

ANNUAL PRODUCTION SALE

SUNDAY, FEBRUARY 18, 2024

ST. CHARLES, MN 1:00 P.M.

WE WELCOME YOU

to another K-LER Cattle ***“Structured for Success”*** production sale on February 18th at K-LER Cattle headquarters in St. Charles, Minnesota. This year, we are selling our biggest and best set of breed-leading genetics, including 53 bulls, 34 bred heifers, 15 open commercial replacements sired by K-LER bulls, and 1 proven donor.

Thank you for taking the time to evaluate our offering. Our customers drive our success. We strive to produce cattle with real-world traits and impressive EPD profiles. We believe in building cattle with long-term advantages of correct feet and legs and strong maternal traits while maintaining growth. In the end, we still get paid by the pound.

This is another year of opportunity for cattlemen nationwide. Fall cattle sales set record prices. Herd improvements will become more important. Cattlemen and women still need to provide consumers with an abundant supply of higher quality beef. Investing in K-LER Genetics on February 18th will help you do just that.

Our bulls are backed by our four-year feet and semen guarantee. With our continued feeder calf marketing option, the calves averaged \$1810/head in early November and continue to sell at the top of the market. You will find bulls that fit a diverse set of needs. From super calving-ease bulls, to pound-producing bulls for heavy weigh-up calves, along with elite AI quality candidates. They sport a combination of progressive EPDs with a functional design.

The bred heifer division is stacked deep with donor potential. These females will earn their keep by raising stout, heavy-weaning calves while adding new genetics to your herd. These are the front end of our genetics, backed by the industry proven cow lines. The young donor speaks for herself.

New this year is the offering of 15 open commercial replacement females, hand-selected and sired by our genetics. These females will make a phenomenal addition for any herd to build upon. Our guest consignors Hill Brothers Livestock, Sequim Valley Angus and Simmental, Stacked K Genetics, KMCC Cattle, and Young Family Cattle continue to offer their top animals.

We want to introduce Craig Schaufler, our on-farm manager. We wouldn't have been able to complete as many projects as we did without his drive and passion for K-LER Cattle.

THANK YOU to everyone who helped throughout the year, from cattle prep to wrangling kids and cows to the right spot.

We look forward to seeing those who can make it to the farm. Please feel free to reach out with questions. Great friends and good cattle are why K-LER Cattle continues in business today.

Sincerely,

The Raehlers

Ralph & Mena

TRUCKING:

Dick Coleman (765) 461-0954
Free delivery to customers within a 350-mile radius of St. Charles, Minnesota. K-LER Cattle covers the first \$200 trucking elsewhere in the United States. \$100 discount per animal if you haul home day of sale.

CREDITS:

Noll Earnst, Sale Photos (641) 414-0404
Ideal Video Productions, Sale Videos... (785) 541-0904

TERMS & CONDITIONS:

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals are removed.

SEMEN INTEREST:

Seller retains 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block.

RISK:

Each animal becomes the risk of the purchaser for loss or injury as soon as sold. We strongly recommend a mortality insurance policy be taken out on any animal left to be wintered. Any bulls left past April 1, 2024 will incur a \$3/Day feed charge.

LIABILITY:

Neither owners nor sale management assume any liability for accidents or injury that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents

BOARDING:

Bulls will be wintered at no additional charge until April 1, 2024. Bulls are guaranteed to pass a breeding soundness exam prior to breeding season.

SUPPLEMENT SHEET:

Announcements from the auction block will take precedence over statements in the catalog. Disclaimer: The information in this catalog is subject to change. Planned mating EPD's will be available for the bred heifers the week of the sale.

Brand Guarantee

1. Four-Year Feet and Semen Guarantee

All bulls sell with a four-breeding season guarantee on feet and semen. If the bull's feet or semen limit the bull's breeding due to genetics or structure, we will provide a sliding-scale credit for the breeding seasons left to complete. The sale credit amount issued will be the purchase price minus salvage value, with a 25% value reduction for each breeding season completed. Feet and Semen are covered for unsoundness NOT caused by illness, foot rot, neglect, or other cattle. A veterinarian semen test and soundness examination certifying that the bull is in good health and condition is required. Sale credit can only be used on one animal and must be used within one year.

2. Feeder-Calf Marketing Program

We have feedlots wanting to buy calves out of our genetics. Contact Seth if you would like to get a bid on your calves – at the farm or the sale barn. Early notice will help us get loads in order.

3. Female Guarantee

All females sold as open animals are guaranteed to breed or they will be replaced with another animal, or with sale credit towards another female. Sale credit must be used within one year.

4. Sight-Unseen Purchase Guarantee

All cattle bought sight unseen- If you don't like the animal once delivered, you don't own it. Warranty will be issued for the appropriate value as sale credit towards another animal and must be used within one year.

5. If you have an issue with an animal purchased from us, please let us know, and we will find a solution.

OF EVENTS

INNOVATION

— AgMarketing, LLC —

The Kaehler family name has been associated with production and animal agriculture since the settlement of the upper Midwest. Heritage, tradition, quality, integrity, and reputation have also been affiliated with the family namesake. In this era, on the family home place in southeastern Minnesota, Seth, Shelby, and their young family continue to build on the family name and carry the torch to a new level in seedstock supplying excellence.

The operation has a path to staying with the changing industry needs and desires. From the swings in desired phenotypic measures of 40 to 50 years ago to the incorporation of the EPD phase, and now on to genomics, the Kaehler family has maintained a path that has kept them at the forefront of the current events and trends within the industry. Seth has always had a distinct passion for the stock with the great phenotype but is industry-savvy enough to understand that it takes more than that to survive within the fast track of the seedstock business of today.

Seth knows it takes seedstock sires like the emerging leaders KBHR Revolution H071 (owned with River Creek and Schooley); K-LER Promoter (owned with Select Sires), or K-LER Formula 1 (owned with CRI and Express Ranches) and young donors like K-LER Barbies Order 970G to keep a program performing on the upper echelon in today's business plan. Several sons of KBHR Revolution and Promoter grace the pages of this sale book along with sons by the proven arsenal of other sires that represent the best of SimGenetic business. K-LER Barbies Order 970G is from the same cow family that produces W/C Fort Knox 609F and 6 years of Denver topping siblings; plus numerous donors and herdsires headlining progressive herds across the US and Canada. It is not often in today's marketplace that one has the opportunity to invest in a youthful, proven donor dam that is on the fastest track of success in the industry, such as 970G. One will notice her sons are not only at the very top end of this offering, but they are at the top end of the business for multiple traits within the breed.

Please consider this your invitation to attend this annual production sale hosted by a family that has a multi-generational influence on the beef business with a family name held in high regard on several levels. The cattle will be excellent, the customer service is some of the very best, and the hospitality is certainly warmer than the actual air temperature this time of the year. If you cannot make it sale day, reach out to Seth to schedule your visit any time before the sale and they will accommodate your needs. If you have any other questions or need help with purchasing stock, do not hesitate to reach out to any of the Innovation Ag Marketing team for assistance.

Thank you for your interest in this annual event and we hope that you enjoy the quality of the stock.

KLER BARBIES ORDER 970G
 DAM OF LOTS 1-3

A fitting introduction to the 2024 KLER Cattle Company offering, KLER Muscle Man 3014L is a phenotypic masterpiece, combining herd bull presence, a good set of running gears, shape and capacity through his middle body, and stout, powerful features from every angle. His pedigree is structured for success, stemming from the KLER Barbies Order 970G donor cow and KBHR Revolution H071, the most prolific sire line in this year's offering. To top off this special creature, his genetic profile reads just like you would draw one up on paper, ranking in the top 5% CW, top 10% WW, TI, top 15% YW, top 20% DOC, top 25% MARB, API, top 30% BW. The 918 lb. WW he posted is top end of the offering. If you want a bull that combines all the key elements of a purebred herd sire, here he is.

The flush brother to KLER Muscle Man 3014L with a more moderate birth weight and distinctive white face, KLER Diesel 4004L possesses the same herd bull characteristics as you analyze him in the pens: stature, structure, and stoutness. The sons of KBHR Revolution H071 in this catalog are the most prominent and heaviest weaning bulls in this year's edition. 4004L contributes to those merits with an 854 lb. WW of his own. What sets this bull apart among the flush brothers is his genetic profile truly excels in this offering, as well as the Simmental population, posting rankings in the top 2% CW, top 10% WW, YW, DOC, REA, TI, and top 20% BW, MARB, API. 4004L will be on the short list of herd bull candidates for even the most discriminating breeder.

If this mating piques your interest, but you need to infuse more calving ease, then study KLER Rev 3009L. This lad carries the same power from all angles and look of a dominant herd bull as his two flushmate brothers. The mating of KBHR Revolution H071 to the KLER Barbies Order 970G donor matron really clicked, as you can see in this year's offering. At only 67 lb., 3009L is one of the lightest calves in the entire offering at birth. The genetic component of this herd sire's total package is most appealing, as he has top marks at top 10% BW, DOC, CW, REA, TI, top 15% YW, API, top 20% WW, top 25% CED, MARB, and top 35% MCE, STAY. 3009L is a calving herd sire prospect steered for success.

3006L is a smoothly designed, long bodied herd sire prospect that reads with structural integrity. A continuation of the KBHR Revolution H071 sire line, adding power and growth to a calf crop in many breeding situations. Ratioing 106 at weaning from an 80 lb. BW, here's a bull that performed admirably while carrying that genetic prowess in his EPD figures as well. Ranking in the top 2% WW, top 3% YW, top 15% MILK, REA, top 25% CW, TI, top 35% DOC. To top it all off, he is both homozygous black and homozygous polled. It's not a bold prediction to say that you will like this one on sale day! A maternal sib also sells in this sale. ****Denver bull**

KLER HARLEY 2008K
 MATERNAL SISTER SELLING AS LOT 57

A favorite of many for his phenotypic superiority, KLER New View 3051L is a true power herd sire prospect. He's massive and full of shape, yet still smoothly designed and good in his joints and structural framework. His 111 WW ratio will catch the attention of any performance driven producer. Ranks in the top 2% WW, YW, top 3% REA, top 4% TI, top 10% CW, top 15% MILK, API, top 20% MARB, top 30% STAY, DOC, excelling in traits of economic importance and producer convenience. Being homozygous black and polled only adds to his merits as a top herd sire in this sale. Dam is a full sib to KLER Promoter! ****Denver bull**

KLER Carry On 3010L is an absolute brute of a bull, packed full of muscle and dimension. The KBHR Revolution H071 sons ring the bell in their power and performance. Here is the #1 WW bull in the entire offering at 1,000 lb. Being homozygous black and polled only adds to his value as a revenue generating herd sire. Her genetic merits include top 4% WW, MILK, top 5% DOC, top 10% YW, STAY, CW, TI, top 15% API, and top 20% MARB. 3010L can carry a herd forward with his service.

If eye appeal, added length, homozygous polled, and performance are key to your bull selection, study your lesson on L16. Only 78 lb. at birth and boasting an 870 lb. WW, this is another KBHR Revolution H071 son that will add pounds to a calf crop. Stemming from the Ellingson/STR MS Innovator donor tree only adds to his maternal prowess. Study the figures on this bull: top 3% DOC, top 10% BW, CW, top 15% WW, YW, STAY, API, TI, top 20% MILK, top 25% REA, top 30% MCE, top 35% CED, MARB. He's as unique as you can draw one up on his EPD tabulation. Dam is a full sister to CDI Innovator. Herd bull potential here.

KLER Solution L2 can provide the answer to many breeding programs. His bold rib and expressive muscle pattern will certainly catch your attention. A son of donor Ellingson/STR MS Innovator, the maternal prowess is certainly abundant in his genetic makeup, while sire KBHR Revolution H071 adds performance capabilities. With an 80 lb. BW and 843 lb. WW, he's an impressive individual performer. To top it all off, his genetic profile is big league for its quality and balance, ranking top 5% STAY, top 15% CW, top 20% BW, WW, YW, MILK, REA, API, TI, and top 35% MCE. This homozygous polled prospect is worthy of consideration. Dam is a full sister to CDI Innovator.

L8 carries the staple traits of length of body, power, and performance you expect from the entire sire group offering in this sale. He is set apart from his contemporaries by being homozygous black and polled. His 932 lb. WW is one of the best in this bull crop, and his genetic profile reads with loads of calving ease and growth: top 2% API, STAY, top 3% TI, top 5% WW, top 10% YW, MCE, MARB, top 15% CED, CW, top 25% BW, DOC, top 30% MILK. His rankings for the economic selection indexes API and TI indicate his ability to improve profitability at all phases of beef production. Maternal siblings averaged \$12,600 in the 2023 River Creek female sale.

K-LER RAIN MARIE
DAM OF LOT 15

3060L will give your herd a clear vision into the future. He is an attractively built calf with length of body, plenty of muscle shape, and good foot size. One of the lighter birth calves in the offering, he still weighed off at an impressive 855 lb. weaning. He'll keep the calf crop black hided and smooth polled, testing homozygous for both. You'll have this son of KLER Right Design 012J on your short list for a high quality, balanced trait sire. He is a half sib to last year's high selling, KLER Elusive. Ranks in the top 25% STAY, top 30% CED, MCE, top 35% YW, API to produce daughters that will be money makers without sacrificing calving ease.

KLER BASIS 048J
MATERNAL BROTHER TO LOT 25

Here is a striking herd sire prospect with plenty of valuable traits on his ledger. This purebred KLER Promoter G15 son was over 850 lb. on his WW. Dam has sent multiple sons through the sale ring, including the \$21,000 KLER Basis to Reed and Jane Crawford of Ontario, as well as a son to Lucas Laufenberg in WI. There's power in his lineage.

 DAM OF LOT 42

Homozygous polled standout red baldy bull. This one is good livestock from the ground up, from all angles. Solid profile, great design, and plenty of true shape and muscle highlight his features. Strong growth and carcass rankings on the genetic profile for this son of W/C Fort Knox 609F (top 15% REA, top 25% WW, MARB, top 30% TI, top 35% YW). His dam brought \$21,000 in the H20 dispersal, and he is a half sibling to a \$25,000 seller. Anonymous 3005L will make himself known on sale day. ****Denver bull**

SYDGEN ENHANCE
 SIRE OF LOT 48-50

3137L is a maternal brother to KLER Formula 1, who sold to Genex and Express Ranches for \$60,000. He's long sided, great in his structural design, and attractive in his look. This son of Sydgen Enhance and our Riverbend Queenie C353 donor is one of three full brothers in the Angus offering this year. Take advantage of the chance to add that uniform genetic pool to your calf crop.

	5	40	15	20	20	40	15	15

With a phenotype that combines many good pieces, 3135L is one to watch in the Angus offering. You will like his stature and functional design. He is a maternal brother to KLER Formula 1, who sold to Genex and Express Ranches for \$60,000. The flush of Riverbend Queenie C353 to Sydgen Enhance really worked well, as evidenced by the bulls offered in this sale.

KLER Webster 312L carries a stout hip and extra muscle to his quarter that is much appreciated. He's clean jointed and correct in his skeletal build. This is the kind of bull that you want to utilize to keep your herd headed on the right track in future generations.

Due to calve 3/20/24 to EKHCC KENNEDY 208K (ASA: 4167351).

KLER Barbies Order 970G is one of the most impressive females to ever be branded with the K-LER prefix. Seldom has the opportunity arisen to buy directly out of the heart of our donor pen, but here exists exactly that. Just a young female that is approaching her prime production years, but is one that has already recorded what many would hope for in a lifetime. This direct daughter of the legendary K-LER Barbie 455B represents the next generation of the legacy, and is the kind that brings to reality what stacking generations of cow power together can do. This ultra-massive bodied, round ribbed, wide ended daughter of W/C Executive Order 8543B has averaged just over \$9,000 on her progeny that have been marketed to date. This includes a \$25,000 daughter of JSUL Something About Mary 8421 that was very successfully campaigned by the Sigmund family of Texas, a full sister was also campaigned by the Lunning family of Minnesota. While she has proven that injecting phenotype is no problem, her real quality shines bright as a herd bull generator, and there are three prime examples of this in this year's bull offering selling as lots 1-3. This high percentage, beauty reads with balance across the board, and phenotypically sets a standard of excellence. Carrying the service of EKHCC Kennedy a baldy sire whose full sib sold for \$13,000 as a bred last year.

Due to calve 4/4/24 to
 KLER NATION 2087K (ASA: 4096021).

This pair of CDI Trustee 387F daughters of K-LER Barbie 455B are exactly what we have been trying to produce. What drives our breeding program is building cattle that are more than just eye appealing, but have some true growth and commercial acceptability, and not just on paper but when they are tested against real world metrics. The pedigree and maternal power of these females alone should have cowboys intrigued, but when you inspect them on the hoof, there should be no doubt that down the road they have immense generating power. There is no question that the Barbie cow family has carried our program with both sons and daughters that stand at the forefront of ours and other breed leading programs. Full siblings to this mating include Dennis Moore's \$20,000 purchase of KLER Barbie 007J in last year's sale, and in the 2022 Production Sale, a full brother, KLER Stellar 031J commanded \$19,000 to Dirk O'Connor. If you're in the market for a donor candidate to generate high growth herd bulls that are backed by generations of consistency then these two should be high on your list. Due to calving ease specialist K-LER Nation 2087K.

Due to calve 2/7/24 to

The maternal sister to Lots 53-55 that offers the leading set of expected growth figures and performance data. This purebred, excels with chart topping Yearling Weight, Average Daily Gain & Carcass Weight traits, she is sure to inject potent growth into her offspring. The LEERS Turnpike 333G daughter is surprisingly smooth and attractive in her muscle design too, and casts a very level and eye appealing outline, we think she will make friends with those of varying production goals in mind. It is hard to beat the maternal backing that she comes with, being a direct daughter of one of the most productive and influential females in our program's history, you can buy with confidence knowing that this is the best we have to offer here.

AI Bred on 11/2/23 to GIBBS 9114G ESSENTIAL (ASA: 3716905). KLER Harley 2008K leads off a pair of very impressive TJ Chief 460G daughters, they exemplify functional design and are accompanied by a very useful set of genomic markers. 2008K would be one of the very best Percentage Simmental females ever raised in St. Charles, and is a female we think has every opportunity to headline the donor pen of even the most astute and discerning cowboys. She stems back to the powerful genetic source, GW Miss GPRD 028X who has had an immense impact on the breed, through sons and daughters that offer futuristic quality with an outcross maternal pedigree.

Due to calve 1/15/24 with a Heifer Calf by CLRWTR CLEAR ADVANTAGE H4G (ASA: 3858588). KLER Sazzy 2091K is loaded with impressive look and dimension. This TJ Chief 460G daughter is loaded to the gills with muscle shape, curvature of rib shape and length of side. We love how she is constructed, both genetically and phenotypically. She stems back to the powerful Sazerac cow family through an up and coming donor for our program, SSF Sazerac S10H. She traces back to the one that started it all for Hudson Pines, Myers Queen Sazerac P94.

FIVE STAR JACKSON J10 (ASA 3947790)
X KLER DIXIE CHICK 2065K (ASA 4096000)

Due to calve 1/17/24 with a Bull Calf by FIVE STAR JACKSON J10 (ASA: 3947790).

The homozygous black, KLER Dixie Chick 2065K excels when you begin sorting the offering for growth and performance potential. She ranks top 15% for both WW & YW, top 30% ADG & MARB, top 10% DOC and top 20% TI. Stemming from the Dixie Erica tribe should remove any doubts you may have about the maternal traits and mothering ability of this 3/4 blood female because they are some of the best females in the beef business. A maternal brother to 2065K sells as Lot 24.

DAM OF LOT 60

Due to calve 3/23/24 to CK/K-LER/RFG LIMITLESS 6052D (ASA: 3235334).

When you find a female with the breeding versatility of KLER Beauty Queen 2085K then there is only one thing left to do, bid. This KBHR Revolution H071 daughter is a special one, and is set to write quite the story for her new owners. She is a maternal sister to KLER/RFG Ms Prophet 092J the \$27,000 highlight of the 2022 "The One" sale at the National Western Stock Show. Maternal brothers to 2085K were crowd favorites in the 2023 Production Sale also selling to Ron Gilliland, Ben O'Connor, Matthew Huff & Heath Larsen. The KMJ/KLER MS Prophet D3008 progeny always float to the top of their contemporary groups although it makes sense once you read into their growth predictions. You will be impressed to find top 3% WW, YW, MWW & TI figures, top 10% ADG, Stay, CW & API, top 15% Milk & MARB, she is absolutely an elite breeding piece that caps off her resume with both homozygous black and polled trait markers. Limitless is a super CE, Marbling and API specialist that ranks with the best in the breed.

CK/K-LER/RFG LIMITLESS 6052D (ASA 3235334)
X KLER LADY LUCK 2114K (ASA 4096041)

Due to calve 3/23/24 to CK/K-LER/RFG LIMITLESS 6052D (ASA: 3235334).

It does not get much better than the performance driven genome that accompanies this KBHR Revolution H071 daughter, because she is one of the most elite with an ASA registration number. This homozygous polled, homozygous black purebred comes with the elite 1% rankings for WW, YW, MWW & TI. But that is just the beginning because you will still find top 5% or better rankings for ADG, DOC, CW, MARB, REA and API. If you are looking for a slingshot approach to the front of the numbers game this you best pull back and engage with this one! The full brothers to 2114K were in the spotting scope of many progressive cattlemen and averaged \$14,250 in last year's sale, the profit generating potential here is remarkable.

Due to calve 1/15/24 with a Heifer Calf by KBHR REVOLUTION H071 (ASA: 3789458). The three daughters of KMJ/K-LER Ms Robust D336 are the flush mates to the most demanded set of bulls that we sold in 2023. They are directly tied to one of the breeds exciting new comers that is making a large splash in the infancy of her production career. Not only do her stock find friends when inspected in the pens, but they quickly sort to the top on paper as well, not something that happens very often! The CDI Trustee 387F sired female of the trio is the most acceptable in her calving ease and birthweight, but still offers exceptional growth and carcass quality.

Due to calve 4/6/24 to KLER NATION 2087K (ASA: 4096021). With both a data set and pedigree that screams growth there is little to question about her potential to inject potent performance in her progeny. KLER She's It 2075K is backed by an impressive CCR Cowboy Cut 5048Z dam and reads top 10% or better for WW, YW, ADG, MWW, Stay, CW & BF.

Due to calve 1/15/24 with a Heifer Calf by CLRWTR CLEAR ADVANTAGE H4G (ASA: 3858588). An extra big bodied, brood cow prospect that leaves nothing to the imagination when it comes to impressive center body shape and dimension. If you get to comparing on density and volume then I can promise it will be hard to find one that trumps this impressive specimen. Being homozygous polled and a purebred sure doesn't hurt anything either! Her maternal brother sells as Lot 6.

Due to calve 3/1/24 with a Bull Calf by KBHR REVOLUTION H071 (ASA: 3789458). Check out the impressive set of curve bending figures that accompany this high percentage female. She spins from a 14.8 CE to top 15% WW & YW figures, and also included in her genomic predictors are top 10% YG and top 15% REA expectations. This sets her up to be an exciting generator of purebred herd bull prospects when mated appropriately, and it will not take long to find out if this comes to fruition as she is due with an exciting bull calf pregnancy sired by purebred calving ease Red Angus KBHR Revolution H071.

Due to calve 1/15/24 with a Heifer Calf by KBHR REVOLUTION H071 (ASA: 3789458). A long sided, heavy muscled half blood that is sired by the KLER bred, Franchise 804F who has been the sire of several success stories for our program. We think that she will be the source of consistency and profitability for her new home, particularly when you take into consideration her homozygous polled and black status, and purebred breeding. Her impact on the cowherd starts early with a heifer calf by KBHR Revolution H071 due for February.

Due to calve 1/17/24 with a Heifer Calf by KBHR REVOLUTION H071 (ASA: 3789458).

Who says you can't have your cake and eat it too? In this situation you will have the best of both worlds, with a genomically enhanced set of EPD's that read for both calving ease and growth. This homozygous polled purebred, stems from a highly productive purchase out of the Oak Meadow Farms program sired by WS All-Around Z35 that has already raised an impressive featured bull from the 2022 KLER Production Sale. Sired by KLER Franchise \$30,000 valuation calving ease specialist whose sired high sellers for us and Hart Simmentals. They go on to produce hugh profit generating offspring.

Due to calve 1/8/24 with a Heifer Calf by KBHR REVOLUTION H071 (ASA: 3789458). KLER Halley 2038K proves that quality sells throughout the entire offering, she has the credentials from both a personal and pedigree standpoint to become a change maker for the program savvy enough to invest. She is a 3/4 sister to the KLER All In 052J herd bull that John Lee purchased in our inaugural sale for \$21,000. Their dam has quickly become a reliable source of the goods and is as versatile of a breeding piece as we have rostered. Turn to the paper and you will find that her growth predictors measure off the charts, and she sits among the elite 5% or better for WW, YW & ADG. A super impressive baldy that has quality that reaches well beyond her cool markings.

Due to calve 1/16/24 with a Heifer Calf sired by KBHR REVOLUTION H071 (ASA: 3789458). KLER Jenny 2001K isn't just the kind of girl you find on every street corner; she is a derivative of the legendary STF Onyx 451W who you will find as her maternal granddam. When it comes to her data set it will become very quickly apparent that she offers leading predictions for calving ease, birthweight and maternal calving ease, yield grade and back fat. It is obvious that we are big fans of the KBHR Revolution H071 sired stock, and we think that the heifer calf she has on board sired by him should be very good.

Due to calve 1/16/24 with a Bull Calf by FIVE STAR JACKSON J10 (ASA: 3947790).

As we continue to build stock that excel from a longevity and productivity standpoint you will find females like KLER Queen 2026K emerging more often in the future. This KLER Law & Order H5 sired daughter is extra functional and easy keeping her in her design, she is coming with a picture perfect udder set up and is so maternal in her ribcage shape. We love how feminine she is in her front third and how smoothly she transitions between her pieces. We love this kind and it has proven to run in the family as we think her maternal brother selling as Lot 46 has many of the same attributes.

KLER LAW & ORDER H5
SIRE OF LOTS 80 - 82

Due to calve 2/7/24 to KLER NATION 2087K (ASA: 4096021). Rounding out the first KLER Law & Order H5 bred heifers to ever be marketed is KLER/YFC Jewels 2132K. This purebred female has a very elegant and eye appealing look from the side, she is built correctly from the ground up and foreshadows a long and successful breeding career with her cowman's kind of phenotype. She is due to calve in early February to KLER Nation 2087K.

Due to calve 5/4/24 to KLER NATION 2087K (ASA: 4096021). When looking for a pedigree saturated with the most potent cow families in the business then it is hard to pass up the one that comes with KLER Elodie 2084K. Her dam is the first born natural daughter of the iconic WS Miss Sugar C4. C4 has a resume of maternal brothers to the dam of 2084K that is too long to fit on the page and continues to add to that still to this day. There is no questioning the importance of cow family when looking into a consistent generating investment, you can trust in having the best in the business supporting here!

Due to calve 3/23/24 to CK/K-LER/RFG LIMITLESS 6052D (ASA: 3235334).

We love the proportions and outline of this beautiful half-blood female. This is the kind we would take 100 of and feel pretty confident in the future of the cowherd's profitability. This no frills, built for the long-haul female has a running gear to outlast any breeding tenure, and foreshadows a low input, high output production career. She calves the earliest of the KLER/YFF Big Country G13 daughters at the end of March.

Due to calve 5/6/24 to

KLER NATION 2087K (ASA: 4096021).

If you are looking for a female to add to the cowherd but are worried about the early calving dates that most of this offering have, then you can rest assured that KLER Miss 2223K is going to wait until the grass is green to lay down and deliver her KLER Nation 2087K calf. The maternal power of these KLER/YFF Big Country G13 comes standard issue.

DONATION LOT

This year, we will donate half of the proceeds of the last heifer cataloged in the sale to St. Matthews Community Lutheran Preschool. St. Matthews is a preschool dedicated to creating a caring Christian environment that fosters friendship, trust, and respect for others. It encourages the children to realize their value in God's eyes and find joy in learning. Creed currently attends St. Matthews and, in the future, Colt and Haven. We want to donate the proceeds to help purchase school STEM equipment, transportation repairs, and upgrades, as these expenses come from fundraising throughout the year. Over the last year and a half, we have understood the meaning of getting involved in our community to help educate and grow our children. We are excited about this opportunity and know Creed will be excited to share about the sale as "snack helper." This female will be a great addition to your operation!

COMMERCIAL FEMALE

New to the sale this year is an offering of 15 top-quality open commercial females backed by KLER Genetics. These females are brought to you by a great friend and customer, Tate Pearson, who runs commercial sim/angus cows. These are the top cut of his females with nothing being held back. The mates to these heifers averaged just over 650# sold at the beginning of November while being born at the beginning of March. The sires to these heifers are a pair of bulls he purchased in 2018. Both bulls stem from the KLER Halley cow family, which has consistently produced high-quality, high-growth cattle that pay out extra across the scale. Buy them and turn them into some profit makers for your herd. All the heifers will have the same shot protocol as the bulls listed in the front of the catalog and will be calfhood vaccinated. They are selling in 3 groups of 5, with the winning bidder having the ability to take 1, 2 or all 3 groups.

All are guaranteed open and breedable. If the new owner wants to AI these, we will supply 15 units on any of our Calving Ease sires.

**LUKE, LANDON,
& TESSA
LAUFENBERG**

"Kaehler Cattle Company is a family-minded, results driven business proven to provide quality stock time after time. Bloodlines run as strong as their desired to create a lasting legacy for generations to come. During my time working with Seth, I have made several transactions that have included excellent communication and forward-thinking procedures and processes. Seth's ability to know and understand the current and upcoming markets gives me confidence build my herd with trust and high expectations."

"I think every cow man can agree that a good heifer bull pays for itself and my K-LER Linebacker bull has done just that. I retain ownership on all my calves and feed them through our feedlot, so something that doesn't perform affects my bottom line. I've bought multiple bulls out of the K-LER program, but the Linebacker bull I've been using has been second to none. He successfully covered 20 synced heifers by himself and I didn't pull a single calf. Now, those calves are now some of the biggest standing in the feedlot pen. I'm excited to see the first calf crop out of my new K-LER bulls this Spring."

**JOE KEISE
KEISER CATTLE CO
GOTHENBURG, NE**

**MICHAEL BRASS
FAMILY
ROCHESTER, MN**

"We have known and done business with the Kaehler family for over 20 years. We have watched their program grow and improve over time. Their commitment to the future of the cattle industry is unparalleled and they have always been generous with their time and information. Our children grew up with Cliff and Seth and we spent many enjoyable hours at their place looking at their cattle, teaching the kids and ate many great meals with Mena, Ralph and the boys. We have witnessed the seamless transition to the next generation and have total confidence that Seth and Shelby will continue looking to the future of the cattle industry and produce cutting edge genetics."

*Customer
Testimonials...*

**REED & JANE
CRAWFORD
RIVER POINT CATTLE CO.
GLENCOE, ONTARIO, CA**

"We are truly impressed with the Kaehler family, from first contacting them they gave their honest opinion on all the bulls to get what suited our needs best. Their customer service is second to none. We admire the structural soundness and mobility of the bull and can't wait to see what the endless possibilities are north of the border. We look forward to using K-Ler Cattle genetics to further our purebred program."

**KURT BLOMGREN
FAMILY
BUTTERFIELD, MN**

"We have known the Kaehler family for more than 20 years as our boys are of similar ages. They introduced us to the value of showing beef cattle as a family project of togetherness. There are few activities in life that instill the values gained by respecting and learning from your competitors like showing cattle in both winning and finishing second. The K-LER bloodlines most importantly succeed at home on the farm in our harsh MN climate. They combine both calving ease as well as growth that stand out far above expectations."

ASA

QUICK EPD REFERENCE

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

ALL-PURPOSE INDEX (API):

Dollars per cow exposed under an all-purpose-sire scenario.

AVERAGE DAILY GAIN (ADG):

Pounds of post weaning daily weight gain.

BACK FAT (BF): Inches of backfat.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE):

Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight.

DOCILITY (DOC):

Percent of offspring achieving a docile (1) score.

MATERNAL CALVING EASE (MCE):

Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MRB): Marbling score.

MATERNAL WEANING WEIGHT (MWW):

Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of ribeye.

WARNER-BRATZLER SHEAR FORCE (WBSF):

Pounds of force required to shear a steak.

STAYABILITY (STAY):

Percent of daughters remaining in the cowherd at 6 years of age.

TERMINAL INDEX (TI):

Dollars per cow exposed under a terminal-sire scenario.

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Yield grade score.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API):

Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI):

Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

USING API AND TI:

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an allpurpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population.

For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

Thank You

We want to extend a special thank you to Ed and Julie Kaehler.

Ed has generously assisted, mentored, and partnered with Seth and Shelby to help them get into and grow the cropping side of their business. Now, most recently, he has sold his cowherd to KLER Cattle. Ed is Ralph's brother, Cliff and Seth's uncle, and a longtime Simmental and Angus cattle breeder under the EKHCC brand (Ed Kaehler Homedale Cattle Co). Ed has a lifetime of showing and producing cattle with the Kaehler family, from bred state fair champions and influential donors (most notably EKHCC Red Jewel), raising his children in the farming, showing, and producing cattle industry. His new passion is being a part of and influencing his five (soon to be six) grandkids.

Ed always kept a herd of cows around. Even though he kept growing the crop side of his business. His grandkids all live out of state, and Grandma Julie was traveling to see the grandkids without him because he had to stay and feed cows. The grandkids have trumped the cows, and he sold his herd to KLER Cattle this year. Each of his grandkids still has a cow running with KLER Cattle. Ed's cowlessness has not been easy on him, and he is suffering from 'CWS,' otherwise known as "Cow Withdrawal Syndrome." Without cows to keep Ed busy outside, we are trying hard to keep him from going crazy and buying more cows. We all know Julie appreciates it!

We cannot thank Ed and Julie enough for all they have done to support us, and we wanted to publicly thank them for their help and celebrate the new phase they have entered.
