

LACY'S RED ANGUS & MC LIVESTOCK
Annual Production Sale

OCTOBER 26, 2024 AT 1:00 PM

DREXEL, MISSOURI

Welcome to West Central Missouri and the 2024 Lacy's Red Angus/MC Livestock Sale!

This year's sale offering is the result of our efforts that started nearly four years ago when we planned the matings, bred/calved the cows and brought the animals through development. As in the past, we do not chase extremes but rather utilize genetics that we know perform. We are very proud that the vast majority of these animals carry the LACY prefix throughout their pedigrees & are backed by generations of cattle born/raised on our ranch.

Once again, we are delighted to continue working with our marketing partners MC Livestock of Archie, MO. Nick, Callie & Stetson Curtis bring a great eye for cattle, integrity, and a tremendous amount talent & energy to the table.

Our Polled Hereford herd is a joint venture with Debbie Lacy Wheeler & Steve Wheeler. Once again will be offering Polled Hereford bulls & have also included some nice open heifers as well as an excellent set of two-year olds with calves at side into this year's offering. As we move forward, we plan to continue to expand the number of Polled Hereford females offered each fall as we continue to provide all the components to create the great "Red Baldy" female.

All the bulls have been developed here on the ranch utilizing large fescue traps. They have been meticulously hand fed twice a day with a low starch/high roughage Purina developer pellet along with By-0-Reg+ mineral tubs. The heifers have been developed here as well, grazing fescue while being supplemented with fescue hay and fed MFA Trendsetter developer at a very minimal rate. Additionally, the heifers have had access to Game Changer Repro mineral tubs manufactured by Preferred Livestock Supplements.

In an effort to provide you with as much information as possible, every bull and female has undergone genomic testing and the results has been incorporated into their EPDs. All the bulls have undergone & passed an extensive Breeding Soundness Exam (BSE). The open heifers have all been fully vaccinated & subjected to a Reproductive Tract Score (RTS) as well as pelvic measurements. All of this data will be available prior to sale day.

We will continue to offer a select group of commercial Red Angus females. This small group of heifers come from Lacy's Red Angus bull customers, Robert & Gail Perryman of Urich, MO. These females are either sired by "LACY" bulls or bred to "LACY" bulls.

Thank you for your continued interest in our operation. We are confident that we are offering you some of the highest quality cattle to sell anywhere in the country. We firmly believe in our genetics and their ability to perform, especially in fescue country.

You are welcome to view the offering anytime, whether it be at our ranch, on our website or on www.CCI.live. The sale videos will be available online in mid-October on our website as well as on [CCI.live](http://www.CCI.live). Whether you intend to bid, buy or just come visit, we truly look forward to seeing you on sale day. If you are unable to attend, the sale will be broadcast live over the internet through www.CCI.live.

Regards,
Dan & Kelly Lacy - Lacy's Red Angus

Dear Friends & Customers,

Welcome to the Lacy's Red Angus & MC Livestock Annual Production sale. 2024 marks our 5th year getting to work with the Lacy family to bring you Red hided cattle that are born and bred in the heart of fescue country.

2024 has had its set of challenges that's no doubt, but with every challenge comes opportunity. Although many of us have experienced the lack of moisture in late summer, some longer than others, now is the time to focus on quality. With the record setting prices in feeder calves, what better time to invest in genetics to advance your operation. When flipping the pages of this catalog you will see progeny out of several of the industry leading sires as well some of the best LACY and MCL bulls to walk the pastures in Drexel, MO.

The bulls in this year's sale are no different than years past, stout, easy fleshing bulls that are built to go to work. They are backed by some of our best cow families. Whether you are looking for a calving ease sire, a sire to add pounds, a sire for replacement heifers, or your next herd sire for your seed stock operation this line up has something for everyone. The largest female offering to date will be waiting for your appraisal on October 26th. If you're looking for females to advance your herd, you will have to drive a lot of miles to find this many Red Angus females in one spot. They are eye appealing, structurally correct, big bodied females that have been bred and raised on fescue to require little supplementation to do their job right.

We would like to personally invite you to come by for a visit, enjoy some lunch, and evaluate the cattle on October 26th. As you study this year's offering, if you have any questions feel free to reach out to any of us. If you would like to view the offering or tour the herd prior to sale day, we would be happy to show you around.

Thank you,

Nick, Callie & Stetson Curtis - MC Livestock

Fellow Red Angus Enthusiasts,

Dale Lacy had a vision of breeding cattle that thrived on the fescue pastures of Eastern Kansas and Missouri. He knew that if he constantly applied selection pressure on hoof structure, fertility, and udder quality, the right cattle would evolve with nearly every other important trait following in line with the necessities of what it takes to establish longevity in production. The initiating Polled Hereford cattle met those stringent criteria before he made the switch to Red Angus where the focus never changed. He built the name, the brand, and the stock with a commercial cattleman’s mindset to reduce inputs as much as possible and let those cows work for you instead of you working for them. The following generation has not changed the course laid out for them. Still, the cattle continue to improve annually along with strengthening demand for what was started well over five decades ago.

Dan and Kelly, along with the watchful eye of Dan’s mother, Kay, have continued the legacy that Dale left at their discretion. Dan is always searching for ways to improve not only the stock, but the land they graze and the animal nutrition to ensure you one of the very best products, regardless of hide color that one can buy from the reputable seedstock firm. Dan had an opportunity to sell a set of proven foundation females to the youthful and aggressive MC Livestock firm. Nick and Callie Curtis along with their son, Stetson, have been quite the addition to this annual marketing event as they share the same disciplined vision in the quest for the ideal stock to graze fescue and be the kind to be readily adaptable to any environment they go to.

This set of cattle is as deep in quality as they have ever been both physically and genetically. The cattle are big at the surface, sizeable in terms of weight and substance, with center body shape built to be efficient foragers. These are only a few of the reasons why the repeat customer base continues to grow, and new faces invest in the program on an annual basis. There is no question that the cattle work and the customer service is as good as it gets in Drexel, MO. Please consider this your invitation to make your appearance to the Lacy sale facility on October 26, 2024, or any time before sale day to visit with Dan, Nick, or Callie. They would be more than accommodating in walking you through the cattle in the offering. Food and hospitality will be almost as good as the cattle, so make sure you have plans to attend one way or another.

Enjoy the cattle,

Graham Blagg Jered Shipman Tim Anderson

PREMIUM RED BALDY PROGRAM

Take advantage of hybrid vigor by maximizing the best traits of both Red Angus and Hereford, producing premium replacements.

The program helps producers access genetically verified females that have the best combination of longevity, fertility and adaptability.

The Premium Red Baldy program has the ideal balance of maternal and carcass traits which will yield cattle poised to increase the profitability of the commercial producer.

Premium Red Baldy

- Females only
- Red Angus or Hereford sired
- Top 50% of breed for HB or BMIS Indexes
- Red bodied with bald or brockle face

*No enrollment fee, 99¢/tag
Not a USDA Process-Verified Program*

Missouri Red Angus Association Fescue Belt Certified Program

Many of us who live in the “fescue belt” have experienced the problems associated with importing newly purchased cattle into our environment. What we’ve seen is a significant percentage of cattle that have not been raised on fescue struggle to perform after being imported onto this “grass we love to hate”. Some animals eventually overcome this issue, but many will not and will eventually be culled from the herd.

Fescue toxicity results from toxins called ergot alkaloids, which are produced by a fungus called endophyte that grows within the fescue plant. Cattle experiencing fescue toxicosis may exhibit rough hair coats, heat stress, suppressed appetite, poor growth rates, reduced reproductive performance, and in some cases lost tail switches or even hooves. The decreased animal performance seen during the “summer slump” of cool-season pastures is made even worse by these toxic effects of fescue.

Research on the subject of fescue management has been done for years. Several strategies can be used to mitigate the toxic effects of fescue, including removal or suppression of seedheads, overseeding of pastures with legumes or other forages, and good mineral supplementation programs. However, fescue remains a serious challenge. The USDA estimates fescue toxicosis costs the U.S. beef industry an estimated \$600 million to \$1 billion annually in lost revenue because of reduced reproductive and growth rates in cattle herds.

The entire state of Missouri is situated within the fescue belt. Since fescue was introduced into our region, Missourians have built their herds retaining only genetics that have proven to be “fescue tolerant.” When looking for Red Angus genetics, look for the MORAA FBC logo & cattle that have “Bred-in Fescue Tolerance.”

THE BULL GUARANTEE

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to the sale & are guaranteed by the seller as outlined by the "Red Angus Association of America Suggested Terms & Conditions". This guarantee does not cover injury, death or poor management.

PROPER MANAGEMENT OF YEARLING BULLS

INTRODUCTION

Yearling bulls represent a large commitment to beef operations. Besides their purchase price, they are the future genetic material of the herd that can influence several generations of stock. Because yearlings still have a significant amount of growth and development ahead of them, they require a higher level of care and management than their older counterparts. This is especially true now as yearling bulls can possess considerably more genetic potential for growth than their ancestors.

PREBREEDING SEASON MANAGEMENT

Nutritional Management

One of the most common complaints of yearling bull purchasers is the run down condition these bulls can exhibit after their first breeding season. This situation can be largely avoided with good bull management. Whether the bulls were developed on the ranch, in a commercial facility, or at a centralized bull test, they were probably fed to gain from 2.5 to 4.0 pounds per day from weaning to one year of age. After coming off of test, and until they are turned out with females, they should continue to gain around 2.0 pounds per day.

Dry matter intake, energy and protein requirements as well as diet formulation is provided as a management aid. Bulls grazing a grass paddock may need to receive 8 to 13 pounds of grain per day, similar to those on dry hay. Some will argue that bulls should not be pampered with grain supplements, but to insure a long and reproductive life, their basic nutrient requirements must be met. Quality of forage is extremely important to formulating proper bull diets. Many diet formulations can easily satisfy yearling bull maintenance and growth requirements. For example, some producers will allow bulls to graze cereal grain pastures with minimal supplementation, while others will have to feed a complete diet in a drylot situation.

Protein Requirement

After achieving their first birthday, bull's protein requirements settle to about 10% of their total diet, depending on their dry matter intake. Usually this requirement can be met by adding one pound of a protein supplement per day to the grain portion of the diet. If high quality forage (pasture or hay) is fed, the additional protein supplement may not be needed. Forage testing and balancing the diet will pinpoint supplemental needs.

Mineral Requirements

Calcium and phosphorus are major minerals. Diets that contain approximately .40% calcium and .20% phosphorus are sufficient to meet dietary goals. The ratio between calcium and phosphorus should be maintained at 2:1 or greater. In addition, trace mineral requirements should be met. Research has shown that feeding zinc at 60 ppm of the diet is beneficial to male reproduction. Other trace minerals like copper, manganese, and selenium should be monitored. Many commercial sources of trace minerals are available, but if desired a mixture of 40% dicalcium phosphate, 20% limestone, 30% trace mineral salt and 10% Selenium 90 premix can be used.

Vitamin Requirement

Any diet that includes high-quality, green forages should provide enough vitamin A to meet the yearling bull's requirement. Vitamin A is inexpensive to feed, and therefore diet fortification near 30,000 IU per day would be cost effective. If forages are weathered and/or of low quality, an intramuscular injection of 3 million IU of vitamin A is advisable. Injectable vitamin A will maintain adequate liver stores for over 100 days.

BREEDING SEASON MANAGEMENT

Number of Females

Setting absolute guidelines for cow-to-bull ratio is difficult because there are several variables that have an impact on this number. Examples are a bull's age, size, condition, and sex drive. Environmental factors like: size of the breeding pastures, type of terrain, climate, and length of the breeding season can also affect the correct cow-to bull ratio. Absolutely, a yearling bull will not be able to service as many cows as an older counterpart. As a rough guideline, however, the working range is approximately 10 to 25 females per yearling bull during a 45 to 60 day breeding season.

Length of Breeding Season

A maximum of 45 to 60 days is an ideal length of breeding season for yearling bulls. Ninety days is an absolute maximum. One method of saving wear and tear on a yearling is to turn him out after an older bull has been with the herd for the first one or two heat cycles. Some producers rotate bulls in and out of pastures to assure a lazy bull's mates can get covered by another. Regardless of the management style, it is not advantageous to run yearling bulls with cows for long periods of time. They will waste a considerable amount of energy chasing cows and losing body condition instead of building up reserves for the next breeding season.

Try to observe the yearling bull closely to make certain he is detecting heat and breeding cows. Also, keep an eye on his condition. If he is getting too thin and rundown, he needs a rest. Thin bulls are more apt to hurt themselves, become less fertile, and have increased nutritional needs after the breeding season. Yearling bulls should not be pastured mated to cows that are extremely larger than themselves. Physically, this height mismatch may cause injury and failure to mate properly.

AFTER THE FIRST BREEDING SEASON

Feeding

Yearling bulls will probably lose from 100 to 300 pounds during their first breeding season. In addition to gaining back this weight during their first rest, they must also gain enough body mass as to achieve 75% of their mature weight by their second birthday. For example, if a bull's potential mature weight is 2,000 pounds, he should weigh at least 1,500 pounds at two years. If he weighed 1,250 pounds at turn-out time as a yearling and lost 200 pounds during the breeding season, he would need to gain about 2.0 pounds per day during the nine months until his second birthday. In order to gain 2.0 pounds per day, coming 2-year-old bulls may need to be fed 13 pounds of grain, protein supplement, and a full-feeding of hay. High quality forages could be utilized to reduce the grain and supplement portions of the diet. A word of caution: do not try to bring a bull back too fast with too much grain because of risk of foundering him.

Health Management

In the fall, after the first breeding season, treat the bull for internal and external parasites. The following spring, when he is two-years old, deworm him again and give him annual booster vaccinations against the diseases listed earlier.

LOT 1

LACY RED LABEL 003L

- We initiate the 2024 Lacy's Red Angus & MC Livestock Production Sale with a powerful herd sire prospect that is sired by the \$80,000 high selling bull from Shaggy Meadows Red Angus, SHAG Red Label 120. The maternal granddam of Lacy Red Label 003L is a powerful female that is from the heart of the donor pen, Lacy Lana 7025!
- Countless sons and daughters of Lacy Lana 7025 are working for programs across North America. The consistency of this cow family is hard to mirror!
- A feature attraction in this year's bull offering when you combine his style, stature, and substance. He's the herd sire kind that checks all of the boxes! Growth and maternal genetic excellence all rolled together in this sale headliner.
- His 707 lb. adjusted weaning weight ratios at 106 among the sale bulls.
- Top 1% ProS, top 2% GM, ADG, CW, top 10% YW, STAY, top 15% WW, top 20% HB, top 30% HPG.

MCL POWER PLAY 3018

- MCL Power Play 3018 is an elite herd sire prospect that initiates the SC Hard Drive H508 sire group. He is without question one of the best herd bull prospects that has EVER been offered from the MC Livestock breeding program. The dam of 3018 is a beautiful young female sired by Lacy Legacy 6097 417 that traces to the influence of the "Annie" cow family. His maternal granddam is the impressive Lacy Ms Annie 6132 donor that has produced countless high sellers and individuals of influence.
- 3018 is flawless phenotypically, offering a powerful hip and hind leg design and strong topline.
- He is a big bodied, bold ribbed bull that is long sided and balanced with extreme symmetry.
- He is a rugged made, athletic bull that takes a long and flexible stride. We appreciate the foot quality and flexibility that he brings to the equation. MCL Power Play 3018 is a bull that will see heavy use in herd at MC Livestock moving forward.
- A must see on sale day if you're in the market for an age advantaged herd sire prospect that checks all of the boxes!
- Top 2% ProS, top 3% HB, top 5% STAY, top 10% REA, top 20% GM, HPG, top 25% CEM.

YEARLING BULL

- Lacy Hard Drive H150 129L is a son of SC Hard Drive H510, an ET flushmate brother to SC Hard Drive H508. These two flushmate brothers that work for MC Livestock and Lacy's Red Angus were selected from the Rule family of Shoal Creek Land & Cattle.
- We love the extra shape and power that 129L brings to the equation. He is a big hipped, thick ended bull that has tremendous turn and expression to his quarter. He is an eye appealing bull that offers exceptional symmetry and balance from the side.
- The dam of 129L is a daughter of the iconic Lacy Marie 8190, one of the premier females in the donor pen at Lacy's Red Angus. A maternal brother to 129L, Lacy Energize 042K, was purchased in last year's sale by Chad and Melissa Wise of Fort Scott, Kansas.
- A definite sale highlight that will add power, performance, and payweight to his progeny!
- Top 10% HPG, top 20% REA, top 30% CED.

LOT 14

LACY BASELINE 120L

- The first son of the \$150,000 PIE Captain 057 is Lacy Baseline 120L! There is no denying the genuine power, shape, and real world performance that 120L possesses. He is among the elite in the Red Angus breed for weaning weight and yearling weight performance.
- He offers a strong data package and EPD profile to further solidify his herd sire credentials.
- He is the NUMNER 1 weaning weight bull in the sale offering that boasts a 791 lb. adjusted weaning weight to record a WWR at 110!
- There is no doubt that 120L is one of the premier herd bull options to sell on October 26, 2024 in Drexel, Missouri!
- Top 2% MILK, top 10% ADG, top 15% WW, YW, top 20% STAY, top 25% ProS, top 30% HB, HPG.

YEARLING BULL

- Here are two ET flushmate brothers sired by the past sale feature, Lacy Iron Mike 005E, arguably one of the premier herd sire prospects that has ever been offered by Lacy's Red Angus!
- The dam of these full brothers is a dynamic female sired by CCF Gold Bar 0251 and supported by the influence of 5L Signature 5615.
- 105L and 084L are performance oriented, big topped, bold ribbed bulls that are massive when viewed from behind. The dam of this pair of herd bull prospects now has over 30 progeny recorded with the Red Angus Association of America herdbook. A maternal sister by Lacy Foundation 448 is working for Holton Cattle Company of Texas. Several maternal brothers are working in top cow herds across the country.
- The opportunity to acquire two full brothers will promote uniformity and consistency within your next calf crop!

YEARLING BULL

- MCL Collusion 3526 is the ONLY son of the past sale featured, Lacy Collusion 115F, in this year's sale offering. We love the general body style, practical build, and flawless skeletal quality that he possesses.
- 3526 is a product of the program as he is further supported by a daughter of the famed Lacy Lana 7025 that is sired by Lacy Legacy 6097 417.
- His pedigree aligns two of the most iconic matriarchs in the Lacy's Red Angus breeding program, Lacy Lakota 8105 and Lacy Lana 7025.
- A big scrotal, dense made, easy fleshing herd sire prospect that has the look of a "cow maker". A tremendous option if you're looking for a bull to sire top shelf replacement females.
- Top 1% STAY, top 3% ProS, HB, top 10% MARB, top 15% MILK, top 25% CEM, top 30% GM.
- **Retaining 1/3 Semen Interest.**

LOT 22

MCL CORNERSTONE 3521

- MCL Cornerstone 3521 is a rugged built, stout featured herd sire prospect that offers tremendous length and power. He is sired by Lacy Cornerstone 078F, a son of Lacy Cornerstone 069C that is backed by the influence of Lacy Hazel 218 072C.
- With over 660 lbs. of weaning weight performance he recorded a WWR at 106.
- His dam is a productive female that has put several sons and daughters to work in programs across the country. A maternal brother to 3521 is working for Robert Williams in Missouri, and a maternal sister was selected by Cheyenne Voge of Texas.
- A powerful herd sire prospect that is ready for heavy service!
- Top 2% STAY, top 4% MILK, top 20% HB, top 25% BW, top 30% REA, 35% ProS.

YEARLING BULL

- Another BIG TIME herd sire prospect that will be on several short lists on sale day! 076L is sired by the tried and true, CCF Gold Bar 0251, a bull that was instrumental in the development of the Lacy's Red Angus breeding program. 0251 is a 20+ year old bull that offers a pedigree that is rich in history and tradition. The daughters, granddaughters, and great granddaughters are the foundation of the cow herd in Drexel, Missouri.
- Lacy Bull-ion 076L is a massive bodied, thick topped, wide based bull that is big footed, and sound built from the ground up. We love his extra eye appeal and natural shape that he possesses.
- He offers incredible power and performance phenotypically. His dam, Lacy Lana 7025, is one of the most influential females in the Lacy's Red Angus breeding program.
- Females sired by 076L will be worth their weight in gold. Keep every daughter of 076L that you have, we promise in 10 years' time you'll be glad you did!
- Top 4% MILK, top 5% HPG, STAY, top 15% ProS, HB, top 20% BW, top 35% GM, MARB.

- Here is a powerful age advantaged bull to initiate the Polled Hereford division of this year's sale offering! He is an eye appealing bull that is smooth fronted, clean shouldered, and transitions into a bold forerib and center body shape. He is a big ended and thick topped bull that is a true beef bull! His sire, Churchill Pilgrim 632D ET, is one of the most widely utilized AI sires in the breed and is supported by one of the great cow families to call home to Churchill Cattle Company!
- He is an athletic bull that is ready for heavy service! His data profile suggests this is one to study closely for making baldy replacement heifers.
- A must see on sale day if you are in the market for a top shelf Polled Hereford herd sire prospect that will enhance your bottomline!
- Top 10% MILK, top 25% SCF, UDR, BMI, top 30% SC, TEA, CW, REA, BII.

AGE ADVANTAGE BULL

LOT 34

DL 18072 CORNHUSKER 58D 022L

- DL 18072 Cornhusker 58D 022L is a thick made, long sided bull that is extra powerful down his top and from behind. A maternal brother, Lacy Foundation 007K, was a past sale feature in last year's sale.
- Physically, he is difficult to poke a hole in with his combination of structure, shape, and functional type. His maternal granddam is one of the most impressive Hereford females on the farm. This is a bull that should be utilized with intensions of female retention within your herd.
- Top 5% WW, top 10% SCF, BMI, BII, top 15% YW, top 25% CW, top 30% TEAT.

Watch the Sale on CCI.live!

The best, the fastest and most comprehensive marketing & bidding tool!

How to Bid Online...

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
 - After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
 - CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

Viewed around the world!

**SALE CATALOG, VIDEOS,
and LIVE BROADCAST...**

all at your fingertips from the sale page at www.CCI.live! Watch live sales weekly!

www.CCI.live

SPRING BRED COW

- C-Bar Stony 128J is beautiful profiling, neat featured female that is feminine about her front third. She offers tremendous udder quality to complement her extra volume and capacity.
- The cow family that supports 128J is the famed "Stony" tribe, arguably the most prolific cow family in the C-Bar Ranch breeding program. The maternal side of her lineage traces to the famous Brown-CBAR Ms Stony ML P7500 donor dam, a female that has been a foundation breeding piece for countless programs across the country.
- She's level across her top and hip, with plenty of depth and lower rib.
- EPD profile reads with a maternal and carcass focus that you will appreciate.
- Top 10% CEM, top 15% HB, top 20% ProS, CEM, STAY, top 30% CED, top 35% MARB.
- AI BRED ON 5/20/24 TO DUFF RED WARRIOR 21104 (RAAA: 4575637).
PE 5/27/24-8/1/24 TO WEBR RELENTLESS 306 (RAAA: 4833672).

SPRING BRED COW

- Next up is another powerful female that was bred in the C-Bar Ranch breeding program of Kansas! She is a high volume female that is loaded with dimension and capacity. She's deep bodied, plenty massive, with the classic "wedge shape" a productive beef cow is expected to have.
- The cow family that supports 110J is one of the primary maternal lines that Steve Maier built his program around. The famed "Stony" line needs no introduction, as countless derivatives of this storied cow family are working in top program across North America. The maternal granddam of 110J is the famous C-Bar Stony W928, a foundation matriarch within the breed! The dam of 110J, C-Bar Stony 7010E, is now a member of the donor pen at Holton Cattle Company in Texas.
- If you study the figures, this one will be sure to impress on paper as well.
- Top 10% ProS, GM, REA, top 20% CED, ADG, HPG, CW, top 25% YW, MILK, top 30% STAY, top 35% HB, WW.

SPRING BRED COW

- 124J is another 2021 model female that is supported by arguably one of the most incredible Red Angus females in the history the breed, C-Bar Ms Stony A302! The famous photo of A302 and her daughter together sets the standard of what a Red Angus female should be built like! Flawless from the ground up, big ribbed, perfect in her udder design, and loaded with shape and capacity.
- The Lacy Collusion 115F daughters will be favorites of many who view these females. Lacy Collusion 115F is backed by the prolific Lacy Lakota 8105 donor, one of the premier females at Lacy's Red Angus.
- A full brother to this female, C-Bar Collusion 234J, was the \$33,000 high selling bull at Kris Black's "Cream of the Crop" sale in Oklahoma selling to GKB Cattle of Texas. 124J is a donor in the making that has the credentials to elevate any program to the next level!

MCL ANNIE 023D 3007

SPRING BRED HEIFER

- MCL Annie 023D 3007 is elegant in her design, yet still packs plenty of punch from behind. She is an ultra-complete female that offers tremendous power and capacity. In addition to her phenotypic traits of excellence, she is supported by a fault free cow family that offers exceptional longevity.
- Her data reads like a female that should be a productive cow for years to come.
- She should be set to calve early in the year to SC Hard Drive H508.
- Top 5% HPG, STAY, top 10% ProS, MILK, top 15% HB, top 20% GM, MARB.
- **AI BRED ON 4/28/24 TO SC HARD DRIVE H508 (RAAA: 4433363).**
PE 5/1/24-7/22/24 TO MCL DAWSON 2519 (RAAA: 4745353). LIKELY SAFE AI. ESTIMATED DUE 2/4/25.

LOT 86

LACY LANA 7025 108L

FALL YEARLING

- A little throwback here with these daughters of Lacy Lana 7025! Here is the first of three ET flushmate sisters sired by the legendary CCF Gold Bar 0251. They are all the right kind of Red Angus female to move a program forward. A full brother to lots 86, 87, and 88 sells as lot 27. Lacy Bull-ion 076L is one of the premier herd sire prospects in this year's sale!
- 108L is correct in her build and has the look of a future maternal prospect.
- Don't miss out on this trio of foundation genetic pieces.
- Top 4% MILK, top 5% HPG, top 10% ProS, STAY, top 20% HB, GM.

FALL YEARLING

- Here is a female that is long spined, angular fronted, and offers true style from the side! We appreciate her natural dimension and capacity.
- 3512 will catch your attention from any angle!
- Yet another top line genetic profile for maternal traits.
- Top 2% STAY, top 4% REA, 5% HPG, top 10% ProS, top 15% GM, top 20% MILK, HB.

SC HARD DRIVE H508 - SIRE OF LOT 102

LOT 103

DL 87G VICKI 52Y 114L

- We initiate the Polled Hereford division of this year's sale offering with a female that is elegant necked, bold ribbed, and powerful in her hip and quarter.
- Her pedigree reads with prominent female makers across the breed.
- A maternal brother sells as lot 33 in this sale offering as one of the featured Polled Hereford herd sire prospects!
- 114L has the genetics to back it up, as her maternal traits are among her highest rankings. Elite phenotype with a data package that is simply bullet proof!
- Top 10% SC, SCF, top 15% MCE, BMI, BII, TEAT, top 20% MILK, top 25% UDR, top 30% WW.

DL 632D PILGRIM 52Y 42K
MATERNAL BROTHER TO LOT 103

- 068L is a deep bodied daughter of NJW 133A 6589 Manifest 87G with extra pigment and quality.
- Put this one to work in any breeding situation you want and reap the benefits.
- She checks many boxes on her EPD profile among these Hereford females.
- Top 3% SCF, top 4% MARB, BII, top 5% BMI, top 15% BW, TEAT, top 25% WW, MILK, UDR, top 30% CED, CHB, MCE.

GIVE CALVES A WEANING-TIME BOOST

Your weapon against weaning stress and health challenges:
Purina® starters with RX3® Immune Support Technology

Drive calves to the feed bunk

Purina® starters are highly palatable to encourage calves to start and continue eating.

Help your profit potential

Keeping calves healthy through weaning means more potential pounds to sell.

Support healthy calves

Purina® starters with RX3® Immune Support Technology prime calves' immune systems to better handle weaning stress, so they quickly recognize health challenges, respond appropriately and return to optimal health.¹

Optimize calf performance

Calves fed Purina® starters with RX3® Immune Support Technology had more consistent average daily gain, averaged 6 pounds heavier over a 30-day period and bounced back from health challenges faster compared to control calves.²

For more information on Purina starter feeds containing RX3 Technology and for all of your feed and pasture needs, contact Mid-West Fertilizer Livestock Production Specialist Whitney Shaw at (417) 321-2651 or wshaw@landolakes.com.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Minerals matter

Selecting the right mineral supplement is crucial for maintaining health, growth and reproductive efficiency in grazing cattle. That's why your herd needs Ricochet™ FesQ Max minerals.

Designed to help alleviate fescue toxicity, Ricochet FesQ Max supplies essential minerals along with MFA Shield Technology® to promote animal health, immunity and performance.

Contact your local MFA for details or call 573-876-5244.

MFA | Your whole farm solution.
