

48TH ANNUAL

L83 RANCH

PRODUCTION SALE

MARCH 26, 2024 AT 1 PM CST | KIST LIVESTOCK | MANDAN, ND

WELCOME

Welcome back as we have completed another trip around the sun. This past year, we have again been graced with uplifting experiences to our entire family. In April, Molly and Chandler introduced Blair Henry Meiers to our family; and in June, Maddy and Ryan introduced their first child, Ajla Kay Westby, to our family. The older grandkids keep growing like weeds, causing for more running around for their parents, and more fun for their "Funcles". Ben and Lacey are busy as ever with cattle shows, sales, and touring cattle everywhere in between. All while remodeling their home in their "spare time." Wyatt has started a new business venture of his own, WeeDog Productions. Here, he has taken his photography passion, that started in the duck blind, into the sporting events for families and athletes to admire. Zane is now in his SENIOR year of High School! Zane has been building his simmental herd, which will probably result in some simmental bulls in the production sales ahead in the future.

This year's set of bulls yet again have brought forth so much to offer. New genetics, but built with the same mindset that we have focused on for years. Producing cattle that work in the harshest of climates, while focusing on what works for the commercial rancher. Like every year, we have put this set together with an intensive culling process. Foot structure, docility, performance, and fertility are our major categories for culling. Developed in the flatlands of the North Dakota tundra, these bulls have seen temperatures from -60 degrees F, all the way up to 110 degrees F. Talk about intense climates. We are certain that these boys can go anywhere and be progressive and long lasting.

Buy with confidence in our program. We take pride in what our offering possesses. We are always welcoming to phone calls. Calving, breeding, selling, buying.anything cattle or just life in general! This cattle market is BOOOMING. Now is the time to invest for the long run. Increase the efficiency of your cow herd. Buy bulls that will give you the return that you deserve. Buy with confidence because L83 is "The Brand You Can Trust"

Sincerely,
The L83 Family

-THE BRAND YOU CAN TRUST-

It goes without saying, the beef business is witnessing and forecasted to see record times. Never before has the producer been on the receiving end of such a significant payday, and the return on investment in growth genetics been so valuable. Each and every added pound that can be gained as a result of genetic heterosis will be passive profit passed along into the hands of the ranchman. With that in mind, we are proud to welcome you to the most impressive set of high performance, big growth orientated herd bull prospects that L83 Ranch has ever marketed. As you read through the offering, take note of the impressive growth projections that the class of 2024 carries with them. You will find that close to 90% of the bulls cataloged rank among the top third or better of the registry for both weaning weight and yearling weight figures, so regardless of how you may like them on the videos, or in the sale pens, there is a high probability that you are setting your program up for added pay weight and profitability with the selection of any bull in the offering.

You too will notice the addition of several new sire groups being added to the roster, they can be held accountable for this programs push towards the leading edge of the Red Angus breeds growth parameters. Six Mile GSF Jolt 452J and Red Wilbar Intuition 832J have been welcomed with open arms, as they have lived up to expectations and potentially injected massive amounts of performance in the first generation, yet have proven to uphold the generations of longevity, hardiness and structural design that has been bred into the bottom side of the equation. We are excited to showcase this offering, they truly are right for the times, and the kind that is going to add value to multiple facets of a cowman's operation, first off with added pay weight and then in the long term with a sensational set of replacement females turned long term matrons.

We look forward to visiting with you about the bull offering, and then hosting you at Kist Livestock the afternoon of March 26th. The bulls have recently been videoed so if you cannot make it to the ranch or the auction barn to inspect the offering, you can trust in the authenticity of the video playlist that can be found on both the DV Auctions or Innovation AgMarketing websites. It would also be worth your time to reach out to Ben to discuss the offering, he knows no stranger, and is eager to talk not only about the offering but the pursuits of agriculture as a whole. As you begin to consider the investments you will make in breeding stock for this coming year, consider the addition of not only L83 and JK Angus genetics to your program but tying into operations that have made significant long-term investments to produce a product that is geared towards the success of their customers.

See you sale day,

Tim Anderson Graham Blagg Jered Shipman

ACCOMMODATIONS

If you are coming from out of town and would like a hotel room in Bismarck or Mandan, give Jennie a call at (701) 263-1016 and we will get a room reserved in your name.

SALE TERMS & CONDITIONS

Any bidding disputes will be settled by the auctioneer. Announcements made from the sale block on sale day take precedence over the catalog. EPDs were pulled 2/22/2024.

GUARANTEE

All bulls sold for \$3,500 or more will be guaranteed sound breeder. All bulls will be semen tested prior to the sale, but it is highly recommended that you test the bulls before turning them out for the breeding season. If a bull tests as a non-breeder, the seller has 180 days to make an adjustment. If the bull is returned to the seller and declared a sound breeder by a competent veterinarian, he will be returned to the buyer at the buyers' expense. In case the bull is declared a non-breeder, the bull will be replaced with one of similar quality if possible or the purchase price will be refunded if the bull was returned in the same body condition as on sale day. This breeding guarantee is valid through Oct. 15, 2024.

SUPPLEMENT SHEET & SALE ORDER

On sale day, you will be provided with a sale order and supplement sheet that will include scrotal measurements, current weight, and ultrasound data. Feel free to call any of us with any questions prior to sale day, or better yet, stop in at the ranch and see the cattle first hand and get your name put in the drawing that will be held on sale day!

HERD HEALTH

Vet care is provided by Carin Frenchick, NVM - Minot Vet Clinic - Minot, ND

ULTRASOUND DATA

JJ Hovde - High Plains Vet - (406) 433-1413

NUTRITIONIST

Lacey Schmitz - Hubbard Feeds - (701) 678-4484

SEMEN INTEREST

We will reserve the right for In-Herd Semen Use on all the bulls, unless otherwise stated.

BULK BUY BENEFITS

Our Bulk Buy program is applied to those who have met these certain requirements:

- The price of each bull purchased by an individual must meet or exceed \$4,000 per bull. Any bull sold for less than \$4,000 will not qualify for discounts.
- All purchases must be purchased by the same individual or ranch, but partnership purchases across 2 or more ranches will not be allowed.
- L83 Ranch reserves the right to refuse any discounts to believed wrongful doings or bending of these rules.
- 3 Bulls - 3% Discount
- 4 Bulls - 4% Discount
- 5+ Bulls - 5% Discount

DELIVERY & FEEDING

Any bull taken home by his new owner on sale day will receive \$150 CASH!! Free bull delivery for customers with an accumulated purchase price of \$6,000 or more on sale day. All other bulls must be picked up at the ranch or trucking fees will apply. Bulls will be fed at L83 at no cost until May 1st. A \$5/day feeding charge will take into affect after this date. Bulls still at L83 after May 1, must be picked up at the ranch, due to the overwhelming spring workload that our farming business requires.

INSURANCE

As soon as an animal is purchased, it becomes the responsibility of the buyer. We do recommend buying insurance for any bull not taken home by the buyer sale day as we will not be responsible for sickness or injury after sale day.

GUIDE TO GENETIC DATA

ProS - Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB - HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM - GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the postweaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

BUYING 13 BULLS THE LAST TWO YEARS!

L83 Dagger 24L is the result of combining generations of cow power from either side of the pedigree, to create a herd bull with the credentials to stand at the forefront of the breed. Those who have seen him realize that phenotypically he rises to the top as one of the most powerfully built, structurally sound and eye appealing studs we have produced to date. His beautiful PIE Cinch 4126 sired dam was purchased from John Lee of Arizona and stems back to the prolific RMS Perfection donor female that bridges the gap of EPD and phenotypic excellence. He came to the weaning pen with over 800 lbs. of pay weight and has accelerated in his growth curve ever since. He is also recognized as the Champion Spring Bull Calf from the 2023 Canadian Western Agribition and the 2024 National Western Stock Show.

LOT 2

L83 Lansford 12L is the dark hided stud that has the extra density it takes to add pounds when running over the scale. Not only can you forecast the added performance from his real-world data, but genomically he tabulates to being the source of pay weight and growth with top 24% WW and top 27% YW figures. We love the added bone and rugged design of this long sided and big muscled stud, this is the kind that stockmen will quickly find if they are searching for power bulls. Maternally he stems back to the L83 Lacey 675D matron through a young CSF Red Zone 1C daughter that is set for big things in the future.

L83 JILLIAN

INTUITION DAUGHTER THAT WE SOLD THIS FALL TO COLBIE FURSTEANU, ND

LOT 3

The Red Wilbar Intuition 832J sons are certainly all we could have hoped for from a design and build standpoint. They are cattle that come round bodied, heavy muscled and still function in their structural kind. JK Lone Star will supply all the phenotype necessary to raise a group of calves that attract a premium when it's their time to go through the sale barn. The sound structure and fault free design of this maternally driven sire makes us excited to put his daughters into production down the road, particularly when they will carry the backing of the storied cow families like you find in support of Lot 3. He stems back to the prolific WEBR Ms Ellie 1024 female that needs no introduction to Red Angus enthusiasts.

WEBR MS ELLIE 1024
MATERNAL GRAND DAM

L83 Layton 36L is the blood red son of Intuition 832J that is long sided and built to inject extra growth potential, if you're searching for a super complete and balanced herd bull that will add pounds when it comes to weaning time then mark him for inspection. His Power Take Off sired dam is a full sister to the L83 Fannie 820F female that Zane showed to success. With 800 lbs. Coming to the weaning pen, he has always been one to catch attention, and we think he will find many friends on sale day.

**L83 FERNY 831F
DAM**

LOT 4

L83 Luverne 29L is a direct son of the legendary, L83 All Girl 20A donor female that has reached six digits in lifetime earnings, of that over \$100,000 is accounted for in daughters alone. With seven natural progeny to her name she still records an impressive, 722 lbs. average for weaning weight and a 101 DMPPA at 11 years of age. This dark hided, early March born son is maturing into an impressive, heavy muscled and rugged herd bull that is ready to go to work and his structural integrity suggests he will for a long time to come.

Huge growth figures accompany this leading son of Six Mile GSF Jolt 452J sire group. You will also notice the inclusion of the maternal legend Six Mile Game Face 164Y in the pedigree of 21L through a beautiful daughter, so you can trust that there are generations of power built right into him. Phenotypically he is deep bodied and masculine, with a big set of feet and legs that will help him to cover cows out in big country. At weaning time L83 Hotwire 21L was ahead of the pack, and ever since has continued to increase this gap. A top 13% Weaning, top 20% Yearling, and top third Average Daily Gain help support the case of this high performance bull.

The Six Mile GSF Jolt 452J sons are powerful! We look forward to hearing from happy customers when the progeny of his sons hit the scales and prove the hype we have around them. Not only do they have performance but they more than surpass the strict structural checklist each bull goes through before making the sale pen, they combine power cattle with productivity. L83 Voltage 18L is supported with growth traits ranking in the upper echelon of the breed that include top 8% WW, top 5% YW and top 5% ADG. He stems from a young female that we purchased from Wasem Red Angus that is already proving to be worth the chips.

LOT 8

L83 Amped 3L follows in the family tradition of herd bulls of excellence. His maternal brother L83 Krush 39K was an absolute beast in terms of power, performance, and overall substance, he sold last year to Mathern Ag. The cow family that stands behind 3L is also responsible for producing L83 Super Duty 244Z and L83 Clint Eastwood 76C, both herd sires that were purchased by Six Mile Ranch of Canada. Here we have a real performance stud that records top 9% WW, top 7% YW and top 7% ADG figures, to promote his position towards the cutting edge of growth bulls to sell.

LOT 9

The Six Mile GSF Jolt 452J x Six Mile Game Face 164Y mating has proven on several occasions to unlock the genetic power from either side of the equation. L83 Lumber Jack 5L is a sappy middled, loose hided and fluid moving bull that we think could generate a heck of a set of replacement females alongside a powerful and heavy weighing set of premium quality feeder cattle. There is no questioning the potential for profit that 5L will generate once you inspect his EPD profile that is highlighted by a WW figure that ranks in the top 10% of the registry. His tenured dam, L83 Bindy 122B has created an impressive success story during her decade within the cowherd.

With some of the leading predictions for injecting weaning weight and yearling weight of the entire offering, it makes logical sense to add L83 Linton 28L to your shortlist for sale day inspection. In a time and market where any added growth is met with significant financial reward, now is the time to make investment in your cowherd's future. Feel the results of performance genetics through added pounds at the weaning pen, and in turn more dollars in your pocket.

“What’s a Good Bull Worth?”

A good bull is worth the value of five calves he sires.

“Cowboy Math”

Market Option A: 521lb weaned steer calves are worth about \$2.96/lb for a value of approximately \$1,542 per head. **Therefore, \$1,542 x 5 = \$7,710.**

Market Option B: 910 lb Yearling steers are worth about \$2.09/lb for a value of \$1,902 per head. **Therefore \$1,902 x 5 = \$9,510**

Mark Z Johnson, “What’s a Good Bull Worth in 2024” Drovers, 23 Jan. 2024

You will find that this Six Mile GSF Jolt 452J son has the most appealing birth weight of his sire group, and the same trend continues with his CED and BW figures. Yet no sacrifices will need to be made when it comes to the significant additions of pay weight and performance that he will inject into his progeny. He ranks top 11% WW, top 14% YW and will be the source of valuable pounds.

LOT 11

L83 Langdon 20L is the late maturing, pound heavy stud that with every stage of development continues to impress. Come time to run over the scale at a year he impressed with a 1300 lbs. plus yearling weight to ratio a 109 among his contemporary group. He is extra burly and heavy muscled, and we appreciate his extra masculinity. His maternal brother in the 2023 bull sale, L83 Kolt 38K sold to Jared Werning Cattle of South Dakota, and this year's model follows in a similar tradition of phenotypic excellence.

The appropriately named, L83 Lion 26L is certainly the kind that stands at the front of the pack. He is incredibly stout featured, big and wide in his structural build and has been heavy on the pounds at every measurement we have taken of him. His EPD tabulations reads with the same expectations for his progeny, and we expect them to be rapid in their growth curve. Take note of his top 9% WW, top 12% YW & top 19% ADG all while still ranking top third of the breed for STAY.

LOT 15

Power in the blood sells here with the combination of Six Mile GSF Jolt 452J and a full sister to L83 2Strong 13F. This big time performance bull has both the genomic predictions and raw data that indicate that his progeny are going to lead the pack from early on and only continue to space themselves apart from the rest of the calf crop. L83 Lisbon 8L was on the front end of his contemporary group at yearling time, ratioing an impressive 108, likewise his

EPD's read impressive, with a top 4% WW ranking, top 3% YW, top 5% ADG and top 18% CW.

We are excited about what these Jolt 452J sons can do for our customers from a growth and performance stand point, they are going to be a great compliment to the sire groups we have used to date to inject a heavy dose of pay weight. L83 Lewis 38L is extra smooth, long bodied and complete from end to end and we think he has the extra density it takes to add pounds when running over the scale. We love to look at this powerful stud as he struts around the pen, maternally he is supported by a 102 DMPPA RED T-K Raptor 26E daughter from the Autumn cow family.

LOT 16

L83 Spark 17L is an obvious option if you're looking to find a herd sire prospect that will inject serious amounts of scale pressure to a calf crop in a single generation. This Six Mile GSF Jolt 452J son has impressed when it came time to run across the scale, and there appears to be no slowing down or lack of gas in the tank because he continues to impress with maturity. His dam has been a steadfast supplier of high growth cattle, and records a 770 lb. average weaning weight on the 6 progeny she has brought to the weaning pen. Power and performance are exactly what you will get here.

Another paternal grandson of Smoky Y Ozark 9131G means that you can trust you are buying a sire that will generate progeny that are versatile in their quality and offer value not just from a pay weight stand point but cattle that come with added whole herd profitability and maternal power. L83 Lignite 15L is the son of a first calving STRA Relentless daughter that reads with elite profitability indexes.

LOT 31

L83 JERRY 36J
SIRE

L83 Litchville 19L is another direct son of the L83 All Girl 20A donor cow that has built a very impressive record of influential progeny and lifetime earnings. Even towards the end of the catalog you will find cattle that carry the backing of our richest cow families and most reliable pedigrees. This Josey Wales 8731 son is a maternal brother to Lot 5 and continues to live up the expectations of his pedigree with every step towards maturity. He weaned off at over 750 lbs. at weaning and accelerated towards an impressive 1320 lbs. of yearling weight.

A royal pedigree supports the bottom side of JK Township 101L's family tree. You will find 3 generations of industry renowned donor females in PZC Fire Queen 813 ET, Rojas African Queen 303 and Six Mile Lakoto 16W to build his maternal lineage. When it comes to consistency and reliability of a genetic base then it would be hard to trump what comes all inclusive with this Red U2 Township 17G son. Then add the power of U2 Beauty 113Z into the equation and we have truly aligned the stars here. The replacement females generated from the service of JK Township 101L will be the kind to build the cowherd around.

THE HEREFORDS

HECTOR SONS

LOT 34

**L83 KODA 248K
FULL SISTER**

The hereford offering is built upon two ultra-stout, impressively masculine sons of our resident herd bull DF Hector 19H. L Hector 27L is a full brother to the L Koda 248K female from the 2022 Female Sale, and if you remember her, then you will realize the quality is reliable as these two are cut front he same mold being massively dense, built wide at their base and still motor with added flexibility and candor. This athletic and proud headed beast is set to sire an awesome set of baldy faced, premium bound feeder cattle or replacement females.

LOT 35

**DF HECTOR 19H
SIRE**

The second DF Hector 19H son is the extra heavy weaning, L Hector 25L. Some would call him the most robust ribbed, deepest sided of the brothers, and he came with the advantage of 30 more pounds to the weaning pen. His dam is a daughter of the Haroldson's Upgrade T100 33D sire that has been heavy use in the nation's most progressive Hereford operations. Here we have a real world bull with the genetic versatility to add value to progeny that will work for a variety of operations with differing marketing programs or management strategies.

DONATION LOT FOR SUTTON

We are going to offer 5 packages of 3 straws of L83 Red Viper 50k. The proceeds will be going to Sutton Hennessy as he fights with Ulcerative Colitis and underwent a complete Colostomy this past month at Mayo. He is a tough cowboy that is near to our hearts and we can't wait to see him succeed and conquer this challenge. We hope to see him back flipping steers in no time!

RED ANGUS MARKETING PROGRAMS

How to Enroll in FCCP and AA

1. The producer contacts the Red Angus Association of America at **(940) 226-4762** and answers a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.

Did you know that reducing stress at branding time can benefit producers by:

- ✓ Increasing the efficacy of immune response to vaccinations, making them more effective and resulting in less treatment costs after branding.
- ✓ Improving feed utilization, encouraging cows to breed on the first or second heat cycle, adding valuable weight to calves born the following year.
- ✓ Improving conception rates giving you more calves to sell the following year.

Did you know there is an easy and effective way to have healthy calves go to market at the top weight?

- ✓ Calves can be up to 40 pounds lighter than their mates at 90 days of age due to lost production caused by calfhood scours.
- ✓ Calves that get sick from calfhood scours are more susceptible to respiratory diseases at branding time.
- ✓ The problem-causing bacteria in a calf's rumen thrives on acid. **CattlActive** while reducing acid and correcting the pH level decreases the level of bad bacteria. In return allows the good microbes to flourish in the system, as they thrive in a neutral environment.

To place an order or consult with your territory manager, call Jason Jensen at 701-500-2026 or 800-254-0179.

VITAFERM

THE TRADITION

Some folks just don't get it. They think owning cattle makes no sense. It takes too much time, too much equipment, not to mention the expense. But the fondest memories of my life -they might think sound funny- were made possible by Mom and Dad, 'cause they spent the time and spend the money. You see, the most important lessons helping values grow so strong, come from loving cattle and passing the tradition on.

-Don Bishop-
