BAYOU CREEK RANCH
— RED ANGUS —

We would like to welcome you to our bull sale at Bayou Creek Ranch. Our goal at Bayou Creek Ranch is to produce the best Red Angus bulls possible to offer to our friends and neighbors. The desire of every successful cattleman and rancher is to develop the best overall cattle – created through a commitment to hard work, dedication and superior genetics. It is our belief that we at Bayou Creek Ranch have done just that. We would like to share our success with you. At Bayou Creek Ranch, we take great pride in producing what we believe are the best Red Angus cattle offered anywhere in the market today. We are confident that you will find exactly what you are looking for in purchasing Red Angus cattle from Bayou Creek Ranch. We appreciate each and every one of you and look forward to meeting your needs for quality Red Angus cattle.

Please join us on Thursday, October 3, 2024 at the ranch in Lone Grove, Oklahoma for our 6th Annual Production Sale. We look forward to seeing you on sale day!

Sincerely,

Ken and Becky Swan

There is no doubt that the beef cattle industry and business has been the place to be for over the past year. The marketplace has certainly surged and maintained a pace and price point to rewrite the history of the American cattle market. Even with the election in the midst, the outlook is very captivating and intriguing from all angles. The need for the absolute best protein source, safe for human consumption is certainly in demand not only domestically, but abroad as well. Innovation in technology and genetics continue to keep the United States' beef producers on the forefront of success and with the dominant infrastructure in place, we feel very strongly about the future of the business.

Bayou Creek Ranch continues to forge their place within the business by producing Red Angus cattle with rancher approved performance, substance, and shape. This set of bulls will be the very best offered by Ken and Becky Swan to date. With the experienced guidance and management of Kent Shankles, this set of bulls have been grown and developed to thrive like no set marketed by the program before. Mr. Shankles comes from a very well-educated background in regard to ranch management with an intense knowledge of pasture and forage care and production that is readily noticed in this set of cattle.

Past and potential customers will notice improved performance measurements with improved quality in phenotype. As in the past the bulls have been stringently sorted on disposition, hoof quality, skeletal integrity, and above all, fertility. The cow herd that backs these herd sire prospects was also sorted and selected with the leadership of Kent Shankles, so one should be certain that they are bred to take your program to the next level and maintain the forward progress that every good cattleman or cattle woman desires.

In any business, annual growth and improvement is desired and as a marketing firm, we believe that your beef business is no different. We are more than confident in the gene pool that built this set of bulls and know that the management and development of the cattle to be nothing short of right. The Bayou Creek program has dispersed hundreds of bulls into the commercial sector and has maintained a long term, repeat customer base with some of the industry's finest commercial programs. The bulls with the Bayou Creek brand have graced pastures from the gulf coast region to the western range of Colorado, the Sand Hill region of Nebraska, and all points in between with much customer approval and success. If you're serious about keeping your program in the upper echelon with quality red hided stock, rest assured that you are studying the right sale book. We hope to see each of you at the annual Bayou Creek Bull Sale at the ranch in Lone Grove, Ok.

Thank you for you interest, and please enjoy the stock.

SALE ORDER

Cattle will not sell in catalog order. A sale order will be available the week of the sale.

DNA

All Bayou Creek Ranch herd sires have had DNA submitted to the Red Angus Association of America.

EPD's

The EPD's in this sale catalog were pulled from the Red Angus Association of America on August 20, 2024. For updated EPD's please visit RedAngus.org

SALE LOCATION & DIRECTIONS

91 Fox Creek Rd - Lone Grove, OK 73443

- From US Hwy 70 turn south onto Cheek Road just west of Lone Grove, OK
- Travel 5 miles south on Cheek Road, turn right onto Rio Grande Road
- Travel 1.1 miles west on Rio Grande Road, turn left onto Fox Creek Road
- Travel 0.5 miles to Bayou Creek Ranch entrance on the right side of the road
- Once entering the ranch's overhead entrance follow the sale signs to the auction facility (approx. 2 miles from the entrance).

TERMS & CONDITIONS

Cattle will sell under the standard Terms & Conditions as recommended by the Red Angus Association of America. All sales are final, and the cattle will become the property of the buyer when the auctioneer says "SOLD".

HERD HEALTH

All animals in the sale are on a complete herd health program. The bulls have received Vista 5 (VL5), Vision 7, Dectomax in the spring of 2024, Safeguard in the fall of 2024, and Multimin. All cattle will be accompanied by proper health certificates for immediate interstate shipment.

BREEDING SOUNDNESS EXAM

All bulls will be fertility tested and trichomoniasis tested prior to the sale and guaranteed to be breeders.

SEMEN INTEREST

Bayou Creek Ranch will retain 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block. The buyer will receive 100% of the salvage value of their purchase.

LIVESTOCK TRANSPORTATION

Load out will be available at the sale facility following the sale. We will assist customers with trucking arrangements as needed. Our facility has a loading chute to accommodate semi-trucks. We will be offering FREE trucking to buyers who purchase 5 or more bulls. We will do our best to assist you in transporting your bulls following the sale. Below are a list of recommended professional trucking options:

Randy Lathrop: (847) 910-4673

Dick Coleman: (765) 461-0954

Brandon Bertsche: (815) 867-0547

SUPPLEMENTAL INFORMATION

A supplement sheet will be provided the week of the sale with updated breeding information, corrections, and addition information. All announcements made from the auction block will take precedence over printed materials associated with this sale.

LIABILITY

By participating in any event planned and controlled by Bayou Creek Ranch, you agree to the following:

- Bayou Creek Ranch events are provided with no special warranty either express or implied. The Organizers, including but not limited to Bayou Creek Ranch, its employees, Ken and Becky Swan, and Innovation AgMarketing, LLC assume no liability for any loss, theft, damage, or injury to property or persons, including death, whether arising in contract, negligence, equity, or otherwise.
- You assume all risks when participating in Bayou Creek Ranch events. All participants must obey all rules and regulations of Bayou Creek Ranch and the laws of the State of Oklahoma. Participants must comply with all requests made by employees and agents of Bayou Creek Ranch. Bayou Creek Ranch reserves the right to eject any participant who does not comply with this section, and further, refuse entry to any participant. Refunds for any reason are at the discretion of Bayou Creek Ranch.
- All participants agree to indemnify and hold harmless Bayou Creek Ranch and The Organizers listed without limitation for any and all legal action arising from or related to a Bayou Creek Ranch event.
- All participants expressly give Bayou Creek Ranch authorization to use and post any photographs, videotapes, recordings, or any other record of our events, including full names of any participants, before, during, or after the event for promotional use reporting to the media, and to publish on our website or blog. Participants are not entitled to compensation for Bayou Creek Ranch's use of their name or image.
- We are not responsible for any typographical errors.

A Guide to EPD's

- HB** HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CEM** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
- CEM** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the postweaning period. (Pounds/Low Value)
- MILK** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

Genetics Backed by GGP

The GeneSeek Genomic Profiler (GGP) products and services empower decisions in selecting, raising and selling elite cattle, enhancing profit and protecting your reputation for high-quality seedstock. Beef genomics is evolving fast. GGP provides advanced, wide range DNA testing for the real world of cattle production.

Using genomic-enhanced EPDs for selection of young breeding stock provides a level of precision and reliability that's never been available to producers before.

Bob Weaber
Kansas State University

Efficient selection of seedstock replacement heifers

Never before has such power been so practical. As breed associations add the GGP uLD to their DNA services, you can genomically screen and select replacements for your herd while adding value to heifers you sell.

- **Profile replacement heifers** – Use genomics to select the best and sell the rest
- **Raise elite cows** – Superior nucleus cows are the source of superior bulls
- **Market quality heifers** – Sell heifers with GE-EPDs helpful to commercial cattle producers
- **Verify parentage** – Confirm parentage of heifers for registration and marketing

The best 50K ever – Effective, affordable power to select, manage and market sale bulls

An ideal tool to test a crop of bull calves, the new GGP 50K is the most advanced 50K ever. Highly accurate. Highly affordable. Very versatile with built-in parentage and genetic-health screening. Nearly all major breed associations offer the GGP 50K as their workhorse profiler for routine use.

- **Genomic-assisted selection** – Identify the best bull calves for sire development or AI studs
- **Profiling bull calves for sale** – Affordable accuracy with GE-EPDs adds value in the sale ring
- **Reputation builder** – Verify quality for local customers and distant buyers
- **Fits modern methods** – Uses markers enhancing new “single-step” GE-EPD calculations

Setting a gold standard for the best of the breeds

The most powerful commercial seedstock profiler, the GGP HD150K is ideal for AI studs, donor dams and elite bloodlines. With its strategically chosen content, running the GGP HD150K on elite bloodlines improves imputation accuracy of pedigree genotypes.

- **Smart Design** – Contains 150,000 markers, filling in genetic details other tests miss
- **Modern** – Works synergistically with other GGP products in the “single-step” system
- **Imputation standard** – GGP HD150K data on parent and grandparent animals can sharpen GE-EPDs on their progeny
- **Unique content** – Impactful new markers for cattle performance, reproduction and quality

GENESEEK

VIEWING THE AUCTION

The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there. You do not need an account just to watch the auction or view videos of the sale offering.

ONLINE BIDDING

Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account. The first time you register an account you will receive a confirmation e-mail that you must click on. Once you have completed this, select the auction you would like to bid on and click the "Request a Buyer Number" button. The first time you request a buyer number you will be sent a confirmation code via text. Enter that code in the login portal and you will receive a buyer number. This 2-step verification process will only have to be done once and in the future you will be able to simply login and request a buyer number and receive it instantly for any auction. Once you have successfully registered and received a buyer number it will show your name and buyer number on both the video preview page and the online bidding page when you are logged in. If you have an account at LiveAuctions.tv you may skip the registration process and use those login credentials to request a buyer number as [LiveAuctions](http://LiveAuctions.tv) is a division of Superior Livestock. For more details on registering an account and also how to bid, you may watch a tutorial at Bid.SuperiorLivestock.com/how-it-works

TURN IN BIDS OVER THE PHONE

This is Superior's traditional method of buying cattle and is the suggested process for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number. Once you receive a buyer number you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS PLEASE CALL SUPERIOR AT (800) 422-2117.

BID.SUPERIORLIVESTOCK.COM

Bull Development

The bulls were developed at the ranch in Lone Grove, Oklahoma on rye winter pastures and supplemented with a bull ration that was formulated by Martindale Feed Mill. They have been maintained on a soy based pellet at a rate not to exceed 1.5% of their body weight to prevent structure and foot issues. By maintaining a slower and more precise development, these bulls are true athletes that are ready for heavy service. These bulls have never set foot in a feedlot. We confidently say that these bulls will endure more seasons in the breeding pasture.

The bulls have been handled both on foot and horseback. Bulls have been strictly culled based on performance, structural integrity, fleshing ease, fertility, and disposition. The bulls have had DNA submitted and will sell with genetically enhanced EPDs to facilitate you in making a more educated decision during the buying process. The bulls that carry the Bayou Creek Ranch brand will add terminal value to your calf crop and in turn contribute to your bottom line!

Bull Guarantee

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard terms and conditions of the Red Angus Association of America, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

Please contact Kent Shankles: (580) 276-7715 for further questions about how Bayou Creek Ranch can add value to your operation.

- One of the top calving ease prospects in this year's sale offering! 3323 recorded an actual birth weight of 56 lbs. with CE and BW EPDs that further confirm his credentials.
- 3323 is a moderate framed, smooth made, clean jointed herd sire prospect that is suitable for use on heifers.
- This dark cherry red herd bull is one that traces to PIE Salvod 0347, a female that has put countless herd bulls to work across the country!
- Top 5% CEM, 7% HB, 9% CED, 10% STAY, 17% ProS, and 27% HPG.

- 3335 leads off an impressive set of bulls sired by the \$132,500 PIE Fullback 7005, a sire of significant influence within our program here at Bayou Creek Ranch. The daughters, granddaughters, and great-granddaughters of PIE Fullback 7005 are noted as some of the most efficient and productive females that we have ever had on the ranch.
- For the past several years we have featured sons of PIE Fullback 7005, and they have been extremely well received by some of the top cattlemen in the country. We have continued to utilize the service of PIE Fullback 7005 due to the consistent quality that he sires.
- He recorded a 62 lb. birth weight and spreads to a weaning weight of 680 lbs. to solidify his curve bending genetics!
- An excellent herd sire prospect that checks all of the boxes!
- Top 4% STAY, 9% HB, 16% MILK, and 26% BW.

- 3432 is another unique son of 4MC Strong Side 0403 that will be on many short lists come sale day! He is moderate framed, huge ribbed, deep flanked, and offers an easy keeping and practical look.
- A big scrotal bull that has the look of a "cow maker". We anticipate him to sire low input, efficient females that will be in the herd for a long time.
- His dam is a daughter of the highly maternal Red U2 Rendition 340D, a bull that put many high quality females back into production.

- 3316 is sired by the other bull that we selected from the Duff Cattle Company breeding program. Duff Carload 275D 20205 is sired by Red Six Mile Car Load 275D, a full brother to the \$60,000 Red Blair's Bingo 581B.
- A big ribbed, soggy made bull that is loaded with quality!
- The dam of 3316 is a tremendous daughter of PIE The Cowboy Kind 343. She has produced two sons that are both working for long-time customer and friend, Joe Stiles.
- Top 10% STAY, 20% DMI, 25% YG, and 30% BW.

PIE FAYETTE 7141
 Dam of Lot 57

PARAMOUNT

Elevate to a more valuable female.

For over a decade, Red Angus females have commanded more at auction than all other breeds, including Angus. According to Superior Livestock data, Red Angus heifers brought nearly \$17/cwt more – **that equates to a \$92/head premium on a weaned replacement female.**
