---

**Cattle on Display at the Sale Facility beginning Thursday, October 25**

**Saturday, October 27, 2018**

Cattle on Display - 9:00 AM

Lunch Served - 11:30 AM

***The Lee's Cattle Company Female Sale - 1:00 PM***

# 10.27.18

*Welcome my friends,*

Welcome on behalf of the family and crew, we thank you for your interest in this year's female sale. This is our first year to have a sale in Perkins, Oklahoma and we are anxious for you to evaluate the females that were hand picked from the heart of our program, including the very best of the bred heifers and young cows. We also hand selected a select group of fall cows that will have calves at their side by sale day.

I have been raising Angus cattle for over 25 years and Simmental cattle for the last 10 years. The cattle are moderate framed, big footed, and have muscle and bone. The Angus females are influenced by foundation Ohlde genetics. Both the Angus and the SimAngus will make excellent seedstock or club calf mothers. We have most recently incorporated Red Angus genetics into the herd that are backed by Pieper bloodlines in order to better accommodate our customers.

The sale will be at the H2 Ranch & Cattle Company sale facility in Perkins, Oklahoma. The cattle will be available for viewing on October 25th and 26th. CCI.Live will provide a live broadcast with real-time bidding. I would like to thank Graham Blagg and Innovation AgMarketing for all of their help making this sale possible. If you have any questions about the offering please feel free to contact any of the sale or ranch staff. We hope to see you on October 27th!

*John Et Kathy Lee*  
Lee's Cattle Company

*Fellow Cattlemen, Cattlewoman, and kids,*

Welcome to the inaugural female sale at Lee's Cattle Company! It is with great pleasure that we invite you to Perkins, Oklahoma for this exciting event. John Lee has spent decades assembling one of the most productive, fault-free, low maintenance cow herds in the United States through disciplined breeding decisions, strong emphasis on economical traits of importance, and the maternal strength that is necessary to positively impact future generations. The cattle are real world and required to travel long distances, maintain flesh in sometimes the less than ideal conditions of North Eastern Colorado, and breed back quick and bring a big stout calf to the weaning pen. With a primary foundation of Angus and Simmental genetics, John and his crew have assembled a tremendous set of production type seedstock genetics that work in a series of different environments and breeding scenarios.

The cattle that will sell are backed by generations of lineage that stem from the influence of sires such as DCC New Look 101, OCC Emblazon 854E, OCC Legend 616L, Barstow Cash, LBS The Foreman 702T, and WLE Uno Mas to name a few of the influential individuals that can be identified throughout the sale offering. Quality of structural integrity, fleshing ability, and real world performance is the strong suit of this set of matrons. With being hand picked from over 1000+ head of females, there is no denying the quality that will make their way to Perkins, Oklahoma for the female sale.

For over 14 years Lee's Cattle Company has been a trusted source for supplying Eastern Colorado with tested, rugged, athletic Angus, SimAngus, and Red Angus bulls that have worked for both purebred and commercial cattlemen with great success. These cattle we bred to last and will thrive in even the most difficult settings. Whether your program is focused on generating Angus or SimAngus seedstock or breeding them to modern club calf bulls to raise show steers, rest assured these are the type and kind of females that offer exceptional breeding versatility.

Consider this your invitation to join us on October 27th, 2018 in Perkins Oklahoma at the H2 Sale Facility east of town. The cattle will be on display leading up to the sale and videos of the offering will be available for viewing at [www.IdealVideoProductions.com](http://www.IdealVideoProductions.com). We are excited to announce that Christy Collins will be at the sale providing CCI.Live for real-time bidding for those of you who cannot make the sale. If you have any questions please do not hesitate to contact any of the sale staff about the offering. We hope to see you on October 27th in Perkins, Oklahoma!

Enjoy the cattle,

*Innovation Ag Marketing, LLC*

What a way to begin the Lee's Cattle Company inaugural female sale offering! 2598 sets the bar for functionality; body mass, structural integrity, and overall design that encompasses her MATERNAL POWER. This female is sired by our \$65,000 selection from "The One" sale, RUBY NFF EXCALIBUR 002X. Her dam traces to the maternal legend, OCC Emblazon 854E on the south side of her pedigree. She is sound footed, good uddered, big centered and offers a tremendous amount of capacity. She has put back an exceptional Maverick daughter into the herd. Study the quality, potential, and underlying value that is being offered in 2598!

Sired by the \$20,000 Krebs Ranch purchase, KR Cash 3389, this stunning Angus female is backed by the influence of Lee's Outlaw! She is jaw dropping from the side, as she offers so much look and elegance through her front third, yet transitions so smoothly into her fore-rib and remains bold and robust through her mid rib. This female is flawless in her skeletal makeup, starting with a large and correctly shaped foot, with exceptional stoutness. Her basic build, presence, and symmetry combined by her elite lineage makes her a true sale feature and potential donor prospect!

## THE FALL BRED HEIFERS

### LOT 21

6354 is an own daughter of the legendary Barstow Cash, a bull that has had as much of an impact on the Angus breed and beef cattle industry as any! Her dam is a productive Outlaw daughter produced in the Lee's Cattle Company program. She offers an attractive profile, with an up-headed and well-balanced symmetry that is further enhanced by her stoutness and genuine structural integrity. Study the extension, rib capacity, and maternal power that this top end Angus female offers!

## THE SPRING SIMGENETIC BRED HEIFERS

SimGenetic cattle have made vast improvements in the commercial beef industry through the utilization of hybrid vigor and added performance. SimAngus females in production are without a doubt some of the most impressive mothers you will find. Improved udder quality, increased fertility, higher weaning weights, and more visual performance. Many of these females are a product of the program, being sired by herd sires that John has hand selected from North America's most elite Simmental programs. The service sires to this set of females are owned by Lee's Cattle Company and are some of the most promising young sires in the business. Here is a big time opportunity to select from years of disciplined breeding decisions, herd sire investments, and proven genetics that support these females. Look to this set of SimAngus females if you're searching for that added performance and of course the beautiful baldy face!

Elegant, smooth shouldered, angular, yet still this red headed beauty offers all of the mass and dimension that one could ever want. She has been admired for her added stoutness of foot and bone, rib capacity, and overall eye-appeal. A big time half blood with a bright future!

**LOT 41**

There is no denying the maternal function, productivity, and generating power that the Angus cowherd at Lee's Cattle Company has to offer. The basic principals of structural soundness, fleshing ability, forage efficiency, and fertility are the most critical when it comes to retention. These females are supported by generations of breed impacting individuals such as Emblazon, Legend, Outlook, New Look, Barstow Cash, and Apollo to name a few. With the fundamentals and key economic traits of importance always taken into consideration first, this set of females is built to last and thrive in even the most arid environments. Many of these females are AI bred and pasture exposed to the same service sire, due to a strong emphasis on the bull battery; John has scouted the countryside to acquire the best set of walking herd sires in the land. These Angus females will compliment any Angus program that puts a strong emphasis on problem free, low maintenance type cattle, as well as working in a crossbreeding scenario to generate high end SimAngus, LimFlex, or Maintainer females, and of course to add a more maternal foundation to a set of club calf producing females. Regardless of the way that you choose to mate these productive young females the next time, rest assured that the **MATERNAL POWER** is in the blood and this set of females will generate!

## THE RED ANGUS **BRED HEIFERS**

**LOT 52**

The newest breed incorporated at Lee's Cattle Company are the Red Angus, and what a set of females that John has put together! Red hided females are taking the commercial marketplace by storm and continue to be in high demand. Added maternal function, fleshing ability, docility, structural correctness, and udder quality can be found in this set of red females. Many of these females are sired by the proven Firestorm, one of the most dominant sires the Red Angus breed has ever known. These females were AI'd and exposed to the 2018 Smoky Y Ranch high selling bull, Smoky Y Now or Never, a son of the Genex Profit Builder stud. Now or Never is a big footed, sound structured, massive centered and big topped bull that is anticipated to add a shot of power and style to the red gene pool. Look to this set of foundation building Red Angus females if you're serious about raising top shelf red cattle!

## THE SPRING SIMANGUS BRED COWS

From the heart of the cowherd comes a strong set of SimAngus production aged females. Many of these cows are the females behind the Lee's Cattle Company Bull Sale that has become a reliable source for rugged, high performing, long-lasting SimGenetic bulls in Eastern Colorado. These females are built to work and required to do so! These females are built to last and never pampered. Large pasture settings, a long walk to water, and sometimes-unfavorable grass conditions makes reality of "survival of the fittest". These females are high volume, good uddered, sound built, good-footed females that sired by proven genetics that have also stood the test of time. The gates are open and John is offering up his very best straight from the heart of the cowherd in Brush, Colorado!

### LOT 74

## THE SPRING ANGUS **BRED COWS**

LOT 78

The Angus females that have made up the foundation of Lee's Cattle Company are real world! They aren't pampered, selected or bred on paper, they aren't supplemented 365 days a year and allowed to miss having a calf with the thought of we will just roll her to the next year, these females are expected to work! They are sound footed, deep healed, and athletic cattle that are required to travel long distances to water in large pasture settings. We take tremendous pride in the cow base that has evolved at Lee's Cattle Company. If the females don't work, then how can the sons and daughters when they are put into different operations? This set of production age Angus females are from the heart of the herd and there is no holding back the quality! Hand selected, time tested, and proven genetics that are AI bred to elite AI sires, and in many instances cleaned up with the same bulls we AI'd to. We believe in a strong bull battery, since it is the quickest way to improve or set back a herd. This set of Angus females are as real as they get and we strongly believe in them and think there is something for everyone on October 27th!

PE 5/21/18-7/14/18 TO KR LEADER (AAA- 18874292)

2170 is another Outlook influenced female that is backed by N BAR Prime Kind H907. She is safe in calf to KR Leader and we expect a big time yield!

**LOT 102**

The Red Angus division of Lee's Cattle Company is without a doubt the most newly instated, but the same basic principles of beef production apply to these females. The Red Angus have been held to the same standards of structural integrity, body mass, udder quality, fleshing ability, and fertility. Red Angus cattle are taking the commercial sector by storm and are topping the markets from coast to coast and border to border! We felt the need to incorporate the Red Angus cattle to better serve our existing customer base. Sound, functional, practical cattle that work is the name of the game...and we are confident that these females will live up to our expectations.

PE 5/23/18-7/16/18 TO MNS PILLAR 6681 (RAAA- 3706429)

An ultra attractive Red Angus female that is sure to draw your attention on sale day! She is big footed, stout boned female that offers a tremendous set to her hip and hind leg. She has been a tremendous producer in our Red program and we believe that this female is capable of generating elite Red hided bulls and females alike. Her advantages in stoutness, rib capacity, and a three-dimensional look are what set this female apart from the normal crowd. She was AI bred to Lee's Uno Mas and exposed to the Pillar 6681 stud. We anticipate this female to make a substantial impact on whatever program selects her when the final hammer falls!
