2024 SD Simmental Association Breeder of the Year

CK *cattle* & Wager *cattle*

On behalf of everyone at CK Cattle and Wager Cattle, I would like to personally invite you to our 8th Annual Production Sale.

I want to thank all of our past customers for your faith in our cattle. Every year it's so much fun to listen to your success stories, whether you sell off the cow, background, sell your cattle as fed cattle, or are in the seedstock business. The amount of closeouts that show 100% Choice and Prime with no yield grade 4's and 5's is quite remarkable. We couldn't be any happier for you and your operations. Good genetics plus good management equals successful days in the cattle business.

I've been saying for the past few years that the cow/calf producer is going to see the best times they've ever seen. Well, here we are. Now the question in everyone's mind is, "How long will it last?" Nobody has the answer and there's many theories. That said, the best thing we can do is go off facts. Fact 1: Cow numbers are at an all-time low. Fact 2: Heifer slaughter numbers are the largest they've been since 2004. Fact 3: Heifer retention and rebuilding is not happening at a rate that will significantly impact overall growth of cowherds. Fact 4: Demand from the consumer for beef is at an all-time high, regardless of price. These 4 facts indicate continued good times for the cow/calf producer in the future. So, sit back and give yourself a pat on the back for staying the course and I'll give you and the rest of the industry a "high-five". You've done everything the consumer has asked of you and now you're being rewarded financially!

The cattle have done outstanding. We couldn't be any prouder of the offering. They weaned a little lighter than normal, but they already caught up at the 5 week weigh in. There is something for everyone. The bred heifers were AI bred in May and hauled to grass as we were breeding them. The sale bred heifers were brought home the 5th of November and have been out on an 80 acre trap. All their vaccinations are done, and they'll be re-pregged before the sale to ensure they're bred. I encourage you to take a close look at this years bred heifer offering. We feel confidently that this is the highest quality set to date that stands the chance to be influential matrons in your herds.

Due to the Black Hills Stock Show ending on the second Saturday in February, we moved the sale for this year, and this year only. Next year we will move back to the second Saturday in February. We will also start at 2 PM instead of 3 PM as the sale is getting large enough that we felt the need to move it up an hour. Thank you for your interest, it means a great deal to us. Feel free to come by anytime and inspect the cattle or call with any questions you might have.

Thanks again and we hope to see you Sunday, February 16, 2025 at 2 PM!

Sincerely,

Chris Effling

The beef business is as good as it has been in some time. Sure, the risk is heightened for different facets of the industry, but the reward is greater than ever. The cow / calf operator is experiencing record success with calf prices they have never witnessed before, in terms of the highs. If that entity decides to put more standards in place such as selling a set of all-naturals or other endeavors with premiums attached, the outcome would certainly be more impactful, and they would get paid for the extra effort. The more the outfit can do, the more return they will experience; therefore, the operation will have the means to expand in numbers or improve in genetics.

Based on the seed stock and commercial bull market through the fall of 2024, we are putting our money on growth through better genetic investment, and the bulls of the CK and Wager programs are built to fit the mold for any operation of the business. Seed stock or commercial there will be as many options available on February 16, 2025, as anywhere else in the country. This year's offering features the first set of male progeny to be marketed from the \$100,000 Bridle Bit Recharge K256 sire that Chris acquired from the famed Bridle Bit Simmental firm of southwest Colorado. K256 was selected as an improver for calving merit, birth weight, and carcass value primarily and the cow base of the program blended mighty well with the near outcross sire selection.

As a set of stock, these bulls have so much to offer. Their type, kind, shape, and skeletal quality are as good as you will evaluate from top to bottom anywhere in the land. Chris Effling is known for his detailed and discriminating eye, as he sees livestock as well as anyone in the business. The uniformity is largely due to Chris' ability to mate cattle, sort cattle, and cull cattle that do not fit the mold. This is one of the best-looking sets of bulls that you can find in the Simmental world in terms of head quality, ear set, neck attachment, and the equipment they all have at the surface. Foot quality is imperative for stock longevity and if the females that you choose to retain remain in production for an additional two years that's roughly an additional four grand minimum that they will return to your program based on today's marketplace.

Customer service is not a perk at CK and Wager, it's a way of life. Chris communicates with the vast customer base as often as he can, he is driven to place your feeder cattle and make sure he can capture the top dollar in the market for his customer's cattle. There have been multiple feeding success stories with cattle that carry the influence of this brand and program. A large percentage of the harvest data is Choice or Prime with minimal Select cattle. The occurrence of the ones, twos, and threes on yield grade is dominant with the fours and fives virtually wiped out of existence. The cattle adapt east, or west river and they thrive in the hot arid summer climates of the south and are certainly hearty enough to battle the winters of the relentless north. They have been sorted for quality, structure, and kind for over two decades and that's why they are as good as they are, and they work anywhere for anybody.

It is our pleasure to welcome you to the 2025 CK Cattle and Wager Cattle Production Sale, and we want you to consider this your personal invitation. If you should have any questions about anything in the offering, we encourage you to reach out to Chris or any of the family. If you wish to speak with someone outside of the team or family, please reach out to any of us on the Innovation AgMarketing squad for all information. We want everyone to have a positive acquisition experience, and we also want potential or past customers to enjoy the hospitality and above all else, the offering.

Best of luck and good health in 2025 and God Bless America!

TERMS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed.

NUTRITION

Jordan Holt: 605.380.1209

HEALTH & WINTERING

Bulls can stay to the first of May when they will have a breeding soundness exam, along with leptospirosis, pinkeye, and hoof rot vaccine. Bred females will need to leave as soon as possible after the sale due to close proximity of calving. Any female left and calved at CK/Wager facilities will not be guaranteed a live calf.

Prairie View Vet Clinic: 605.695.4086

RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction. Insurance will be available sale day.

ANNOUNCEMENTS

Announcements made sale day and from the auction block during the sale take precedence over printed material in the catalog or other printed material associated with this sale. Anyone attending this sale, attends at their own risk. Breeders or any of the sale force will not be held responsible for any injury while attending this sale.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

INSURANCE

Insurance will be available sale day. We suggest a mortality policy, especially if you plan to leave your bull(s) to be wintered until May 1, 2025. We will pay 1/2 of the insurance premium on bulls if you wish to purchase a policy. Please visit with Ray Trudeau at the clerking desk if you have interest in insuring your purchase.
Ray Trudeau – Martin-Trudeau Insurance 605.770.5170.

ADDITIONAL INFORMATION

Ultrasound data, yearling weights, gain test results, scrotal circumference measurements and Homo Black/Homo Polled testing results will be available sale day. Many of the donor dams to the cattle selling will be available for viewing sale day.

CK AND WAGER SIRED CALVES TOP THE MARKET!

"We have been purchasing Simmental and SimAngus bulls from CK Cattle and Wager Cattle to capitalize on the added heterosis that SimGenetics can bring to the table. The improved carcass data, real world performance, and ability to consistently grade is what these bulls have contributed to our operation. The Simmental influenced cattle not only perform in the feedlot, but the female contemporaries offer a strong maternal foundation that will benefit the cowherd for years to come. We have been very impressed with the ability that these bulls have to cover large country and maintain flesh during breeding season."

-Darren Ridley

Ridley Ranch of Colorado

- The summer born steers of Ridley Ranch were purchased by HRC Feeders of Kansas. They were harvested at 14 months of age and weighed 1508
- 88% graded Choice and Prime
- ZERO yield grade 4's and 5's
- The cattle dressed at 64.8%
- The conversion was 5.7 pounds to 1 pound of gain as they gained 4.2 pounds per day

Rick Larsen of Iowa

- Harvested at 1517 pounds
- 17% Prime
- 83% Choice
- 64% qualified for Certified Angus Beef
- ZERO Yield Grade 4's and 5's

Brady & April Schilder of South Dakota

- 200 Head of CK & Wager Cattle sired heifers
- Harvested at 1,504
- 27% Prime
- 73% Choice
- 48% CAB qualified

Starr and Smith of South Dakota

- 4 loads harvested
- 100% Prime and Choice
- ZERO yield grade 4's and 5's
- 13% Yield Grade 1
- 48.9% Yield Grade 2
- 37.7% Yield Grade 3

THE BULLS

BULL GUARANTEE

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the American Simmental Association, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

BULL BUYER VOLUME DISCOUNTS

- 3% off total purchase price of 3 Bulls
- 4% off total purchase price of 4 Bulls
- 5% off total purchase price of 5-9 Bulls
- 10% off your total purchase price of 10+ Bulls

DELIVERY

Free delivery within 300 miles on all bulls and we will assist in finding delivery options to other parts of the country!

EMBRYO TRANSFER PROGENY

Bulls without a WW Ratio are the result of embryo transfer. Their respective breed associations do not recognize them as having a contemporary group so they do not have a WW Ratio.

SEMEN INTEREST

Seller retains 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block.

DATA

Each pedigree includes an Actual Birth Weight and all bull pedigrees include an Adjusted Weaning Weight and Ratios for Birth and Weaning.

BRIDLE BIT RECHARGE K256

\$100,000 Sire of Lots 1-19

CHEZ KTE FRKG DORA 0677H

Maternal Granddam of Lot 1

- We initiate this year's offering with the exciting, fresh sire group of the \$100,000 Bridle Bit Recharge K256.
- CKCC Mr Recharge 4623M is very impressive in his physical presence. He is masculine, stout, rugged, and durable in his athletic build and stature with evident performance.
- He posted an impressive weaning weight ratio of 109 as he pounded the weaning scales with 721 pounds.
- 4623M ranks in the top 1% for both WW and YW, the top 2% for MWW, the top 3% for ADG and CW, the top 5% for REA, and the top 10% for TI.
- He is from one of the very exciting daughters of Deer Valley Growth Fund that traces back to the proven Mr CCF 20-20 and Profit.

THE RECHARGE SIRE GROUP

LOT 2 - CKCC MR RECHARGE 4605M

- Cattle like this stud are exactly why Chris and Kristi took the plunge to invest in the calving ease and carcass curve bender, Bridle Bit Recharge K256.
- They had been in search of a bull that could sire cattle that are balanced in their numeric profile that still pound the scales at weaning and look like beef cattle should look.
- He ratioed 91 for Birth and 104 at Weaning and was raised by a direct daughter of the past sale feature, CKCC Lincoln 0631H with the influence of Profit as well.
- This stud ranks among the top 10% for REA, the top 15% for MWW and Milk, the top 20% for CW, and the top 25% for WW, YW, MCE, and YG. He charts all other numeric traits and indexes in the top half of the business and should breed accordingly.
- No extremes, just balance driven with profit in mind.

Maternal Grand sire of Lot 2

THE RECHARGE SIRE GROUP

LOT 3 - WAGR MR RECHARGE 4010M

LOT 4 - KTE MR RECHARGE 4626M

- The firms have injected some of the better Angus sire groups into the program over the years. Sire groups known for performance and production like Connealy Confidence Plus. They also purchased a son of KG Solution 0018, RS Solution E111, that has sired many retention worthy females over his tenure as well.
- This stud is from a daughter of OMF Epic E27, that is out of a dam of the genetic blend of the previously mentioned Angus sires, with the influence of HOC Mr Broker. The program is certainly represented here once again.
- This burly built herd sire prospect is big and true at the surface with tons of shape and industry merit.
- 4010M ratioed 105 at weaning and was more than sensible at birth. He is laced with genetics that promote moderation at birth with cowboy growth and performance.
- He ranks in the top 10% for WW, MWW, and REA, the top 15% for YW, Milk, CW, and TI, the top 25% for ADG, and the top 30% for BW, Doc, and API while fortifying all other traits within the top 45% of the business. Quite impressive!

KTE MR EAGLE 1678J
Maternal Brother to Dam of Lot 4

- For the most part, the sons of "Recharge", should meet the criteria of most all ranching operations with a moderate BW suitable for heifers and young cows while not sacrificing growth and pay weight.
- He is from a daughter of OMF Hard Right H21, the past high-selling sale feature for the Oak Meadows Farm program of Minnesota. A program built on the discipline of breeding cattle based on "the total program" approach. The Aggen family has maintained the balance between numbers and phenotype for several years. We expect more big things from this young matron to come.
- This herd sire prospect ranks in the top 15% for MCE, Milk, and API, the top 20% for TI. REA, Marb, CW, Stay, and BW, and the top 25% for CE, MWW, and Doc. He also maintains all other industry numeric drivers in the top half of the breed to further ensure the profitability his calves should convey.

- ES Right Time FA110-4 has had a significant impact on the programs in Highmore and Gettysburg. Not only has he sired elite, breed leading herd sires, but he has left a trail of daughters that will impact the program, the breed, and the industry for generations to come.
- The young, two-year-old dam of 4014M brought a load to the weaning pen as he came across the scales at 726 pounds to ratio 113 with a modest start at 82 pounds. He's a legit performance sire prospect that posts the numeric credentials as well.
- This stud charts in the top 10% for TI, CW, MWW, and Milk, the top 15% for WW, YW, and ADG, the top 20% for API, Marb, Doc, and MCE, and the top 35% for CE, BW, and REA.
- The steer and cull heifer progeny will be premium bound, and the daughters retained should remain performance and profit-driven, surpassing industry standards!

- The influence of ES Right Time FA110-4 will be up close and substantial on the maternal side in this set of herd sire prospects regardless of sire group, as his daughters are relentless when it comes to bringing the goods. 1730J, the dam of this prospect comes with the proven influence of the outstanding Angus legend, JMB Traction 292.
- This son of K256 is another scale pounder as he weighed in at 743 pounds. He is dense and bold in his build with the scale and extension necessary to carry the load.
- He ranks in the top 3% for Milk and MWW, the top 10% for YW, ADG, and CW, the top 15% for WW, REA, and TI, and the top 25% for API. In addition, like many in this sire group, he establishes all other profit drivers in the top half of the industry.
- You will love the feeder cattle and have his daughters in the program for the years ahead.

- Hook's Eagle 6E is a sire that could do almost anything the industry was in need of at the time. Sensible birth, suitable performance, improved carcass merit, and the daughters were fundamental and productive enough to bring the goods to the weaning pen just like the dam of 4721M.
- This one is bold built with big feet and plenty of substance with a weaning ratio of 102.
- He offers balanced yet top tier performance as he ranks in the top 10% for ADG, CW, and REA, the top 15% for YW, Doc, and TI, and the top 20% for API, Marb, MWW, and WW.

- The dam of Lot 8 is a maternal sister to lot 49 through 52. The potency of the SJF Emerald cow family is quickly becoming of "Melody", "Bella", or "Bobbi" magnitude within the program as she consistently produces cattle of each sex that surface to the top at CK and Wager.
- This son of Bridle Bit Recharge K256 is unrivaled in his phenotype, presence, and skeletal quality. He is built to inject length, weight, and quality into any set of cows he is introduced to. Bid and buy with confidence.

64.1	13.2	12.1	44.5	-0.32	0.33	-0.05	1.05	130.2	82.3	

- A herd sire prospect from a maternal sister to the legendary J6RA Bada Bing 1602B donor dam that is loaded for bear with significant weaning performance as he recorded 778 pounds to ratio 103. CKCC LD Gwen 912G ET records five sons in the ASA data base whose combined average weaning weight figures to be 735 pounds.
- He is certainly one of the bigger more impressive performance laced sons of the Colorado native in the offering and is backed with the maternal credentials to do great things for any program that is profit focused.
- His number profile suggests that his cattle should calve with little management, grow in competitive fashion alongside their contemporaries, and be bound with cutability and conversion.

- As this program continues to evolve, the cowherd continues to be the kind that generates consistency as the stock carries on the traits where constant pressure is applied. Chris has no intent on letting off of the throttle for payweight, carcass quality without chasing extremes, the maternal instinct that has always been a focal point, and above all else phenotypic balance. The latter has allowed for the injection of sires like Hook's Eagle 6E, and the acquisition of Bridle Bit Recharge K256.
- He ratios 102 for weaning and 99 at birth with all 15 genetic expectations and index values in the top half of the breed. This one does offer breeding flexibility to many Simmental breeders and will be suitable for most of the past and current customers of the CK Wager brand as well.

- Outlaw was the go-to sire group for calving ease in the developmental stage of the CK and Wager programs. The daughters that surpass the stringent tests to remain in the program have been nothing shy of excellent in production much like the dam of lot 18. She remains very consistent in production and the outfit expects her progeny to continue to meet the criteria to make the cut for the annual production sale.
- 4021M is very sensible at birth and keeps both his BW and CE expectations in check, along with maternal, carcass, and profit index values as well.
- If you are in search of a "Recharge" son with the balance that will keep your program centered, you should strongly consider what lot 18 has to offer.

- This one is certainly strong in phenotype genetics and backed by dams that continually place cattle in this marketing venue. If they make the sort each year, it is a feat in its own right as the quality continues to get stronger and deeper with each generation.
- 4777M should sire a premium bound finished product for harvest as he posts top 25% values for both REA and Marb. The cattle should also calve with very little management and perform like their big spread contemporaries to their suitable market weight with ideal conversion.

THE PATRIOT SIRE GROUP

LOT 20 - KTE MR PATRIOT 4664M

- Here is the lead off son of the very impressive WAGR Patriot 1008J, a sire that needs no introduction the business. 4664M is a performance standout that offers a premium blend of phenotype and genotype.
- The Hoover Dam bred dam of this elite son of WAGR Patriot 1008J records four bull progeny that have a combined weaning weight average at 730 pounds with a combined birth weight average of 81.5 by four different sires. To state that a cow doesn't carry the load would be inaccurate in this situation without question. Just ask Jason Jensen how well they like their maternal brother to this prospect by EC Rebel 156F.
- 4664M is genuine in his skeletal width, bold in his body shape, with masculinity, and athleticism when in motion. This stud ranks in the top 15% for both WW, YW, and CW, the top 20% for ADG and MWW, and the top 25% for REA and Doc.

68	16.5	13.6	29.7	-0.43	0.43	-0.08	0.96	159.4	96	

- This would be the full brother to Lot 22. A full sib that falls short only at the weaning pen while still daylighting the contemporaries with 785 pounds of the stuff that turns to cash when sold at weaning.
- 4902M does not disappoint in phenotypic evaluation as he is stout, secure, and genuine at the surface, and loaded with shape and density.
- This calf ranks among the top 10% for TI, the top 15% for API, Marb, WW, and YW, the top 25% for CE, ADG, MWW, and Doc while keeping all other traits besides Milk in the top half of the business.

THE PATRIOT SIRE GROUP

LOT 24 - WAGR MR PATRIOT 4020M

- The powerful son of WAGR Patriot 1008J is from one of the very productive daughters of the \$400,000 Profit and would trace back to some of the foundation herd bulls that built this progressive program. WAGR Dream Catcher 03R and R&R Chamberlain X744 both had an instrumental role in leaving a set of daughters that were fundamentally sound and loaded with phenotype.
- This stud ranks in the top third of breed for several important economic traits. TI, REA, Marb, YG, CW, ADG, YW, and WW all have values that leave him more than competitive when it comes to siring feedlot bound progeny that will be premium bound.

MONTANA BLACKCAP Z009
Maternal Granddam of Lot 25

- This powerful, rancher's select stud should deliver the goods to any set of cows he is introduced to as far as a payweight and product.
- It's documented that he should sire a set a fast growing cattle that will respond to feed, grade, and minimize the 3s, 4s, and 5s.
- He's one that came to the weaning pen to weigh 792 pounds. He, too, ranks in the top 10% for REA, the top 15% for WW, the top 20% for YW and YG, the top 25% for TI, and the top 30% for ADG.

- Lot 29 would be a maternal brother to a son of TJ High Calibre 556B that was selected by Shipwreck Cattle Company of Texas in the 2021 CK Wager Production Sale.
- The quality that this dam puts out every year is recognizable as they make the sort for the marketing endeavor annually.
- The sons of ES Right Time FA110-4 have been admired and appreciated by the ranchers and stockmen who have invested in them over the years. Feeder cattle have been bound with premiums and the heifer retention has been high as well.
- This FA110-4 son came to the weaning pen with 726 pounds to ratio 110.
- He ranks among the top 15% for WW and CW, and the top 25% for YW while maintaining carcass values at better than breed average as well.

- 4823M's 8-year-old dam carries the maternal brother to the very proven and popular B C Lookout 7024 known as B C Mid Emblazon 854E 702 on the top side of her respective pedigree. Bill Conley's Legacy will thrive for years with the proven predictability he instilled in every sire and dam produced by the program.
- This stud should leave a set of daughters that are bold but maternal in their build that will most certainly be worthy of retention for any program. He too should sire male progeny that are suitable for generating dollars for payweight and harvest premiums.
- Lot 36 ranks in the top 5% for WW, the top 15% for YW and MWW, and the top 25% for REA with values for both CW and YG in the top third of the industry as well.

UC CROCUS D686 BLK
Dam of Lot 36

THE RELEVANT SIRE GROUP

LOT 37 - CKCC MR RELEVANT 4702M

- CKCC Relevant 0639H was selected by Windy Creek Cattle Company in the 2021 CK Wager Production Sale. He has gone on to sire retention worthy females and herdsire prospects that are rancher accepted annually at their annual bull sale.
- Chris believes in the value of the bull as well and will continue to sample him throughout the program he came from for more breeding seasons to come.
- This "Relevant" son is from a very productive female that bears the blend of Profit and the Mr NLC Upgrade U8676 sired son of 3C Melody M668 BZ, WAGR Upside 020X.
- We expect this prospect to sire cattle that meet the stringent demands of the industry in regard to pound and product in a quality package.

- What an incredible young, three-year-old dam this herd sire is from. She is a direct daughter of the female maker, Ruby's Currency 7134E, which traces to the famed and proven WAGR Lullaby 703T.
- Moderate at birth with great gains for the weaning pen is what this sire prospect stands to inject into your program.
- 4085M offers numeric balance without the extremes as he ranks in the top 15% for REA, the top 20% for CW, the top 25% for YW, ADG, Milk, and MWW, the top 30% for WW, and the top 35% for Marb. He should sire cattle that convert, perform, and go to the rail with premiums attached.

- CKCC Mr Dutton 4800M would be from a youthful and productive daughter of ES Right Time FA110-4 backed by the influence of the Mr NLC Upgrade U8676 x 3C Melody M668 BZ combination.
- He is a big boy as conveyed at weaning as he stepped across the scales to weigh 743 pounds that equated to a weaning ratio of 113.
- Certainly, an elite prospect worthy of discretion by any cattleman as he ranks among the top 15% for WW and MWW, the top 20% for YW, Milk, and CW, the top 25% ADG, and the top 30% for Marb and TI.

- This individual could surface towards the top end of multiple short lists on sale day. Numerically this prospect keeps everything centered and grounded with what's essential to stay in business long term.
- He offers a slightly better than breed average EPD profile that will keep a program centered for all traits important to generating performance and sensible maternal quality.
- Basin Excitement is one of the rising Angus patriarchs associated with female retention and maternal excellence with longevity attached. This six-year-old dam has two females retained in the program and the firm plans for more to come in the future.

THE ALL RIGHT SIRE GROUP

LOT 49 - KTE MR ALL RIGHT 4655M

LOT 50 - KTE MR ALL RIGHT 4681M

- Lot 49 initiates a lineup of four full brothers sired by the \$147,500 WINC All Right 213K from the 2018 AJSA Summer Classic Champion Percentage Female exhibited by none other than Miss Kenidey Effling.
- SJF Emerald was selected from the 2017 Hartman Cattle Company Customer Appreciation Female Sale and was raised by one of the nation's finest cattlemen, Mr. Shannon Frankenreider of Illinois. The Frankenreider firm would be built with very best, western origin, foundation maternal Angus genetics that region has to offer, and it shows through in each set of cattle from the past champion.
- 4655M attaches high out of his shoulder with an ultra-arrogant presence. His athleticism is unrivaled as his skeleton is loosely hinged and strong in genuine spread.

WINC ALL RIGHT 213K
\$147,500 Sire of Lots 49-53

- Arguably, WINC All Right 213K, can be used on heifers and the build that 4681M possesses could be justified for such as well with management.
- These brothers are the perfect blend of the bold and rugged from their sire, with the smooth as glass profile from their dam. The consistency is remarkable from one to the next.
- Longevity is becoming the popular, new buzzword in the commercial sector of the business. Bulls from dams like these should be built to withstand the pressures of servicing cows and undesirable terrain for multiple breeding seasons and should sire daughters that can remain profitable in the program for several more years than the national average reads today.

- The Angus genetics that helped build SJF Emerald would be from famed Angus programs of the likes of Connealy, McCumber, Sitz, and countless others entrenched in the fundamental mindset of breeding cattle with the long game in mind.
- A maternal sister to this foursome of brothers was able to produce a \$26,000 son of OMF Epic E27 that was another selection of Jason Parker's in the 2024 edition of the CK and Wager Production Sale.
- CK and Wager cattle are recognized for their ability to feed and grade with premiums on board, but the females are gaining popularity as well as they can bear the load of most all sire selections keeping quality first and foremost.

THE ALL RIGHT SIRE GROUP

LOT 52 - KTE MR ALL RIGHT 4642M

- These WINC All Right 213K cattle are loaded with body shape, genuine skeletal width, skeletal flexibility, and quality beef cattle look.
- The cow base that backs this set of ET brothers would be one of the nation's best and the daughters of LLSF Pays To Believe ZU194 are documented producers in their own right.
- You should appreciate these cattle on sale day. If your ranch is in need of multiple bulls, we strongly suggest that any outfit should consider gathering up this set without reservation.

CKCC MR EPIC 3616L
Maternal Grandson of SJF Emerald

LOT 52A - KTE MR ALL RIGHT 4652M

- The consistency in this set of flush brothers is unrivaled and deep with quality and industry merit from all perspectives and disciplines.
- Cattle that are well-rounded from a growth, maternal, and cutability standpoint will never lose value and will return profit to any operation even in the most challenging of times.
- Skeletal integrity, big feet, durability, flexibility, and genuine width and shape will always be in demand.

65.4	13.8	12.1	21.7	-0.35	0.37	-0.07	0.69	139.9	86	

- This is the lone son of the \$60,000 OMF Hard Right H21 and is from the popular and proven WAGR Ms Innovator 9026G.
- The potency of the 9026G donor dam is unrivaled within the program. She never ceases to bring one or more to the summit of the offering year after year. She records five sons that have a collective average of 749.2 pounds at weaning. Granted some of those would be ET calves, but the consistency of the product cannot be denied when each of those recorded weights has a 100 pound spread from the highest to the lowest that still records over 700.
- In the 2024 CK Wager Production sale, two maternal brothers by ES Right Time FA110-4 were sold for a collective \$45,500 average and were selected by Jason Parker of Idaho and Ashworth Farm & Ranch of Saskatchewan, Canada. A maternal sister to M450 sells as lot 210 in the bred heifer division!
- Daughter retention from this son of H21 could be high as he excels in his numeric profile relative to the offering with a top 25% mark for Milk. He too should be sensible at calving with a top 20% value for BW and he carries the same rank advantage for Marb as well. There has never been a day when each live calf born has more value than they do in today's marketplace and why not have a live calf with premiums attached at harvest?
- Tie into reputation and tie on to what's tangible.

LOT 55 - WAGR MR EPIC 4006M

- OMF Epic E27 has been one of the heaviest and long-term use bulls in the recent SimGenetic scope of A.I. sires.
- The stud continues to sire cattle that fit the mold every marketing season and his daughters are proving to be the calf raising kind with excellent udder structure, fertility, and skeletal design to ensure long term use and production.
- Lot 55 comes with another dose of the genetics that build cattle to remain useful for years beyond the modern day life expectancy of the commercial herdsire or the daughters left behind to further the program. He is from the proven blend of ES Right Time FA110-4 and TJ High Calibre 556B. He charts the top 25% for MWW, the top 30% for both API and Stay with a value for Milk that suits most all cattlemen at just above breed average.
- His performance drivers place him in the top 15% for WW, YW, and CW, the top 20% for TI and ADG, and a Marb expectation to keep him in the top third.

LOT 57 - KTE MR EPIC 4613M

- Another dose of the maternal Angus royalty court is on board on the bottom side of this one's lineage. The famous and high dollar generating "Frontier Gal" cow family helped build great Angus firms like Wallace Cattle Company and influences multiple facets within the Express Ranches program as well.
- 4613M could justifiably be acceptable for use as a heifer bull as he posts a 65 pound actual birth weight and ranks among the top 15% for both CE and BW expectations.
- Here again the importance of live born calves with vigor is of utmost importance in the present day marketplace especially when they have the genetics to influence payweight and carcass merit just as this prospect does. He charts in the top 20% for YG, the top 25% for MCE, and remains in the top third or slightly better for WW, Doc, REA, and both API and TI as well.

THE PLATINUM SIRE GROUP

LOT 58 - CKCC MR PLATINUM 4698M

- Another impressive group sired by the \$170,000 FRKG CKCC Platinum 009H as we lead off with a SimAngus stud with the up-close support of Basin Payweight 1682. The seven-year-old Mogck bred matron records five head in her tenure at CK Cattle with three bulls that collectively averaged over 740 pounds at weaning.
- CKCC Mr Platinum 4698M posts a weaning ratio of 108 and charts in the top 15% for WW EPD value with a top 20% mark for both YW and MWW as well.
- He is a big ribbed stud, with impeccable skeletal quality, and the combined width and substance to enhance any program.

FRKG CKCC PLATINUM 009H ET
\$175,000 Sire of Lots 58-65

LOT 59 - ECC CKCC MR PLATINUM 4907M

- A royally bred son of FRKG CKCC Platinum 009H from the high powered GF/HS Miley X243 cow family that has had significant impact in progressive SimGenetic programs over the years and remains to be the matriarch for Ryan Effling's program.
- A maternal sister to the dam of 4907M, sired by CDI Trustee 387F, produced a son of Musgrave Jumbo that commanded a \$13,000 hammer price in last year's sale.
- This stud came to the weaning pen with 736 pounds of performance with a modest 85 pound start out of the gate.
- He will transmit power and durability to any set of cows and his cattle will be the kind that respond to feed and be tied to the grid with an abundance of premiums.

LOT 60 - MDD CKCC MILESTONE M67

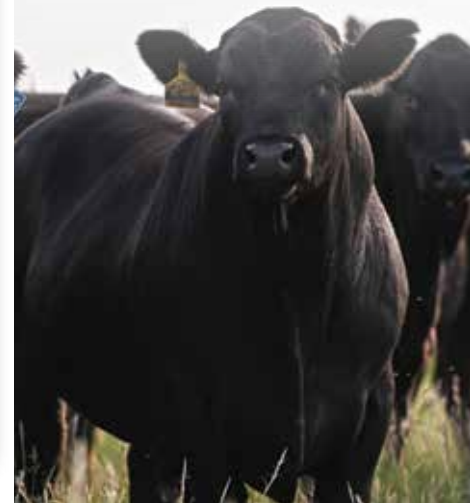

LOT 61 - MDD CKCC MAVERICK M55

- We introduce a pair of flushmate brothers from a descendent of the Remington Lock N Load 54U influence on the dam side sired by the sire of balance and look, FRKG CKCC Platinum 009H ET.
- Masculine, athletic, skeletal integrity with quality, look, trendy basic build with a huge foundation would all be accurate ways to describe the brothers from the Dockter donor MDD Ms C516 F121.
- Lot 60 came to the weaning facility to weigh in at 739 pounds and so should raise the bar for weaning expectations for the ranch with the winning bid.
- Both cattle excel for cutability and product yield expectations on the rail as they rank in the top 1% for YG, and the top 10% for REA as well.
- Gather both or one; you won't steer your program wrong either direction.

LOT 62 - CKCC MR PLATINUM 4665M

- This stud keeps the bar in place without jeopardizing growth in the negative direction as this 009H son ratios 105 at weaning.
- He is the balance of growth, carcass, and phenotype that will sire cattle with demand for acquisition and keep the look and quest for profitability at arm's reach.
- This prospect ranks in the top 15% for YG, the top 20% for REA with a top 25% value for WW.

CKCC MS STAR 1405J
Dam of Lot 62

LOT 63 - CKCC MR PLATINUM 4699M

- Mr NLC Upgrade U8676, WS Pilgrim H182U, and ES Right Time FA110-4 would all three be key sires to a successful maternal genetic base to build a program with, especially to produce commercial or seedstock sires of choice. The aforementioned sires are saturated with the right body shape, skeletal build, and have a proof of positive history for maternal instinct as well and they all three line the bottom side of this prospect's pedigree.
- 4699M also brings two potent donor dams to his acclaim with 3C Melody M668 BZ and WAGR Ms Profit 7054E presence top and bottom.
- This stud should inject shape, look, and red meat yield into any set of cows that he is introduced to.

Maternal Sister to Dam of Lot 65

THE NIGHT VISION SIRE GROUP

LOT 66 - CKCC MR NIGHT VISION 4635M

- HOLT Night Vision 457H was acquired as a calving ease herd sire from Jordan and Amanda Holt. His service has fit the bill for what he was purchased for with extras in terms of look and beef cattle shape, and his daughters are proving their worth in the program as well.
- CKCC Mr Night Vision 4635M has been a standout since he hit the ground. His overall body mass, width, dimension, and build is as good as any in the entire offering, and we expect him to have plenty of friends on February 16.
- His youthful dam sired by Deer Valley Growth Fund was produced by a first calf heifer as well. With this prospect, justified and certified calving ease that would be suitable for use on heifers is undeniable. He came into the world at 75 pounds and adjusted at weaning with 727 pounds to ratio 110 and then ranks among the top 10% of the breed for WW. He's quite impressive and a well-rounded candidate for consideration of your program needs.

- This sire group is strong for base width, athleticism, and body shape, with red meat yield in mind.
- A prospect raised by a seven-year-old Angus dam that is rich in Connealy influence with both Connealy Confidence 0100 and Connealy Forefront on board. In the Angus database, she ranks in the top 10% for DMI and the top 15% for REA. She certainly left a herd bull that has the genetics to do it all.

- GF Evening Tinge 1X is one of the dominant matriarchs of the CK and Wager programs' SimAngus gene pool for extreme and eccentric phenotype. The most reputable daughter would be the many time Champion J6RA Bada Bing 1602B, also known as "Bobbi". Besides Mr HOC Broker, Profit worked very well on 1X leaving a set of daughters like the dam of this prospect and CKCC Bobbi Kristina 8827F which is owned by Freking Cattle Co of Alpha, Minnesota.
- We think he is the elite son of CKCC Lincoln 0631H, in terms of balance, structure, and his ability to spill significant power through every square inch of surface area he amasses.

- This genetic cross yielded a big ribeye, weaning curve bender for last year's sale and they liked him so well as a calf they tried the mating again and it worked with similar results.
- They have yet to scan these bulls but just based on overall general build and measurements to this stage, they would expect the end result to be very close to the full brother selected by Rusty Pearman a year ago.
- A prospect that was moderate at birth and ratioed over 101 at weaning with the built-in predictability of the ES Right Time FA110-4 influence as well.

CKCC MR HARD RIGHT 3674L

Maternal Brother to Lot 79

- A year ago the sons of CKCC Lincoln 0631H averaged right at an even \$7,000 and we strongly believe that the quality runs deeper than a year ago.
- In the 2024 CK Cattle and Wager Cattle Production Sale, a maternal brother by OMF Hard Right H21 commanded a \$9,000 gavel price and was selected by a long-term customer and friend of the program, Mr. Todd Klockgether.
- 4809M is from a cow bred in the Wayne Wilson program of Northeastern Wyoming. The cattle are bred and selected to withstand harsh and adverse conditions with the expectation to breed back on range and wean a calf with weight and quality.

SO REMEDY 7F

\$530,000 Sire of Lots 82-86

- We initiate the offering from the \$530,000 SO Remedy 7F with a trio of brothers from the heavily referred to matriarch J6RA Bada Bing 1602B.
- These sons of "Bobbi" are as good as they have ever been, and we are not quite sure where to split the difference or even if there would be any to split.

THE REMEDY SIRE GROUP

LOT 83 - FRKG CKCC MR REMEDY 410M ET

- These three-quarter blood bulls are suitable for any breeding program and should quickly adapt to any environment or climate as well.
- The overall construction and build is so consistent and genuine from every angle of evaluation. We are not sure that there has been another mating as consistent as this trio is especially in reference to the amount of shape and dimension that they all have to offer.
- A year ago, five sons of the "Bobbi" donor dam averaged right at \$10,350 and were purchased by discriminating cattlemen by the names of Trey Kautzman, Jeff Burg, Tom Harris, Herb Wipf, and Darren Ridley.

CHEZ BOBBI 0623H ET
Maternal Sister to Lots 82-84

LOT 84 - FRKG CKCC MR REMEDY 418M ET

- SO Remedy 7F has been a sire of true consistency in terms of basic build, eye appeal, skeletal quality, and overall body shape. The cattle with his influence have been well received nationwide and have topped many sales for multiple breeders as well.
- MR HOC Broker would line many of the maternal pedigrees in the industry regardless of breed affiliation. The sire has proved himself to be instrumental in the production of stock of top shelf quality.
- These two sire groups combined produce the quality that is represented in this dominant trio of brothers.

- This SimAngus bred, direct son of SO Remedy 7F, brings the heat regarding Angus royalty. Two shots of the female maker S A V Renown 3439 that has the influence of S A V Blackcap May 4136 on board, and the inclusion of the very prominent Coleman Donna 714 are the supporting cast on the Angus side of this elite herd sire prospect.
- The depth and center body dimension that this stud has to offer in unrivaled. There is no doubt that he has the credentials to leave a set of daughters that will be saturated with production value, longevity, and profit earning potential.

COLEMAN DONNA 386

Legendary 4th Generation Dam of Lot 85

THE REMEDY SIRE GROUP

LOT 86 - FRKG CKCC MR REMEDY 434M

- This son of SO Remedy 7F is from a dominant producing dam that brought a son a year ago to this marketing venue that commanded a \$7,000 hammer price as the selection of Raechel Otter.
- Study the back shape and pattern this one has to his claim.

LOT 86A - FRKG CKCC MR REMEDY 408M

- The past National Champion, SO Remedy 7F, left his phenotype DNA markers on this direct son!
- This rascal is quite the specimen! He hits the surface as genuine and wide as any with athleticism. His shape is wide, his build burly, and his look is very noticeable.
- These sons of SO Remedy 7F are as good here as anywhere else in the country. If you are serious about improving phenotype, body shape, build, and skeletal integrity, take serious note of the astounding quality this pen offers.

- We initiate a foursome of flush brothers from the proven FSC2 Bella, also known as "54Z2", sired by the \$620,000 record selling STCC Tecumseh 058J. If you are in the business of producing show heifers or like the good phenotype kind, this is where you set the cash satchel down and wade through the dense quality of what this IVF cycle produced from a herd sire perspective.
- Foot size, circumference of bone, rig cage design, and sheer muscle shape is what one will find plenty of in this herd sire of consideration.
- He is a trait leader for WW and came across the scale with an adjusted 205 day weight of 731.

- STCC Tecumseh 058J, himself, is huge at the surface, deep in his heel, big in his skeletal build in terms of bone, big and square in his back shape, wild and eccentric through his front third, with a pen presence that is impressive.
- His sons are the kind of cattle that can be used on nearly any set of British based females to make the absolute best feedlot bound progeny reducing the count of the 3, 4 and 5 yield grade cattle and the females retained should transmit heterosis advantages superior to any other cross in the industry.

- Cowboy or cowgirl alike, neither could be steered wrong when investing in the influence of the past Triple Crown Winning Mr HOC Broker. Combine that with the undeniable proof and reputation of an influential donor such as HF Serena via her \$620,000 world record selling son, STCC Tecumseh 058J, and there is no denying that profitability will be in your future!
- 4023M would be the lowest birthweight son of STCC Tecumseh 058J in the offering but he comes with the same extras in terms of look and balance.

THE YEARLING BULLS

LOT 94 - WAGR MR HIGH CALIBUR 4082M

- From a pedigree age standpoint, this mating may be the oldest in the entire sale book. Oldie but goody for sure, especially when one considers the females that have been sired by TJ High Calibre 556B and the daughters who carry the direct and second generation influence of a matriarch like 3C Melody M668 BZ.
- Whoever wins the bidding contest on this herd sire prospect, we certainly urge you to buy with daughter retention in mind. Structure and feet can be certain for the shorter longevity in the U.S. cowherd, but so can udder quality and the volume of milk produced to wean the calf size that is preferred in the marketplace today. This herdsire prospect is built with longevity in mind skeletally and the genetics should seal the deal for heifer retention, and he ranks in the top 10% for Stay.
- This stud offers a very desirable EPD profile that is mostly better than average with suitable profit indexes and doesn't have the extremes that can sometimes adversely affect the long game plan.

- We are certain that you will dig this SimAngus prospect by the proven and popular Deer Valley Growth Fund. This one is loaded with the head turning features, he's big barreled, huge ended, square to the surface, with sheer substance to spare.
- He ratios an impressive 109 at weaning time and does not lay it up on paper. He ranks among the top 2% for CW, the top 3% for WW and YW, the top 4% for ADG, the top 5% for MWW, and the top 20% for Milk too.
- He has the right influence on the maternal side of his pedigree to be an all-around sire that will sire scale-pounding steer progeny or sale topping herd sires, and the daughters, oh my, they will make your neighbors want to cut the fence before branding. He may be the Travis Hunter of the entire sale offering, pay attention here.

- There are many reasons for the success of this program, we cannot mention them all, but one of the primary drivers would be Chris' discriminating eye and his innate ability to mate cattle to build the ideal product. Who knew, besides him, that Deer Valley Growth Fund would turn these "Melody" daughters and granddaughters inside out on paper? The cattle carrying her influence have always been of high quality and elite but have not ever numbered up quite as nicely.
- Udder quality and longevity for the cow herd is inbound for whatever progressive ranching firm wins the bid on lot 99, with zero hesitation.
- This stud ranks in the top 1% for CW, the top 2% for YW and ADG, and the top 5% for WW.

- Woodhill Abraham F838-K680 was acquired from the famed Woodhill Angus program of Wisconsin a year ago for use on heifers for the program. K680 is built like one would expect Chris to have. He's big and quality at the surface with the ideal amount of bone to be utilized on virgin heifers without sacrificing overall quality and substance. The pattern of the beast is relentless in quality with plenty of body shape, pin width, and stifle to consider him an outlier for his lineage and breed affiliation.
- He worked very well on this first time calver sired by the full brother to FRKG CKCC Platinum 009H, FRKG CKCC Undisputed 005H.
- 4701M is the lone son of the Woodhill herd sire but one that numbers up nicely to match his phenotypic kind and build. A balanced product from a balanced equation.

- A true scale pounder as he mounted the scale to tally up 700 pounds of payweight that converted to a 109 weaning weight ratio.
- This stud has as much big spread genetic potential as any in the pen. He is built so rugged and masculine with an undeniable amount of sheer skeletal width and capacity.
- He is tied to one of the most productive Angus dams of the program, his maternal granddam, Chestnut Georgina 599. Just a year ago, four sons of the prolific Angus matron sold for a combined average of \$12,500.
- He combines two dominant cows in his lineage that bring the "center stage" quality to the offering, "599" and WAGR Ms Profit 7054E.

- This Angus influenced; heifer bull candidate is rich in Angus heritage. Maybe not the heritage familiar to most Dakota region ranchers but we are certain that his female offspring will be worthy of retention, or the fanciest bred females offered for sale on the video or your progressive livestock market of choice. The paternal great granddam would have been one of those dominant producers that Tim and Trudy Ohlde let slip through the cracks as she went on to become a half million dollar earning female and left sons and daughters that were major contributors wherever they roamed.
- LKCC Princess Vision 915K is one of Dallas Woltemath's all-time favorite Simmental cows. Her udder quality and fertility have been unrivaled within the program as well as her ability to transmit quality into any genetic equation.

- We begin the Angus division with a direct son of the ST Genetics Angus phenom, Hoffman Thedford, produced in the world class Hoffman Ranch operation of Nebraska. Hoffman Thedford, the elite son of Bar R Jet Black 5063 that blends high levels of calving ease, performance, and \$C into one complete package.
- 4309 is from a very productive, four-year-old daughter of Connealy Impression. RCL Barb 082 is impeccable in her udder attachments, ideal in her teat size, and very good in her basic build with added hoof quality and skeletal integrity.
- He should leave a beautiful set of young matrons to build any program with and sire male progeny with premium market value.

- In late summer, the reports of these calves by Mohnen Hollywood were buzzing with positive credentials. Upon evaluation of the next two lots, I would say they are certainly justified.
- Angus cattle that are built wide and correct from the ground up are in demand once again and these sons of Mohnen Hollywood will fit almost any bill. The most impressive part about 4308 is his powerful, yet refined dam by S A V Renown 3439! What a female!

- The presence of the exciting Connealy Commerce makes his debut at the 2025 edition of the CK and Wager Production sale.
- This "Commerce" son is from a very good daughter of Baldrige Alternative E125. The E125 females are of reputation as they consistently prove themselves with each calf raised. She contributes to a 710 pound weaning weight that generated a 110 weaning ratio.
- This stud is a true calving ease prospect that could benefit higher elevation ranching entities with a CED value in the top 4%, a PAP value in the top 3%, a CEM value in the top 1%, and growth drivers in the top fourth of the Angus data base.

• PE 5/28/24-8/8/24 to NG ICONIC L014 (AAA: 20731705). Estimated Due 3/10/25.

- Without a doubt, this is one of the highest quality females to ever be offered in the bred division in the annual Production Sale for CK and Wager.
- WAGR Ms Remedy 3042L possesses the balance, look, and overall quality to enter any donor pen in the nation. She is near perfection at the surface with a huge foot that comes with a deep heel as she sets wide and genuine off all corners. This female is bold and deep in her center body with the extra heart and flank and transitions desirably into the back side of her blade. Her back and pin set is big, her shoulder is flat and smooth, and she is quite exquisite about her head and neck. She's not the biggest or the heaviest, but she flat out sets the bar for the right type and the right kind.
- SO Remedy 7F always blends best with the subtle influence of the patriarch Profit, but this one comes with a little more for cow power, with the presence of 3C Melody M668 BZ as her maternal granddam.
- She is due to calve early Spring Break, just in time to run the first IVF cycle by the first of May for those February ET babies for 2026.

- We introduce the first of a pair of full sisters sired by the heavily used and proven Musgrave 316 Stunner from Bailey's Dream Girl donor dam.
- Width, capacity, and overall skeletal quality will allow this one to surface on your sale day short list.
- The now deceased Bailey's Ms Dreamy 946W was one of the past decade's more prolific, profitable, and predictable donors. She put as many daughters in front of backdrops nationwide as any in the breed and left sons scattered throughout breeder pastures across the nation.
- She was preg checked to be carrying the service of the \$100,000 Bridle Bit Recharge K256, so regardless of sex, the owner could very well have their next herdsire or donor dam on board.
- *AI Bred on 5/5/24 to BRIDLE BIT RECHARGE K256 (ASA: 4058272). Safe AI. Estimated Due 2/10/25.*

- The second of the flush mate sisters from the Bailey's Dream Girl donor female won't disappoint.
- She is loaded with a big rib cage, plenty of skeletal width, a great set of running gear, and a beautiful presence. This homozygous black female is loaded with power and substance.
- She is carrying an elite SimGenetic breeding piece on board with the service to the exciting young angus herd sire from one of the historically storied Angus breeding programs in the nation, and they call him Woodhill Abraham F838-K680.
- *PE 5/23/24-7/24/24 to WOODHILL ABRAHAM F838-K680 (AAA: 20517260). Estimated Due 3/25/25.*

THE BRED FEMALES

LOT 204 - CKCC MS PATRIOT 3612L

- We have a deep set of sons by the Wagonhammer Ranch selection, WAGR Patriot 1008J, in the bull offering this year but we introduce the lone daughter of the Hook's Eagle 6E son of the female offering.
- She's an elite individual with zero reservations for the statement! One that is robust in her center body, big in her upper rib, wide in her pins, genuine at the surface, and flawless in motion.
- Her dam is a beautiful uddered female with extra volume, dimension, and look.
- 3612L maintains an elite performance profile with final product yield at the forefront as she ranks in the top 10% for both WW and YW, and the top 15% for both REA and YG.
- Study the endless potential for return on investment with a calf on the way by the elite Angus sire, Woodhill Abraham F838-K680.
- PE 5/23/24-7/24/24 to WOODHILL ABRAHAM F838-K680 (AAA: 20517260). Estimated Due 3/25/25.

- When we reference cow family, prospective buyers should take note. The dam of this female was selected from the Hartman Cattle Company Customer Appreciation Female Sale. The maternal granddam, SVF Above & Beyond T87, is a proven matriarch for the Metzger Cattle Company firm of Kentucky. T87 has produced countless profit bound progeny as well as stock that are no strangers to the backdrop as well.
- If you desire to produce herd bulls and females laced with donor potential, we're not sure that you could blend two more potent donor lines in the SimGenetic donor sector than with the influence of FSC2 Bella and SVF Above & Beyond T87. The cattle from 3808L should be dedicated to the exceptionally big bodied mold and base width second to no others. Quality should ooze from the hide, and dollar generating potential will be of flourishing nature.
- The SimAngus calf on board could pay for the total package with enough left in the kitty for the next lineup of profit bound seed stock.
- PE 5/23/24-7/24/24 to WOODHILL ABRAHAM F838-K680 (AAA: 20517260). Estimated Due 4/10/25.

13.1	13.8	42.3	-0.29	0.4	-0.06	0.9	124.7	79

- We commented over and over again in the bull section on the value of the females by the senior herd sire, ES Right Time FA110-4 from a real-world perspective and the simple production value he injects into a genetic equation. The daughters of the high selling Ruby's Currency 7134E would be one in the same as well and so a female like 3845L is bred to work and bred for profit on both sides.
- Another SimAngus calf on board by the Woodhill bred stud "Abraham" should be a curve bender numerically and maternally.
- *PE 5/23/24-7/24/24 to WOODHILL ABRAHAM F838-K680 (AAA: 20517260). Estimated Due 3/13/25.*

- *AI Bred on 5/6/24 to BRIDLE BIT RECHARGE K256 (ASA: 4058272). Safe AI. Estimated Due 2/16/25.*

- Pay attention as we present the direct daughter of the past sale feature and dominant producer, WAGR Ms Innovator 9026G. In the 2024 Production Sale, a full sib brother commanded a \$10,000 gavel price. Two maternal brothers by ES Right Time FA110-4 sell for \$70,000 and \$21,000 as well. 9026G is quickly becoming a household name by those who follow the progressive outfit in Highmore.
- The cattle by the \$170,000 FRKG CKCC Platinum 009H maintain a look and presence like few others. They are consistently long sided, chiseled and striking about their initial third. Nearly all transition like glass in their general build and all come with the big feet, substance of bone, skeletal width, and depth to get towards the top end of any offering or outing.
- The earning potential of the calf on board is quite possibly like no other in the bred pen. Bridle Bit Recharge K256 will surprise many phenotype critics once they have witnessed the herd sire prospects that start this sale book. Value is included twofold when one analyzes the bred female for her genetic equation and the pregnancy she is carrying.

- Productive brood cow longevity is becoming a crisis in the industry. We believe that is a short fall of the rapid generation turnover that the industry drives every year, it doesn't give stockmen the time needed to really prove the genetics for long term structural integrity and maternal balance for milk volume, udder quality, and fertility.
- A bred heifer like this lone daughter of WAGR Current Affair 9042G should go against the modern-day grain and prove to be around for 8-10 calving intervals barring a lightning incident. Not only is she bred to go the distance, but she's built as she should be to endure and adjust to any environment or terrain.
- *PE 5/28/24-8/8/24 to NG ICONIC L014 (AAA: 20731705). Estimated Due 3/29/25.*

THE BRED FEMALES

LOT 214 - WAGR MS DUTTON 3078L

- These females by CKCC Mr Dutton 1606J are very impressive and worthy of attention.
- 3078L is from a very productive dam that placed her first daughter in the 2023 version of the CK and Wager Production Sale that went on to be the selection of Bailey Peterson. Her 2022 born daughter was retained in the program, and now this year her daughter of 2023 is the featured daughter of Dutton sire group.
- This female is loaded with body, dimension, and skeletal quality throughout. She is a weaning weight trait leader with carcass drivers that keep her cattle competitive with the national average as well.

CKCC MR DUTTON 1606J
Sire of Lots 214 & 215

LOT 215 - WAGR MS DUTTON 3048L

- You will admire this female for her body shape and density and then thoroughly fall in love with her for the way she is bred.
- Mr HOC Broker, Basin Payweight 1682, OMF Epic E27, and the maternal sister to the legendary WHF Summer 365C known as CKCC SWC Andie 9622G. What a foundation set of sires and an up-and-coming donor that will keep kicking out the upper echelon stock for years to come.

LOT 217 - CKCC MS RIGHT TIME 3788L

CKCC MS BELLA'S CURRENCY 0688H
Dam of Lot 216

ES RIGHT TIME FA110-4
Sire of Lots 216-223

- We begin the ES Right Time FA110-4 bred females with a pair of ET sisters from a full sister to CKCC Lincoln 0631H.
- A year ago, five sons of FA110-4 from the FSC2 Bella donor dam averaged \$8,550. The genetic proof that cattle bred very similar to this bred heifer are built to thrive in a commercial or seed stock setting.
- "Recharge K256" worked very well on the ES Right Time FA110-4 and we certainly expect the same here.

- This sister to 216 posts a weaning weight ratio of 107 and ranks in the top 20% for ADG and Milk, the top 25% for YW and MWW, and the top 30% for Marb and DOC as well.
- The expectations for the mating to the Eichacker bred stud, ES Titan LJ44, are huge as we expect not only a dynamic list of numeric expectations, but a quality calf destined for herd bull or donor dam status as well.

- Chris was certainly aware of the genetic and phenotypic impact of the introduction to "Bella" and her daughters when he made the 2022 mating decisions. Not many outfits offer as many like bred females as this outfit does, so we strongly encourage those that are looking to add numbers or replace some females to dive into these daughters of ES Right Time FA110-4 from this dynamic donor dam that continues to raise the bar for the kind she so consistently stamps with her influence.
- A mating certainly proven for payweight performance and profit with more on the way with the calf on board by WAGR Patriot 1008J.
- AI Bred on 5/6/24 to WAGR PATRIOT 1008J (ASA: 3961833). Safe AI. Estimated Due 2/10/25.

- 3552L is the full sister to five brothers that sold through the 2024 version of the CK and Wager Production Sale that averaged over \$8,500.
- There is no question why there is so much demand for the mating. Real world performance and measurements are substantial on the minds of those who wish to improve the total package. Payweight, fleshing ability, udder quality, fertility, and fundamental structural principle all play the major roll not only for longevity, but profitability as well. These cattle come with the credentials to be industry and ownership worthy in one complete product.
- These direct daughters of ES Right Time FA110-4 are worth their weight in gold.
- PE 5/23/24-7/24/24 to ES TITAN LJ44 (ASA: 4186967). Estimated Due 3/4/25.

- A long sided, attractive female that is supported by another proven profitable cow family.
- She is certain to have a big-time calf sired by the proven WAGR Patriot 1008J.
- *AI Bred on 5/5/24 to WAGR PATRIOT 1008J (ASA: 3961833). Safe AI. Estimated Due 2/10/25.*

LOT 228 - CKCC MS TECUMSEH 3666L

THE BRED FEMALES

LOT 229 - WAGR MS REBEL 3070L

LOT 230 - CKCC MS ELIZABETH 3604L

- WAGR Ms Rebel 3070L is a maternal sister to the Wagonhammer Ranches sire WAGR Patriot 1008J by the proven EC Rebel 156F.
- Last year's bred heifer offering was initiated with the EC Rebel 156F sire group. The pair of daughters average \$18,000. WAGR Ms Rebel 3070L is the lone daughter of the proven sire of quality and shape and we think she is one of utmost significance.
- 3070L is trademark in her design to the sire group with the huge paws at the surface, the huge bone work, the structural flexibility, the dense body shape, and the oversized permit load she leaves you with.
- She will mate well with the Nextgen sire acquisition made this past bull season with the proven influence of the robust built DB Iconic G95.

EC REBEL 156F - \$200,00 Sire of Lot 229

WAGR PATRIOT 1008J - Maternal Brother to Lot 229

- In the 2023 event, the dam of this elite daughter of OMF Epic E27 commanded an \$80,000 hammer price. If gives plenty of reason why this bred female is the caliber that she portrays.
- Curve bender, bar setter, the summit, however, you wish to describe one that stands out in a crowd, is exactly what CKCC Elizabeth 3604L exemplifies in person and on paper.
- Big and soft in her body shape, stout in her bone work and foot shape to the surface, stout ended, but feminine necked and headed is what she is in person.
- She trends to be an outlier in the big pen of bred cattle in her numeric profile as she ranks in the top 10% for WW and MWW, the top 15% for CE, the top 20% for Milk and TI, and the top 25% for YW and CW.
- We expect nothing shy of excellence from the SimAngus calf on board by Woodhill Abraham F838-K680.

- KTE Ms Night Vision 3642L is one off the top end, lights out females of the bred offering and she initiates the HOLT Night Vision 457H sire group.
- She is laced with great SimGenetic potential as she is geared by one of the very good Angus matrons in the program. Bred in South Dakota ranching fundamentals of survival and adaptability with the innate maternal instinct on board that the cattle have been selected upon.
- This elite cow prospect sells with the service to the \$100,000 Bridle Bit Recharge K256. She is definitely bound with privilege for those that will own her.
- *AI Bred on 5/6/24 to BRIDLE BIT RECHARGE K256 (ASA: 4058272). Safe AI. Estimated Due 2/16/25.*

THE BRED FEMALES

LOT 235 - MS CKCC BAILEY 203L

LOT 236 - MS CKCC BAILEY 103L

- RS Solution E111 was selected by CK Cattle and Chestnut Angus as a herd sire for use on heifers and neither firm has looked back on the investment as the cattle were significantly better than expected and were laced with number profiles that offered correction in the positive direction for multiple traits.
- E111 daughters have proved their ultimate worth in production as indicated by the quality of this daughter of HOLT Night Vision 457H.

CKCC MR EPIC 1626J
Maternal Brother to Dam of Lot 235

- These stouter built bred females are the ideal complement to the Woodhill bred Angus herd sire, "Abraham".
- TMAS Can't Touch This 8531F was a sire that would inject shape and ruggedness of skeleton.

- When Chris and Lanny acquired Profit, there was no turning back. They brought the bull home, turned him out and let him do what he was built to do regardless of investment level. End result would be a set of daughters that generated countless high sellers and cattle that were appraised and appreciated by some of the most discriminating ranching entities across the country. And, despite what an EPD profile might state, the sire group and its descendants harvest with the very best Angus sired stock with fewer 3s, 4s, and 5s. Ask Chris about Darren Ridley's harvest reports or for other customer's kill data and he will be more than happy to share the intel.
- This H21 daughter is laced with maternal value with excellent udder quality for generations.
- PE 5/28/24-8/8/24 to NG ICONIC L014 (AAA: 20731705). Estimated Due 3/18/25.

- Besides her number profile this daughter of H21 is from a very, very productive line of sires on the maternal side. TJ High Calibre 556B, R&R Chamberlain x744, and WAGR Dream Catcher 03R are each responsible for siring females that were and still are huge generators for many programs across the country.
- Her pedigree and data submission allows her to post an EPD profile that keeps her in the top 20% for TI and Marb, the top 25% for API, WW, Milk, MWW, Stay, and Doc, and the top 30% for YW.
- Impressive.
- AI Bred on 5/16/24 to WOODHILL ABRAHAM F838-K680 (AAA: 20517260). Safe AI. Estimated Due 2/26/25.

- The cattle with the Mr NLC Upgrade U8676 presence are generally bold in their center body, big ended, and tremendous in production. U8676 is the ideal Simmental bull to be used on a set of British based cows as he can put the barrel and red meat yield on any set of bones that gets his service.
- This bred heifer comes with a double shot of the "Upgrade" influence and ties "Dream Catcher 03R" into the equation as well. It's a genetic combination that almost every Simmental breeder in South Dakota can agree to the fact that it worked as good as anything until other options came along or sons and daughters were put into play. Invest with confidence.
- PE 5/23/24-7/24/24 to ES TITAN LJ44 (ASA: 4186967). Estimated Due 4/8/25.

- Like several good cattlemen and ranchers, the firms decided to sample SITZ Stellar 726D for his proven and told calving ease and well rounded EPD profile. There is no doubt that he has proved himself to be a true breeding bull as he has sired countless sons that will carry on his genetics for generations.
- This daughter of 726D is backed by none other than Profit and M668 with a twist of Hart Eclipse 510Y. She spells program and carries the service to the Bridle Bit phenom they call "Recharge".
- AI Bred on 5/16/24 to BRIDLE BIT RECHARGE K256 (ASA: 4058272). Safe AI. Estimated Due 2/26/25.

- This granddaughter of G A R Hometown is sired by the lead off bull in the Thomas Ranch Bull Sale. TR Hometown 1119J set the bar for physical build and presence in comparison to his contemporaries and this daughter would be no different.
- EC Rebel 156F does impact the maternal side of this female in a very positive way that make you take notice of the quality this female has to offer.
- She ranks in the top 20% for Milk and keeps YW, ADG, and Marb in the top third of the breed as well.
- *PE 5/28/24-8/8/24 to NG ICONIC L014 (AAA: 20731705). Estimated Due 4/9/25.*

Selling 100 units of conventional semen in packages of 5 units

*Owned by CK Cattle, Wager Cattle, Klockgether Cattle,
& Windy Creek Cattle Company*

- CK Cattle Company selected the \$100,000 Bridle Bit Recharge K256 in the 2023 Bridle Bit Production Sale.
- He has been utilized extensively in the program on virgin heifers and mature cows. The calves have arrived easily with vigor and exhibit true low-input rancher performance.
- The sons initiating this sale catalog are the first testament to what the outlier herd sire is capable of. We are confident that everyone will agree that the first nineteen head are not structured like the typical low-birthweight, high-calving ease cattle the industry is used to. These cattle possess substance, size, and scale, showcasing industry merit that should ensure most operations remain profitable, and the retained daughters are designed for longevity.
- This young, three-year-old patriarch-in-the-making charts very favorably across the board. He ranks among the top 3% for BW, MCE, and REA, the top 4% for CW, the top 5% for CE and Milk, and the top 10% for TI, API, ADG, MWW, and DOC, the top 20% for YW, and the top 30% for WW.
- He is impressive on the hoof with plenty of body, genuine width, and skeletal integrity. We believe him to be one of the very best options to be used to improve a set of cattle numerically while offering a pedigree that is not saturated multi-generationally with "Legacy." These cattle appear to be the kind that will go the distance to produce cattle to meet the industry demands on the rail or in the pasture.
