Sale Location

At the Ranch - 10623N 1710 Road
Sweetwater, Oklahoma 73666

From Sweetwater OK take Hwy 30 North 3 miles,
then go 1 mile west and 3/4 of a mile North.

Sale Schedule

Sunday - March 29, 2020
Bulls available for viewing all day
Monday - March 30, 2020
9:00 am - Bulls on Display
11:30 am - Lunch Served
1:00 pm - Partners in Progress Sale

Welcome friends and neighbors to our 8th annual Partners in Progress Production sale here at McEntire Red Angus. We hope you know how much we appreciate everyone who supports our program. We love the cattle business and the families that it brings to our Ranch. It's what we do day in and day out, except for a few sporting events with the kids every so often!

We are excited about the offering of bulls we have for you this spring. These bulls were weaned on the 1st of October and developed here at the ranch. We have had them on a high roughage ration on a 110-day test. The carcass ultrasound data came back with great results, as you will be able to see in the bull information listed with each lot.

We understand that the Red Angus Breed is becoming more and more popular and that you have many options when it comes to choosing your herd bulls. We invite you out to the ranch to look over the bulls and heifers and hopefully you will find something that will bring value to your own operation and move your program forward. Good Bulls make great cows and our mating decisions have been based on producing next generation females to be more efficient and productive than their mothers. The Red Angus cattle have been known for good dispositions, calving ease, adaptability, and keeping your operation in the black! A good set of Red Angus tagged calves will top the sale no matter where you go.

We will be selling a nice set of herd bull prospects that we feel will make a great addition to a seed stock producer or to a commercial cattle operation. We will also be selling 40 commercial straight Red Angus replacement heifers and 50 commercial Red Angus Pairs. These heifers have been on a complete vaccination program and will be checked by Dr. Richard Prather one week prior to the sale for reproductive soundness. We will be selling these heifers and pairs in a gate cut of five head or more.

We would like to invite you to come out to the ranch on Sunday night before the sale and enjoy supper and a social. We would love to get to know you and your family! We will eat around 6:00 pm.

Please join us sale day at 11:30 am for lunch. The sale will start promptly at 1:00 pm CST. Again this year, the sale will be broadcasted live on CCI.Live for those of you that are unable to attend the sale. If you have any questions about the sale, please feel free to contact us or any of the sale staff to visit about the offering. Be sure and check out our website at www.mcentireredangus.com to view videos of all the lots in the sale. We will not sell in catalog order this year. Therefore, please be sure and look on our Facebook page or on CCI.live for the sale order on sale day. Thank you for your interest, and we look forward to doing business with you.

See you at the sale!

Randy McEntire

INNOVATION

— AgMarketing, LLC —

Welcome to the McEntire Red Angus 2020 Annual Partners in Progress Sale! It is a pleasure to work with the McEntire family and their program. There is no question that this operation is committed to producing a high-quality product for their valued customers. Randy, Crystal, and their family have assembled a tremendous foundation of brood cows to build from. Structure, longevity, fleshing ability, and performance are priorities. This highly functional, no-nonsense cow herd has been further enhanced through elite herd sire selection. Many of the walking herd sires at McEntire Red Angus are breed-leading sires that offer exceptional phenotype, genomics, and numeric profiles. The cowherd has adapted to the arid conditions of Western Oklahoma and thrives on the natural resources. These cattle are capable of going to different environments, adapting, and thriving because of the strict selection criteria that the cattle are put through day in and day out.

The McEntire family is fully committed to their product and their customers. They will be offering 62 stout, service-aged Red Angus bulls, 19 head of foundation building registered females, 40 commercial Red Angus open females, and 50 commercial Red Angus pairs. Consistency within sire groups is present, and the McEntire family is proud to offer large sire groups to better serve their customers with large selections of 1/2 brothers to improve uniformity of their customers calf crop.

The registered females are from the heart of the program and offer foundation-building traits. Many of these females are from top producing females that have endured the conditions and excelled. The commercial offering is a top shelf set of commercial Red Angus females that offer tremendous promise as brood cow prospects.

Consider this your invitation to join us on Monday, March 30th in Sweetwater, OK for the McEntire Red Angus 2020 Partners in Progress sale! Lunch will be served at 11:30 and the sale will begin at 1:00 PM CST. New this year, the sale will be broadcasted live on CCI.Live for those of you that are unable to attend the sale. If you have any questions about the sale, please feel free to contact any of the sale staff to visit about the offering.

Enjoy the Cattle!

SALE ORDER

Cattle WILL NOT sell in catalog order this year. A sale order will be available prior to the sale.

TERMS & CONDITIONS

Cattle sell under the standard terms and conditions as recommended by the Red Angus Association of America.

SEMEN TEST

All bulls will be semen and Trichomonas tested prior to the sale and are guaranteed to be fertile.

INCENTIVES

Free delivery within 150 miles of the ranch on bulls selling for \$3,500 or more and free nation-wide delivery on purchases greater than \$20,000. This does not include heifers. All trucking on females are the buyer's responsibility, but we will be glad to assist with trucking plans. If bulls cannot be taken sale day or arrangements have not been made with us within the first week for delivery, the seller can house bulls until pick up at a rate of \$4/day, however we will not be responsible for sickness or injury.

LIABILITY & ACCIDENTS

Every precaution will be exercised to protect the safety and comfort of those attending the sale. Neither the owners, auctioneer or any sale staff assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss of property. All persons attending the sale do so at their own risk. We are not responsible for typographical errors.

GUARANTEE

All bulls selling over \$4,000 will carry a first breeding season guarantee. The first breeding season ends December 31 of the year of purchase. Any request for a replacement bull needs to be made by this date. Death loss is the buyer's risk and mortality insurance is available on all bulls at the sale. Anything selling over \$5,000 is recommended to buy Livestock Mortality Insurance and McEntire Red Angus will pay 2% of the premium. Normal care and adequate nutrition need to be provided for maximum potential to be reached. It is recommended that bulls receive supplemental feed after the breeding season until they have reach maturity.

HERD HEALTH

All cattle sold through the sale are on a complete health program and will be accompanied by the health papers for shipment anywhere in the United States.

The Franchise Sire Group

9 Mile Franchise 6305 has taken the breed by storm as one of the most popular young sires in the Red Angus breed. Curve bending figures, elite carcass data, and maternal strength can be identified throughout the pedigree of the \$105,000 phenom. 9 Mile Franchise 6305 is from the late Y11 matriarch that made home at C-Bar Red Angus in Kansas. There is no denying the impact that Franchise 6305 has had and will continue to have on the business, especially as more data is collected and recorded on the progeny and grand progeny as they move through the feeding system. The Franchise bulls represented here at McEntire Red Angus offer an exciting combination of carcass merit, calving ease, and performance. This sire group offers many three-quarter brothers that are from productive daughters of PIE The Cowboy Kind 343. Consistency is key, cow families matter, and performance is guaranteed.

"I have used McEntire Red Angus bulls for the last several years with great success. Not only are the bulls easy to be around, but also they perform and their progeny performs. We retained ownership on our steers and were very pleased with how they fed. They weighed 1466 at harvest and gained 3.88 lbs. per day with a .70 cost of gain. We will continue to use McEntire Red Angus bulls to achieve this success." - *Ronnie Browns*

The New Territory Sire Group

PIE New Territory 523 was our selection from the Pieper Red Angus program in 2015. He is sired by the great Andras Fusion R240 and backed by the C-Bar Colt 121Y daughter, Centennial Fortune 3330. He is an elite growth and performance sire that ranks top 2% for WW, top 2% YW, top 3% ADG, top 1% CW, and top 14% REA. New Territory 523 boasts a double-digit calving ease figure to accompany his real-world performance. His sons are sure to add pay weight at weaning time to your calf crop and carcass merit if you retain ownership and feed your own cattle. Be sure to pay close attention to the New Territory sire group if you're looking to inject power and shape into your next calf crop.

9101 is sure to add pounds to your calf crop, yet still work on well-managed virgin heifers. He possesses an actual weaning weight of 729-pounds, a WW Ratio of 115, YW Ratio of 110, and a REA Ratio of 105. 9101 ranks top 1% GridMaster, top 1% WW, top 4% YW, top 17% ADG, top 1% DMI, top 22% YG, top 20% CW, and top 13% REA. His dam boasts a DMPPA of 106.

"I've been using Randy's bulls now for about four years and am very pleased. Randy is a great man to deal with and his bulls have a quiet, gentle disposition. His bulls will meet your needs whether you are looking to increase your weaning weight or to raise replacement heifers. Last year I was unable to attend the McEntire sale due to health issues. My wife called Randy and told him the situation we were in. He purchased a bull for us sight unseen and we could not have been happier with the selection he made for us. We plan to be at the sale again this year!" - *Mike Darsey*

9197 is the lone son of the offering that is by the six-figure valued AHL Flashback 446B. The added shape, length, and design that the Flashback sire group has become well-noted for is certainly recognized in 9197. His dam is a top daughter of BUF CRK Lancer F L297. A low birth weight bull with a 114 WW Ratio.

4MC Boteet 9176 is sired by PIE Seneca 7213, an own son of RREDS Seneca 731C. Her Saga dam is a tremendous young female with excellent udder quality and power. He is among the top 24% for WW, top 32% YW, top 13% HPG, top 24% Stay, top 18% YG, and top 15% REA.

The Commercial Offering

40 OPENS & 50 FIRST-CALF HEIFER PAIRS

BELOW YOU WILL FIND DESCRIPTIONS OF THE EPD DATA LISTED IN THIS SALE CATALOG.

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MATERNAL

Calving Ease Direct (CED) predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus' CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

Heifer Pregnancy (HPG) predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers.

Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

Maintenance Energy (ME) - predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cowherd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis. Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling Score (MARB) - predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

Yield Grade (YG)- predicts differences in USDA Yield Grade score and is expressed in USDA Yield Grade units. YG EPD is calculated using the genetic predictions of CW, REA and FAT EPDs. The reliability of Red Angus' YG EPD is enhanced by using both ultrasound and actual carcass data in the calculation of REA and FAT EPDs.

Carcass Weight (CW) - predicts differences in hot carcass weight and is expressed in pounds. Because Red Angus' CW EPD is a multi-trait model which includes birth, weaning and yearling weight data, the prediction is not subject to culling bias. Thus, it provides a more reliable EPD as compared to only using actual carcass weights. This computation allows for the use of weights taken on ~57,000 animals per year as compared to only ~1,500 animals per year with actual carcass weight observations. Increased Carcass Weight tends to detrimentally affect Yield Grade; the calculation of which also includes Rib Eye Area and Fat Thickness.

Rib Eye Area (REA) predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

12th Rib Fat Thickness (FAT) predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade.

INDEXES

Herdbuilder - Producers selecting bulls to develop replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder index into their selection decision.

GridMaster - Use the GridMaster index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.
