

Hearns Cattle Company
33RD ANNUAL BULL SALE
SIMMENTAL & SIMGENETIC BULLS

Thursday, March 3, 2022 at 1 pm
AT THE RANCH IN RUSHVILLE, NE

33 Years in the Making.....

4 GENERATIONS STRONG. 1 GOAL.

A warm welcome to everyone, Simmental enthusiasts, friends, and family to our 33rd Annual Bull Sale. Thank you for this opportunity to serve you as we present this offering of bulls.

The bull line up is deep in quality with Purebred Simmental, percentage SimAngus, and a select group of registered Angus bulls. The bulls being offered are the result of breeding selection for easy fleshing ability, structural soundness, and eye appeal. Customers can choose through a quality selection of long-sided, thick butted, high performing bulls that sire heavier muscled, faster gaining calves. The bulls have strong EPDs and indexes with the common goal of customer success.

This year's offering will include progeny of our leading donor cows. Our embryo transfer and AI program has created the opportunity for you to select from groups of genetic full brothers. Our constant goal is to improve the offering each year so these bulls will positively impact your business's bottom line.

We have videos of the entire offering at www.kearnscattleco.com and welcome you stop by the ranch any time prior to the sale. The bulls will be on display Wednesday, March 2nd, from 1 – 5 MST; and please join us for hospitality and refreshments.

We look forward to seeing you on sale day, Thursday, March 3rd! Lunch will begin at 12 Noon MST.

Regards,

Zach Kearns

AN EXCITING RETURN TO THE
National Western Stock Show

Grand Champion Pen of Three Percentage Simmental Bulls
2022 National Western Stock Show

Reserve Champion Pen of Three Purebred Simmental Bulls
2022 National Western Stock Show

We are pleased to welcome you.

Fellow Cattle Enthusiasts,

Welcome to the annual bull sale event at Kearns Cattle Company. We are certain that this is the very best and deepest set of bulls ever offered by Tom and Zach. The genetics behind these bulls are saturated with proven cow families that are intertwined throughout the entire set. Many of these bulls are sired by past Kearns Cattle Company sale highlights or are from the sisters and maternal sisters of those past sale features. As the cattle continue to improve in consistency and performance one should notice that the family operation is gaining ground in regard to quality in the right kind of stock built to succeed in their local environment and ready to adapt to wherever they go outside of the upper western plains.

Over the past years, many of those that pay attention to the Kearns program know that this offering has been built around limited cow family influence through the aggressive utilization of embryo transfer and IVF technology. As one studies the information between the pages of this sale book, they should readily notice the presence of Victoria, Dolly, Stars, 8014C, and 2077Z (Precision) as their influence can be found in some pedigrees on both sides. The aforementioned donors influence most of the offering directly, or through sons and daughters. In the fall of 2020 Zach added a rather large draft of registered Angus females that he selected from TD Angus of North Platte. Most of the western Nebraska ranching industry is familiar with the TD program that's based on the years of disciplined breeding and selection of the good cowboy, Bill Rishel. These Angus females will be the future of the Simgenetic base in Rushville as they offer significant improvement in EPD values, carcass, and maternal instinct to the program. The very top end of the male calves from the TD acquisition is offered in this sale and a large swath of their sisters have been retained for the future at KCC.

The Simmental and Simgenetic circles experienced a great class of bulls a year ago with some standouts across the country that experienced heavy use, but in our travels and marketing ventures thus far, we have witnessed an even better set of stock with multiple individuals suitable for most breeders and bull studs. This 2022 sale offering is dense nationwide with the right kind to fit multiple breeding programs and commercial operations and the set offered at Kearns Cattle Company wouldn't be any different. We are most certain that this set of bulls will impress as you evaluate the videos or come see the stock in person.

Tom Kearns built the program that represents the brand and is still the dominant face of the operation. We have enjoyed and cherished becoming allies and friends of the program and there is no question that all who have met him, hold Tom in high regard with utmost respect and admiration. He is truly one of the great western Nebraska ranching legends of the business. Over the past year, the official transfer and transition to the next generation went into effect, but the high integrity, reputable methods of business transaction and customer service will remain the same. Doing business with great people that have great stock is always an enjoyable experience and that experience is with Kearns Cattle Co. Please join us March 3, 2022, at the ranch southeast of Rushville.

Graham Blagg Jered Shipman Tim Anderson

DELIVERY

Free delivery within 300 miles on all bulls and we will assist in finding delivery options to other parts of the country!

HEALTH

Bulls have been vaccinated under Dr. Erquiaga's recommendations. All bulls have been tested negative for BVD. Sale vet will assist buyers on health status for specific states.

ANNOUNCEMENT

Announcements from the auction block will precedence over statements in catalog. Disclaimer: The information in this catalog is subject to change.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

ONLINE BIDDING

We are pleased to bring you real-time internet bidding and a live broadcast of this sale through Superior Broadcasting. If you are unable to attend for any reason, you may bid online at superiorlivestock.com. Please be sure to create an account and get approved for bidding prior to the start of the sale. For more information consult the Superior Bidding Instructions in the back of this sale catalog. You can also contact the Superior Livestock Office at (800) 431- 4452.

TERMS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed. Sale will be available to registered bidders via the Internet at Superiorlivestock.com to accommodate both local and distant individuals who cannot attend in person. They provide a real-time internet broadcast during the sale. All absentee bidding will be done via internet to a ringside sale representative. Please register for bidder number at superiorlivestock.com anytime prior to 12 Noon on Wednesday, March 2nd to accommodate the approval process. After this date/time, bidder approval may be delayed. Approved bidders will be issued bidder number and access prior to the sale.

RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction. Insurance will be available sale day. Contact Jim Gies (970) 590-0500.

GUARANTEE

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the American Simmental Association we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling that are purchased for \$3000 or more. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. If a bull is deemed a non-breeder, we reserve the right to take the bull back and prove that he is a breeder within a 180-day period. We will work with our veterinarian and you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less a salvage value of \$2500 for the animal.

WHY SIMGENETIC CATTLE?

- LOWER YIELD GRADES
- INCREASE WEANING WEIGHTS
- IMPROVE THE UDDER QUALITY AND LONGEVITY OF YOUR REPLACEMENTS
- ENHANCE YOUR ANGUS BASED GENETICS WITH SIMGENETIC BULLS

2021 SALE PRICING BREAKDOWN

KEARNS CATTLE COMPANY BULLS ARE AFFORDABLE!

75% of the bulls sold for \$4999 or less in the 2021 sale. With extensive use of E.T. and AI, we are proud to offer many full, 3/4, and 1/2 brothers to provide our customers with a more uniform and consistent product! You will see the direct benefit of uniformity in your calf crops and the added value that they will command!

A GUIDE TO EXPECTED PROGENY DIFFERENCES

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

- **Calving Ease (CE):** Percent of unassisted births when used on heifers.
- **Birth Weight (BW):** Pounds of birth weight. Calving Ease (CE): Percent of unassisted births when used on heifers.
- **Weaning Weight (WW):** Pounds of weaning weight.
- **Yearling Weight (YW):** Pounds of yearling weight.
- **Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.
- **Milk (MLK):** Pounds of weaning weight due to milk.
- **Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.
- **Stayability (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.
- **Carcass Weight (CW):** Pounds of carcass weight.
- **Yield Grade (YG):** Yield grade score.
- **Marbling (MRB):** Marbling score.
- **Back Fat (BF):** Inches of backfat.
- **Ribeye Area (REA):** Square inches of ribeye.
- **All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)
- **Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well- conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes: All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. There are 2 places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "clicktobid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

*If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.

The 2022 Offering

ELITE COW FAMILIES | BREED LEADING SIRES

The National Western Reserve Champion Pen of Three Purebreds

Introducing the 2022 National Western Stock Show Reserve Grand Champion Pen of Three Purebred Simmental bulls. It was great to be back in the "Mile High" city this past January. We were fortunate enough to return home with the Reserve Grand Champion banner in the Purebred show.

Lots 1 through 3 represent the winning pen of bulls!

Lot 1

NWSS PEN BULL

We partnered with Scott and Joey Bailey on an IVF cycle on the legendary Bailey's Ms Dreamy 946W donor with the goal of creating a set of sons and daughters sired by the \$120,000 KCC1 Exclusive 116E. This mating is exactly what we expected and then some when it comes to generating Purebred cattle that offer a well-balanced look, combined with genuine base width, and squareness of build. The Dreamy donor is now deceased, but her legacy continues through direct progeny and grand progeny that are working in some of the nation's most established and well-respected donor pens. Dreamy is one of the industry's highest dollar generating females, with well over the million-dollar mark when it comes to progeny sales. Dreamy's most recognized daughters would be the \$195,000 Bailey's Profit's Dream, a member of the donor pen at Sullivan Farms in Dunlap, Iowa. This past fall she produced a stunning red hided heifer calf that commanded \$90,000! Another sister, Bailey's Dream Girl, sold for \$135,000 to Freking Cattle and Kenidey Effling. She produced the \$230,000 Reset stud that topped the 2021 Hartman Cattle Company Bull Sale, as well as a \$50,000 heifer sired by Rebel. The consistency and generating capabilities that this genetic line offers is hard to mimic. Here is a powerful set of ET flushmate brothers that combine the influence of KCC1 Victoria 57A and Bailey's Ms Dreamy 946W, two legendary matriarchs that are now both deceased. These brothers will add structural integrity, fleshing ease, and genuine dimension to the equation. Without a doubt one of the stoutest set of BEEF bulls that we have ever offered at Kearns Cattle Company!

KCC1 ETERNITY 113E - \$20,000 SIRE OF LOTS 6 & 7

Here is a stout pair of brothers sired by the \$20,000 KCC1 Eternity 113E, a member of the most successful and highest dollar generating flush in the history of Kearns Cattle Company. Eternity was purchased by our good friends at Coyote Creek Cattle Company of Cushing, Oklahoma. Kelly Holderread and his family have been long time customers and supporters of our program. We appreciate the stoutness, shape, and length of body that these Eternity sired bulls bring to the table. They are both backed by big bodied, low input, efficient Angus females. You can expect superior udder quality and maternal strength based on pedigree alone with this pair of brothers.

KCC1 ENTERPRISE 519E - \$35,500 FULL BROTHER TO SIRE OF LOTS 1-7

Lot 8

NWSS PEN BULL

The next set of flush brothers are the resulting product derived from mating two individuals of impact that were both bred and raised in the Kearns Cattle Company program. KCC1 War Cry 878G is the sire of this powerful flush of three-quarter blood SimAngus herd bull prospects, while their phenotypically superior dam is the powerful KCC1 Estelle 510E that sold for \$30,000 for 1/2 interest. Estelle is a maternal sister to the great KCC1 Havana 83E, the dam of the \$230,000 KCC1 Countertime 872H, as well as the \$120,000 KCC1 Exclusive 116E. The maternal strength found in the pedigree of this set of ET flushmate brothers runs generations deep on both sides of their pedigree. The dam of War Cry is the now deceased Malsons Savannah 27Y, most widely known as the dam of the industry leading KR Casino 6243. These brothers offer a balanced eye appealing look of quality from every angle. We appreciate the athletic stride, square build, and masculine herd sire look that this set of brothers personify.

Dolly does it...AGAIN! There are few females that have contributed to the business as much as Ford RJ Dolly Y83, and it seems as though her impact is everlasting. Dolly is without a doubt the cornerstone female of Kearns Cattle Company, producing countless high sellers, AI promotional sires, and influential females that are working in some of the top programs across the country. Dolly is nearing the million-dollar mark in production. Her most notable sons would include the \$100,000 Cannon, \$75,000 Classified, \$40,000 Frost, \$33,000 Carver, \$33,000 Classified, \$30,000 High Caliber, and \$28,000 Escalade. Countless sons and daughters have sold from \$7,000 to \$15,000 each year and are working in some of the top seedstock operations in North America. Dolly's most well-known daughter is the great TKCC Victoria 57A, the now deceased donor dam that is responsible for the most successful flush in the history of Kearns Cattle Company. Another mating that you can hang your hat on if you're requirements involve structurally sound, easy fleshing cattle that offer tremendous length, shape, and eye appeal.

Here is a unique SimAngus bull sired by, KCC1 War Cry 878G, a past high seller who commanded \$22,500 to Wicks Cattle Company of Richardton, North Dakota. The maternal side of his pedigree is no stranger to the spotlight, as his dam has produced several high selling progeny that continue to leave an impact for the respective programs that they work in. CCR Ms Misty May 8014U is the dam of the \$39,000 high selling herd sire that now stands at Lee's Cattle Company in Brush, Colorado. Maternal sisters to 936J also work in the Field Cattle Company Program of Kansas, and for the Philipello family of Texas. Another SimAngus herd sire option that combines prolific cow families throughout his lineage.

KCC1 FOLSOM 512F
SIRE OF LOTS 17-29

MR HOC BROKER
MATERNAL BROTHER TO THE GRANDDAM OF LOTS 17-18

Here is a pair of ET flushmate brothers that combine a unique outcross pedigree that is saturated with maternal excellence. KCC Folsom 512F was a past high seller that is now working in the Lee's Cattle Company program at Brush, Colorado. Folsom is sired by the \$400,000 TJ High Calibre 556B and backed by the powerful CCR Ms Misty May 8014U. What makes this pedigree even more interesting is the fact that their maternal granddam is a maternal sister to the great MR HOC Broker. JM/SWC Olivia Y19 is a stout constructed, bold ribbed, sound footed female that offers a complete and total outcross pedigree to Dream On, Upgrade, Legacy and Lock N Load. Here is a pair of brothers that could be used in a series of different breeding programs with tremendous success due to the combination of phenotypic quality, performance, and outcross status.

KCC1 Folsom 76J is a maternal brother to the record setting KCC1 Countertime 872H who commanded \$230,000 to the Countertime group in our 2021 bull sale. The dam of 76J is the prolific KCC1 Havana 83E, the only full sister in existence to the \$120,000 KCC1 Exclusive 116E. Havana is also the dam of the \$60,000 high selling female from the 2020 edition of The Black Label Event. KCC1 SWC Harmony 847H was a Reserve Division Champion at the 2021 Cattlemen's Congress for Megan Brown. Harmony was also selected as the 2021 Cowgirls in Cowtown Grand Champion Simmental Heifer. This past summer she was the dominant Grand Champion Purebred Heifer at the 2021 AJSA South Central Regional in Springfield, MO. Other high sellers from KCC1 Havana 83E would include progeny that have sold for \$30,000, \$25,000, \$11,000, and \$8,000. A true sale feature that has the credentials of a herd bull!

Lot 20

FORD RJ DOLLY Y83 - FOUNDATION MATRIARCH AND DAM OF LOTS 20 & 21

TKCC CLASSIFIED - \$75,000 MATERNAL BROTHER TO LOTS 20 & 21

511J and 272J are from the most decorated female in the donor pen at Kearns Cattle Company. Here are TWO direct sons of the prolific Ford RJ Dolly Y83, a female that has made a lasting impact on the program for nearly a decade. Countless maternal brothers have been utilized across the business as AI sires of impact, while TKCC Victoria 57A, a maternal sister to this pair of brothers needs no introduction regarding the legacy that she left behind. Victoria is the dam of the \$120,000 Exclusive, as well as KCC1 Havana 83E, the dam of the record selling \$230,000 Countertime. These two bulls would be three-quarter sibs to a past high seller at \$30,000. They rank among the top third of the breed for performance, while charting top 15% for Marb.

We knew when Folsom was a yearling that he was special, but little did we know he would have the ability to sire bulls with so much mass and density, yet females that offer textbook udder quality, overwhelming body dimension, and maternal power all at the same time. There is no doubt in our mind that Folsom is one of the most versatile breeding bulls that we have ever produced, and that is why he will continue to see heavy service in our ET and AI program.

TKCC BLACKCAP MAY 1758H - MATERNAL SISTER TO LOT 24

Lot 26

TR Ms Precision 2077Z is without a doubt one of the most prolific Angus females that we have been able to incorporate into our SimAngus breeding program. She has produced countless high selling half-blood bulls that were selected by top seedstock and commercial producers across the country. The first set of ET flushmate brothers that sold in 2018 will be recognized as one of the deepest sets of flush brothers that we have ever offered. KCC1 Empire sold for \$20,000 to Krebs Ranch, KCC1 Execute 109E sold for \$22,000 to KenCo Cattle Company, and several other flushmate brothers sold from \$7,500 to \$12,000 to operations across the country. This trio of brothers offer breeding leading figures that rank them among the top 4% of the breed for YW and ADG, top 10% WW, top 15% MWW, top 15% CW, top 20% API, and top 15% TI. They are homozygous black and homozygous polled half-blood herd sire prospects that will leave behind a sensational set of replacement females. Pick and choose which brother you like best or turn out all three to experience the full affect!

210J is a blaze faced Berwick son that is backed by KCC1 Havana 83E, making him a maternal brother to the \$230,000 KCC1 Countertime 872H and the \$60,000 KCC1 SWC Harmony 847H. Havana is one of the most consistent and predictable females that we have ever had in the donor pen. She is from a long line of maternal greats that would include the now deceased TKCC Victoria 57A, and the foundation matriarch Ford RJ Dolly Y83.

KCC1 HAVANA 83E - DAM OF LOT 33

Lot 34

We purchased JPCC Confederate 49G from Wheatland Cattle Company in 2019 to inject more length, frame, and growth into the maternal base of our cowherd. Confederate is an Affiliate son, tracing to the \$70,000 CCLT Alliance 91C. We have been impressed with the added length of side, stoutness, and structural integrity that Affiliate has sired in this set of sons. TKCC Confederate 166J is from a productive daughter of Yardley High Regard W242 that has produced several sons that we have sold in previous sales. 166J posted a WWR at 105.

NWSS PEN BULL

2022 NWSS GRAND CHAMPION PEN OF THREE PERCENTAGE BULLS
LOTS 49 & 50 WERE MEMBERS OF THE PEN

The next pair of SimAngus herd sire prospects may very well be the most unique three-quarter blood bulls that we have ever produced at Kearns Cattle Company. They are sired by the record selling \$530,000 SO Remedy 7F and supported by a tremendous two-year-old that we IVF'd as a virgin heifer. KCC1 Gwen 9073G is a flushmate sister to the \$22,500 high selling bull from two years ago that was selected by Wicks Cattle Company of North Dakota. Gwen is a maternal sister to the legendary KR Casino 6243, one of the most well-respected sires in the Angus breed. Casino semen has been offered to the public on a limited basis, and when made available has sold for over \$450 per unit! We admire these two brothers for the structural integrity, flexibility, and real-world performance that they offer. The dam of these brothers offers a picture-perfect udder design and is phenotypically one of the most beautiful young females on the ranch. 538J is a bigger outlined, longer framed bull that offers tremendous eye appeal and presence. 536J is a more moderate framed bull that is unmatched in terms of center body shape, dimension, and density. Help yourself to one of the first Remedy sons to sell, backed by generations of elite cow families!

Here is another trio of ET flushmate brothers that are sired by the record selling SO Remedy 7F. The dam of these standout three-quarter blood SimAngus bulls is sired by the \$75,000 TKCC Classified, a member of the herd sire battery at the historic Hudson Pines Farm in New York. The dam of KCC1 Felicity 8021F is the powerhouse Angus donor dam known as TR Ms Precision 2077Z. 8021F is a three-quarter sister in blood to KCC1 Execute 109E and KCC1 Empire 280E, as well as several other past sale features from the 2077Z cow family. These homozygous black and homozygous polled herd sire prospects rank among the top 10% WW, top 10% YW, top 15% ADG, top 15% MWW, top 25% Doc, and top 30% TI.

CCR MS MISTY MAY 8014U - DAM OF LOT 54-57

KCC1 FOLSOM 512F - MATERNAL BROTHER TO LOTS 54-57

We have put very strong emphasis on the maternal aspect of our cowherd to produce bulls that have the maternal strength and longevity bred into them. Consequently, these bulls should last longer and sire top tier replacements that are the keeping kind! The dam of 354J, 55J, 1204J, and 305J is the powerful CCR Ms Misty May 8014U donor dam. 8014U is also the dam of KCC1 Folsom 512F, a past sale feature and sire of impact that has become one of the most versatile breeding bulls we have ever used. Other maternal brothers to these four ET flushmate brothers would be KCC1 Battle Cry 540H and KCC1 Turnpike 286H. They rank top 25% for YW, top 25% ADG, top 15% Doc, and top 30% WW. All four brothers are homozygous black and homozygous polled.

1232J is a half-blood SimAngus that is big ribbed, sound built, and easy fleshing. We have always appreciated the efficiency of the Sandeen Upper Class daughters, and the dam of this bull is no exception. 6008D is further influenced by the foundation CNS Tiara P405, making her a maternal sister to TKCC Tiara 1Z. The Tiara cow family has been one of our most reliable lines for the past decade.

B/R RUBY OF TIFFANY 15 - MATERNAL GRANDDAM OF LOT 65

The next three bulls are full sibs in blood sired by the ST Genetics standout, B/R MVP 5247. All three of these bulls were raised by two-year-old first calf heifers that are ET flushmate sisters. The three first calf heifers are sired by the \$400,000 Profit and backed by the strong maternal influence of TEX Young Lucy 9010, a top producing donor dam sired by B/R Ambush 28. All three of these bulls offer moderate birth weights, and their dams brought them to the weaning pen with excellent pay weight. We appreciate the sound structural build, body dimension, and overall balance that these three full sib brothers in blood offer. If you're looking for a low percentage SimAngus bull to maintain the maternal strength in your cowherd, while capitalizing on heterosis, then pay attention here!

1061J is a maternal grandson of B/R Ruby of Tiffany 15, one of the leading donor females in the TD Angus program. T/D Ruby of Tiffany G9310 is a powerful two-year-old daughter of the \$400,000 Profit. This quarter-blood SimAngus bull is long, smooth, and flexible on the move. Several Pathfinder dams line the pedigree that supports 1061J. B/R Ruby of Tiffany 15 is also responsible for producing the \$25,000 B/R New Day 454-341 sire.

We made the investment in a set of bred heifers straight from the heart of the TD Angus program, and we couldn't be more pleased with how those females have calved and the job they did raising their first set of calves. KCC1 MVP 1012 is the first son of the ST Genetics standout B/R MVP 5247. We appreciate the blend of calving ease, performance, and carcass merit that 1012 brings to the equation. Qualified for the CAB "Targeting the Brand" program.
