WELCOME TO AWR

On behalf of the Aces Wild Crew, I'd like to welcome you to the Aces Wild Ranch Spring Production Sale. We invite you to come evaluate the cattle we are offering on April 29th at the Ranch. The sale cattle, donors, and the herdsires will be on display. It is sure to be a good time for those who come! Will Hobbs will be performing live music and there will be cold drinks served along with good quality beef.

Over my lifetime I have worked to breed a genetic base that meets and exceeds the demands of today's farmers and ranchers. I have spent my lifetime in the Charolais business and I am so grateful to have built many lifelong relationships, as well as having the ability to establish this program.

Our Angus cow herd is composed of cattle that were handpicked out of Express Ranches. These Cows were picked primarily on visual, appraisal, and production history. They have proven to be very powerful, functional, and very easy on the eyes!

The bulls and females we are offering have been developed on a high forage ration at our location in Waurika, Oklahoma. We have raised them to be able to work once they are in your hands. These bulls and females are guaranteed to be breeders. On the females we are willing to synchronize and breed them to our exciting new Angus sire, Custom Built, at our expense. We would be interested in buying these calves back at weaning as well.

We believe we are only as successful as our customers, and we are here after the sale to help you in any way that we can. Please feel free to call with any questions. We look forward to seeing you on April 29th at the ranch, as well as at the Superior Studio or online on May 1st!

Jed Watje

welcome TO THE INAUGURAL ACES WILD RANCH ♠ ♥ ♦ ♣ BULL SALE

MONDAY, MAY 1 • 1 PM

TRAVEL

The auction will take place at the brand-new state of the art studio at the Superior Livestock Auction headquarters located conveniently between Weatherford and Fort Worth on I-20. The cattle will be on display at Aces Wild Ranch in Millsap, Texas and available for viewing prior to the sale. Each lot will have a video that was taken the third week of April. We look forward to seeing you on sale day!

DELIVERY & YARDAGE

Bulls will be available for load out sale day after complete payment has been made. Aces Wild Ranch will help with arranging trucking of bulls immediately after the sale, please reach out to Jed for more information. Bulls that do not have prior arrangements made will be charged \$5/day after May 15th for yardage.

ANNOUNCEMENTS

Announcements made sale day and from the auction block during the sale take precedence over printed materials associated with this sale. Anyone attending this sale attends at their own risk. Aces Wild Ranch and sale team will not be held responsible for any personal injury for attending this sale or open house.

TERMS & CONDITIONS

All cattle sell under the standard terms and conditions of the American Angus Association & American International Charolais Association. Terms available sale day.

EPDs

The EPDs listed are Spring 2023 numbers. Please note that EPDs may change from the time the sale catalog is printed until registration papers are transferred.

BULLS SELLING

Aces Wild Ranch is retaining one-third semen interest on all bulls. Additionally, the supplement sheet will outline special terms & conditions and/or any changes in retained semen interest in any of the bulls selling.

INSURANCE

We recommend serious consideration is taken about insuring your herd bull purchases. Insurance will be available sale day via James F. Bessler, LLC. James F. Bessler, 815.762.2641 • 4812 McBreyer Pl • Fort Worth, TX 76244

BREEDING SOUNDNESS EXAM

All bulls have been semen tested and passed a breeding soundness exam prior to sale day, results will be made available via a supplement sheet posted on Innovation AgMarketing website and the Aces Wild Ranch Facebook Page.

CATTLMEN & WOMEN

There are few people in the business that have had the patience and persistence that Jed has shown towards building a nationally reputable program. Not only has significant knowledge, toil & financial sacrifice been made to get to this point in the Aces Wild Ranch but a significant faith in trusting the process and only settling for the best has yielded the product you see today. We are excited to help showcase the product that Jed and his crew have tirelessly worked on putting together, and just know that this first offering of herd bull prospects and herd building replacement females are just a small sampling of what is to come in the short-term future of this program.

No doubts can be made about the commitments and support that Jed has put into the Charolais breed, he has been involved with numerous legendary individuals in the breed, and made it evident that no ceiling is too high when it comes to procuring the absolute most elite genetics that are made available. The Charolais sire battery for Aces Wild Ranch mimics the Hall Of Fame of Charolais Sires within the past 15 years, and this commitment to upper echelon quality is what sources the leading group of Charolais bulls to go under the hammer on May 1st.

The black hided division comes about as the results of a large transaction of Angus cows from the nation's second largest registered seedstock operation, and arguably the most recognized, Express Ranches of Yukon, Oklahoma. Jed with the assistance of longtime friends and herd advisors had the exclusive opportunity to hand select from the heart of the cowherd, taking not just those that impressed phenotypically, but females that had proven track records, and were backed by the most reliable and consistent cow families in the breed. The Angus cowherd of Aces Wild is built upon the principles of environmental hardiness, longevity, maternal excellence and long-term profitability. We think as you begin investigating the cow families, production records and predictability of the Angus offering you will be pleasantly surprised at the value you will find in your investment.

We look forward to the opportunity to host you at the ranch prior to sale day for an open house experience on April 29th. The afternoon will be filled with good cattle, like-minded people, excellent hospitality and a performance by Will Hobbs to enjoy. The bulls have recently been videoed so if you cannot make it to the Ranch to inspect the offering, you can trust in the authenticity of the video playlist that can be found on both the Superior Livestock Auctions or Innovation AgMarketing websites. It would also be worth your time to reach out to Jed to discuss the offering, he knows no stranger, and is eager to talk not only about the offering but the beef business as a whole. As you begin to consider the investments you will make in breeding stock for this coming year consider the addition of not only Aces Wild genetics to your program but tying into an operation that has made significant investments for more than a decade to produce a product that is geared towards the success of their customers.

• Welcome to the Inaugural Aces Wild Spring Bull Sale, this is a sale that has been a lifetime in the making, and we could only begin once we had a lineup of stock that were worth the occasion.

• AWR Mr Vision 2203 is exactly the kind that we want our program to be known for, a herd bull that combines the powers of immense cow family, impressive phenotype and the ability to add long term pounds and profitability into our customers cowherds.

TR CAG CARBINE'S VISION 9700 ET
SIRE OF LOTS 1-7

• We admire his body density, muscle shape and His dam, WATJE Ms Diablo 620D PLD has begun building quite the resume with a track record of generating progeny that enter purebred operations, including a brother selling to Tim Respondek and a daughter working for 4-W Charolais of South Dakota.

**AWR WILD CARD 2200** LOT 4

• AWR Wild Card 2200 personifies exactly why we think TR CAG Carbine's Vision 9700 ET is one of the most potent bulls we have ever been fortunate to use in herd, his surefire ability to click with our cowherd to increase mass, muscle shape, performance and eye appeal is unmatched.

• This thick ended, expressive muscled, stout boned, and dense bodied herd bull is impressive in the flesh. He has always been a standout from a composition and performance standpoint, and was raised by a Junior National, class winning female for Belle. In fact his dam stems from the fortitude of one of the breeds most recognizable cow families, being a direct daughter of the legendary HF Mustang Sally 904 by the National Champion TR PZC Mr Turton 0794 ET.

• Regardless of if you view him from the side, or behind, we think you'll find 2200 to have more than enough product and power.

• AWR Mr Phenom 933 is geared genomically to add increases in growth and performance to his progeny, however phenotypically and pedigree wise we see him making a bigger influence than just those traits.

• We love his long and extended outline, and just like the cowboys have always said, length equals pounds!

• Turn to the EPD profile of this age advantage stud to see proof to the claims as he charts top 6% weaning weight and top 5% maternal weaning weight.

**M6 BELLS & WHISTLES 258 P**
MATERNAL GRANDSIRE OF LOT 8

Additionally he ranks among the top 8% of the registry for marbling, so not only will his progeny hit market weight quicker, but their carcass quality will improve! That sounds like serious increases in profitability to us.

• AWR Mr Cub 2204 is the only son of our Reserve National Champion Sire, ONL AWR Cool Cub 7C that will sell this year. However for what the sire group lacks in numbers, this representative makes up for in regard to quality.

• At the ground you will find a set of big and square feet, dense and rugged bone work and a running gear that is flexible, up above is the big rib shape and aggressive muscle shape that we constantly set out for.

• We think the sky's the limit here as phenotypically he is sure a unique creature, and pedigree wise he provides some mating flexibility. Notice that is maternal pedigree traces back to the dam of Lot 3 in WATJE Ms Diablo 606D, a female that has a role model production record and has been a leading producer of breeder quality herd bulls and females.

77		691										

- Both sides of AWR Mr Law 33H's pedigree represent some of the finest maternal lines available north of the border; he would be an outcross to a very large majority of the genetics in the United States, yet he matches up with this group of bulls very well from a constitution and performance stand point.
- His sire, JIL Law N' Order 138F passed early but was destined to be the next great calving ease option, there are only a small sampling of his son's available worldwide. For those looking to try something different, that aren't willing to sacrifice calving ease, yet still demand growth then turn your attention here.

69	737	1352	41					

• AWR EXAR Vanguard 2378B came to the pen at weaning time with just shy of 750 pounds of pay weight, he leads the offering in that regard, and still stands at the front of the pack to this day as he mashed the scales on semen check day with an actual weight of 1352lbs.

• We love the combination of phenotype and EPD predictions that the Growth Fund derivatives possess, they are stout in their feature, rugged about their structural design and powerful in their muscle shape. 2378B finds maternal support through a Quaker Hill Rampage oA36 daughter that stems from the Rita tribe of female's, a cow family known as a leader of maternal excellence in the Angus Business. We predict progeny of Lot 22 will mash down the scale and be heavier muscled than the rest of the cohort.

• He ranks among the most elite 1% for WW, MW & YW, top 2% for RADG, CW & SF and top 10% for YH, SC, CEM and \$B.

AWR HENRIETTA 2270 LOT 26

• The females that are tagged Lot 28-31 are sired by arguably the most successful show cattle sire of all time!

• The story book that Silveiras Style 9303 has written for the show cattle industry is simply legendary. His influence across breeds is bar none the most dominant and consistent as any piece of breeding livestock to this point in history. If they hand out purple banners for it, a Style derivative has more than likely claimed it of recent times. There is no question that he injects a look and kind that is different than anything the business has seen, and these females have inherited his outlier feature.

• They are the big bodied, flexible moving and feminine featured kind that you will want in the front pasture. Tie to cow families that we are entrusting to build the cowherd here.

• If you are serious about carcass quality and profitability then the EXAR Jet Fuel 9706B progeny are the kind to tie too. He was a crowd favorite of the 2020 National Western Grand Champion Carload for Express Ranches, and showed that his quality was on either side of his hide when he scanned with an adjusted 17.4-inch Ribeye Area and recorded a 119 IMF ratio.

**EXAR JET FUEL 9706B** SIRE OF LOT 36

• Numerically a complete standout, she ranks top 10% CED, top 5% WW, top 3% YW, top 5% RADG and top 10% for SF, SG, SB and SC.

• Pay attention to this granddaughter of the \$150,000 EXAR Rita 5316 that was selected by the High Roller program, this EXAR Stock Fund 9097B daughter is built with the cowman in mind!

• There's a lot to like about this big bodied and cowy female. She is ultra-maternal in her kind, with a free build that is correct from the ground up, and her body shape is dense and bold.

• The Joy tribe of females is one that we look forward to propagating looking into the future, they are balanced on paper, but it's the cow power and longevity of these females that makes them so desirable to us. Good and square feet, great udder quality and easy fleshing ability means these cattle work in our country.

• This group of open heifer calves come from truly the heart of the replacement pen, going into our inaugural sale we knew it would be important to put quality first. We have hand sorted on them to bring you a group that are easy on the eyes, and out of our most potent cow families, meaning their ability to go on and generate is high. That means that this Simmental female had to be sifted into the sale pen.

• A direct daughter of the record setting \$530,000 Embryos on Snow phenom, SO Remedy 7F.

• We put a lot of value in the build of this SO Remedy 7F, she is extra square topped, deep bodied and great structured.

**SO REMEDY 7F** SIRE OF LOT 39

HEIFER GROUPS

The females selling as lots 40-54 will be grouped into 3 groups of 5 in order of lot, and lots 55-58 will sell as a group of 4. They are grouped by similarities in sire group and age, and are backed by many of the finest females and cow families that we are waging the future of the Aces Wild Ranch around. You can trace back in the pedigrees of these heifers to find many of the richest producing Angus females in the nation and they are sired by leaders in the industry. These grouped females are the kind you can entrust the future of a program around, build from them and yield the results of generations of meticulous cowmanship and selection. These females have undergone a vigorous health program and are ready for breeding season once they make the journey to their new owners.
