TERMS & CONDITIONS:

All cattle will sell under the suggested terms and conditions of the respective breed associations in which are represented throughout the sale offering - Red Angus Association of American and American Simmental Association. All sales are final. Seller reserves the right to two successful flushes on each heifer in the sale at the buyer's convenience and seller's expense.

All females are sold as sound breeders. However, if we feel that a heifer has been fed to an extreme level of obesity, we will hold the feeder responsible for any reproductive problems. Seller reserves the right to take possession of any animal(s) that presents difficulty conceiving before a sale credit will be issued. Seller guarantees each female to produce a live calf or transferrable embryos.

ANNOUNCEMENTS:

A supplement sheet will be available sale day with updated information, corrections, and additional information. This sheet and any announcements made sale day from the auction block during the sale, will take precedence over printed material associated with the sale.

LIABILITY:

Anyone attending this sale attends at their own risk. Sellers, facility owners, nor the sales team will not be held responsible for any personal injury from attending this sale.

VIDEOS:

Videos of cattle will be available prior to the sale. The videos will be available for viewing at www.CCI.live

INNOVATION

— AgMarketing, LLC —

2023 has been another year for the ages. Sure, the weather was challenging with record snow fall accumulations through the end of winter and spring, followed up with record heat and drought for another consecutive year for much of the land. Even with those circumstances, many were able to recover through the summer and early fall with record prices for crops and livestock across the board. The beef business received some of its biggest premiums in history that were needed to offset the increase in input costs. At the end of the day the good business operations in ag are setting in pretty good shape as they look to plan for what's in store for their operations in 2024.

The Red Angus breed shared in the success of the year with multiple bull sales throughout the spring as good as they have ever been as the sale averages were all at least \$500 better on the average than a year ago. Industry demand for the age and source verified Red Angus stock remained solid to stronger for all classes in the commercial marketplace and some of the early marketed Red Angus bred females commanded top dollar on the summer run of the Superior Livestock specials. One thing is very certain as we switch gears towards the business that is between the pages of this book and beyond this letter is that the demand for youth involvement in the industry has continued to ramp up. It is one of the very best ways to raise a family as exhibiting livestock will teach a young person everything they need to know about life and the reality of the world we live in.

TC Reds is the source for those junior show projects as well as the source for high end bred females that will go out and return on investment in short fashion. Scott and Mia Bayer have raised their family on the pastures of Ringle, Wisconsin and the surrounding area. This family has a proven track record of success in the Red Angus, Angus, and Simmental breeds. Scott and Ty know how to mate them, raise them, and prepare the stock to play at the level necessary to achieve the ultimate goal. They are very hands on, and they will do all things necessary to assure your young person the success that they are familiar with. The entire family will be on your junior exhibitor's team every step of the way if you so desire. This opportunity to do business with this family will be a priceless experience if you are new to the industry or just haven't been able to acquire one of the great females from TC Reds.

This set of females are the very best that TC has ever offered, so browse, call with any questions, and be prepared to invest in the future of your child, children, or your established operation's future. One of the great families of the industry stands behind this set of stock. We know that the TC family will be happy to field any calls about their program and Innovation Ag Marketing's team is on board for the same task as well. We hope to see you there at the Wies Sale Facility in warm and cozy St. Ansgar, IA on December 2, 2023.

TC MISS ELLIE 11L

We promise there has never been an animal that has garnered as much attention in Ringle prior to sale day then TC Miss Ellie 11L, a direct daughter of RED Northline Tucker 54E and out of the WEBR Ms Ellie 1024 donor that needs absolutely no introduction to this business. Seldom do individuals come along that are this unique in their build, so genuine in their structural integrity and so seamless about the transitions between their pieces. As you break 11L down is becomes evident, quickly that there is little further to desire, a big circumference of foot and bone meets the earth, with fluid joints and shaggy hide. All built to carry the extra volume and mass that she has matured with. This is one that needs to be inspected in the flesh as she comes flawless in her basic build, yet excels in regard to all the extras that are trendy, it's not often can you have both, and to this point we aren't sure we have raised one that does so many things right like you will find here. One of the most elite Red Angus females to sell in 2023, period.

Retaining 50% embryo interest.

TC ELLIE 61L

A pair of full sisters that stem from the potent combination of Meado-West Jazz and WEBR Ms Ellie 1024. The three full sisters to this mating averaged over \$8,000 in last year's sale and we think this year's duo have as much, if not more to offer both as show heifer prospects and breeding pieces. Their mother, WEBR Ms Ellie 1024 is one of the most decorated females in the entire Red Angus directory, she has had close to a decade of dominance of the winner's circle, the phenotypic quality she transmits has proven to be timeless. She continues to generate the right kind, but it's her daughter's that are taking on the role of protecting the legacy she has built.

TC ELLIE 07K - \$15,500 Full Sister to Lot 5

TC ELLIE 05K

A royal pedigree accompanies this featured member of the sale offering being a direct daughter of the legend, WEBR Ms Ellie 1024. She is a flush sister to last years \$15,500 sale highlight TC Ellie 07K that was Reserve in her division at the 2022 North American and several other high sellers and banner winners over the past decade. The cow that builds the foundation for TC Ellie 05K is the once in a lifetime kind of female that really kicked things off for our program, we think she has the potential to be this kind of breeding piece for her new owners. 05K is impressive in her own right, being long bodied, wide pinned, and has the added presence and look that the special ones always have. We think the true value of this Meado-West Montana Creek 413 daughter will be quickly realized once she hits the donor pen for her new owners.

TC SUGAR K78 - \$16,500 Full Sister to Lots 7-9

TC MS SUGAR L99

While some may say that this trio of Meado-West Montana Creek 413 daughters don't have the advantage of age and maturity on their side, we believe that their potential to be a dominate force in the division is undeniable! They are full sisters to the \$16,500 heifer that Tyler Wilson purchased out of this sale last year. As a whole this trio of sisters are as complete and balanced of any females in the offering, and have as much potential to compete on a national level as any we will sell. We term TC Ms Sugar L99 as impeccable in her structural build, being flexible and agile off of either end of her skeleton, as she paws the ground with elegance and poise. She hits the ground with a big and square foot, and carries this same circumference of bone all the way up her leg. She is an absolute standout of the offering, we aren't really sure where we would change her build.

TC SUGAR K7 - \$31,000 Full Sister to Lot 10

The addition of TC Sugar K1 to your breeding program should be taken very seriously if you are looking to add phenotypic excellence to the herd. She is a full sister to Madison Fischer's \$31,000 high selling female out of the 2022 Female Sale, and we think this EGL GCC Red Eagle E7194 daughter is something special! We regret not throwing a halter on this one earlier and showing her, she has matured with more look and quality than we could have ever imagined. Her dam TC Sugarcup 02Y proved herself the old fashion way, she didn't enter the donor pen until she had shown she could raise the kind that deserve the extra inputs and her progeny in these past two past Fall Female Sales have proven beyond doubt that she deserves the promotion. As you trace her maternal lineage you will see she is a descendant of one of the most influential cow families in our operation, the Luanna's. Sure this one carries all the trendy presence and feature that we love to select for in this business, but just keep in mind that generations of cow power have formed the foundations to do so.

OPEN RED ANGUS FEMALE

TC CB BIG FOOT 106J - Maternal Brother to Lot 19

CB TC RUBY 25L

CB TC Ruby 25L is a huge middled, functionally orientated daughter of the maternal legend in WEBR Night Train 324. She is exactly what we envisioned when selecting this mating for the FFG Ruby 8124 female that we purchased from Frank Family Genetics with Shane Bedwell. This is the type of female that screams longevity and high productivity, we can promise her udder quality and structural integrity will be of the utmost quality.

TC LOLA 28L

You have heard it from us before, but there is just something special about these MLK Big Foot daughters, they are so unique when comparing to their contemporaries in the breed. TC Lola 28L has a monster big foot, unbelievable hair quality, an unreal look on the standstill, and a presence that is untrainable. We believe there is purple in the future for this one and she needs to be taken seriously by those hunting a high end show heifer prospect.

MEADO-WEST TC HANNAH - Maternal Granddam of Lots 21 & 23

TC HANNAH 62L

Meado-West TC Hannah and her daughters are a time tested and approved lineage of females that have added both phenotype and productivity to the cowherd. A MLK Big Foot sired maternal sister to the mother of TC Hannah 62L was Avery McMurphy's multiple division winning, TC Hanna 105E that she showed in the 2018-2019 show season. This one stems from a family tradition of cattle that feed and mature with extra look and style, dimension and mass.

TC DUCH DIRECT FACTOR 217K

TC DUCH Direct Factor 217K is a featured daughter of LSF MEW X-Factor 6693D, you'll be challenged to find many in the offering as long bodied, elegant fronted and balanced. Just like her phenotype, her pedigree suggests unparalleled opportunities to raise the kind to propel an operation forward. She is a descendant of the prolific Judy cow family in the Pieper operation, one of the cornerstones of their program.

TC HANNAH 60K

A daughter of the full sister to Meado-West Montana Creek 413 in Meado-West TC Hannah, and sired by the female generator WEBR TC Card Shark 1015, she is built right from the ground up, and has the potential to be a mainstay type female in any program. We have several Hannah daughters kicking it out of the park in production, including the mother of Lot 21. This is a young female with a very balanced genomic profile, it's easy to say that her best days ahead of her as she enters production. She is extra heavy boned and rugged in her feature.

TCB WEIS COCO L395

We begin the Simmental division with a purebred female that we think is pretty special. A direct daughter of the \$530,000 SO Remedy 7F, who after his first two calf crops relegated any doubt about the legacy he was destined to build, his progeny are winning banners on the nation's largest stages, and are at the top of high seller's lists. Both the Champion and Reserve Purebred Females at the 2023 American Royal were daughters of SO Remedy 7F. We knew that this cross with Miss Coco 16F was going to align the stars phenotypically, and we think 395L looks a lot like her mother did at this stage. Her mother was Reserve Champion Purebred Simmental Female both at the North American and the NWSS, and Supreme Champion Female at the Minnesota Beef Expo. The striking looks of this middle of May born heifer calf will be what catches your initial attention but upon further inspection you will like the flawless structure and captious middle third that she's built with.

1 PACKAGE OF 3 IVF SEXED FEMALE EMBRYOS

Another very rare genetic opportunity to acquire FULL SIB embryos to one of the featured females in this year's sale offering. We have assembled a small, but very high quality set of Simmental and SimGenetic females to add diversity to our breeding program. J6C Weis Miss Coco 16F was the 2019 NAILE Reserve Grand Champion Purebred Simmental Heifer. She was also the 2020 NWSS Reserve Grand Champion Purebred Simmental Heifer and Supreme at the MN Beef Expo. She has produced countless high sellers and we anticipate that she is just getting started! The embryos selling are sired by the \$530,000 record selling SO Remedy 7F, a sire that is living up to the hype he created when he sold in the 2021 Embryos On Snow sale in Oklahoma City! Bid with confidence... these are the very best we have to offer!

Guaranteeing one 60-day pregnancy if transferred by a certified technician.

The second of the pair of SO Remedy 7F Purebred Simmental show heifers is a daughter of W/C Chica Linda 0201H, 0201H is a W/C Bankroll 811D daughter from the W/C Angel 7114E matron, one of the leading ladies for Jared Werning. We love the outlier feature and unconventional pieces that this female is built with, she has inherited the special features that have always made the Angel cow family one we have admired. Find this one to inspect her extra massive, boldy sprung ribcage, her extra degree of bone circumference and foot size, along with added hair quality and neck extension, properties that propel her to the top of many peoples lists.

BRAND NEW MAN 001H - Sire of Lot 27

TCB BRANDI 104L

A percentage female sired by our Brand New Man 001H herd sire, that is ultra-complete and balanced. We think this May born heifer calf will be a fun one for a junior to show, year-round! As the industry trends back towards needing more substance in their show heifers we think this one suits the bill very well. She is extra burly in her bone and muscle shape, with an elongated front third and powerful rib shape.
