CATTLE SOURCE
PRODUCTION SALE

1 PM MST - MARCH 24, 2022 - AT THE RANCH CRAWFORD, NEBRASKA

Welcome

Jock and I would like to welcome you to our First Annual Production Sale. It has been many years coming and we felt like the time was right. We are excited to have Innovation Ag Marketing on our team and helping guide us through our first sale. **WE** value all of our customers through the years and great friendships we have built. Having a sale will give everyone equal opportunity to view and bid on the bulls of their choice.

This is the strongest and deepest set of bulls we have ever offered for sale. There are bulls in this offering to meet everyone's needs, calving ease, performance or both. They will be semen tested and ready to go by sale time. These bulls have gained well and ultra-sounded very well. In a dry year and with the low energy and management strategies we take in developing, them we couldn't be more proud of the way they have look, we know that as they continue to mature they will only continue to impress during their long breeding career. These bulls are no fluff and puff, just ranch raised and ready bulls that will thrive in just as well during the poor years as the good ones. We try to keep our bulls from being too fat and in great shape so they will hold up during the breeding season for you. If have any issues or concerns with the livestock please let us be the first to know and we will do what we can to sort any problems out. We select herd bulls that are outliers in their herds. A lot of the bulls we turn out are AI sire bulls or AI sire quality. We want cattle that will excel in our environment and yours. Our donor cows are cows that have excelled in production and have proven themselves to us. They may not be a household name but I will guarantee you they flat get their job done on raising/producing high quality consistent progeny.

We would like to welcome our guest consignors Cumming Creek Cattle Co. and Volk Livestock.

Feel free to come by and evaluate the bulls anytime prior to the sale and hope to see everyone on sale day.

Sincerely,
Western Cattle Source
Jock and Brenda Beeson
Tyler Morava

THURSDAY, MARCH 24, 2022 - 1 PM MST - AT THE RANCH - CRAWFORD, NEBRASKA

The Western Cattle Source has been in motion for nearly three decades. Jock and Brenda have been very driven and methodical in the evolution of their progressive program. It's one entrenched with grit and passion for the land and the cattle that graze the western Nebraska range. These cattle are ran in true western ranching fashion and will essentially thrive anywhere they are introduced. The innate ability to hustle is a significant part of their DNA due to the selection pressure of the environment over the many years WCS has been in the business.

The female side of the operation is essentially a closed herd endeavor and rightfully so as those that are in the working cow herd have passed all regional tests and cleared all of the necessary hurdles. The pressures of the environment are extreme cold, frequent drought, and predatory species, big pastures, and infrequent water sources with significant distance in between. The hustle is what makes cattle like the ones at WCS survivors, western ranch bred stock are awesome to see in action especially at calving time. The survival instincts kick in and its sheer value that many east of US Highway 81 do not ever witness.

Northwest Nebraska has always been considered "Angus Country" and therefore Jock and Brenda felt they had to build their Simgenetic program with cattle that fit that mold. The females at WCS are loaded with femininity, deep, bold rib design, and flawless feet and joints. They have that good flat smooth build and kind to replicate the competition. The power and extra punch would be delivered by the bull battery in which the investment has been made over the years. The goal to continue to build cattle with improvement at every evaluation point with quality and the ability to thrive in their environment will always be at the forefront of the WCS check list. There would be a significant amount of feeder cattle marketed throughout this region across the video or through many of the very high volume, reputable auction yards throughout the territory, so those cattle in those scenarios must have quality, look, balance, and

weigh in order to be profitable for the ranches that produce them and the order buyers that place them to be fed. Those cattle are procured the way that they always have been with the human eye. Jock and Brenda are conscious of the numbers and index, but they never get too far away from the basic fundamentals and that is why they have been able to grow their cowherd and land base over the years. Computer generated stock are not an option in this setting or environment.

The Innovation team is excited to work with Western Cattle Source and encourage all to take an in depth look into the offering that exists on the pages of this sale book. Please join us on March 24 for the first annual bull and female event at the ranch just outside of Crawford, Nebraska. If time permits, we suggest travel via Rapid City and take in Mt. Rushmore pre or post sale. Please reach out to Jock, Brenda, or sale management with any questions regarding this offering and the WCS program at any time.

Enjoy the stock

- The influence that Express Lane 29G has already had on our program is immense, the set of progeny this Turnpike son has generated are the real deal and the surefire consistency he breeds with reveals he will be a sire that goes down in the history books at WCS. WCS Hammer Lane 1820J epitomizes what we love about this sire group, they offer so much more than just being impressive from the two-dimensional view, these cattle are wide backed, powerful hipped and high performing. We focus on keeping a build of longevity whilst adding density and here is a prime example of goals being achieved. As you turn to his number profile you will see unique combination of big improvements of growth and pay weight along with heifer bull candidate birth weight and calving ease combination.
- He along with his full brother's lots 2-4 and maternal brothers 19 & 20 come from one of our most dominate forces in donor pen LRS Ms Elevate 6019D.

LRS MS ELEVATE 6019D

- One of the most intriguing bulls that has ever been raised here in Crawford, this purebred son of W/C Express Lane 29G combines a burly build, extra dense body shape, wide foundation and awesome structure with a data set that is as dynamic as you could possibly find. You will see evidence through his own performance that includes close to 700 pounds at weaning time.
- He comes with some extra stifle expression, boldness of hind quarter and upper hip shape, regardless of your vantage point he is set to impress.
- He tested homozygous polled and black.

- It's the combination of build, presence, genotype and cow family that elevate the position of Express 194J on our favorites list.
- Each time he runs through the chute to have data collected he impresses, at weaning he ratioed a 110 with 723 pounds of scale pressure and on scan day his 115 IMF ratio only justified our beliefs that he will be the promoter of high quality beef characteristics not only on the hoof but at the rail. The second highest API figure of any bull in the sale.

- WCS Express 1033J presented a performance package that is curve bending in nature, he exploded from a 76 pound birth weight to just shy of 700 pounds when he came to the weaning pen.
- He is the easy keeping kind that is big bodied and will generate females that are difficult to let go of.

- WCS Mr Express 155J is the long outlined son of Express Lane that stems back to the influence of TNGL Track On B748 maternally.
- A unique pedigree that mixes the best of both worlds, maternally his pedigree reads of generations of cows that have been mainstays here in the program, and paternally you find an injection of growth and performance.

- WCS Ms Mainstay 1818J leads of one of the most impressive sets of full brothers we have marketed to date. These three quarter brothers represent the combination of our tried and true W/C Mainstay 355F herd sire on the WCS Ms Point 5228C female that represents a new addition to the donor line up. 5228C is an outlier from a performance stand point, this purebred female is an out-cross to many of the common pedigrees you will see that sport a dataset like hers.
- Turn to 1818J as a breed leader for growth and performance. His injection of weight will come from the added length and frame that his progeny will be built with.
- Top 2% wean, top 2% yearling, top 4% ADG and top 1% REA.

- WCS Mr Stabilizer 1814J is one that has drawn a crowd! He is the combination of some of the most potent breeders that have ever stepped onto the Ranch in Crawford. He checks all the boxes, he is a heifer bull candidate, that is baldy faced and matured with extra capacity and curvature.
- His mother LRS Ms Elevate 6019D was our selection of the pick of the Lassle Simmental cowherd in Montana. She is beautiful uddered, awesome footed and has been one of the most impressive donor cows we have ever fostered, to this point she has 33 registered progeny in the ASA and many of the females we have got are entering production and yielding the goods!

- Stay With Me 123J is the type that you need to mark if you're interested in massive additions of pay weight, growth, phenotypic value. He ratioed a 111 at weaning with his 726 pound weaning weight. His performance is backed by genomic predictions that reveal the heritability of his growth is high, as he sits top 10% weaning weight, top 15% yearling weight, top 30% average daily gain and top 10% Ribeye Area.
- From a phenotypic stand point, this Mainstay 355F son excels, his baldy face may draw your eye but it's the flexible skeleton of 123J and combination of body shape and muscle lead to even more value and intrigue.

- A three quarter blood that will sire calves with massive growth potential as they mature. This baldy is a stout cowman's bull that is extra wide and burly in his muscle shape, he is masculine headed, wide based and big footed. He is the type that will make a quick and potent influence to the profit margins of your calf crop through injecting additions of pounds and carcass yield in the first generation.

- A homozygous black son of W/C Mainstay 355F that sports a baldy face. In an effort to maximize profitability and productivity, WCS Main 147J presents himself as a leading option. One of the undoubted ways to remain profitable in your operation is to increase the longevity of the females in the cowherd, the more calves they bring to the weaning pen the quicker they put their name in the green.

- He flipped from a 94 birth weight ratio to a 108 at weaning.

- WCS Mainstay 137J has matured into a super attractive and proud headed stud, he will be the source of added pay weight and performance, his grandam TC Chloe 5167 has been a valuable addition to the program, she is responsible for a long list of role model daughters in the cowherd.

- Not only do you get an injection of maternal with 137J but he scanned just shy of 15 square inches of rib eye area, we think 137J offers a world of good to a commercial operation.

- WCS Rest Easy 1012J starts off the small but impressive set of W/C Rest Easy 752G sons we will sell in 2022. His dam WCS Ms Executive 916G stems back to the influence of the legendary 5002X cow that has made a huge impact in our program.
- We love the easy keeping and easy feeding traits of these Rest Easy cattle, they continue to impress as they mature from a moderate birth weight. As you look to source herd bulls that will transmit a curve bending growth pattern whilst maintaining look in their progeny then pay attention to lots 31-33.

- PCK Admiral has one of the most impressive EPD profiles of any purebred in the entire offering. He has twelve traits that rank above breed average, with highlights including a combination of calving ease and performance traits.

**LOT 33 - PCK ADMIRAL**

- WCS Instinct 120J is a purebred son of the sire of attraction W/C Instinct 1000F. He is the CDI Innovator son out of the highest grossing Simmental cow in the history of the breed, Miss Werning KP 8543U, who has more than 8 million dollars of direct progeny sales.
- We love our 1000F daughters, and they were a highlight of the Werning's dispersal of the 2020 born bred heifers this past February. We foresee the daughters of 120J to be the keeping kind.
- There is questioning that 120J is a heifer bull candidate.

- WCS Instinct 127J came light at birth, but exploded from there towards an impressive display at the weaning pen where he crossed the scale to ratio a 104.
- Scan day allowed 127J to only add more stars besides his name when he excelled for both ribeye area and IMF, two traits that often work against each other, he measured a 14.6 eye and scanned a massive 126 for IMF.

- WCS The Patriot 1069J is an impressive beast, we love his unique structural design and eye-catching charms. He is extra big bodied and dense, yet long spined and remains flexible on the move, never missing his track.
- 1069J has been an outlier when it comes to mass, his 809 pounds was toward the top of the class come weaning time to ratio a 123 and he mashed the scale with over 1200 pounds at a year.

- A January born purebred that is sired by the SJCC Volk Channing C020 stud that combines the influences of STF Royal Affair and the legendary JS Flatout Flirty 46T, the grandmother of the Triple Crown winning 'Boots' female that Jake Bloomberg campaigned.
- He comes with some extra masculinity and maturity, we predict he will be ready to breed cows early and often.

- A direct son on W/C Executive 187D that just like the entire offering was developed with longevity in mind, never pushed or jeopardized. We know he will continue to mature into a moderate framed, easy keeping and big bodied type of her sire. That's exactly the way you will describe his daughters that will be featured members of the cowherd.

		25	40				35	30		50	25		25	25		

- WCS Biscuit 103J is a homozygous polled and homozygous black $\frac{3}{4}$ blood bull that traces back to the influence of the performance driven W/C Wide Track 694Y.
- He is the bigger outlined type and burlier built kind that is equally as impressive from behind as he is from the side. You will appreciate the extra muscle shape he brings to the equation.

LOT 50 WCS BISCUIT 1127J

- A big growth purebred son of WCS Biscuit On High 9805G, that tested homozygous for both the poll and black genes. His EPD profile reveals that his ability to add quality goes well beyond growth.
- 1127 is one of the youngest bulls in the offering, and ranks as one of the highest marbling purebreds we will sell.

- A longer spinned and heavier muscled son of WCS Biscuit On High 9805G. His EPD profile follows suit with impressive growth predictions that will quickly inject pay weight into your calf crop and therefore the bottom line of your operation. He ranks top 25% weaning, top 30% yearling and top 40% average daily gain.
- He ratioed a 110 when he ran over the scale at 724 pounds come weaning time, proof of his impressive predictions.

30		30	40				35	35		30	25		10	40		

- This son of WCS Huskermix 6042D measured with a massive 15.6 ribeye area that ratioed a 112 among the contemporary group. Couple that with a top 30% yield grade trait and top 25% carcass weight number and he will quickly inject beef product into his progeny.
- The numbers support the powerful muscle shape and build of 1049, he is extra stout!
- Note: WCS Huskermix 6042D is a full brother to the WCS MR Husker 3076A bull that is hard at work for the Werning program. He is a big-time generator and sired an awesome set of females that highlighted their bred heifer sale dispersal this past Spring.

- WCS Mr Aimhigh 1089J is a homozygous polled and black and ranks top 10% for milk, top 15% stay and top 30% for calving ease.
- A younger bull prospect that offers an out-cross pedigree to many of the popular sire cows and cow families not only in our program but across the nation.
- A maternal brother to WCS Deadwood 4010B, raised by us and purchased by Werning's.

30	50	20	20	25	35	10	10	45	35	15			50	30	45	35

- We initiate this group of Age Advantage bulls with a half-blood son of W/C Mainstay 355F that is extra stout in his build, he is the bigger backed, long sided type who will be responsible for calves that develop with extra performance after a moderate and acceptable birth weight.
- His homozygous polled and black status means that he will add to the consistency to the calf crop, a sure-fire way to add value to the marketability of these progeny.
- His EPD profile sports top 30% rankings for calving ease, top 50% BW, top 20% WW, top

direct from cow country in western Nebraska

LOT 56 - WCS MAINSTAY 0713H

- 0713H has been a leader of the pack from early on, almost tipping the scale with 847 pounds of weaning weight, ratioing a 120. His mother WCS Ms Point 542C has been a high-end producer in the cowherd, and continues to rack up and impressive resume.
- You will not find a better candidate that is read to work immediately and add immense pounds to the calf crop.
- He scanned a 14.7 eye to ratio a 104, and his IMF scan was t 3.27 to ratio a 105.

- A higher percentage stud that came small and weighed heavy, he also tested homozygous polled and black. He has a spread from his moderate birthweight figure of 0.2 to a 131 yearling weight figure.
- He goes back to the influence of Track On and out of a WCS Ms Pendleton 2029Z female that stems from generations of WCS branded females.
