This powerful baldy is a direct son of 174Y, the full sister to 8543U that continues to prove her own case as a nationally acclaimed herd bull generator. Though he may wow in regard to power and shape we love how smoothly he ties it all together, and the ease and comfort he motors with.

W/C Turnpike 0019J begins the exciting group of Turnpike sons that we are offering in 2022, his sons were well received last year for the added growth and performance they offer, traits that directly affect your operations profitability. Here we have a homozygous polled, purebred that ranks above average for 13 individual traits and strikes a powerful pose from the side. He goes back to a Bullseye x Sequoia Y770 daughter and we project him to develop into a larger framed herd sire that will positively impact growth and carcass in his progeny.

A pair of purebred flush brothers sired by the growth stand out and generator of real-world performance, Ruby's Turnpike and out of a young, up and coming donor in our program W/C Miss Werning 751E. This Executive Order daughter finds maternal support through a Husker x 534R daughter which translates to power in the blood and will be one that sees continued focus going forward. Both are homozygous for poll and black traits, and both pushed the scale down with more than 700 pounds at weaning time, growth additions will also be seen in their EPD profile. In the flesh you will like these bulls even more as they are the easy keeping, big bodied type, that motor with ease and have a proud look.

W/C MISS WERNING 751E
 Dam of Lots 58 & 59

RUBYS TURNPIKE 771E
 Sire of Lots 57 & 63

TURNPIKE x 6175

A set of rugged purebred brothers that are dense and massive, the type we suggest to producers that share our values of hybrid vigor and the potency that it can inject value to the bottom line of a calf crop, particularly in the commercial setting. Supported by a young donor that comes from the heart of our cowherd, she has shots of 8543U and 543R on either side of her pedigree and will continue to be a source of high-end genetics for years to come. These bulls sport a balanced EPD profile that trend for additions in pay weight and performance, along with impressive improvements to ribeye area, back fat and yield grade.

MISS WERNING 534R
Influential Dam of Lots 67-69

A trio of maternal brothers that find origins within the best cow families both the Simmental and Angus breeds have to offer. Maternally these three brothers are direct sons of the cornerstone dam of the Werning program, Miss 534R, a female with more than 200 registered progeny that is approaching two decades of excellence. She is directly linked to more high sellers, breed influencers and record setters than you could count, and we will forever be grateful for the role she has played here at the W/C. Paternally you will find a father son combo, S A V President was one of the most anticipated sires to ever sell in the hills of St. Anthony, North Dakota, only trumped by his initial son to go under the hammer, the world record setting \$1.51 million dollar S A V America. The power is in the blood here, the only decision to be made is which or how many you'd like to take home with you.

THE BRAND FOR RESULTS

LOT 70

W/C MISS WERNING 951G
Dam of Lot 70

W/C Night Watch 951J is a homozygous polled ¾ blood that provides a very dynamic and well-rounded combination of power through phenotype, pedigree and via his genomics. This direct son of Night Watch 84E is out of a Bankroll 811D times the infamous Forever Lady, Angus cow family. The dam of 951J created quite the reputation for herself after several championships on the tanbark for the Curtain family of Iowa. 951J continues to mature with performance, but keep in mind he still only ratioed a 97 at birth with an 83-pound birth weight. This star headed stud is proud headed and smooth outlined, all built upon a correctly designed running gear.

W/C ANGEL 7113E
\$240,000 Valuation Full Sister to the Dam of Lot 71

W/C Night Watch 81J has emerged as one of the premier purebred calving ease options that will be offered this Spring, as a direct son of 84E, and back on a Relentless x Angel daughter he is stacked with a pedigree that reads for superior phenotypic value as well. He calved unassisted with an 82-pound birthweight, and sits top 10% for both CE and BW, you will notice he has developed with some performance though turning in an adjusted yearling weight over 1400 pounds to ratio an impressive 108. We love him from a build standpoint, and the way he has matured with some extra punch and substance.

LOT 73

LOT 74

A very successful embryo purchase that combines one of the most intriguing half-blood females we have seen in the last couple of years, a PVF Insight daughter, SFI Miss Kiss This C3M and one of our proudest breeding accomplishments to date, W/C Night Watch 84E. With maternal power coming from either side of the equation you will see the results are three very impressive 3/4 bloods. 1574J has been a performance leader among this entire Spring 2021 crop of bulls, and is projected with an impressive 1490 adjusted yearling weight! If you are in the market to add a herd sire that is deep sided, easy fleshing and will bring improvements of udder quality and longevity then mark these boys as ones to inspect when you come to Emery.

If you like them smoother muscled and easy keeping in their build then W/C Triple Threat 9117J will catch your eye here in Emery. Not only is he homozygous black he also sports a EPD profile that you'll struggle to poke a hole in. Check out his massive 157 API index, one that's built to reflect the opportunity for profitability in the commercial setting, that number is among the top 10% of the entire breed.

LOT 79

We lead off this rookie calf crop of WINC Mahomes 979F progeny with a three quarter blood that is ultra-elite in his build, we love the added power and masculinity that he proudly struts with, the quality reaches from end to end in W/C Mahomes 789J and we think this homozygous polled stud has the quality to plead a serious case in being added to the herd sire battery of top commercial and seed stock operations, alike. High quality livestock, he has already made friends of all that have toured early, and just like his sire, the future is bright for this breeding piece. If his individual quality wasn't enough you can trust that the maternal tree he stems from is spangled with notable influences, including CCR Anchor, NLC Upgrade and ALC Treasure C50P.

W/C Mahomes 6344J is a powerful purebred son of our choice of the ES Surelock sons at Windy Creek, he carries on the family tradition of bigger framed, stout hipped and heavy muscled sons that stem from this genetic tree. Maternally you will see 6344J is a close derivative of the 534R cow maternally through his United 956Y sired mother.

WINC MAHOMES 979G
Sire of Lots 79-82

LOT 81

A big and round bodied son of Fort Knox, we continue to learn the value he is adding to the breeding program and are excited about these daughters in production. This black and polled purebred stems maternally from the influence of the Miss Werning 8060F, a new donor in our program that resulted from combining Executive Order and Angel 2870Z. His balanced phenotype is matched by a fool proof EPD profile, and we project his quality to breed on with high heritability because of the consistency in his pedigree.

LOT 82

W/C Mahomes 8063J will have a crowd around him come February 8th, this purebred has always been a favorite of those that visited the ranch and his sire is setting himself up for a notable success story in the history of our program. Extra burly in his build and stout featured and both homozygous black and polled, this baldy faced son of WINC Mahomes 979G stems from the female that started it all for us, Miss Werning 534R so you will never have to question the cow power that comes standard issue with the service of 8063J. When it comes to finding a herd bull that will add real world beef quality in a single potent generation then take serious consideration of securing the services of this purebred, ground pounder.

LOT 83

A direct son of the man that put our program on the map, Remington Lock N Load 54U. This 5/8ths goes back to the maternal Angus legend K C F Bennett Absolute on the maternal side so you can trust he has just as good odds raising fancy replacement type females as he does market topping steer calves. Awesome from the profile, we appreciate the secure and correct structural build he has starting from the ground.

Massive injections of growth will come through the service of W/C Mainstay 533J. In his own right, 533J weaned off his Lock Down dam with 811 pounds of pay weight to ratio an impressive 113 against his contemporaries. His EPD tabulations also make him elite in this offering with a top 2% weaning weight figure and joins the elite group of animals with a yearling weight figure that is +150. You will notice other highlights including top 4% MWW, top 3% CW, top 10% REA and top 15% TI. Performance geared and approved.

LOT 87

A pair of double half blood brothers that go back to some of the most notable percentage cattle to derived from our program. Sired by Family Tradition, the Silveras Style son out of the highest grossing Simmental cow in history 8543U, that was purchased by the keen cowboys of the Reimann Ranch. And out the deserved Supreme Champion Female at the North American International Livestock Exposition for Sara Sullivan that resulted from the surefire mating of Bankroll 811D and EXAR Rita 5406, a combination that's been responsible for several featured bulls here at the W/C alike. There is some serious maternal power in this situation, and like the star-studded pedigree they come from, this duo conforms to the standards. The set of replacement females that will be generated here will be lights out!

LOT 89

Some very unique individuals combined in the pedigree of W/C Rolex 554J to create this deep sided and extra flexible, homozygous polled three-quarter blood. Rolex was a high selling bull in 2018 sired by Utah and out of the great 8543U, maternally you will see a full sister to Sara Sullivan's Supreme Champion Female at the 2018 North American. Plenty of growth comes with this trendy pedigree, and real-world acceptance will be earned quickly.

Truly one of the most exciting herd sires that will go under the hammer, and perhaps ever has here in Emery. W/C Bankroll 269J combines two of the most notable individuals in the history of our program, and you could perhaps say the entire breed. This purebred red baldy is the result of crossing the \$205,000 W/C Bankroll and the proven generator and National Champion, W/C Miss Angel 2870Z meaning there are two direct shots of the highest generating female in the history of the breed, 8543U. She is approaching \$9 million dollars in direct progeny sales and continues her stranglehold on the industry to this day. You will want to see this burly stud in person, we have no doubt that you will agree that he too shares the phenotype that has been seen in countless breed changing members of his family tree.

A red hided 5/8ths that is a direct son of the sire of timeless excellence here in Emery, W/C Lock Down 206Z. He has a fault free phenotype and reads for some additions in performance. You will notice a young CEO daughter maternally that goes back to the great influence of 3C Pasque L746 Blk Z.

LOT 98

We initiate the mature bull offering with a red hided stud that ties together phenotypic value to run with the best of them. W/C Lock N Load 7053H is homozygous polled, rugged structured, masculine headed and necked, burly in his body cavity and moves with ease. He tabulates for calving ease and himself came into the world with a mere 71-pound birthweight, we keep the scale well calibrated here in Emery so we trust he will be a serious calving ease option. His pedigree reads of some of the greats to come out of our program, Lock N Load, Executive Order, Sure Bet and 9514W.

LOT 101

W/C Night Watch E757H poses a very interesting option for those who are in need of a bull that will improve calving ease, without making sacrifices in the performance of a calf crop. In fact across the board he tabulates above average for close to all traits that the ASA keeps track of. He is a direct son of the proven generator of the right kind, W/C Night Watch and out of a full sister to the highest valued bull in our program's history, W/C Bankroll 811D. Not often will you find purebreds with the sleek head and throat latch of E757H, we think he will do lots of good in the breeding pen.

LOT 102
W/C Family Tradition 1242H

Two full brothers that will definitely draw crowd, we mated the infamous Broker daughter, Hara's Miss Heartbreaker 422B to a past sire of attraction who we have affectionally grown to know as 'Family Tradition' and we are thankful to offer their appraisal to the public. The generating potential here is vast, this is a pair of bulls that will produce cattle that work on either end of the spectrum, but we foresee them working best to add an intriguing and sound phenotype to a program that retains females. Either way you can trust that there is serious power in the blood here with many siblings fetching large price tags, including a full sister that will hit the showring this year that found a hammer price of \$109,000, and several others fetching between \$35,000 and \$8,000.

POWER BULL! We lead off the Ruby's Turnpike sons with this stout built, extra heavy and rugged featured half blood, homozygous polled, stud. You don't make them much denser than this Hoover Dam grandson, and if you go back a further generation you will notice the inclusion of the infamous female maker BC Lookout. Versatility is key to a successful breeding program, 3024H combines the best of both worlds.

RUBYS TURNPIKE 771E
Sire of Lots 122-124

This pair of Turnpike full brothers tick many boxes in our minds, they are purebred, meaning they can provide large amounts of hybrid vigor in the commercial setting, they are both homozygous polled and black to ensure a uniform calf crop and they come with the maternal support of a proven Bullseye donor cow. Add the fact that they sport curve bending predictions for growth and we think that the only choice to be made is if you need just one or both to only add more consistency to your program.

W/C Bankroll 115H is a natural born son of the D W Miss Hoover 115Y donor, she is responsible for six full brothers to 115H selling as lots 12-17 in the yearling division. The 2020 born edition of the brothers is homozygous polled and weaned off the donor dam with more than 750 pounds of pay weight. We think he becomes a logical choice if you're searching for a herd bull that's ready to go to work early, and in a program that retains females.

Here we have the lone son of a past sale attraction and now highly sought-after W/C Miss Werning 5013C donor that was acquired by the Hicks program. W/C Bankroll 1228H is the solid black, purebred 811D son that carries lots of meat on his skeleton, he like the rest of this offering will add red meat yield to your calf crop, and we think that sounds like a fairly logical way to create more of the best protein known to mankind.

ANGEL 2870Z

TWO-YEAR-OLD AGE ADVANTAGE BULLS

W/C MISS ANGEL 2870Z
Dam of Lots 132-134

Three direct sons of the phenomenal Angel 2870Z matron, a cow that's gone on to prove that championship banner winning cattle can make it in the real world too, with a long list of progeny that lead breeding programs around the nation. Three different sires offer some differences in mating flexibility, but the consistency of this cow has resulted in similar phenotypic value, you will notice you can choose between differences in homozygous polled and black status. Across the board they read for great calving ease and would make for strong candidates to breed to younger cows.

THE BRAND FOR RESULTS

W/C

LOT 135

An early maturing, Lock Down son that has the structural build that dictates he has a long breeding career ahead, couple this with the fact that he already has impressive testicular development and has a hefty presence on the scale he won't be hard to find on sale day. The Lock Down cattle flat work, many repeat customers still sort them out as their leading choice sire group for calving ease and longevity.

We combined some notoriety in the pedigree of Lot 140, he is a direct son of the famous Fort Knox 609F and out of the full sister to 8543U in the Werning 174Y donor, needless to say there is power in the blood here. He is a purebred and has that baldy face that is always attention seeking. We think he adds value to the commercial setting with the opportunity for hybrid vigor and will produce calves with an explosive muscle pattern from end to end.

Mr W/C Nightwatch 1301H is a perfect option on the search for a purebred calving ease herd sire prospect, a direct son of the Night Watch 84E that has matured with some extra performance. He went from a 69-pound birthweight to an 732-pound weaning weight, impressive when you take into consideration he is out of first calf heifer. His mother is a Loaded Up 1119Y daughter back to the FBF1/SF Sheza Scarlet donor that is doing a great job for the T Bar T program.

We have combined the best of both worlds here in the pedigree of W/C Night Watch 897H, he is a three quarter blood that tabulates for both balanced calving ease and performance traits, sitting top 35% for CE and Weaning Weight. He is a direct son of the Night Watch stud that continues to impress and goes back to the influence of United and a Box Car grandmother that garners the goods every year!

W/C Instinct 766H is a big bodied and powerfully built three quarter blood that will put muscle shape into a calf crop while maintaining that important easy fleshing ability we focus on breeding for. The paternal sisters to 766H are impressive!

Homozygous polled and HEAVY! The last time we ran W/C Instinct 478H over the scale he proved that sometimes the best proof is in the pudding, weighing an impressive 1714 pounds to put himself among the upper echelon of this age advantage group. These Instinct cattle are proving to be the right kind, and maternally you will see the time-tested combination of Lock N Load and a high quality New Day 8005 sired Angus female.

There is no denying that the build of Mr W/C Night Watch 8005H is extremely unique. This homozygous black and polled purebred in an impressive creature, extra soft in his angles, so flexible in the way he plants his feet to the ground, a neck that extends way up in the air and a body cavity that is extra round and capacious. He comes with a EPD profile that tabulates for calving ease and we predict him to be a great option for heifers after a season of trial. In the maternal lineage you will see a Relentless 32C daughter out of Biscuit 4007B, the High Regard x 8543U donor that has made many friends in her travels.

A 3/4 blood that is derived from the heart of our fall born program, he tested homozygous polled and sports a square and balanced outline. Genomically he is backed by an EPD profile that projects improvements for growth, a trait that directly effects almost every beef producer. Like the best ones always do, you will notice the inclusion of Lock N Load on the bottom side of his pedigree.

The five purebred Angus bulls we present as lots 157-161 represent an elite group of sire prospects that provide an option to inject a generation of hybrid vigor to those that have predominately utilized Simmental genetics for several seasons, but the quality here is so high that we truly believe several of these brothers deserve employment in seedstock operations. S A V America 8018 holds the world record for the highest priced bull, across breeds in the beef business, he set the world on fire when the gavel dropped at 1.51 million dollars in 2019. His influence is what has resulted in the upper echelon performance traits you see across the paternal brothers, ones that are proven by the impressive ADG numbers they generated on test. Take notice of the appearance of two staples in our cowherd, 036X's is the dam of lots 157-160 and her mother K36U is responsible for the maternal power of lot 161. The influence of these cows is deeply embedded in many of our top producers, we have 100% faith in the cow power that supports this impressive group of purebred Angus herd sires. We look forward to seeing which individual or individuals you tie into first.

By no means do we claim to be leaders in the Angus game, but we truly think there is some special pieces that this stud brings to the entire industry. A son of Ellingson Aquifer 9137 that will make many friends of those that make the trip to Emery, his undeniable presence means he is always a standout amongst any crowd, couple that with the sheer mass and dimension he struts with and it's hard to not believe he is bound to make an impact. Maternally he stems back to the infamous Soo Line Rose cow family that is responsible for millions of dollars of revenue generating, particularly north of the boarder. The grandmother of 9200J was a \$100,000 purchase for the Rust Mountain View Ranch and has gone onto prove to be a very profitable investment.

Dale Werning

BRITNEY SPENCER

MISS WERNING KP 8543U

Dam of Lots 200-205 · The Simmental breed's highest dollar generating donor dam!

When it comes to pinpointing a female in our program that set the standards for excellence, the Miss Werning 534R matriarch is the one we have looked to in Emery for more than a decade. She has in excess of 200 registered progeny in the American Simmental registry and has been a blessing to this operation. Her legacy will long live throughout our cowherd, not only through direct progeny such as the infamous 8543U star, but as a feature of the second generation in a pedigree as many grandsons and granddaughters are paving their own stories for operations around the world. We have combined the 534R influence with one of the most proclaimed sires to emerge from the Schaff Angus Valley program of St. Anthony, North Dakota, S A V Raindance 6848, he and his flush brothers were the talk of the industry when they set records through the 114th Annual SAV Production Sale. The results are impressive with 4 flush sisters that are consistently, ultra maternal in their build.

LOT 200 A super brood cow prospect, that is so robust in her build, extra massive middled and powerful in her ribcage design. Her foundations are set square on an ideally designed set of feet and legs. We love the presence she struts with and think she processes the extra pizzazz that has made this cow family so important to the Werning Cattle program.

LOT 201 W/C Miss Werning 021H comes with an added degree of shear power and dimension. There is no denying the added substance she brings to the equation and we think her combination to W/C Lock Down 206Z will yield either profit or a replacement.

LOT 202 W/C Miss Werning 074H comes with most moderate birth weight of the sisters, and was confirmed pregnant to calve on March 7th with a double bred half-blood calf by W/C Lock Down 206Z

LOT 203 W/C Miss Werning 075H rounds out the homozygous polled and black flush sisters sired by SAV Raindance 6848. Like her sisters the maternal power she has been built with exudes generating potential and we look forward to hearing about the long success story she will have for her new owners.

We combined the exceptional phenotypic design that 534R stamps so consistently with and the elite status performance stud, TJ Main Event 503B, who has become a consistent source of ensuring more pounds in a potent single generation. We love the versatility this female brings to the equation, she blends power and phenotype effortlessly, she has a perfectly square hip and pin set, soft angles and extra burly body shape. We think this 3/4 blood female is a serious bull generating candidate and has a different twist to her pedigree that leaves the sire selection conversation wide open.

LOT 205

The single opportunity in this 41st edition of the Werning Cattle Production Sale to acquire a purebred daughter of the one that it all stems back to, Miss Werning 534R. Seldom opportunities will exist going forward to secure direct daughters of 534R, we don't let go of her daughters easily, many remain employed right here in Emery, and if it wasn't for the fact that we are offering the entire 2020 born calf crop this one would be too. Sired by CDI CEO 281D, you can rest assured that this homozygous polled and black, power female has both the genetic and phenotypic stripes that will make her addition to the cowherd one that brings serious value. She will calve with a purebred pregnancy to the proven calving ease stud, SR Mr. Right Now E1538.

A trio of homozygous black and polled sisters that stem from the less notable but equally as valuable, full sister to 8543U. Miss Werning 174Y has written her own success stories here at Werning Cattle, her first calf crop yielded the promotional sire for Sloup and BF Black Simmentals in W/C Innocent Man and several daughters are featured members of donor pens in some of America's most progressive cowherds. Not only do they possess the fundamentals that our cowherd has been built around, they have the extra unique features that have made this cow family so infamous across the entire seedstock industry. Sired by CDI CEO 281D ensures that there is going to be no lack of density or width of skeleton, and no sacrifices are made when it comes to foot shape and size. All three sisters are expecting MR SR Right Now E1538 calves that too will carry purebred status.

We have combined the influences of some of our most noted individuals of recent, the \$180,000 W/C Fort Knox and our senior member of the donor pen Miss Werning 174Y. There is absolute power in the blood here and its evident in the flesh too as both W/C Miss Werning 010H and W/C Miss Werning 049H are extra stout in their build, with a wide pin set and deep, robust rib cage design. These females are super striking in their look too and have a flexible gait. We are liking the young group of Fort Knox females that have entered the cowherd already, and being out of 174Y there is no doubt these two will not make phenomenal cows in production. These are not your typical built purebred females, and deserve appraisal on sale day as we feel like their generating potential is limitless going forward.

We are excited for you to see this one in the flesh, pedigree wise she paternally is outside of our wheelhouse, however after paying attention to movements on a national stage, the influence of HPF Quantum Leap Z952 has proven to generate Simmental seedstock that align with many of our selection criteria, being easy fleshing, impeccable structured and have a strong maternal presence, without sacrificing some growth and muscle. Those are all terms epitomized by this direct daughter of the National Champion female W/C Angel 2870Z, whilst acceptance in the showing is not a part of our breeding decisions we feel the combination of these two past National Champions has resulted in a female that regardless of production goals provides huge value to the business.

LOT 213

We love the extreme brood cow that W/C Angel 0112H is developing into, she is so big middled, round in her upper rib cage and deep at the center of her underline. The mating to Koch Big Timer was a new twist on the matriarch Angel 2870Z however we are excited about the resulting outcross, balanced numbered and robust built female it yielded. The Angel cow family has been a staple here in Emery, but of recent there have been several maternal sisters to 0112H that are going far beyond expected in production, we don't think the story will be any different here. She comes bred to W/C Lockdown and will calve towards the end of February.

W/C MISS ANGEL 9005G
 \$120,000 Valuation Maternal Sister to Lots 212 & 213
 Owned with SK Cattle and Harrell Cattle Company

LOT 215

The eye appeal of this striking purebred baldy comes as no surprise when you look at her pedigree. A direct daughter of W/C Bankroll 811D combined with the leading Innovator daughter, W/C Angel 8598F has resulted in a sale featured female that always catches the attention of those who have come to look. Angel 8598F has quickly began to prove her hype as a cornerstone type female going forward, a full brother to lot 215 was a bull sale highlight in 2021, W/C Cyclone 385H, was the selection of Bruhn Cattle he was used heavily, we look forward to hearing calf reports on him this coming spring. W/C ANGEL 0129H is long and sleek about the build of her front third, combined with the extra foot size and bone that comes standard with the 811D influence. The prospect of her purebred Night Watch 84E calf has us excited too as we feel phenotypically these animals align perfectly.

LOT 216

W/C Angel 0113H brings together some one the most elite animals we have had on the ranch, she is a daughter of Mr SR 71 Right Now E1538 and is out of one of the newest elections to the donor pen, W/C Angel 8598F. 8598F is an Innovator out of the National Champion and generator of excellence Angel 2870Z. A purebred that has awesome presence and is super eloquent outlined from the side, square in her pin set and has the soft running gear, but it goes further than a pretty face because she is accompanied by a very impressive set of genomic predictions that include 13 traits sitting in the elite top quarter of the breed. Big time opportunity to secure a female to build a program around.

LOT 217

W/C Miss Werning 098H is no doubt the foundation type of female you can build a program around, the kind that regardless of your approach to the business can satisfy even the most discriminating cattleman, on the hoof, scale, computer or her progeny at the rail. We love the intriguing outline she ties together so smoothly, and her pedigree that aligns some of the most potent generators in not only our program but the entire breed. When it comes to the genomic tabulations 098H excels across the board. This purebred, provides an early calving date also that allows for her quick nomination to the donor pen, she needs to be investigated when you come to Emery for this 41st edition of the Werning Cattle Company Production Sale.

It takes generations of aligning the best to come up with results like you will find in this Turnpike daughter, she is so sharp and angular about her head and neck, yet so massive in the shape to her middle third and structural makeup. At the ground she sets wide and square on all four points of contact, and hinges perfectly with a hind leg that's design is indicative of longevity. Not only does 0102H excel form a build standpoint she sports an EPD profile that excels in several areas, she sits in the top third of the breed for Wean, Year, MWW and ADG and from a carcass standpoint you will see a top 5% YG, top 20% BF and top 10% REA.

W/C ANGEL 7113E

\$240,000 Valuation Full Sister to Dam of Lot 218

LOT 219

W/C Miss Werning 038H is a unique creature, she follows in the footsteps of her notable father being extra heavily boned, heavy muscled, wide hipped and big backed. A purebred female that whilst being so rugged up high, carries herself with unwavering flexibility at the ground, and poses with a feminine look and presence. Tying together a muscle pattern like that of 038H with the cow power and symmetry that she has is not common, add the fact that she is homozygous polled and impressive on paper and we present a very exciting opportunity to get in at the ground floor on a serious donor quality female.

Owned with Griswold Cattle Company
& Gustin Cattle Company

KS MISS SEQUOIA Y770
Dam of Lots 221 & 222

A pair of direct daughters of the infamous, tried and true, red hided, purebred female KS Miss Sequoia Y770, these Bankroll daughters would be full sibs to the Bank On It phenom that Griswold and Gustin Cattle Company placed the final bid on. The production record of Y770 is close to unrivaled by any other red female in the country, both sons and daughters have been sale highlights here in Emery and for those that have invested in her frozen genetics. The W/C Miss Werning 97G female is a long spined and heavy muscled purebred female that looks like she will stamp her progeny with power and presence. The second of the pair, Miss Werning 060H carries a purebred pregnancy sired by the \$180,000 W/C Fort Knox and is set to calve close to sale date, the opportunity to return on investment will be rapid!

LOT 223

A pair of soft bodied and extra bold bodied baldies that scream power cow. We truly think this is the most dynamic and elite set of bred heifers we have offered through our Production Sale and this pair floats right to the top when it comes to sorting on phenotype and maternal power. The duo of Sazzy daughters stem from the combination of the \$205,000 and proven sire of high caliber females, W/C Bankroll 811D and the W/C Sazzy 6010D female who inserts a fresh family of breed leading females into our cowherd being a direct daughter of HPF Sazerac Z074. We strive to build our cowherd around females that are extra shapely in their body composition and extra sound at the ground, it's the way these sisters excel in those traits that promote them to sale feature status.

Even though this Sazzy 6010D may round out the group of maternal sisters, don't take that as any disregard to her quality as this purebred, homozygous black and polled donor prospect bring a serious case to the table as a sale highlight. We don't need to go into detail on her phenotype but trust that there is more than just a pretty face here, the stars aligned in her pedigree but still allow for breeding versatility particularly against our sire battery. An early indication of her generating potential will come with her pregnancy sired by CCR Anchor.

W/C KINGPIN 1018H
Full Brother to Lot 226 and Maternal Brother to Lots 223-225

W/C Miss Werning 0157H is the homozygous polled, full sister to the \$180,000 syndicated and talk of the town W/C Fort Knox that sold through the 2018 Production Sale. There is no questioning the alignment of Bankroll on the Dolly 609D cow because it has shown to be surefire. This female matches the resounding features that made her brother so famous so quickly, big and square feet, perfect flexibility at the ground, a large and powerful hip, along with a presence and look that is unmatched. Tie into a genetic combination that is being utilized by cattleman nationwide, she will calve the end of February with a W/C Night Watch purebred calf.

LOT 228

W/C Miss Werning 0100H is a ¼ blood female that reminds us of many of the unique features of her infamous maternal brother, W/C Fort Knox who topped our 37th Annual Production Sale and has more than satisfied the hype that came with such an accolade in the breeding pen. We love the tight throat latch and high neck set of 0100H, yet when it comes to the fundamentals of structural integrity at the ground and the combination of muscle mass with body shape we think is where this Relentless 32C daughter furthers herself from the crowd. To further tick boxes she tested both homozygous polled and black, we think the returns on investment here could be significant and exponential. It will begin shortly after sale day with a

pregnancy by Night Watch 84E, a sire that has proven he has much more value than just a sleep all night heifer bull.

When it comes to genetic opportunities, the one that exists with W/C Miss Werning 0109H floats to the top in terms of relevance. Here is a maternal sister to the \$180,000 W/C Fort Knox, a bull that's influence is scattered throughout this book, and was responsible for generating the Bet On Red phenom from last year's sale. The homozygous polled and black breeding piece has a unique look and presence, one that will propel her opportunities to generate offspring of serious value-added capabilities. Add the fact that beyond her phenotype exists a genomic package that excels, you will see 9 individual traits that sit among the elite top 10% of every percentage female in the Simmental database.

GW MISS GPRD 028X
Maternal Granddam of Lots 227-229

LOT 230

If you don't believe in a perfectly built animal then that's fair, but in our minds the phenotype of W/C Miss Werning 0122H comes about as close as you can get. It's difficult to put this much curvature in one's center body cavity and yet keep the incredible stylish front end and overall balance of this Bankroll daughter. Its females matching the quality of 0122H that has dictated the record setting semen sales of Bankroll 811D, as operations nationwide continue to turn to him to inject maternal prowess and quality. We think the generating potential of lot 230 is immense and look forward to hearing of the success story she is bound for in her new home.

A half-blood that packs a punch! W/C Miss Echo 0163H is a direct daughter of W/C Bankroll 811D and out of a Purebred Angus female that was slapped as the prestigious RBC Beef Supreme Champion female at the Canadian Western Agribition - PM Echo 8'16. She is a Bar-E-L Natural Law 52Y daughter that has already begun a production career as illustrious as her show career. We could not be more impressed with the results of this embryo purchase as Miss Echo 0163H is truly impressive to see in the flesh. We love the complete balance and poise she was built with; she motors with ease. She is bred to calve in Early March with a W/C Night Watch 84E calf.

PM ECHO 8'16
Dam of Lot 231 · 2018 Canadian Western Agribition Supreme Champion Female

LOT 232

A homozygous polled daughter of Bankroll that loves to pose! We love her perfect baldy face, eye catching presence and extra swoopy ribcage. She is a 3/4 blood so the prospect of her raising purebreds is very realistic, and we think there are many popular sire choices that will mate up perfectly here. She is mated up to CCR Anchor the sire of Night Watch, and we think the chance to make significant return on investment in this first calf crop is high.

LOT 233

A purebred baldy that stops you in your tracks, this own daughter of Bankroll 811D is super square in her hip and tailhead design, maternal in her body capacity and eloquent about her front third. She goes back to the maternal influence of W/C Bullseye and her mother has a role model production record in the cowherd, raising a Turnpike son that sold to Crossroads Livestock Farms in the 40th Annual Production Sale. She is bred to calve with a purebred Night Watch calf the beginning of March.

LOT 234

A set of ET sisters that are certainly overwhelming in regard to eye appeal and all the extra features they bring to the equation. The pair are the result of crossing the \$205,000 and proven sire of champions in W/C Bankroll 811D and a Colburn Primo 5153 x Lutton daughter that is has begun to build quite the reputation for herself. Could you paint them anymore symmetrical or balanced from the side profile? Or make them loner necked or softer legged, it would be a struggle. We think the mating to Night Watch will hit it out of the park here, and even though he may be a heifer bull, we could see you mating them the same way for next year!

A super solid daughter of Bankroll 811D, this half-blood screams cow prospect to us and we have confidence that she will develop into a great cow like her purebred Angus mother who is sired by Prairie Pride Next Step 2036. Add the fact that every calf she has will be polled and that she is carrying an Anchor pregnancy, we feel like this is a very safe bet.

donor female for the program, W/C Miss Werning 626D, an Executive Order 8543B daughter that we look forward leaning on going forward. It's obvious to see why she got her nomination to the donor pen when she is responsible for producing progeny with the build of 0154H, one that is so eye appealing, easy fleshing and rugged constructed. She will calve with a purebred sired by Night Watch.

The design that W/C Bankroll 811D consistently sires, aligns with the production goals we have strived for many years, W/C Miss Werning 9151G is long and level spined, square pinned, extra soft bodied and has a structural design that is indicative of a long and productive tenure in the cowherd. To top it off this 5/8ths is super attractive in her head and neck design and has a different calving interval than many of the other females in the offering if you're looking to do something different or find one that easily falls into a fall calving program.

LOT 245

W/C Miss Werning 088H is one you often catch in a picture-perfect pose, the hereditability of the presence that made Fort Knox so unique has proven to be potent, as his progeny often sport that some look at me aura. Couple that presence with a heavy bone work, curvaceous body shape and balanced set of EPD predictions and we think the sky is the limit here. To begin her breeding tenure, she will calve to Mr SR Right Now in March.

A striking blaze faced beauty that poses with a killer look on the stand still. This daughter of Lock Down 206Z carries three quarter blood status from a registration stand point but carries the elite status when it comes to sorting on phenotype. We love how high her neck set ties, how she carries all her mass and the more than adequate circumference of foot and bone she is built upon. We think of the prospect of her CCR Anchor calf in early March is exciting, and just like her CDI CEO mother milk with a productive udder.

Massive middled and extra cowy daughter of Lock Down 206Z that presents a strong argument when it comes to comparing roar cow power among her contemporaries. We will continue to turn to Lock Down at the breeding box, because of his incredible calving ease he often only sees exposure at the replacement pen, however the quality of his daughters only continues to impress as they mature and his spot among the best sires we have ever utilized continues to solidify season after season. It's fun to sell females built like W/C Miss Werning 072H because they always make for happy customers. Realize that she is direct granddaughter of 534R!

energy just quality beef stock that will have an extended breeding tenure in the cowherd. Inevitably profitability correlates with longevity in the beef business, and its ones like this that it takes, her production career will begin with a Triple Threat 8102F sired calf at the end of March.

LOT 254

W/C Miss Werning 0156H is homozygous black, homozygous polled and homozygous for quality. We love the way this purebred has been built from the ground up, she is so burly and massive where it counts, yet remains square in her pin set and flawless on the move. You don't make cattle every day that have the presence of lot 254, and this one opens up the world of opportunities on either end of the spectrum when it comes to generating. It's no wonder you find so much quality here, because only a generation back you will find this cowherd's matriarch, 534R. The Lock Down 206Z calf she will in early March will just be the beginning of her elusive breeding career.

LOT 255

Another Turnpike daughter that reads for additions of growth and pay weight, this 3/4 blood is more pronounced in her muscle shape and is long spined. Maternally you will find an Executive Order daughter that has been a consistent producer, including a son that sold to the Wudel operation of Parkston, South Dakota.

LOT 256

A super cow prospect that is deep sided, round bodied and has huge amounts of maternal power. She is a 3/4 blood Ruby's Turnpike daughter that goes back to a Lock n Load x Plattermere Queenie 825 female that's a favorite on the ranch, the Queenie females have proven themselves in production and we foresee this one to match that trend. Middle of February calf by Lock Down coming!

LOT 257

W/C Miss Werning 0158H continues to prove the fact that these Turnpike females are the type of cattle that make money in the real world, they have some extra scale and length of body, they are true performance cattle that grow, and the heritability of this growth is high. There is longevity also built in here through the injection of the Stevenson Angus program in her maternal pedigree. Be expecting a Night Watch calf shortly after sale day with the purchase of Lot 257!

LOT 258

W/C Miss Werning 079H is a stout featured baldy that hits the ground with big and square feet, carrying that powerful outline with ease. This ¼ blood Turnpike daughter goes back to Wide Track maternally, and reads for added growth and carcass, a generation further back you will find the great JS Sure Bet 1914 Donor that excelled for length and depth. We feel Night Watch is a perfect mating on her this first time around, it will come towards the end of February.

LOT 259

W/C Miss Werning 046H brings lots of good to the situation, first off she is homozygous for both poll and black status, has an incredible set of genomic predictors, is just one generation away from raising purebred stock and offers a pedigree that very versatile going forward. There is serious quality all the way through this offering but the opportunity for success that comes with an investment in 046H needs as serious consideration as any. She comes with an early return on investment sired by the tired and true W/C Lock Down 206Z.

LOT 260

A purebred Turnpike 711E daughter that is already taking claim to being a power cow! They don't get much denser and shapely than W/C Miss Werning 0133H, it doesn't matter if you inspect her from the profile, behind or even above this one comes with undeniable mass. High quality stock that projects for growth via her sire and longevity via the track record of her 8-year-old dam. The stems from one of the prettiest cow families we have at the W/C.

LOT 261

A purebred daughter of the growth leader and proven generator of seedstock that yield profit, Ruby's Turnpike 771E, and out of a cow family that's very special to us here in Emery, Miss Werning 715T. We aim to consistently raise cattle that mimic the dense body type, low maintenance and balanced outline of W/C Miss Werning 082H, if you are wanting to build a cow family of females that are easy fleshing, great uddered and perform in the real world then you can trust an investment here.

LOT 262

Big bodied and powerful are the first two things that come to mind about this bigger framed Rubys Turnpike 771E daughter. Then you realize she stems from a cow family that are consistently great uddered and sharp fronted. She is a three-quarter blood that is supported by a standout Lock Down daughter maternally. If you're interested in adding pay weight to your calf crops, then its females with the pedigree and build of 0177H that you need to me marking on sale day.

LOT 263

W/C Miss Werning 0140H hits us with huge brood cow potential, her body type reads massive and dense with extreme rib shape and body depth. This power goes beyond her phenotype and can describe the set of genomic predictions she sports too, they read for top quarter of the breed or better in all growth traits; Wean, Year, ADG, Milk and MWW. The versatility of the outcross pedigree of 0140H helps us to project that the breeding story that this Turnpike daughter is bound to have will be impressive. If you agree that consistency is key, then realize both her dam and Grandam are both W/C Donors. Bred to Lock Down!

LOT 264

A big and burly half-blood that is overwhelming in terms of body shape and cow power. When we see cattle built like this selling elsewhere we know it's time to set the satchel down and start bidding, because when they are designed with such a seamless outline and ideal running gear there is no end to the generating potential! She goes back to a Pathfinder dam by the maternal Angus legend in S A V Bismarck, a sire that has made many a happy cowboy because of the structural integrity and udder quality he brings to the equation. Maternal brothers feature in the bull battery's of several great cowboys, including a pair at Vruegdenbil's.

A long necked and proud headed daughter of Turnpike that tested homozygous black, but the genomics brought many other exciting features to support W/C Miss Werning 081H. Check out the way she tabulates for growth, top 3% Wean, top 2% Year, top 2% ADG, top 2% Milk, top 1% MWW, and top 10% rankings for CW, BF and REA. A true outlier of this offering if you decide to sort by growth predictions, we think the future for 081H reads as herd bull raiser deluxe. This is all before you inspect her build, one which puts into action the quality she reads for.

W/C Miss Werning 009H is a homozygous polled half-blood that goes back to our choice of the historic River Hills dispersion, the CAR Efficient 534 daughter River Hills Pride X186. There is power and consistency in the blood here, you can trust that the maternal backing of 009H is strong! This square built and level spined daughter of Turnpike comes bred to Lock Down too so the opportunity to raise a replacement type female is high.

W/C Miss Werning 069H is purebred daughter of Turnpike that follows the trend of high-performance predictions and commercially geared attributes that he consistently stamps progeny with. As you trace her maternal pedigree back you will find five generations of females that sported the W/C brand, ones that have put in the hard yards around the ranch. Numerically she excels with traits sitting top 15% Yearling, top 10% ADG, top 15% CW and top 15% Rib Eye Area.

LOT 269

W/C Miss Werning 087H leads of this impressive set of CDI CEO 281D daughters to sell February 8th, and this purebred has the quality to lead any progressive donor pen across the nation. We have always loved how effortlessly this one ties together her impressive pieces such as the maternal rib cage she carries upon the set of feet and legs she has which are designed with flexibility and longevity in mind. We proved last year that JS Sure Bet 4T still breeds with timeless quality by siring the high selling female, the mother of 087H is also a Sure Bet daughter, actually one that matches the quality of the Kappes' families purchase last year. Big time quality here not just phenotypically but on paper too, with several traits ranking among the top 1/3 of the breed.

W/C Miss Werning 0158H ticks lots of boxes in our mind, she's both homozygous polled and black, is a direct granddaughter of 534R and tabulates for impressive growth and carcass. The CEO females are proving to be phenomenal cows here in Emery, and we think this purebred will yield profits regardless of the production methods or goals. Good quality livestock come in various shapes and sizes; this one will find friends with differing selection criteria.

A very intriguing 3/4 blood that tested homozygous polled, and sports an EPD profile that is impressive across the board, with highlights of top 15% Year and ADG, top 10% YG and top 4% REA, all traits we link directly to profitability in Emery. The splash of white on her face compliments a long sided yet eloquent outline and you will notice the inclusion of maternal power through a pin up girl quality derivate of Really Windy and Bushs Focus. She will calve to Mr Right Now shortly after the sale to kickstart a productive career in the cowherd.

W/C Miss Werning 004H is a Night Watch 84E daughter with a perfect baldy face, she comes with 3/4 blood papers and a very impressive set of curve-bending growth tabulations. Seldom do you find the combination of top 15% CE and BW with top 15% Wean and top 30% Yearling weights. You will also notice a double shot of 534R in her pedigree, only adding to the consistency and potency that we think she will breed with. Power that is rich in the blood!

W/C MISS WERNING 653D
Maternal Sister to the Dam of Lot 278

LOT 279

W/C Miss Werning 032H is a purebred that packs a punch! She comes with extra muscle shape, pin width and length of body, whilst retaining that extra eye appeal that is so important to us here at Werning Cattle. Add the fact that she has a perfect baldy face, homozygous polled and has impressive curve bending traits from top 10% BW to nearly 120 at a Year and you aren't mistaken in thinking there is lots of breeding value in lot 279. There are great cows scattered throughout this one's pedigree! She is carrying a very early pregnancy by Mr. SR Right Now with a fair chance that she may have a calf on side by sale day!

LOT 280

A purebred daughter of W/C Night Watch 84E that goes back to a United x Surebet female that holds rolemodel status in the cowherd. Add the fact that she is homozygous black and calves shortly after sale day with a purebred Right Now calf and I'd say we have put in the leg work for success.

W/C NIGHT WATCH 84E
\$142,500 Sire of Lots 277-282

LOT 281

You can trust that behind each one of these females are generations of cow power that have had to surpass our strict standards to stay in the herd year after year, even though 0189H may not come with registration status it's by no fault of her own. The quality of 0189H aligns with some of the best we will offer, she is designed to be super square and powerful, and her production days will be off to a great start with a pregnancy by Mr Right Now.

LOT 282

A maternally designed, extra big bodied half-blood that is sired by the past high selling CCR Anchor x 8543U son, W/C Night Watch 84E. W/C Miss Werning 0148H stems from a purebred Angus female we purchased from the Rock Creek program, she has the same balanced design that we admired in her mother. Bar CK 4118B 8102F "Triple Threat" is a herd sire we purchased out of Oregon that is extra elite on paper, he sires the pregnancy that is due towards the end of April here.

036X

A set of full sisters that are cut from the mold that we have built this cowherd around, the Remington Lock N Load 54U sire singlehandedly shaped the face of this cowherd through his surefire ability to add both power and longevity to a calf crop in one single potent generation. You will notice these same principles all five of these dense built half-blood cow prospects. Big and burly from the side and behind, the Angus donor cow you will find maternally is an impressive bovine in her own right, D W Hazel 036X is a staple in the donor pen here at Werning Cattle, and for more than 8 years has been impressing for more than 40 progeny registered to her name. A full brother to these heifers was a sale highlight in 2015 but these could be her best breeding accomplishments to date, all come with pregnancies sired by Mr Right Now but do offer some differences in calving dates so decisions can be made as to what suits your calving period the best.

LOT 288

We have aligned some serious maternal power in the pedigree that supports W/C Miss Werning 080H, but without knowing her pedigree we feel like it's fairly easy to assume that would be the case. A direct daughter of Remington Lock N Load 54U and out of a super productive Barstow Cash female that sports 8 generations of the Wendy cow family in her maternal pedigree. Its females like 080H that prove the influence of Lock N Load is timeless, and will be immortal here in Emery, super square in her pin set, level in her spine, attractive about her front third and coming with a beautiful udder set up. A favorite baldy female that has a long and illustrious breeding career ahead.

LOT 290

W/C Miss Werning 0168H is a Lock N Load half-blood that is deep sided, solid black hided and easy on the eyes. There is no questioning that she will mature with a nice udder when she calves at the end of February. She goes back to a productive Jindra Acclaim daughter so you can trust that there is maternal power in the blood.

LOT 292

We couldn't be happier with this initial calf out of a high selling female purchase from Reck Brothers, RBS You're Right F804 is a Duracell T52 daughter that we have big plans for, particularly when she has proven herself so quickly here. W/C Miss Werning 013H has many redeeming factors, not only does this purebred tabulate for excellence across the board she has been blessed with a burly and massive phenotype that dictates she is the herd bull producing kind. Take advantage of this open-door approach to the cowherd we are offering, there are many opportunities available in this 41st Production Sale that would never normally be available.

The Right Now cattle continue to impress, not only do they tabulate with incredible predictions but phenotypically they match our production goals. This one exemplifies the exact reasons why his progeny have and will continue to highlight both the bull and female divisions of this sale. Incredible from the side, 061H ties so high at the top of her shoulder, connects effortlessly into an ultra-dimensional ribcage and then compliments it with flexible foundations. Add to the equation that she is homozygous polled and outcross pedigreed and we are bringing you something special, don't forget to analyze the EPD's in this situation with 10 traits that she sits within the top 20% of the breed for.

A long bodied and good looking, purebred that goes back to some of the best cow families we have here at Werning Cattle. She also tested homozygous polled and genomically elevated herself as a curve bending growth leader among her contemporaries. Notice the inclusion of 534R as the maternal grand dam of W/C Miss Werning 0161H. She will calve in February with a Night Watch purebred calf.

We couldn't be happier with the job that Mr Right Now has done, the daughters he has generated for our program will form the soul of the cowherd and it's because he makes them with the build of W/C Miss Werning 0176H that they are.

LOT 300

The pedigree of W/C Miss Werning 065H brings together some of the best in both the Angus and Simmental breeds, paternally you will see TFS Samurai 7362E meaning the inclusion of S A V Resource and Hooks Shear Force, the maternal side of her pedigree features one of our favorite 534R daughters on the entire place, she is sired by S A V Bismarck and epitomizes the build we strive for. We stacked the good stuff here and know that the consistency in her blood will show even with her first calf by CCR Anchor.

Some extra fancy pieces accompany this TFS Samurai 7362E daughter, it starts with a perfect baldy face and sleek and extended front end. Not only does her presence draw your eye but we appreciate the square hip and correct hind leg she has been built with. Her pedigree may also be of your fancy as her dam is an Executive Order x Miss Werning 9514W, 9514W has been a power cow for our program raising several sons that work in seedstock cowherds, nationwide.

LOT 309

A direct daughter of W/C Instinct 1000F that has the awesome build we have come to expect from his progeny, it doesn't hurt that maternally she finds support in a beautiful daughter of Prairie Pride Next Step 2036. This brood cow prospect will have a double bred half-blood calf by Lock Down, chances are it could be a baldy to boot!

LOT 310

W/C Miss Werning 052H proves the point that this is the most impressive set of bred heifers we have sold to date, there is no doubt that this one would have stayed in the keeper pen if it wasn't for the fact that we made the tough decision to sell the entire 2020 born set of bred heifers. This three-quarter blood, homozygous black daughter of W/C Instinct 1000F is ultra-stylish, extra cowy and has the potential to be a female you could build a program around. Phenotypically we think this is an absolute sale highlight, and you can trust that the influence of these Instinct daughters is one we will be entrusting to take our program into the future.

LOT 311

W/C Miss Werning 039H is a direct daughter of W/C Instinct 1000F, the Innovator son out of 8543U that is one of the most impressive mature herd sires we run. The good looks of 039H come from both sides of her pedigree though as you will find an easy on the eyes, half-blood daughter of High Regard maternally. We love the smooth lines and balance of this 3/4 blood, and the fact she is coming with a February CCR Anchor calf only adds stars in our book.

W/C Miss Werning 007H is a direct daughter of W/C Innovator 4321F, a herd sire that is a direct son of the National Champion, Angel 2870Z. 007H is homozygous polled and built just how we like them, soggy middled, square pinned and attractive fronted, combine her phenotype, pedigree and ability to make purebreds and there is some serious quality to take abold of here. She is bred to the API and TI leader, Bar CK 4118B 8102F, Triple Threat.

W/C Miss Werning 0184H is a homozygous polled half blood that combines the proven potency of W/C Innovator 4321F, an Innovator x Angel 2870Z son that we retained for in herd use. She goes back to a productive daughter of Lemmon Newsline C804 and will calve when its warm and without the need for protection towards the end of May to Triple Threat.

253Z

If you appreciate livestock that leave nothing desired when it comes to dimension and shape then this set of W/C Miss Werning 253Z daughters deserve your attention, they are rugged and dense but offer some differences in regard to breed make up and calving dates. 253Z is a Lock Down x Bismarck that is leaving her influence in the cowherd by generating broody cow prospects that we love to look at, she also raised a Main Event son name Mainstay 355F that was the selection of our friends at Western Cattle Source, his sons will highlight their Inaugural Bull Sale in 2022. Big time set of flush sisters here.

Herd Sire of Influence

LOT 320

Double homozygous for the polled and black gene, this W/C Relentless 32C daughter is square in her make up and projects an easykeeping look. Her mother, D W Hazel 036X has been a staple Angus donor for us, she epitomizes why the Pioneer daughters are some of the best in the Angus business. The next chapter for 0414 will begin the middle of March when she calves a Night Watch ¼ blood.

LOT 321

We aren't exaggerating when we say there is sale highlights throughout this entire female offering, here is one, the lone daughter of W/C Doctor's Orders 665F in this offering and we think she is pretty special. Before we talk about her build take notice of the impressive data set she sports, additionally she is both homozygous polled and black, easy to look at, moves so fluidly and carries so much mass along with it. The Doctor's Orders sire group will be one you notice in mass come the future of our program, so put yourself in a position at the ground floor of his influence.

LOT 322

A pair of homozygous polled and black $\frac{3}{4}$ blood sisters that have an undeniable presence and eye appeal. We love the baldy faces they were blessed with, but the list of quality gets much longer when you begin to study the rest of the maternally based design they have been constructed with. Their mother W/C Miss Werning 672D is a daughter of K C F Bennett Absolute x Lock N Load that earned her spot in the donor pen by consistently producing cattle with added pay weight, and performance, we foresee these daughters to follow in the footsteps of their mothers. Notice the differences in calving dates of the two sisters and the fact that we are giving you two different options that align best with the rest of your herds calving blanket.

A pair of red baldy half-blood females that will stop you in your tracks, the topic as which one is our favorite is often of conversation at the dinner table, and we go back and forward each time. Regardless, these are two impressive females that demand some serious consideration if you're looking to add a cornerstone breeding piece to the program, the color of their hide is irrelevant when it comes to this level of quality, but we think the fact that these are red only adds value in the current climate. The Bankroll females will go down as some of the most productive and impressive females we have ever put in the cowherd and their legacy is only beginning, add the influence of the powerhouse Red Angus donor on the bottom side in Pelton Miss 361B and the results are bound to be impressive. 361B is the mother of the King of the Cowboys Red Angus females from last year, one which sold for \$80,000 to Jesse Heimer, and another for \$58,000 to Slack Farms. W/C Miss Werning 90G comes with a February calving date to the red hided Fort Knox 757H, her square pin set and smooth muscle pattern will align perfectly with how we think he needs to be mated. The longer sided and shapelier, 91G will calve a red hided All Star calf towards the end of March. \$58,000 valuation on 9026G

LOT 332

The red heads are an impressive group in this 41st edition of the Werning Cattle Production Sale. This baldy is a daughter of the \$205,000 W/C Bankroll 811D and goes back to a purebred Red Angus cow that is deeply stacked for quality both genetically and phenotypically. W/C Miss Werning 043H has incredible presence and good looks, it would be tough to make her any more feminine and balanced, nor would you make many changes to her structural build. We continued the trend of red heads in the first year of her production records with a calf coming by the LHT All Star r88G stud.

A chromed up 5/8ths that is one you will never miss finding in the herd, she has extremely distinctive markings that set her apart, but once you set aside the markings you will notice that the density and capacity of 0175H make her just as unique. We love how big bodied and robust this W/C Fort Knox daughter is, and we think her generating potential for both curve bending growth bulls and stylish females is bright.

LOT 334

W/C Miss Werning 040H is a homozygous polled red head that is a direct daughter of Remington Lock N Load 54U that carries 3/4 blood registration. She tabulates for large improvements in ribeye area and yield grade, and remains balanced across the rest of her data set. There is as much excitement about these red bided cattle as there ever has been, add the fact that 040H is coming with a February Fort Knox calf there is plenty of opportunity here to turn a profit here.

To many that have watched our program for a while you will notice some names of notoriety in the pedigree of W/C Miss Werning 0169H. This red baldy goes back to a very special female in Miss Werning 715T, this WAGR Dream Catcher 03R daughter was slapped the Grand Champion Purebred Simmental female for Jared at the 2008 American Royal, and proved that her talents were even better received in the pasture. 42B is also a member of the donor battery and we are excitedly expecting a litter of W/C Bet On Red calves this spring out of her. There are certain animals that come along that in regard to phenotypic quality are timeless, there are several of these individuals in the pedigree of 0169H.

One of very few red purebred females that we had born in 2020, she is super square and attractive in her outline, projects with an easy keeping body shape and muscle pattern. A direct daughter of Remington Lock N Load, a mating that has proven potent before as a ¼ brother was the selection of Denning Farms and now resides at Hill Top Simmentals in their herd sire battery. Her pregnancy due in March will be sired by the also red hided, LHT All Star 118G.

A timeless collector's item for the savviest Simmental enthusiast. One of few full sisters in captivity to the world renowned \$205,000 W/C Bankroll 811D. 7058E is truly special in her presence and build. Once we decided to offer an exclusive collection of donors we realized we needed to include some special ones, but the more we thought about adding 7058E, the more we wondered if we could afford to let her go. A young matron that descends from the heart of our herd and I can promise you that she is just as impressive in person. You will idolize every aspect of this females build, from the tip of her nose the end of her tail. There are no guarantees in the cattle business, but here's one that checks all the boxes in terms of genetics and quality.

SELLS OPEN AND READY TO FLUSH

Y9207 has been a cornerstone of our Red program and has been a true generator for many years. In this sale alone she has direct progeny that highlight this event from cover to cover. We invite any and all interest as we have decided to share this female while she has many good years ahead of her and continues to flush very well. Not often does the opportunity to invest in a heavily proven female that is still in the prime of her production years come along, perhaps several chapters have been written in her story book, but the we are by no means approaching the final one. Mother to Lots 1 & 2, 31, 92 & 232.

CALVED 1/14/22 TO MR SR RIGHT NOW · BULL CALF

It's no secret what high end Angus show heifer prospects are worth these days and we truly believe Missie 2017 is one of the most elite Angus females we have been around when it comes to building a foundation to make those extra valuable, sale features going forward. Phenotypically her build is flawless when it comes to the basics, but what really sets her apart from the crowd is when you begin to take into consideration the extras she brings to the equation. The shaggy hair coat, killer hind leg design, and that undeniable cocky presence that draws the eye of even the most critical of show heifer enthusiasts. As luck would be VZR Missie 2017 calved with a bull calf sired by Mr SR Right Now on January 14th, so the opportunity for her reentry to the donor pen is very close on the horizon.

SELLS WITH BULL CALF AT SIDE BY MR SR RIGHT NOW

DONORS

Ladies and gentlemen, we proudly present the opportunity to acquire sexed female on the \$300,000 high selling lot from the 16th Annual Embryos on Snow in Denver, Colorado. TRCC Pandemic is the uniquely built, dark cherry red, soft haired son of the \$205,000 W/C Bankroll 811D. Those that have inspected TRCC Pandemic in the flesh have commented that he maintains the signature Bankroll presence, style, and shape, while offering more frame, length, and squareness of pin set than that of his extremely proven sire. Pandemic sets the bar when it comes to skeletal quality, form, and function. He is flawless in the way he ties his long sleek neck high into the top side of his neatly laid in shoulder, while transitioning into a full forerib and bold center rib cage. We love the hip and hind leg quality that Pandemic exemplifies as he sets to the surface with confidence.

TRCC Pandemic has been utilized exclusively in herd at the W/C on the most prominent and prolific donors that call home to Emery, South Dakota. The initial TRCC Pandemic semen offering was on January 7, 2022 at the National Cowboy & Western Heritage Museum in Oklahoma City where it averaged north of \$850 per unit!

Bird Cattle Company of Lubbock, Texas made the investment to acquire 50% semen interest in TRCC Pandemic to add to their already illustrious multi-breed herd sire battery. Bird Cattle Company is home to several individuals of influence within the Simmental breed. A pivotal member of the donor pen that has built the program is WLE Missy U409, arguably the most prolific daughter of the legendary Shawnee Miss 770P, and full sister to WLE Uno Mas X549. DMCC Counter Attack 8C has secured his position as the senior herd sire at Bird Cattle Company, producing countless high sellers and champions that have carried the JCBB prefix.

TRCC Pandemic is without a doubt one of the absolute most exciting red blaze face Simmental bulls to surface and will be used extensively in some of the top programs in the United States that secured semen from the initial offering in OKC. On February 8, 2022 the opportunity will be yours to purchase TRCC Pandemic sexed female semen just in time for Spring breeding and flush work. Bid with confidence!

Please Note: TRCC Pandemic sexed female semen will ONLY be sold at auction while supplies last. The week of the sale we will specify on the supplement sheet how many units of semen will sell from the week prior's collection.
