then go 1 mile west and 3/4 of a mile North.

Sale Schedule

Sunday - March 26, 2023
Bulls available for viewing all day
Monday - March 27, 2023
9:00 am - Bulls on Display
11:30 am - Lunch Served
1:00 pm - Partners in Progress Sale

Welcome friends and neighbors to our 11th annual Partners in Progress Production sale here at McEntire Red Angus. We hope you know how much we appreciate everyone who supports our program. We love the cattle business and the families that it brings to our Ranch. It's what we do day in and day out, except for a few sporting events with the kids every so often!

We are excited about the offering of bulls we have for you this spring. These bulls were weaned on the 1st of October and developed here at the ranch. We have had them on a high roughage ration on a 110-day test. The carcass ultrasound data came back with great results, as you will be able to see in the bull information listed with each lot.

We understand that the Red Angus Breed is becoming more and more popular and that you have many options when it comes to choosing your herd bulls. We invite you out to the ranch to look over the bulls and heifers and hopefully you will find something that will bring value to your own operation and move your program forward. Good Bulls make great cows and our mating decisions have been based on producing next generation females to be more efficient and productive than their mothers. The Red Angus cattle have been known for good dispositions, calving ease, adaptability, and keeping your operation in the black! A good set of Red Angus tagged calves will top the sale no matter where you go.

We will be selling a nice set of herd bull prospects that we feel will make a great addition to a seed stock producer or to a commercial cattle operation. We will also be selling 50 commercial straight Red Angus replacement heifers and 50 commercial Red Angus Pairs. These heifers have been on a complete vaccination program and will be checked by Dr. Richard Prather one week prior to the sale for reproductive soundness.

We would like to invite you to come out to the ranch on Sunday night before the sale and enjoy supper and a social. We would love to get to know you and your family! We will eat around 6:00 pm.

Please join us sale day at 11:30 am for lunch. The sale will start promptly at 1:00 pm CST. Again this year, the sale will be broadcasted live on CCI.Live for those of you that are unable to attend the sale. If you have any questions about the sale, please feel free to contact us or any of the sale staff to visit about the offering. Be sure and check out our website at www.mcentireredangus.com to view videos of all the lots in the sale. We will not sell in catalog order this year. Therefore, please be sure and look on our Facebook page or on CCI.live for the sale order on sale day. Thank you for your interest, and we look forward to doing business with you.

See you at the sale!

INNOVATION

— AgMarketing, LLC —

The initiative to do something fuels the determination to succeed in any life task. Grit keeps the focus on the end goal and pulls one through the unforeseen bumps in the road that can throw the goal off track. When initiative, determination, and grit collide, great things are achieved and the willingness to have the patience to let things work and allow that great something to be created. A drought or years of adverse conditions can put a damper on any agricultural project as those said conditions wear on one's strength of mind and spirit. However, when it's a means to a living, a family unit can push through the toughest of times together and generate a product that can benefit those that come to invest. Randy and Crystal McEntire believe in the Red Angus product that they started with and continue to produce today.

We welcome you to the annual "Partners In Progress" Red Angus Bull and Female Sale. This family outfit is just shy of two decades in the business and their success has been noted. There is no question that "the golden rule" has played a major role to this point. Randy's approach and execution to customer service is definitely second to none and therefore customer retention is very high. When you believe in the product that you produce and you know that you have done everything to make the product as good as it can be for your customers, the service part is simple as most of the potential problems have been addressed before sale day. The problem free product offered by the McEntire Red Angus outfit is just that and that's why so many have invested with confidence over the years.

The program's base is from an operation that has been in the cattle business for over 6 decades and now includes 3 generations. Randy and Crystal's investment in those genetics allowed for their operation to grow into what it is today. The knowledge they had from their previous commercial endeavors is why their product appeals to so many ranchers in the southwest and central plains. These red hided cattle that bear the McEntire brand are very hardy with additional strength in growth, durability, shape, and eye appeal. Randy sorts extremely hard on hoof quality and the cowherd that generated these studs has been grown in a very disciplined manner over the past 18 years. So, it simply stands to reason why these cattle are as good as they are and why many continue to come back and new faces surface year after year.

Folks, we are not sure if there is an annual opportunity to business with a family that's any better than the operation in Sweetwater, Oklahoma. Randy and Crystal have a very good reputation within their surrounding community and also with those that have conducted business with them over the years. "Salt of the earth" is a commonly used term, but not sure if that is good enough to use to describe them. The western placed ranching community is one that knows no strangers, and everyone is and feels welcome. Hospitality and food for sale day will be incredible and the stock will only compliment the reception when you set foot on the ranch. If you need assistance with information, selection, or purchasing, please reach out to Graham Blagg and he will be happy to assist. We hope to see you the last Monday of March in Sweetwater, Oklahoma for this annual event.

Enjoy the Cattle!

SALE ORDER

Cattle WILL NOT sell in catalog order this year. A sale order will be available prior to the sale.

TERMS & CONDITIONS

Cattle sell under the standard terms and conditions as recommended by the Red Angus Association of America.

SEMEN INTEREST

McEntire Red Angus will retain 1/2 semen interest in all bulls sold.

SEMEN TEST

All bulls will be semen and Trichomonas tested prior to the sale and are guaranteed to be fertile.

INCENTIVES

Free delivery within 150 miles of the ranch on bulls selling for \$3,500 or more and free nation-wide delivery on purchases greater than \$20,000. This does not include heifers. All trucking on females are the buyer's responsibility, but we will be glad to assist with trucking plans. If bulls cannot be taken sale day or arrangements have not been made with us within the first week for delivery, the seller can house bulls until pick up at a rate of \$4/day, however we will not be responsible for sickness or injury.

LIABILITY & ACCIDENTS

Every precaution will be exercised to protect the safety and comfort of those attending the sale. Neither the owners, auctioneer or any sale staff assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss of property. All persons attending the sale do so at their own risk. We are not responsible for typographical errors.

GUARANTEE

All bulls selling over \$4,000 will carry a first breeding season guarantee. The first breeding season ends August 1 of the year of purchase. Any request for a replacement bull needs to be made by this date. Death loss is the buyer's risk and mortality insurance is available on all bulls at the sale. Anything selling over \$5,000 is recommended to buy Livestock Mortality Insurance and McEntire Red Angus will pay 2% of the premium. Normal care and adequate nutrition need to be provided for maximum potential to be reached. It is recommended that bulls receive supplemental feed after the breeding season until they have reach maturity.

HERD HEALTH

All cattle sold through the sale are on a complete health program and will be accompanied by the health papers for shipment anywhere in the United States.

BELOW YOU WILL FIND DESCRIPTIONS OF THE EPD DATA LISTED IN THIS SALE CATALOG.

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

ProS - Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB - HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM - GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the postweaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED - Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW - Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW - Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW - Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG - Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI - Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK - Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME - Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG - Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM - Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY - Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB - Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG - Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW - Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA - Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT - Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

The Commercial Offering

50 Commercial Open Heifers

Offering 50 hand sorted commercial open heifers sired my 4MC Red Angus bulls! Traditionally we have gate cut groups of 10 head or more for our customers, but we felt this year the quality was deeper than it ever has been. These females are sorted based on size and kind for uniformity. We think that you'll agree, this is a top shelf set of red hided commercial replacement females that will add maternal strength to your cowherd. Bid with confidence!

GROUP 1	GROUP 2	GROUP 3	GROUP 4	GROUP 5
202	206	207	201	249
208	210	235	203	252
231	230	241	209	258
240	242	261	232	260

293	319	297	290	295
311	320	316	317	314

50 Commercial First Calf Heifer Pairs

Again this year we proudly offer a fancy set of red hided commercial first calf heifer pairs that have calves at side sired by 4MC Tight End 0182, a top son of PIE Convoy 7058 that is backed by a daughter of PIE The Cowboy Kind 343. This set of females originated from bull customers in South Dakota and Oklahoma. We will sort these females into groups of 5 prior to sale day and have complete calf information. For more information about the herd health protocol please reach out to Randy McEntire at (580) 729-9036 to discuss the offering.
