

HILLTOP

— SIMMENTALS —

March 10, 2023 • Six O'Clock In The Evening

WORTHING, SD

**LET US HELP TAKE YOU
TO THE TOP OF THE HILL**
ONE BULL AT A TIME.

WELCOME

We would like to personally invite you to the 8th Annual Bull Sale at Hilltop Simmentals in Worthing, SD. We have put together a great set of cattle for your appraisal. We put a lot of thought and consideration into this breeding program to help further other breeders and commercial herds.

We have invested heavily into good herd sires and cow families here at Hilltop to provide power and consistency. A herd sire we currently run is ES Right Time FA110-4, who is no stranger to the breed. He has bred above and beyond our expectations, seeing how he is going to heavily influence our herd. Proof being the two best bulls we have ever raised being Right Time sons! I have no doubts they will be a big part of the Simmental breeds future!

Developing bulls is something we take a lot of pride in. From the time we decide what bulls are going to be marketed in the sale, to how they perform on our ration. We believe in strong and proven genetics to back our bulls. We have learnt first-hand that if the bulls have been developed on a hot ration, they will not hold up in the pasture. They are on a pretty basic high roughage ration with a really good mineral. Doing this we have heard countless times how impressed the customers have been with the bulls holding weight and not melting away after breeding season. We believe in developing bulls in this way also results in very good fertility, which is exactly what we need for our customers be successful.

We want to thank you for taking the time to read through the catalog, and would love to see you here with our family and friends!

Jaron

welcome to HILLTOP

It is indeed a pleasure to welcome you to the Annual Bull Sale at Hilltop Simmentals, conveniently located right off I-29 in Worthing, South Dakota. The Van Beek family has been a pleasure to work with in the preparation for this year's marketing event. Jaron Van Beek approaches the business with an enthusiastic and driven mindset that is unrivaled. He takes his role as your trusted seedstock provider very seriously.

This year's offering is saturated with herd bulls that are backed by cow families of significance that have made a substantial impact on the beef industry. The offering is highlighted by a pair of ET flushmate brothers that are sired by the resident herd sire at CK Cattle, Eichacker Simmentals, and Hilltop Simmentals that has become a household name in the business — ES Right Time FA110-4. The dam of this powerful duo is the recently re-valued \$210,000 donor dam known as WS Miss Sugar C4, a female that has put as many herd bulls in stud as any other donor in the last few years. They combine the best of both sides of their lineage in terms of functionality, performance, and carcass merit. A must see sale attraction if you're serious about breed improvement!

A methodical approach is taken with the development and management of this set of bulls. The crew at Hilltop Simmentals has fed this set of bulls with longevity, fertility, and functionality in mind. They have been slowly developed in order to preserve their structural integrity and foot quality. They are fit and ready for heavy service! Also being offering on the 10th of March is a fancy set of fall born heifer calves from the heart of the embryo transfer program. Much like the bull offering, these ladies are supported by genuine cow power that offers serious genetic relevance.

Consider this your personal invitation to join us on Friday evening, March 10, 2023 in Worthing, South Dakota for a powerful set of Simmental genetics that will positively enhance your program's bottomline. We believe that this offering presents the necessary diversity in terms of performance bulls, calving ease bulls, and aged bulls — there is truly something for everyone! We encourage you stop by the ranch or call and visit with Jaron about the sale offering. It won't take you long to recognize the passion that he has for the beef industry. We look forward to seeing each of you on sale day!

Enjoy the cattle,

GRAHAM BLAGG · JERED SHIPMAN · TIM ANDERSON

TERMS, CONDITIONS & GUARANTEE

All of the bulls selling have passed a breeding soundness exam prior to sale day. In addition to the standard Terms and Conditions of the American Simmental Association we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling that are purchased for \$3000 or more. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. All animals selling are up to date with our vaccination program built with the assistance of Sweetgrass Veterinary Clinic. Announcements made sale day from the block take precedence over printed material in this catalog. Payment will be accepted in the form of cash, cashier's check, or check. All cattle must be paid for prior to release and transfer.

RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

INSURANCE

*We recommend serious consideration is taken about insuring your herd bull purchases. Insurance will be available sale day via James Bessler representing XL Catlin. **James Bessler**, 815.762.2641*

· In the history of the Hilltop program, never before have two individuals surfaced that are as capable of changing the breed as the two that are tagged 1 and 2. The pair of brothers are two of the most intriguing, complete, dynamic and elite Simmental breeding pieces we think will sell anywhere in the 2023 calendar year!

· Either side of the direct pedigree of the pair reveals two divisions of royalty within the Simmental Breed. ES Right Time FA110-4 has become a heavily desired source of paternal excellence, and as his progeny mature and dive deeper into their production careers, it's now that his influence is truly being realized and acknowledged. Sons of Right Time include KTE FRKG Reset 825H ET at \$230,000, the \$230,000 KCCr Countertime 872H, the \$45,000 CKCC Relevant 0639H and the \$35,000 high seller from the 2023 CK Bull Sale. One of the first daughters of ES Right Time FA110-4 is KCCr SWC Harmony 847H the \$60,000 2022 Houston Livestock Show & Rodeo Grand Champion Purebred Simmental Heifer and 2021 Cowgirls in Courtown Show Grand Champion Female for Megan Brown. Her first year of production yielded the recently marketed \$450,000 3BCC KCCr Krypton 100K, quite the resume builder for this young matron in the making.

• Maternally you will find the legendary WS Miss Sugar C4 who just a month ago was purchased by Forest Lucas for \$210,000 in the Lazy C Diamond Production Sale. She is without question one of the Simmental breeds most notable females, with over 150 progeny recorded in the American Simmental Association Herdbook that includes a long list of breed influencing sons such as, WS Proclamation E202, LCDR Favor 149F, KBHR Revolution Ho71, LCDR Progressive 106G, LCDR Impact 134F and KBHR High Road E283.

• Two of the breeds most potent forces come together, in the exclusive mating of ES Right Time FA110-4 with WS Miss Sugar C4. These are two bulls that withstand the hype one would have when thinking about combining these genetic gems, homozygous polled and black bulls with outlier phenotype, genuine muscle shape, foot quality, masculinity, impeccable structural integrity and an EPD package that rivals the best in the business. These are bulls that define curve bending genetics that accelerate towards impressive performance and growth.

• This pair need serious consideration from both a genetic progression and investment standpoint, the marketability of these studs aligns with the trends of the business, cattle that flawlessly combine genomic and phenotypic excellence.

- ES Right Time FA110-4 has proven to be one of the breeds most consistent producing herd sires in history, and this third son continues the trend of dense built, real world applicable herd sires that is built with shape and power.
- A purebred and homozygous polled and homozygous black son of Right Time that goes back to the maternal influence of our programs iconic ES A85. She has proven to be a trident in production with a long list on value added progeny. You can trust that genetic power of HTP/HLTS Rivalry K9 will improve carcass quality and performance immediately

- A son of the highly acclaimed, MR CCF 20-20 sire that is dominantly asserting his real-world phenotypic value into cow herds around America. The now deceased maternal legend has only ever had Limited semen released, but those who have turned to his service have been met with structural integrity, ideal maturity, added maternal value and fool proof breeding capabilities.
- Backed by the greatness of the HPF Sazerac 238B donor, you will find that RSSF/HLTS 20/20 J30 is built with both form and function in mind. He is super robust and shapely in his rib shape and transitions perfectly from a long neck and smooth shoulder into his bold forerib. He is great looking from the side with extra base width and muscle shape when you view him from behind.
- Homozygous black, purebred that scanned with an impressive 118 IMF ratio.

- A cookie cutter profile when compared to his sire, being extra-long sided, bold shaped and explosive. We think this kind adds muscle shape and length to his progeny in an automatic fashion. This is a real-world ranchman's bull that will sire progeny that draw the attention of feeders because of their body type while still being easy to look at.
- Numerically he trends calving ease with a top 25% Calving Ease ranking and 68-pound birthweight.
- He is a full brother to the \$37,000 record setting SSC Victoria's Secret 49B and the \$17,250 SSC Shell Shocked 44B sire that has seen promotion, a proven mating that will yield consistent results.

• *HLTS Weapon K25 is the appropriately named red bided herd sire prospect that we think will become an impressive tool in a breeding artillery. He is sired by Remington Secret Weapon 185, the exclusively used sire of phenotypic excellence that has provided exceptional results for our program, and on the legendary, EKHCC Red Jewel 760*

• *He is a direct daughter of the legendary EKHCC Red Jewel 760, one of the premier Red bided cows in the business that is largely responsible for the red wave of popularity that has come over the breed. She has been one of the foundation matriarchs that has built our program, and has a tremendous influence all the way through the cowherd.*

• *This Purebred offers a pedigree lined with maternal excellence without sacrificing real world power and performance.*

• DBJR/HTLS Lover Boy adds another dimension to the quality set of red bided purebred studs that we will market in 2023. One that is striking from the side, offering a bold body shape and correct structural build, with good foot shape and angularity. He is the easy keeping kind that will mature with appropriate frame size for our environment. We think he will sire daughters that have impressive maternal instinct and always keep in good rig. Invest in the maternal value and longevity of your cowherd here.

• THSF Lover Boy B33 was a National Champion himself, and has become one of the most demanded purebred sires in the business right now, he reliably sires added look, structure and style, with calving ease and maternal as an added bonus.

• Take note for those who have invested in the Red Jewel cow family, he offers an outcross to that genetic line.

• A pair of full brothers that embody beef bull characteristic, with impressive muscle shape, explosive stifle design, impeccable foot structure and added length of spine. These bulls are sure to add real world quality and genuine beef production advantages.

• These Main Event cattle have passed the selection criteria for close to a decade now, and we believe these sons check many of the boxes for being direct drivers of profitable progeny that regardless of marketing strategy or endpoint will be the right kind and turn a profit.

• A perfect pair of full brothers to add to the bull battery if you have a multi-sire pasture situation and need to add some uniformity to your calf crop.

• We lead off the CDI Mainline cattle with a long spined, functionally constructed son who was raised by an impressive and proven daughter of W/C United 956Y, a sire who has built a reputation of volume, power and easy keeping progeny that make for happy cowboys. The EPD profile that accompanies J287 tabulates for upper echelon growth, along with impressive milk, and carcass numbers, an all-rounder type of bull that will fit various production goals.

• Performance stud in the flesh, this is a growth leader that smashes the scales with over 1600 actual pounds today.

61	613	1255	38.5	12.41	2.43							

• HLTS Mainline J45 is a CDI Mainline 265D son that offers a very versatile phenotype, we think he is the kind that makes both feeder cattle and replacement females of top tier quality. The Mainline daughters are impressive in production, they are perfect uddered, great mothers and ideal footed. The maternal lineage here goes back to a very productive Hofmann purchase, a cow that sets the gold standard for Simmental females in production.

• He is breed leading in his quest as a beifer bull candidate, and we think is surefire, sleep all night material.

- A homozygous polled and homozygous black purebred that will add consistency and uniformity to a cowherd with his ability to sire only polled and black progeny. Plus those with a British based cowherd will have access to the cheapest yet most reliable tool we have as cattle producers, hybrid vigor.
- He is very balanced from both a phenotype and numeric standpoint, and we think he is a complete and logical option for a cattleman or woman that needs a herd bull that will sire both feeder cattle and replacements with added value, who has the build of longevity to be a long-term investment towards bettering the cowherd.

96	784	1460	41	13.97	2.09							

• HLTS Favor J75 has emerged as an absolute outlier among the group, and there is no question that his influence will potently inject mass improvements of growth and performance genetics to an operation with goals of increasing scale pressure. Topping the class at weaning time, carrying purebred status, testing homozygous polled and sitting top 1% for weaning weight, yearling weight and MWW, and then top 3% for average daily gain, are all factors that nominate J75 as one of the most impressive growth promoters we have ever sold.

• LCDR Favor 149F cattle are in heavy demand, he is genomically one of the most impressive Simmental bulls to ever arise. Adding his pedigree to the equation also comes with a potent injection of the WS Miss Sugar influence that you will find backing Lot 1 & 2.

- A direct daughter of the deceased and legendary JSUL Something About Mary 8421!
- We aren't wanting to be known as a program focusing on the show heifer business, but this one needs to be on the end of a halter! She is fun to look at, tying all her pieces big pieces together flawlessly and her outline leads us to believe she will mature with the same completeness her cow family is renowned for. The transition from her skinny and feminine front third to her extra swoopy middle third positions her right with the trendiness of the business.
- When she is parked it's impressive, but when she gets on the move is when she sets herself apart, take the time to watch her video.

• A Hilltop Simmental sale would never be complete without the addition of EKHCC Red Jewel 760 on the dam roster. We round out the offering with two direct daughters of the queen of Hilltop herself. Regardless of how she was mated the results were consistently high quality.

• The results of the GEFF County O mating yielded us this red bided gem that has been blessed with the extra good looks, fuzzy hair type and big rib shape. K219 is extra square in her build, with a long skinny neck and flawless structure, the building blocks required to raise big time show cattle after her own show career is complete, regardless of the way you breed her we think she will raise the right kind.

• A full sister to the proven mating of W/C Loaded Up 1119Y on the Red Jewel influence sells as Lot 30. You can find her built with the same eye appeal and out their feature that is consistently generated by this genetic cross.

• Red Jewel genetics are in limited supply, however that's the only limitation that can be found with this genetic line, as they have gone onto produce at the highest level for programs nationwide, make sure you add a Red Jewel daughter to your breeding artillery before it's too late!
