KAEHLERCATTLE.COM

We welcome you to another K-LER Cattle “Structured for Success” production sale on February 19th at K-LER Cattle headquarters, Seth’s farm, in St. Charles, Minnesota. This year marks 143 years of Kaehler ownership of the family farm. The birth of Haven Violet Kaehler in November was a highlight of 2022, adding the fifth member to generation-six on the farm.

Thank you for taking the time to evaluate our bulls, breds, and embryo lots. We strive each year to combine phenotype with strong EPD percentiles while maintaining the long-term production values of sound feet, sound structure, and correct udders.

This year is a year of opportunity for cattlemen as cow numbers are at an all-time low. With feeders and fats continuing to climb in price, it’s the time to invest in herd improvement. The K-LER Cattle genetic purchases made on February 19th will add profit to your bottom line – something K-LER genetics has been doing for customers since 1918.

With this set of cattle, we offer the deepest and strongest yet in terms of breeding potential and sheer quality. The bulls are backed by our four-year feet and semen guarantee. We continue to offer direct feeder-calf marketing options for calves out of our genetics. This year, calves sired by K-LER bulls averaged \$1274 in early November, straight through on steers and heifers. Weaning weights continue to climb. Throughout the bull line-up you will find herd sires that suit your needs. From elite AI quality bulls to calving-ease sires for first-calf heifers, to pounds-and-power bulls for heavy calves to run across the scales. The success stories we get from our customers inspire us to continue on.

We welcome our guest consigners and friends Paul and Nia Hill, Hill Brothers Livestock; Brandon and Nicole Hammann, Hammann’s Rock Hill Angus; Jake and Emma Smith, Sequim Valley Angus and Simmentals.

We want to give a huge shout-out to Ryan Ihrke and Dylan Lunning, our on-farm managers. We wouldn’t be able to do what we do without them. They give their full effort every day and know what needs to be done. They’re willing mentors for Creed when he thinks they need an extra hand.

We look forward to seeing you all before or on sale day. Please feel free to reach out with any questions about the offerings. Good cattle and great friends are why K-LER Cattle continues in this business. We would not be where we are today without you.

We look forward to working with our existing friends and making new ones along the way.

Sincerely,

Seth, Shelby, Creed, Colt, and Haven
Cliff, Bailee, Phenix, and Devereux
Ralph and Mena

Structured for Success

Welcome to the another K-LER Cattle “*Structured for Success*” production sale on February 19th at K-LER Cattle headquarters, Seth and Shelby’s farm, in St. Charles, Minnesota. The Kaehler family has deep tying roots to the production agriculture business throughout the upper Midwest. A long-standing program that has put strong selection pressure and breeding emphasis on creating eye-appealing cattle that are sound built and offer real world performance. The program is anchored around key cow families that can be identified throughout the entire offering.

The bulls have been developed in a manner to host longevity for you as you make your investment. This program has yielded many herd sire prospects over the years that have positively impacted some of the breed’s most notable programs. The genetics that support this set of bulls have the credentials to positively impact your program’s bottomline. Regardless of your production goals, there are bulls that will fit your every need. From calving ease prospects to performance driven sires that will add terminal merit to your next calf crop, or maybe you’re searching for a herd bull that will add the necessary maternal function to his daughters to warrant replacement status post weaning, rest assured that this herd sire offering has the diversity and quality that deserves your consideration!

The bred heifer division is saturated with quality and cow family this set of females are straight from the heart of the program! Daughters and granddaughters of the most proven and prolific will sell on February 19th in Saint Charles, Minnesota. The opportunity to invest in the future of your program awaits your appraisal and should not be taken lightly.

Consider this your personal invitation to join us at KLER Cattle Company for the Structured for Success production sale on February 19, 2023. The cattle will be available for viewing at the farm any time prior to the sale. If you are unable to attend on sale day, rest assured that DV Auction will be able to accommodate your schedule with a live broadcast that offers real-time bidding. If you have questions about the offering, please reach out to any of the sale staff prior to the auction. We look forward to seeing you on the 19th in Saint Charles, Minnesota!

Enjoy the cattle,

Graham Blagg

TRUCKING

Dick Coleman 765.461.0954

Free delivery to customers within a 350-mile radius of St. Charles, Minnesota. K-LER Cattle covers the first \$200 trucking elsewhere in the United States. *\$100 discount per animal if you haul home day of sale.*

TERMS & CONDITIONS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed. Sale will be available to registered bidders via the Internet at DV Auctions (www.dvauction.com) to accommodate both local and distant individuals who cannot attend in person. They provide a real-time internet broadcast during the sale. All absentee bidding will be done via internet to a ringside sale representative. Please register for bidder number at dvauction.com any time prior to 12 Noon on Friday, February 11th to accommodate the approval process. After this date/ time, bidder approval may be delayed. Approved bidders will be issued bidder number and access prior to the sale. For questions or sale bookings call Office M-F 8am-6pm CT: (402) 316-5460

SEMEN INTEREST

Seller retains 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block.

RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury and will be loaded according to purchaser's direction.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

LIVESTOCK INSURANCE

Jame Secondino Krieger (812) 208-0956

BOARDING

Bulls will be wintered at no additional charge until April 1, 2023. Bulls will have passed a thorough breeding soundness exam prior to pick up/delivery. Since each animal becomes the risk of the purchaser as soon as sold, we strongly recommend a mortality insurance policy be taken out on any animal that is left to be wintered. Any bulls left past April 1, 2023 will incur a \$3/Day feed charge.

SUPPLEMENT SHEET

Announcements from the auction block will precedence over statements in catalog. Disclaimer: The information in this catalog is subject to change. Planned mating EPD's will also be available for the bred heifers the week of the sale.

BRAND GUARANTEE

1. Four-Year Feet and Semen Guarantee

All bulls sell with a four-breeding season guarantee on feet and semen. If his semen or feet go bad, we will provide credit for the breeding seasons left to complete. The sale credit issued will be the purchase price minus salvage value. Sale credit reduces 25% of that value for each breeding season completed. Feet will be covered or unsoundness not caused by illness, foot rot, or other bulls. Vet statement must be provided for semen test or soundness and with statement bull is in good health and condition. Sale credit must be used within one year.

2. Feeder-Calf Marketing Program

We have feedlots wanting to buy calves out of our genetics. Contact Seth if you would like to get a bid on your calves – at the farm or the sale barn. Early notice will help us get loads in order.

3. Female Guarantee

All females sold as open animals are guaranteed to breed or they will be replaced with another animal, or with sale credit towards another female. Sale credit must be used within one year.

4. Sight-Unseen Purchase Guarantee

All cattle bought sight unseen- If you don't like the animal once delivered, you don't own it. Warranty will be issued for the appropriate value as sale credit towards another animal and must be used within one year.

5. If you have an issue with an animal purchased from us, please let us know, and we will find a solution.

- KLER Greater Good 2064K is one of the truly unique herd sire prospects ever produced at KLER Cattle Company. A tremendous homozygous polled Purebred that is sired by KLER Promoter G15 Select Sires feature sire, one of the many sons of the prolific GW Miss GPRD 028X.
- KLER Promoter G15 is a maternal brother to the \$170,000 KLER Right Design 012J, the high selling bull from last year's production sale.
- The dam of 2064K is the young and exciting red hided donor, HS/HLF4 Gingersnap. She is a derivative of the famed Myers Queen Sazerac P94 cow family, one of the most prominent cow families in the Simmental breed.
- 2064K is a standout performance sire that posted an adjusted weaning weight of 908 to ratio at 114. He ranks top 3% WW, top 2% YW, top 3% ADG, top 10% CW, top 5% YG, top 25% Marb, top 2% REA, and top 4% TI.
- A true standout among the offering that offers elite structural integrity, balance, and eye appeal!

- KLER Promotion 2053K is another performance standout among the class of 2022 herd sire prospects. He is a stout featured, rugged designed Purebred that is homozygous black.
- The dam of 2053K is sired by KLER No Worries and further supported by KLER Young Money and KLER Make It Rain, merging the most proven cow families on the farm in St. Charles, Minnesota.
- 2053K is a big footed, square hipped Purebred that came to the weaning pen with an adjusted weaning weight of 853 to ratio at 108.
- He charts top 10% WW, top 3% YW, top 2% ADG, top 10% MWW, top 15% CW, and top 20% Doc.
- This herd sire prospect is a prime example that powerful, performance driven genetics can offer balance and eye appeal phenotypically. A sale highlight!

- An eye-catching, blaze faced son of Select Sires KLER Promoter G15 that defies any claims that high growth bulls have to be compact built and unattractive.
- SV/KLER Promoter 211K is super long sided, with a mile long neck and high tying attachment. Proof in the pudding that length equals weight, and we predict him to sire that same kind of body type.
- Additions of consistency will be found in his calf crop with the homozygous polled and homozygous black status that G15 carries.
- A purebred sire that started with a modest 79 pound birthweight that now projects with top 15% weaning, top 10% yearling and top 10% average daily gain figures. His genomic profile also features a top 20% Terminal Index rank with combinations of top 20% REA and top 30% Marbling.

Maternal Granddam of Lot 4

- KLER Retro 2011K brings one of the most impressive curve bending predictions of any of the KLER Promoter G15 sons that will sell. He tabulates with top 15% CE and top 25% BW to flip to above average for yearling weight and average daily gain.
- His prolific paternal granddam GW Miss GPRD 028X, is one of the leading ladies in the Simmental breed, and her influence is further through Promoter G15's maternal sister, K-LER Dolly's Queen 609D the dam of the \$180,000 W/C Fort Knox 609F that is used nationwide.
- This stud prospect is dense built with a large heavy yet smooth jointed bone makeup.

LOT 5 | KLER BALANCE 2051K

- KLER Balance 2051K is extra masculine and burly in his build, sporting powerful hip shape and extra athleticism on the move.
- However his best attributes are the incredible genomic predictions that you will find when diving further into the story of 2051K. His combination of calving ease and early growth is unprecedented. He ranks in the top 20% of the Purebred database for 12 individual traits.
- Elite top 2% rankings for CE, top 20% BW, top 15% Wean, top 15% Year, top 3% MCE, top 5% MCE, top 5% Milk, top 5% MWW, top 15% CW, top 25% Marb and top 20% REA. His economic indexes reflect his genomic excellence with a top 15% API and top 10% TI.
- His dam stems from the River Creek program of Kansas and has been a solid producer in St Charles, with a maternal brother selling in last year's sale to Joe Keiser.
- Homozygous polled and homozygous black.

KMJ/K-LER MS PROPHET D3008

Dam of Lots 6-9

- KLER Explode 2101K is named in reference to the growth trend you will experience from his service. An absolute outlier in regard to his high performance and ability to sire a very quick addition of payweight into his progeny.
- He is among the elite 1% of the entire registry for the directly linked profit traits of weaning weight, yearling weight and average daily gain. This combined with top 15% Ribeye Area and top 10% Marbling figures contribute to the top 1% Terminal Index that you will find he has. One of the most impressive carcass and growth orientated bulls to sell all year.
- He was among the top of the class with an impressive 949lbs adjusted weaning weight.
- A homozygous polled and black percentage bull that will make his presence felt quickly by siring feeder cattle that lead from the front of the pack, and weigh heaving every time they run across the scale.
- 5 traits in tip 1%

LOT 7 | KLER GAINS 2102K

- A long sided, powerfully shaped, big testicled son of KLER Promoter G15 that continues the high growth trends that he so consistently injects. KLER Gains 2102K weaned off at an incredible 938lbs of adjusted weaning weight to be a forerunner of the entire offering.
- The dam of 2102K, KMJ/K-LER Ms Prophet D3008 is a leading half blood donor for the program. She is sired by the one of the most elite marbling sires in seedstock history, G A R Prophet, who features a highly accurate, 115 MARB figure that is supported by several generations of genomic and industry generated data.

This set of half brothers all sport 8 plus traits in the top 5% of the breed. Power, performance and breed leading genomics in one package.

KLER MS PROPHET 092J

\$27,000 Maternal Sister to Lots 6-9

LOT 8 | KLER GROWTH FUND 2100K

- A full brother to lots 6,7 and 9 that attests to the impressive growth and performance statistics that follow the mating.
- Weaning off at 915lbs and continuing to a 1328lb yearling weight, not only does he tabulate on paper for growth, but has proven that the real world performance attests to any computer generated figure.
- Growth Fund 2100K is the boldest bodied, heaviest structured, deepest sided brother of the Promoter x Prophet D3008 combination. We think he may generate the best set of replacement females of the four brothers.

- KLER Durable 2056K leads off a group of maternal brothers out of KMJ/K-LER Ms Robust D336, the \$30,000 NWSS sale topping donor that with small sampling has proved she is the kind that you build a cow family around. She is an absolute standout from both a phenotypic and data standpoint, and we are thankful for the support of Brantley Cattle Company for their investment in this breed changing type of female.
- The two maternal brothers that have sold are working in the Hart Simmentals and Tekrony Brothers programs. She is also the dam of K-LER Franchise 804F who is the sire of Lots 15-19 in this year's sale. 2023 represents her largest offering to date, and the three sire choices show the incredible versatility and consistency she is breeding with.
- With traits charting top 2% WW, top 4% YW, top 2% MWW, top 5% DOC, top 10% CW, top 10% YG, top 10% MARB, top 1% REA, top 10% API and top 1% TI. Every base is covered if trying to quickly add economic value to your cowherd.

- A son of the highly acclaimed, ES Right Time FA110-4 sire that is dominantly asserting his real world phenotypic value into cow herds around America. Limited semen has ever been released, but those who have turned to his service have been met with structural integrity, ideal maturity, added maternal value and fool proof breeding capabilities.
- Backed by the elite data package of the KMJ/K-LER Ms Robust D336 donor, you will find that KLER Time Change 2027K combines both elite growth with carcass quality into a robust and shapely phenotype.
- The heaviest of his maternal brothers at a year with a 1418 yearling weight.

ES RIGHT TIME FA110-4
Sire of Lot 11

KLER CATTLE COMPANY

LOT 12 | KLER GENERAL 2116K

KBHR REVOLUTION H071

Sire of Lots 12-14

LOT 13 | KLER LEADER 2119K

- A trio of full brothers sired by KBHR Revolution H071 out of KMJ/K-LER Ms Robust D336 that set the gold standard from a EPD standpoint. Their sire is a direct son of the legendary, WS Miss Sugar C4 a female that has been a maternal source of excellence for production orientated Simmental programs for several generations. He was purchased by Schooley and River Creek, and stands among the breeds most elite with top 1% rankings for weaning weight, yearling weight, average daily gain, maternal weaning weight, carcass weight and Terminal Index.
- KLER General 2116K stands above his peers genomically, excelling from a predicted growth standpoint that includes top 1% figures for WW, YW, MWW, API and TI. Top 2% rankings for STAY, CW and MARB. Top 5% or better for ADG, DOC, and REA. That is eleven individual traits that stand in the top 5% of the breed, an incredible data set that would rival any animal in the registry, don't forget he is an outcross, purebred that is homozygous polled and black. The kind that can change a data set in a single generation.
- These are obvious options if you're coming to the ranch on sale day to find a herd sire prospect that will inject serious amounts of scale pressure to a calf crop in a single generation. Look into the added calving ease that will come with KLER Leader 2119K, and if your search involves the selection criteria of a baldy then KLER Elusive 2117K also has you covered.
- Has 5 traits in the top 1%, 11 in the top 5%, and he is an outcross!!!

- KLER Elusive 2117K is the next son of KBHR Revolution H071 that offers a superior combination of phenotype and genotype! 2117K is a true performance standout that boasts figures positioning him among the most elite in the breed. New outcross in a blaze package.
- He ranks top 3% for WW and YW, top 4% CW, top 5% ADG, and top 15% TI.
- 2117K is a homozygous black and polled herd sire prospect that came to the weaning pen with an adjusted weaning weight of 1005 pounds!
- The dam of 2117K is from the famed KLER Sweet Marie cow family that has been so instrumental in the development of the cowherd. Daughters were Res Champ C/C at Jr nationals, and another Supreme Female at the Colorado State Fair in 2022 alone.
- A true standout phenotypically that has the length, scale, and shape to be a true program changing herd sire that will inject real world performance in every mating!

**K-LER RAIN MARIE**

Dam of Lot 14

LOT 15 | KLER FRANCHISE 2028K

- A purebred and homozygous polled son of K-LER Franchise 804F that goes back to the maternal influence of a first calving CDI Trustee daughter. A generation further back you will find the legendary Hooks Shear Force 38K, so you can trust that genetic power, carcass quality and performance are deeply embedded within.
- KLER Franchise 2028K will be a potent source of added pay weight, reflected by his impressive weaning and yearling figures that rank him among the top 2 and 5 percentile ranges, respectively.
- Take notice of the incredible combination of top 1% CW, marbling and REA traits, a trio of statistics you will very rarely find together. This adds to the massive 108, Terminal Index you will find linked to 2028K.
- A sire that combines the most elite EPD predictions with a balanced and masculine phenotype, he can transform the profitability of a calf crop or the face of a breeding program in very quick fashion.

LOT 16 | KLER ELITE 2015K

K-LER FRANCHISE 804F

Sire of Lots 15-19

- KLER Elite 2015K will add the most value to his progeny through increases of carcass quality and yield. Definitely one to inspect if you market on the grid.
- A true curve bending performance stud that was born with a very acceptable 78lb birthweight to ratio a 96. He flips to a top 20% ranking for weaning weight.
- A half-blood bull that is hard to fault, his depth of body, back shape, structural build and balanced composition suggest he will have a long and successful breeding tenure.

- The appropriately named, KLER Wide Body 2025K is an absolute beast of a specimen.
- A true power bull that brings added muscle expression, width of base and a true horsepower phenotype to the table. He is just as impressive in person as you will find in his picture and video.
- His Relentless sired dam, KLER/RFG Forever Lucky is ideal in her proportions and adds worlds of maternal value and security to the generating potential of this early maturing stud. His Granddam further validates the claim, as she has been a high production donor for the KLER and Rossman Farms partnership.

CDI TRUSTEE 387F

Sire of Lots 20 & 21

LOT 21 | KLER RED WOLF 2029K

- KLER Red Wolf 2029K is the homozygous polled, red hided son of CDI Trustee 387F that stems from the Hooks Shear Force 38K sired KMJ/K-LER Ms SForce D106 dam.
- His balanced phenotype is reflected with a data package that is exemplary across the board, with impressive highlights of top 2% yield grade and ribeye area figures.
- Red Wolf offers producers a potent source of hybrid vigor and ribeye area for those searching for a red hided bull to compliment Red Angus or Hereford based cowherds.

LOT 22 | KLER/DFS1 MADE TO ORDER

KLER LAW & ORDER H5
Sire of Lots 22 & 23

- DFS1/KLER Made To Order is the second red hided herd sire prospect in this year's sale. He is sired by KLER Law & Order H5, the maternal grandson of GW Miss GPRD 028X, one of the foundation matriarchs that has had a tremendous influence on the program.
- His dam is a direct daughter of the legendary EKHCC Red Jewel 760, one of the premier Red hided cows in the business that is largely responsible for the red wave of popularity that has come over the breed.
- This homozygous polled Purebred offers a pedigree lined with maternal excellence without sacrificing real world power and performance. He ranks among the top third of the breed for WW, YW, and ADG.

LOT 23 | KLER LAWMAN 2041K

- KLER Lawman 2041K is a low birthweight herd sire prospect that is homozygous polled and powerful in his build. He comes with a big and burly back shape, and stout set of running gear.
- He stems from an Eichacker bred heifer purchase sired by CDI Authority 77X that has been a potent producer ever since the day she stepped on the place in St Charles.

LOT 24 | KLER FORBES 2066K

KLER FORBES H9

Sire of Lots 24 & 25

- KLER Forbes 2066K is sired by the full brother to the \$180,000 W/C Fort Knox 609F that has been used with great success across the nation. His sons stamp their progeny with added power and shape, while the daughters are proving to be invaluable in production.
- This purebred baldy faced stud is homozygous polled and black, ultra-chiseled in his front third and has the brand name explosive muscle shape and stifle that is expected from his pedigree.
- He genomically charts with more calving ease and less birthweight than you would expect from such a powerhouse.

- The second of the pair of Forbes H9 sons that will sell on February 19th. KLER Gator 2063K is a unique combination of eye appeal, power, structural integrity and growth. The immense quality exists on either side of his hide elevates their position to one of the most unique herd bulls to come out of the program to date.
- His dam is a direct daughter of the deceased, \$100,000 Mr CCF 20-20 that is the maternal source of extreme value. The age old story of a sire's true value being realized after his demise couldn't be any more true here, and 20-20 semen regularly fetches on the north side of \$1,000 a unit when made available.
- Adding consistency to the pedigree, a generation further back you will find K-LER Dolly's Princess donor that has become a staple in both the KLER and Heartland programs and is a full sister to the mother of both Forbes H9 and Fort Knox 609F.

Dam of Lots 26 & 27

- Two sons of the maternal legend, W/C Executive Order 8543B the natural born son of 8543U, the highest revenue generating female in the history of Simmental cattle. She has generated over \$8 million in lifetime earnings, and Executive Order has proven to be one of her finest breeding accomplishments to date.
- The mother of the full brothers is K-LER Barbie 455B, this Young Money daughter has be a potent producer for the program, she was the maternal force behind the lot 4 feature in last year's production sale, KLER Stellar 031J that sold for \$19,000.
- You will notice the inclusion of GW Miss GPRD 028X as the maternal granddam of the brothers, she is recognized as one of the corner pillars that built the KLER program that you see today and is holds the same position in the pedigree of the \$180,000 W/C Fort Knox 609F.
- Big additions of growth and red meat yield can be expected by utilizing either of these brothers in the herd sire battery.

- FABZ/HLL Barstool 103K is a three quarter blood, square built, eye appealing February born stud that checks all the boxes when it comes to building better beef. Weaning off with more than 800 pounds.
- His K-LER Kingsman 610D sired dam is a foundation donor for the Fabrizio Ranch, and stems back to a leading female in the Lee program that featured in their Reserve Champion Pen of Three Percentage Females at the 2019 NWSS. A maternal sister to 103K was purchased by Bailey Livestock in the 2022 "The One" sale, after being sashed as the Grand Champion Percentage Simmental Female at the Colorado State Fair.

WS PROCLAMATION E202

Sire of Lot 31

- A monster growth son of the industry approved, WS Proclamation E202. KLER Proclamation 2052K has always been an impressive brute, at the side of his CDI Trustee 387F. He weaned off with an adjusted 854 pounds, to ratio a 107.
- The homozygous polled and homozygous black beast is sure to add pounds to a calf crop with his top 1% rank for weaning, top 2% yearling rank, and top 10% average daily gain figure.
- If your program gets paid by the pound, then the future sees dollar signs if you turn out KLER Proclamation 2052K with your cows.

RUBY SWC YETTI E767

Maternal Granddam of Lot 31

LOT 32 | KLER COMBINATION 2081K

LOT 33 | KLER SLEEP EASY 2019K

TJ CHIEF 460G

Sire of Lots 32-34

- TJ Chief 460G is one of the most interesting blaze faced sires to ever come out of the Triangle J Ranch, this half-blood son of TJ Frosty 318E is a curve bender in his growth pattern, and stems from a role model in production who has proven to consistently bring the biggest calves back to the weaning pen.
- KLER Combination 2081K follows in his father's footsteps, with upgrades for percentage and carcass traits. He is homozygous black and polled, and is supported by the KLER Dolly family through a tremendous Ruby's Turnpike daughter of the legendary GW Miss GPRD 028X. Making his dam a full sister to KLER Promoter G15, the sire of lots 1 through 10.
- A very versatile sire prospect that combines great maternal power, curve bending growth traits and an elite phenotype.
- This stud stands out from the pack, he will be one to see one sale day, no risks are involved by adding KLER Combination 2081K to your sire arsenal.

KLER BASIS 048J

Maternal Brother to Lot 33

- The added age and maturity of KLER Sleep Easy 2019K has helped him to stand out phenotypically, as he is a bigger outlined, longer spined herd bull that will be able to cover ground on a sound set of feet and legs.
- He is a lower birth weight bull that will be appropriate for use on younger cows this first season and may perhaps prove to be a viable option for heifers in the future.
- Homozygous polled and black.

LOT 34 | KLER TONKA 2042K

- Pounds = Profits and that's exactly what you can expect from KLER Tonka 2042K.
- This burly backed and soft bodied herd sire prospect has been a favorite of all those that have made the trip to the ranch.
- Homozygous polled and black.
- A true power bull with top 15% ranks for both weaning and yearling weights.

LOT 35 | KLER MR STONE COLD

TJ STONE COLD 336G

Sire of Lot 35

- We project KLER Mr Stone Cold to be bigger framed, loose structured and rugged in his composition. If added pay weight and red meat yield are what you're searching for then this stud is one that needs serious inspection.
- He powered his way towards the top of the contemporary group at weaning time to tip the scale at 812 pounds to ratio a 113. He will be very effective option in boosting the scale pressure of your calf crop.
- He ranks top 5% Wean, top 3% Year, top 3% ADG, top 3% MWW, top 10% DOC, top 10% CW and top 15% REA.

LOT 36 | KLER 2087K

WS MISS SUGAR C4

Legendary 3rd Generation Dam of Lot 36

- 2087K is one of the premier calving ease prospects in the offering, charting with an impressive CE EPD that positions him among the top 4% of the breed. He also ranks top 10% BW, top 4% MCE, top 25% Doc, top 3% Marb, top 5% API, and top 20% TI.
- The dam of 2087K is the IR Imperial D948 sired daughter, KLER Sugar Sweet G19. She is a maternal granddaughter of the legendary WS Miss Sugar C4, one of the premier donors in the Simmental breed that has over 140 progeny recorded in the American Simmental Association Herdbook.
- Here is a big bodied, deep sided herd bull that is sound footed, and athletic in his build.
- This Purebred herd sire prospect is recommended for use on heifers.

LOT 37 | KLER RETRO 2076K

RFG/K-LER ELEVATION 727E

Paternal Grandsire of Lots 36 & 37

- KLER Retro 2076K is a purebred son of KLER Mr Elevation 079H out of a super attractive, WS Revival daughter that stems from the K-LER Barbie 455B donor whose influence you will find scattered through the offering.
- He weaned of his dam with an 857 pound weaning weight to top his contemporary group.
- Add consistency with this homozygous polled and black herd sire.

- High quality sells all the way through the offering!
- The immense quality exists on either side of the hide here, as Right On 2022K elevates his position as one of the most unique bulls in the offering, a herd changing type herd bull that is exceptional from every aspect, both numerically and phenotypically.
- He stems back to a full sister to the industry famous K-LER/RC Miss Hoya Saxa that is the mother of the triple crown winning KDP Miss Hoya Hayleigh that the Udell and Black Gold Simmental programs campaigned. She has become the leading purebred Simmental donor for these programs, raising a \$77,000 Remedy sired daughter in her first breeding season.
- Genomically he is just as impressive, he reads as a calving ease option that will sire progeny that quickly up the ante, towards weaning and then accelerate towards a year.
- Purebred, homozygous polled, homozygous black and high, high quality.

**MR SR 71 RIGHT NOW E1538***Sire of Lot 39***K-LER/RC MISS HOYA SAXA***Full Sister to Maternal Granddam of Lot 39***KLER CATTLE COMPANY**

LOT 40 | KLER FABZ/HLL PAWNEE 107K

GSC GCCO DEW NORTH 102C

Sire of Lot 40

- 107K is a moderate birth weight, smooth jointed, well designed Purebred calving ease prospect that stems from the strong influence of 028X.
- Homozygous Black and Homozygous Polled.
- Numerically he ranks among the top 15% for WW, top 5% YG, top 25% BF, top 25% REA, and top 15% Shr.

LOT 41 | KLER MR 2092K

STEVENSON TURNING POINT

Sire of lot 41

- 2092K is a homozygous polled SimAngus by the legendary Stevenson Turning Point that offers a balanced look of quality and style.
- He is a moderate birthweight bull that offers a moderate 67 pound birth weight and came to the weaning pen with an adjusted weaning weight of 721.
- A sleep all night heifer bull that is sired by the Genex calving ease sensation!

Safe AI. Estimated Due 12/27/22.

Selling 1/2 Interest, including 3 - Grade 1, unsorted embryos by KBHR Revolution with the option to double down for 100% interest and 6 embryos.

- Unprecedented opportunity!
- A flush mate sister to the \$170,000 phenom from the inaugural Production Sale, KLER Right Design 012J that Brantley Cattle Company of Florida added to their impressive breeding artillery.
- One of the finest breeding pieces to ever be donned with the KLER prefix! KLER Dollys Right 015J is a direct daughter of the legendary GW Miss GPRD 028X, the one that begun the Dolly cow family and out of one of the most versatile breeding bulls in the business, regardless of breeds. This combination gives the purchaser a combination of two potent forces in one, a perfect storm situation.
- Whilst the upper echelon build and conformation of KLER Dollys Right 015J suggests she may stem from a more of a phenotype focused pedigree, her data set and real world tabulations indicate she would appease those that align with breeding goals that are more production orientated.
- She will have already begun her generating career before sale day with a purebred calf sired by KLER Franchise 804F that tabulates for immense power and performance.
- Elite breeding female that unlocks the genetic potential of the industry's leading producers.

- KLER Ms Dolly's Lady 036J stems from the combination of VCL Foresight and K-LER Dolly's Lady 810F, the full sister to the mother of the \$180,000 W/C Fort Knox 609F.
- VCL Foresight is the sire of the world record setting, \$630,000 STCC Tecumseh 058J, and in limited use has proven to be one of the most unique breeding bulls of outlier kind in the Simmental registry.
- 036J is a shining example of the qualities VCL Foresight is becoming synonymous for generating. She comes with added eye appeal, impressive neck extension, a slim and neat throat latch and a flexible hind leg design, yet she is still impressive from a muscle and shape perspective.
- Maternally you will find as notable of a pedigree, as the proven generating value of the W/C Executive Order 8543B x GW Miss GPRD 028X is employed once again. Take note of the long list of breed influences that stem from this cross on the maternal side of the lineage. We expect the same to ring true for this genetic force.

K-LER DOLLY'S STAR

Dam of Lots 53 & 54

- A pair of maternal sisters that stem from some of the most exciting and admirable pedigrees you will find within our program, sons of K-LER Dolly's Star have been in high demand. These two daughters are the first and only she has generated to this point. They are proving to be extra powerful and cowy and the Dolly cow family needs no introduction to any Simmental enthusiast when it comes to the generating potential they instill.
- The Profit sired sister of the duo, KLER/HLL Dollys Profit J32 is the powerhouse of the pair, she is unrivaled when it comes to muscle shape, width, stoutness and performance. There is no questioning the influence that the \$400,000 Profit has made within the breed, he has both sons and daughters that are leading the breeding programs of programs nationwide.
- The more refined and elegant of the pair would be KLER Ms Dolly's Star 093J, she has extreme wow factor! We love the way this one ties all her big and fancy features together; being long spined and extremely chiseled about her head and neck. She is sired by KLER Linebacker 05G the K-LER Statesmen 738E son that goes back to the RUBY SWC Yetti D655 donor. She is homozygous black and polled and numerically reads to add growth and performance.
- Both maternal sisters settled early to AI and will be accompanied by their first calves on sale day, if fact they will both be ready for embryo production immediately after sale day if that is the route you would like to take. In our opinion the quality sure dictates this being a wise and viable option.

YARDLEY HIGH REGARD W242

Maternal Brother to Lot 56

- Red hided livestock are in demand, and this purebred superstar is one of the most unique females to sell!
- KLER/HLL Miss Lover is supported by one of the breeds long standing sources of maternal value, Miss Yardley T68, the dam of the wildly popular, Yardley High Regard W242. For more than a decade he has been the choice of cattleman across the nation to add function, eye appeal and utility.
- THSF Lover Boy B33 has emerged as one of the go to heifer bulls in the business, not only is he true calving ease but he adds immense look and intrigue with high accuracy!
- There will be seldom opportunities in existence to replicate the one that sells as lot 56, combining a trusted matron, with one of the newest generations of elite phenotype and maternal value in the Simmental breed.

LOT 57 | KLER MS RAIN MARIE 078J

K-LER RAIN MARIE

Dam of Lot 57

- KLER Ms Rain Marie 078J is a combination of the best of both worlds, taking some of the leading members of importance from several of the nation's leading operations.
- She has the added practicality and real world appeal from the inclusion of the Turnpike influence via her paternal grandsire Rubys Turnpike 771E. A serious brood cow prospect that packs an extra punch in regard to her proportions and growth predictions.
- Purebred, homozygous polled and due March 15th to KLER MR Franchise 005J.

LOT 58 | KLER MS SERENITY 044J

RUBYS TURNPIKE 771E

Paternal Grandsire of Lots 57-62

- KLER Ms Serenity 044J is a purebred daughter of LERS Turnpike 333G that is backed by a K-LER Young Money sired dam who has been a member of the donor pen in St Charles.
- 044J is long and smooth in her muscle shape, extra capacious and round centered and built atop four, big, square and deep heeled feet. There is no question that the cow power that comes with the Serenity cow family is immense.
- She will be found with a calf at side sired by Rivercreek Eagle 459H on sale day.

AI Bred 4/19/22 to KLER Franchise 804F (ASA 3430423).

Safe AI. Estimated Due 1/26/23.

- EKHCC Alexis 191 is the kind that you could build a cow family around. She excels in just about every aspect we find value in. It doesn't matter if your inspection is in the flesh, by pedigree or on paper, she will impress.
- There are not bigger fans of the Promoter cattle than the ones you will find here at K-LER Cattle Company, we realize his influence is not yet wide spread, but do not think that it's because we don't think he raises the right kind, it's because we don't feel like we can afford to let go of the ones we have.
- We haven't come across a Simmental bull that can consistently inject an elite set of EPD's, and then couple it with the mass and body shape that we admire about every one of his progeny. 191 is a prime example of the reason we raise this breed, so maternal in her outline, with a running gear designed with longevity as the pinnacle. We project her udder deign to be ideal and her foot shape follows that trend.
- She will come with a January born calf by KLER Franchise 804F that will justify your initial investment.

LOT 60 | KLER/YFF LORETTA

- KLER/YFF Loretta is a purebred that has the extra pizzazz and eye appeal to catch the gaze of any onlooker. This Promoter G15 daughter is the kind you struggle to put a hole in. She trends curve bending in her growth pattern and has a perfect amount of chrome.
- You can expect this female to have a long breeding tenure, just like her Bullseye mother that epitomizes what a Simmental female should be built like.

LOT 61 | KLER MS 042J

- We realize that to inevitably remain profitable in this business it's necessary, like most things in life to stay true to the path, avoid chasing trends and set goals with some moderation in mind. We feel KLER Ms 042J is proof of our quest towards this mantra, sure she many not blow you away in any facet but in the end its females like this that are a safe bet from the beginning who prevail.
- KLER Ms 042J is sure to calve on while the sun is shining and the grass is green with her 6/5 due date to KLER Mr Franchise 005J.

LOT 62 | KLER MS ROBUST 026J

LOT 63 | KLER MS ROBUST 084J

- KLER Ms Robust 026J is a standout daughter of our senior herd sire in KLER Promoter G15, and we deem her phenotypic design as ideal for our production goals. Her structural build is authentic and will support an extended breeding tenure. Both genomically and in the real world she excels in terms of performance, her EPD profile features a top 20% WW ranking, top 15% YW, and top 15% MWW.
- KLER Ms Robust 026J is built with big and flexible joints, she has a perfect set to her shoulder and knee and is bold and shapely from end to end.
- Homozygous polled and black.

KMJ/K-LER MS ROBUST D336

Dam of Lot 63

- KLER Ms Robust 084J offers a nice balance of numerical power with top quarter of the breed rankings for growth, outstanding carcass yield and is still able to abide by our strict checklist for quality of phenotype. Her mother is the one of the most dominate producers for the program, and you will recognize her as the maternal power behind K-LER Franchise 804F.
- She carries two shots of GW Predestined 70IT in her pedigree, which adds accuracy to her impressive economic predictions and indexes.
- She will calve in late January to the \$75,000 second high selling bull from the 2021 Keller Broken Heart Ranch sale and sire of lots 12-14, KBHR Revolution H071.

KLER NO WORRIES

Sire of Lots 70 & 71

- KLER/YFC Ember 16J is the kind we could have pastures full of, I mean who doesn't love a baldy! Plus she is a purebred, and bred up early to her AI date to ensure she will have a calf at side on sale day by KLER Franchise 804F.
- The KLER No Worries daughters have proven to be fundamental breeding pieces and exhibit great maternal quality, two claims we think 16J exemplifies.

LOT 71 | KLER QUEEN 014J

- If your selection criteria are satisfied by the extra cowy, broody and maternal type of female, then KLER Queen 014J is one you will need to inspect on sale day. The daughter of KLER No Worries is huge bodied and extra dense, her udder development is impressive, and her teat setup is square and correct.
- Not only does she scream power cow from a phenotype standpoint but her EPD profile suggests the same, with top 15% rankings for WW, top 20% YW, top 10% Milk, top 10% MWW, top 10% Marb, top 20% API and top 10% TI.

LOT 72 KLER MS EAGLE 080J

- One of the most intriguing genomic females in the offering will sell as lot 72, pay attention to the data set that accompanies KLER Ms Eagle 080J. It places her in the 20% of the registry for 11 different traits.
- A true versatility female that combines the calving ease of J BAR J Nightride 225Z with the power and performance of Hook's Eagle 6E and W/C United 956Y. This comes through his dam's pedigree, she was our selection of the bred heifers in the 2021 Raml Production Sale.

Structured for Success

“ We have known the Kaehler family for more than 20 years as our boys are of similar ages. They introduced us to the value of showing beef cattle as a family project of togetherness. There are few activities in life that instill the values gained by respecting and learning from your competitors like showing cattle in both winning and finishing second. The K-LER bloodlines most importantly succeed at home on the farm in our harsh MN climate. They combine both calving ease as well as growth that stand out far above expectations.

- Kurt Blomgren Family
Butterfield, MN

”

“ Kaehler Cattle Company is a family-minded, results driven business proven to provide quality stock time after time. Bloodlines run as strong as their desired to create a lasting legacy for generations to come. During my time working with Seth, I have made several transactions that have included excellent communication and forward-thinking procedures and processes. Seth's ability to know and understand the current and upcoming markets gives me confidence build my herd with trust and high expectations.

- Luke, Landon, and Tessa Laufenberg

”

“ We are truly impressed with the Kaehler family, from first contacting them they gave their honest opinion on all the bulls to get what suited our needs best. Their customer service is second to none. We admire the structural soundness and mobility of the bull and can't wait to see what the endless possibilities are north of the border. We look forward to using K-Ler Cattle genetics to further our purebred program.

- Reed & Jane Crawford
River Point Cattle Co.
Glencoe, Ontario Canada

”

QUICK REFERENCE TO ASA

EXPECTED PROGENY DIFFERENCES (EPDs):

EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in.

For example, if the case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

ALL-PURPOSE INDEX (API):

Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

AVERAGE DAILY GAIN (ADG):

Pounds of post weaning daily weight gain.

BACK FAT (BF):

Inches of backfat.

BIRTH WEIGHT (BW):

Pounds of birth weight.

CALVING EASE (CE):

Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW):

Pounds of carcass weight.

DOCILITY (DOC):

Percent of offspring achieving a docile (1) score.

MATERNAL CALVING EASE (MCE):

Percent of unassisted births in first-calving daughters.

MILK (MLK):

Pounds of weaning weight due to milk.

MARBLING (MRB):

Marbling score.

MATERNAL WEANING WEIGHT (MWW):

Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA):

Square inches of ribeye.

WARNER-BRATZLER SHEAR FORCE (WBSF):

Pounds of force required to shear a steak.

STAYABILITY (STAY):

Percent of daughters remaining in the cowherd at 6 years of age. Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

WEANING WEIGHT (WW):

Pounds of weaning weight.

YEARLING WEIGHT (YW):

Pounds of yearling weight.

YIELD GRADE (YG):

Yield grade score.

EPDS AND \$ INDEXES

\$ INDEXES:

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API):

Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI):

Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

USING API AND TI:

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population.

For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

IMPORTANT DISCLAIMER:

DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.
