*Cattle will be available for load out sale day after complete payment has been made. Aces Wild Ranch will help with arranging trucking of females immediately after the sale, please reach out to Jed for more information.*

*Cattle that have been purchased and have no plan made for movement will incur a yardage fee from the 1st of November.*

*Trucking: Kip Childers, 256.303.3382*

## ANNOUNCEMENTS

*Announcements made sale day and from the auction block during the sale take precedence over printed materials associated with this sale. Anyone attending this sale attends at their own risk. Aces Wild Ranch and sale team will not be held responsible for any personal injury for attending this sale.*

## TERMS & CONDITIONS

*The terms of the sale are cash or good check payable immediately upon the conclusion of the sale before animals will be removed. Cattle sell under the standard terms of their respective breed association. All sales are final, and the cattle will become the property of the buyer when the auctioneer says "SOLD". All females are sold as sound breeders. Seller guarantees each female to produce a live calf or transferrable embryos.*

## EPDs

*The EPDs listed are Fall 2024 numbers. Please note that EPDs may change from the time the sale catalog is printed until registration papers are transferred.*

## INSURANCE

*We recommend serious consideration is taken about insuring your livestock purchases. Insurance will be available sale day via James F. Bessler, LLC.*

*James F. Bessler, 815.762.2641 • 4812 McBreyer Pl • Fort Worth, TX 76244*

# WELCOME TO AWR

*I am extremely excited to invite you to this second edition of the "Southern Belles" Sale. We are grateful to have been involved in some very special moments through this business, but being able to raise the set of prospects that highlight this sale would have to be one of our proudest achievements to date. These genetics have been built over my entire career in the purebred cattle industry. It has been my passion to accumulate and raise the best genetics that Charolais breed has to offer. The cattle in this offering are from the top of our program, and will go on to add significant value to your programs. We think industry leading matrons will exchange hands on October 13th, and we are proud to stand alongside those progressive firms that decide to invest.*

*We are also offering the opportunity to join forces on a select group of donor females that stand at the leading edge of our embryo program. The Lot 1, AWR Alley Cat 933 female is one that sets the gold standard in our opinion, and is just a mating away from becoming the household name that she is bound to be. She along with 4 other donor females are sure to make a major impact on our industry. We also introduce the first set of SVY Mayfield 30H progeny to the auction setting, and if you have heard from me in the past 6 months, you already know how excited we are about his influence. If nothing else were to be of interest to you, we truly think the set of Mayfield daughters is worth the trip to Milsap alone. We would love to chat more about them with you, so if you are in the area we will be sure to accommodate you with anything to help!*

*While the Charolais have always been the heart and soul of the AWR brand, we have been carefully building an Angus division to compliment the white hided program. Through the guidance of cattlemen we have the upmost respect for, we have put together a set of purebred Angus females that combine cowman phenotype, with number crunchers genomics. You will find a sampling right from the top of our Angus program in the center section of this sale book. Some of the most decorated and productive cow families in the Angus breed are represented.*

*Our industry is currently setting records in global demand. As you know, our supply is at a record low, with nothing but upside ahead for the future. The industry starts with the seedstock sector, and with feed availability, and climate challenges, proving to be the key economic drivers. I am very confident in the cattle in this offering, and I am excited to watch them work in your programs. I would like to stay involved with each of you long after the sale and continue to work together to improve this great breed!*

*Please come and enjoy some Southern hospitality at the "Southern Belles" Event. Call upon me, or the rest of the AWR crew at any time if we can help assist with travel arrangements or answer any questions.*

*Jed Watje*

## A NOTE FROM THE *sale management*

Welcome to the 2024 edition of the “Southern Belles” production sale at Aces Wild Ranch! While we were proud to stand behind the Charolais females offered in the inaugural sale last year, it is with great pleasure that we invite you to the 2024 sale with even more enthusiasm, as we believe the sale offering has stepped into a new echelon. We believe this is set to be one of the premier offerings of Charolais females to be marketed in the Fall 2024 Sale Season.

Jed, Tracy, Belle, and the entire staff at Aces Wild Ranch have a strong commitment to offering the very best, and that is certainly what this offering represents. It doesn't take long after meeting Jed and the crew at Aces Wild Ranch to realize that there are few people in the beef business that share the same level of excitement and enthusiasm about the seedstock business and its future. In a world of negativity, it's refreshing to work with such an upbeat crew that enjoy the labor just as much as the fruits. To those that have not been to the ranch or met the talented people behind the AWR operation then wait no longer, they will go out of their way to take you through the cowherd, explain their breeding philosophies and talk about how you could benefit from an injection of their genetics into your program.

The donor battery that stands in Millsap, Texas encompasses several of the most dominate and proven cow families in the breed. There is no doubt that Jed has been aggressive in his search to secure a group of cornerstone breeding pieces that lead the business. The influences of his leading ladies, JLL Misty 123Z, M6 Ms Patsy Bell 527 P, AWR Darling 18E, M&M Ms 8122 0011 PLD, & TR Ms Turton 3680A all sell between the covers of this book. True investment opportunity lies within this group of females, with exceptional ROI possibilities for those that make the investment.

October 13th also presents itself as the only planned opportunity to purchase SVY Mayfield 30H semen at this time, it will sell as 10, individual unit packages. It will not take long to realize the incredible influence on the breed that this once in a lifetime sire is about to create through the set of open heifers that highlight the sale. We truly believe that the future of the breed is in safe hands with the addition of a breeding piece like SVY Mayfield 30H being added to the service roster.

New in 2024 you will find two new divisions, purebred Angus cows and bred heifers, all that have roots back to the most prominent and productive cow families that the business breed has to offer. Just a short few years ago, Jed was granted access into the heart of the Express Ranches cowherd, and a large majority of the Angus females that sell in this sale are directly from that transaction, or as a result of the mating's on these cows. Study the pedigrees carefully and you will quickly notice the genetic strength that comes built into these black hided females.

Consider this your personal invitation to join us for unrivaled southern hospitality and a great set of Charolais, Angus, Red Angus and show heifer prospects at this second edition of the “Southern Belles” Production Sale at Aces Wild Ranch! If you are unable to attend the sale in person, a live broadcast will be provided by CCI.live. Please feel free to reach out to us with any questions about the offering, we look forward to seeing you all on Sunday, October 13, 2024 in Millsap, Texas!

*Epaham Blagg    Erin Anderson    Jered Shipman*

 ESTIMATED DUE EARLY JANUARY.  
 SELLING ½ EMBRYO INTEREST

- The most dynamic offering of females to ever sell from the Aces Wild Ranch begins with a prime aged, high production donor female that has always been one of the most eye appealing females on the ranch, but has recently proven herself as a leading lady in production. She has promoted herself as the next generation of powerful matrons from the JIL Misty 123Z lineage, a cow family that has paved the way for the AWR.
- Being a direct daughter of the BOY BK Gunslinger E80 sire, means she carries the maternal power of two legendary females of AWR in her direct pedigree. With the synergy of both JIL Misty 123Z and TR Ms Turton 3680A in her direct pedigree there is no limit to the generating possibilities that come with AWR Alley Cat 933.
- She is a maternal sister to the 49th National Reserve Grand Champion Bull, ONL AWR Cool Cub 7C, a sire that has proved more than worthy than his accolades in the showing with his ability to sire immense quality in multiple cowherds nationwide. The influence of AWR Cool Cub 7C continues through a sensational set of sons and daughters that are delivering the goods at the front end of the business.
- Belle showed AWR Alley Cat 933 to a division champion banner at the 2023 AIJCA National Junior Show. We think that the upside potential on this female is immeasurable. Take note that she offers an outcross genetically to the Outsider line of stock, opening the door wide to a championship line of sire choices.

ONL AWR COOL CUB 7C  
Maternal Brother to Lots 1 & 2

SVY MAYFIELD 30H  
Sire of Lot 2

• Introducing what many have been waiting for, the initial offering of SVY Mayfield 30H daughters to sell, and we think they live up to even the wildest hype.

• There are few if any females to be branded with the AWR that we been as excited about than AWR Alley May 4111 ET. Combining the most proven maternal lines, with one of the most anticipated sires of the time has generated us results that have us very excited about the future.

• AWR Alley May 4111 ET is the perfect combination of power and poise, and from a phenotype standpoint, she is and always has represented the goals of our program. Built stout and dense from the ground, and all the way up, we just love how she is able to carry all this power in such a smooth and eye appealing manner. The turn to her ribcage and depth at the center of her underline is impressive, and yet she still floats while in motion. In our mind, this is the future direction of the breed.

• This maternal sister to the 49th National Reserve Grand Champion Bull, ONL AWR Cool Cub 7C, and the rising star of the donor pen, AWR Alley Cat 933 has us on the edge of our seats, not just in excitement for her show career, but for what she offers to the breed going into the next decade, serious investment opportunity awaits here.

**LOT 3**

- This donor female stems from the successful synergy of the Reserve National Champion, ONL AWR Cool Cub 7C with the most versatile female in our battery, M6 Ms Patsy Bell 527 P.
- When touring the cowherd, AWR Patsy Cline 902 would be an absolute standout of the mature cows, being built with the muscle and density that Cool Cub generates, and with the structural build, udder quality and longevity that the 527 daughters are known for. This is a lineage of cattle that will hold up, and have proven to be the kind that will age like a fine wine.
- Not only does she excel on the hoof, but a glance into the genomics will reveal a set of predictions that are very favorable for growth and performance, meaning you can rely on her progeny to come to the weaning pen ahead of the cohort. We place serious value on the fact that she is a female that many would deem geared for high production but yet she is still blessed with a great phenotype!

76	-0.05	77.45	119.4	2795	4.65	0.935	0.1495	256.44

- A set of full sisters that leave us very optimistic as to the generating power of the SVY Mayfield 30H influence, what is bound for the programs that added him to their breeding roster, and further, the future of the breed. These four flush sisters are so striking in their look and presence that it is hard not to turn your attention their way. We look forward to visiting with you about your favorite, as there is certainly plenty of discussions to be had over this set of sisters. One thing you won't have to make decisions about is the PA status of the sisters, as they all are free by pedigree.
- Maternally there is power built in, as the M6 Ms Patsy Bell 527 P donor has been a staple in the donor pen, with a blemish free record in production. She was purchased as a \$18,500 first calving heifer in the M6 Dispersal and has proven to be a very wise investment. Knocking it out of the park with her first set of ET daughters to average \$6,750. She too is the dam of the AWR Gypsy Soul 910 female that sold in the Player's Club Las Vegas Sale for \$24,000. Something else to take note of is that M6 Ms Patsy Bell 527 P ranks top 1% WW, top 4% YW, top 2% MTL, top 2% SC, top 8% Udder, top 8% Teat and top 9% TSI with high accuracies.
- You will notice the Pasty cow family has been on the maternal side of many AWR success stories, and several maternal sisters to this flush stand at the heart of the cowherd in Millsap.
- Turn to the paper to find that these sisters are much more than a pretty face. In a breed looking for new options from a genetic

standpoint, they offer many a fresh canvas and add the advantages from an EPD standpoint that these offer and we think there is unheard of amount of potential ahead for these females.

- We dug all the way to the heart of the cowherd when putting this sale offering together. AWR BCC Snow Belle 418B is exactly that, a tenured producer that every year has brought something of added value to the weaning pen. An example of this would be her 2022 born daughter of TR CAG Carbine's Vision 9700 ET that was a part of the show string that Belle showed in Oklahoma City.
- The dam of Lot 8, DA MS Marion 728 P ET knows few strangers in this business, making an impact on both the Charolais and Club Calf business, in fact her Monopoly sired steers averaged over \$10,000 over the years. She is a direct daughter of the 2014-2015 Show Dam of the Year, OW Miss Marion 0025 ET.
- While she may sport an old school pedigree, this is the kind of female that got us in the business. Extra rugged and big scaled, this is a long-sided female that has a build of longevity set to outlast any breeding tenure.

- AWR Gucci 914 has always been an impressive creature, as a calf she had the same eye-catching front end and look you will find now, massive bone, flawless structure and a beautiful shaggy hair coat. This AWR ZKCC All In 587C daughter has all the big pieces to raise front end show cattle, and her pedigree allows for a combination with the greats like Outsider and Mayfield, Cool Cub and Crushing Hearts.
- With every stage of maturity she only gains stars next to her name.
- Her dam, WATJE Ms Diablo 602D PLD is a prime example why CML Diablo 2X will go down as one of the best maternal sires in the history of the Charolais breed, these females consistently record impressive progeny stats, they are the kind that is low input, yet high output and are perfect natured.

- There have only been just a handful of flushes in the history of AWR that have truly paved the future direction of the program, and with that in mind these five females would certainly be a part of one of them. Even as heifer calves, this has been a fun group to be around, but now as bred females the visions we had on flush day are turning into reality. We could sit all day long debating and sorting through them and still not be set on our favorite or decide with one is best.
- The donor dam behind this collection of sisters is one of our proudest breeding accomplishments to date, and a full sister to the NWSS and FWSS Grand Champion, TR MS Allie 3606A. A full sister in blood to these females was the Johnson families, J&J Ms Dari 748 that was sashed 4th Overall Champion Female at the 2018 AIJCA Junior National in Des Moines, Iowa.
- Their dam, AWR Darling 18E is the kind you dedicate your life to try to create, a female that defines maternal, productivity, longevity and consistency. These bred heifers are further backed by the iconic, \$42,500 TR Ms Dari 0642X, adding just another degree of reliability, and generating potential to the production career ahead.
- There is no questioning the influence that M&M Outsider 4003 PLD has had on the Charolais business. For approaching a decade, he has been responsible for a long list of national champions, high sellers, breed influencers and cowherd builders. This litter of daughters stand up and verify the claim that we believe he is a once in a life time kind of breeding bull.
- As you sort through the draft of full sisters you will begin to find some variations in size, muscle pattern, look from the side, and calving date, however as a whole you will find these cattle to be soft bodied, perfect structured and right for the times. We struggle to put a hole in them and feel like they are the kind you can rank and still be happy with your 5th choice. We look forward to visiting with you about these females, and standing alongside you for the bright future they are bound for.

- AWR Libby 330L ET embodies what cow power looks like in our mind, this extra bold and maternally built female has generator wrote all over her! She is so massive and pulled apart in her ribcage and skeleton, loose in her spine and flexible off either end of her skeleton.
- Her dam, M&M Ms 8122 0011 PLD has been a long-term power matron for the AWR, she combines impressive maternal traits, both on paper and production, with a very feminine and cowy build. She stems from a long line of donor dams in the historic M&M program, both her dam and granddam have raised progeny that have yielded results, and she shares a sire with the iconic M&M Carbine 1567.
- She comes carrying an exciting, early due pregnancy by the BHSC Brightside Tina 86L stud.

- The SVY Mayfield 30H flush on the tried-and-true M&M Ms 8122 0011 PLD donor female has unlocked all the good from either side of the equation. This pair of January born flush sisters are built extra symmetrical and balanced, with a look of longevity and productivity.
- The talk of the Charolais business has been around this first crop of SVY Mayfield 30H daughters to hit the soil in the United States, well they are here and awaiting appraisal. The investment in his initial semen offering may prove to be one of our wisest yet, as we think the cattle he has generated in this first sampling are better than we could have even imagined.

SELLS OPEN.

- AWR Ms Mayfield Turton 4100 stems from the influences of the TR Ms Turton 3680A donor, making her a maternal sister to the litter of M&M Outsider 4003 PLD daughters that averaged over \$30,000 in the fall of 2017. Included in this group of full sisters was BK BOY Eye Catching 740E who was purchased by Kelton Arthur for \$83,000. She collected a swarm of championships that included winning the Open Show at the 2018 North American, and being sashed the Reserve National Champion Female.
- We truly think that this beautiful profiling female offers huge potential as a show heifer prospect over the next show season, she is built with an ultra-attractive and flexible hind leg, level hip and pin set, sweeping body cavity, and because there is no denying the captivating presence about her front third.

- This daughter of the \$135,000 valued, HRX Copenhagen stands on the front side of the genomics curve. This young female hails from the Thomas Ranch cowherd of South Dakota, and stands out from a combination of phenotype and genotype.
- The Simmental mating on these Angus cows is bound to generate some awesome replacement females.

- We are big fans of the daughters sired by our herd sire Bushs Custom Built 860. He was our high selling selection out of the 2022 Bush Angus Bull Sale, and was the center of many phone calls once he arrived at stud, and was seen by the public. These daughters are the result of his first calf crop, and will be the first to go under the hammer. The bull mates that sold on the 2024 Bush Angus Bull Sale were crowd favorites with \$18,000 and \$15,500 high sellers.
- Her maternal granddam, EXAR Miss Blackfoot 3009 has been a trident for Express Ranches with several daughters sporting exemplary production records.

ESTIMATED DUE MID FEBRUARY.

• This pair of red hided Percentage Simmental females are a prime example of why the SJF SMJ Payroll sire is becoming the go to herd bull to use for elite built red hided Simgenetic stock. SJF SMJ Payroll remains one of the leading bulls in the Griswold sire directory for sales, and the retention of those who utilize his service from season to season only increases!

• These flush sisters are generated from the AWR Tracy 601 donor female, that is a daughter of the immortal, GT Cita 4060 female that has built a longstanding tradition of excellence within the Red Angus breed in particular. Yet her versatility shone bright when a HOC MR Broker sired daughter was the Grand Champion Percentage Simmental Female at the 2016 AJSA Classic.

• We love the wedge shape to their body design, feminine look about their head and neck, incredible structural design and all-around value to the industry that they offer. There is no question that the Red Angus and Simmental hybrid is one of the best kept secrets of the cattle business, they combine the best of both worlds into a dynamic, maternally powerful package.

• The resulting progeny from their mating to BBR Mafia M.A.X. 667K ET will result in Maintainer papered cattle. This pair of sisters offer a buyer a unique herd building opportunity as we think they are bound to increase consistency and are a pivotal building block towards forming an impressive cow family.

BLC/MLA OMEGA 2258  
*Sire of Lot 54*

- AWR Ms Omega Blackcap 4118 will be one of the first daughters of the \$190,000 Embryos on Snow sensation, BLC/MLA Omega 2258 to go under the hammer.
- An absolute outlier for her show heifer qualities. This April born female is so eccentric about her head and neck composition. The way she throws her head proudly into the air, yet maintains her presence on the move is very unlike the norm.
- The upside potential here is exciting, we think she has big time potential to bring home banners on the big stage.

LOT 55

- Yes! You read that right, the 2024 “Southern Belles” includes a Polled Hereford, and truly one that is built extra high quality.
- AWR Miss Turquoise Fun 4102 comes with an eccentric look, is ultra durable in her structural build, dense and robust in her middle third and cocks off with undeniable presence. This one is fun to look at! Breed for breed she perhaps offers as much potential as a high caliber show heifer as any that will sell.
- She is the heart racing kind; they don't make them like this every day. For what she lacks in age and maturity she makes up quickly for in terms of 'look-at-me' charisma, uncharacteristic hair type and show ring approved eye appeal.

**DUE DATE: 11-08-2024**

- Sired by the \$65,000 new addition to the herdsire battery, WC Loaded Up 1833 P ET, this is a mating we are eagerly awaiting ourselves! We think it has the potential to reinvent the wheel and generate progeny that tiptoe the edge of genomic and phenotypic superiority.
- It becomes evident after inspecting Lots 3-7 that the M6 Ms Patsy Bell 527 P influence is something special, we believe her rookie calf crop of SVY Mayfield 30H daughters is one of the most potent flushes in the history of the Aces Wild Ranch, and she is on the cusps of becoming a household name in the Charolais breed.
- The pedigree of the resulting calf will also supply a very fresh roster of proven producers to the equation, and therefore could be a cornerstone or flagship towards a program's future.

**DUE DATE: 04-20-2025**

- Another fresh mating for our program combines the \$75,000 LT Combat 2591 PLD with a matron that stands at the front of the world renowned, Lindskov's LT Ranch Charolais donor pen, LT Sheila 337 PLD. We are proud to have secured an interest in this female, as she is one of the most dominate producers the Charolais breed has ever seen.
- LT Sheila 337 PLD is a very recognizable name to those who follow the happenings of Isabel, South Dakota. Both sons and daughters continue to rise to the top of the crop, with over 20 daughters being retained by LT. Yet, 2024 has been an incredible year for this female, as her son, LT Global 3322 PLD ET set a world record, commanding \$300,000 for two-thirds interest, this was followed by another son, LT Premier 3304 PLD, finding a \$150,000 hammer price for two-thirds interest also. They were accompanied by 6 other maternal brothers that found themselves at the scene of bidding wars on that April day.
- An opportunity exists to elevate your program to the front of the curve with just a single pregnancy, truly this mating has the potential to shape your program, and the breeds future.

BRCHE TR DORY 6501

DUE DATE: 05-18-2025

- A different twist for a mating on our CAG Bubbles 9950G donor than you may be accustomed to, but we think a mating that could reveal some serious profit return.
- CAG Bubbles 9950G is a female who is the result of combining two National Champions in TR CAG Carbon Copy 7630E ET and BRCHE TR Dory 6501.
- In her own right, Bubbles was the Reserve Grand Champion Female in the Junior Show at the 2020 American Royal and Supreme Champion Heifer at the 2020 South Dakota Summer Spotlight!
- She has proven to pass along plenty of extra stoutness, freakish feature and exquisite look, so truly the club calf mating to In God We Trust just seemed like common sense.
- This sexed male pregnancy is due for the middle of May, a perfect calving date for those wanting to raise the holdover sized steers that will work for the Texas majors.

CONLEY SHEZA STAR Z32

DUE DATE: 12-27-2024

- Conley Sheza Star D3 is the \$120,000 high selling Simmental donor dam from the historic Conley Cattle Simmental Dispersion that we partnered with Lindskov's LT Ranch to acquire! Conley Sheza Star D3 was a foundation breeding piece that was instrumental in the development of the Conley Cattle SimGenetic breeding program.
- D3 is the dam of the \$100,000 Conley High Rise F3, a member of the illustrious herd sire battery at Hartman Cattle Company. Another son of D3 is the impressive Conley Loud & Heavy 410J, the \$25,000 sire that was selected by Volk Livestock of Missouri. One of the most famous daughters of Conley Sheza Star D3 is Conley Sheza Star F912, the 2020 Fort Worth Stock Show Reserve Grand Champion Purebred Simmental Heifer for Madilyn Norvell. F912 continued her winnings ways when she was slapped Grand Champion Purebred Simmental Heifer at the Oklahoma Youth Expo, the world's largest youth livestock show!
- This pregnancy of Conley Sheza Star D3 with the leading red hided purebred bull in the business, SJF SMJ Payroll has legitimate potential to ring the bell, there is no shortage of credentials in support of this pedigree.
- Offered with Lindskov's LT Ranch.

SVY *mayfield* 30H

SVY Mayfield 30H is the one in a million, International Champion Bull, claiming the 2022 Canadian Western Agribition Supreme Champion Bull & 2023 NWSS Grand Champion Bull, two of the most coveted titles a Charolais bull could claim. He has been the center of many conversations even since his public debut, with many wondering if it was possible for him to pass along such an incredible phenotype to his progeny. Well we feel like the proof lies between the pages of this book. There have been no other plans to publicly sell Mayfield semen at this time, take hold of this opportunity before it is no longer.

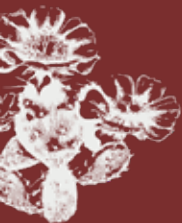

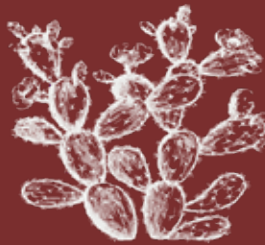

**100 A-J** SVY MAYFIELD 30H SEMEN
