Welcome

TO THE ANNUAL CHESTNUT ANGUS PRODUCTION SALE

I would like to welcome you all to the 2025 Chestnut Angus Annual Production Sale. What an amazing time to be in the cattle business, as the cattle market has been out of this world! Thank you friends, current, past, and new customers for taking the time to look through this year's offering. We had an awesome 2024 growing season, as we were able to harvest an ample supply of hay, which was enjoyable knowing we could go into the winter months confident of our hay supply! We also celebrated the wedding of our son Wesly, and his wife Kayla this past summer! We are very Thankful and blessed to have Kayla become a part of this family, as she has been an incredible asset and addition to our operation!

I understand it gets said every year, but I am very proud of these bulls, and truly believe this is one of the most consistent set of bulls we are offering for your consideration. We were overwhelmed with the response to the cattle at this year's National Western Stock Show, and we sincerely appreciate all of the positive feedback. We continue to strive to always be progressive, and produce the best product for our customers, and feel as though we have accomplished that again this year. I feel as though there are bulls and females in this offering for everybody. We focus on producing bulls that will add vigor and pounds to your calf crop, without sacrificing maternal traits including structural integrity and disposition. We also strive for added phenotype, so that you receive top dollar when selling your cattle, along with carcass merit to earn those premiums when sent to the rail. An important point, and something that people maybe don't realize is that nearly the entire offering are natural calves raised by their dam. We are very proud that our cow herd has been able to generate the set of cattle we are offering this year. The set of females we are offering come from the heart of our program. I am confident they will go home and be nothing but profitable. We focus on several important genetic and physical characteristics in our cattle highlighted by foot and udder quality, along with docility, which has brought us to where we are today. If they don't meet those requirements, they do not last long here. I mention it often, because I believe it is important that in order to make our cattle better, and the industry better, these traits need to be very important regardless if you are a purebred, or commercial cattleman. I am confident this set of bulls will inject many of these important traits into your calf crop to take your operation to the next level.

I would like to thank you all for your continued support and interest in our program. We are proud of this set of cattle, excited for their future, and excited as the next generation is hitting the ground now. I would like to thank my family for everything they do, to keep this operation running like a well oiled machine. We all have different roles within this operation, and it takes all of us to make sure everything gets accomplished. Thank you to my friends, customers, and all of the supporters of Chestnut Angus. We all know it takes a lot of people at different times of the year to make everything happen, and your help and continued support is greatly appreciated. Similar to last year, the cattle market has been good for everyone! It is time to trade in those older herd bulls for a new and fresh set of genetics to add value to your operation. When you consider the value of feeder cattle in the marketplace being sold by the pound, the added value of a performance driven bull justifies the initial expense of that bull, and as a result add more pounds to your calf crop, which results in more dollars in your pocket. These young herd sires provide a tremendous return on investment in today's cattle market which ultimately is the bottom line in the cattle business. We encourage anyone and everyone to stop by the farm anytime to check out this year's offering. Please reach out with any questions you may have. Thank you again for your consideration, and we hope to see you on Sunday, February 23rd at the farm.

ALL REGISTERED ANGUS BULLS HAVE BEEN GENOMIC TESTED THROUGH ANGUS GS, AS WELL AS PARENT VERIFIED AND TESTED FOR ALL NECESSARY GENETIC DEFECTS!

DELIVERY & YARDAGE

Bulls will be available for load out sale day after complete payment has been made. After March 15th Chestnut Angus will begin delivery of sale bulls within reason, visit with Glenn and Wesly Johnson for more information. Bulls that do not have prior arrangements made will be charged \$5/day after March 15th for yardage.

ANNOUNCEMENTS

Announcements made sale day and from the auction block during the sale take precedence over printed materials associated with this sale. Anyone attending this sale attends at their own risk. Chestnut Angus and sale force will not be held responsible for any personal injury for attending this sale.

TERMS & CONDITIONS

All cattle sell under the terms and conditions of the American Angus Association. Terms available sale day.

EPDs

The EPDs listed are Spring 2025 numbers. Please note that EPDs may change from the time the sale catalog is printed until registration papers are transferred.

BULLS SELLING

Chestnut Angus is retaining one-third semen interest on all bulls. Additionally, the supplement sheet will outline special terms & conditions and/or any changes in retained semen interest in any of the bulls selling.

INSURANCE

We recommend serious consideration is taken about insuring your herd bull purchases. Insurance will be available sale day via James Bessler representing XL Catlin. James Bessler - 815.762.2641.

SEMEN CHECK AND ULTRA SOUNDING

All bulls will be semen tested and ultra-sounded prior to sale day, results will be made available via a supplement sheet posted on Innovation AgMarketing website and the Chestnut Angus Facebook Page.

HERD HEALTH

We have a no exceptions approach to Johnes testing and prevention here at Chestnut Angus via annual, whole herd testing. If a suspect animal is identified they are culled from the herd immediately along with their calf.

VIEW & BID ON DV AUCTION

DVAuction

DEAR CATTLEMEN & WOMEN,

It will be our pleasure to welcome you to Pipestone on SUNDAY, FEBRUARY 23rd for an afternoon of fellowship and elite Angus seedstock. The Chestnut Angus family is built upon some of the most driven people in the business, and is a world class program that has been developed from generations of focusing on maximizing the success and profits of anyone that invests in a breeding piece. The men of the Johnson family are cattlemen that don't source the funds elsewhere to back a hobby in the cattle business, or just enjoy ranching on the weekends when it's convenient, but are a family operation that realizes the importance of caring for the land, developing their breeding program and battles with the day to day hardships of raising crops and livestock in an ever changing environment and market. What you see today as the CN brand has been built solely through a dedication to performance Angus seedstock and fulfilling the needs of a growing customer base.

It goes without saying, the beef business is witnessing and is forecasted to see record times. Never before has the producer been on the receiving end of such a significant payday, and the return on investment in growth genetics been so valuable. Each and every added pound that can be gained as a result of genetic heterosis will be passive profit passed along into the hands of the ranchman. With that in mind, we are proud to welcome you to the most impressive set of high performance, big growth orientated herd bull prospects that Chestnut Angus has ever marketed. As you read through the offering, take note of the impressive growth projections that the class of 2025 carries with them. You will find that well over 50% of the bulls cataloged rank among the top third or better of the registry for both weaning weight and yearling weight figures, so regardless of how you may like them on the videos, or in the sale pens, there is a high probability that you are setting your program up for added pay weight and profitability with the selection of any bull in the offering.

You too will notice the addition of several new sire groups being added to the roster, they can be held accountable for this program's push towards the leading edge of the Angus breeds growth parameters. They have lived up to expectations, and have potently injected massive amounts of performance in the first generation, all while having proven to uphold the generations of longevity, hardiness and structural design that has been bred into the bottom side of the equation. We are excited to showcase this offering, they truly are right for the times, and the kind that is going to add value to multiple facets of a cowman's operation, first off with added pay weight and then in the long term with a sensational set of replacement females turned long term matrons.

The 2025 crop of bulls outshine previous groups from the perspective of combination cattle that excel not just on foot but through every method of evolution. Chestnut is truly molding the program, and the stock towards the 'Angus cattle that combine banner-winning phenotype with breed-leading genomics' motto that is in place. The bulls that are cataloged in the latter pages of this sale book represent not just this past year's accomplishments, but generations of meticulous selection, miles of genetic research, dollars of investment, hours of management and lives of dedication. There are potentially industry leading herd sires that will sell in this 2025 edition of the Chestnut Angus Bull Sale, but this is a program that you can tie to with confidence in knowing that the best is yet to come. Even with the successes and accolades this program has already gathered, it may still be in its infancy as the drivers of the future are as eager, talented and motivated about the Angus business as you will find.

Please feel free to reach out to any member of the Innovation AgMarketing team, or the Chestnut crew with any questions or queries any time leading up to SUNDAY FEBRUARY 23rd.

- We believe this is the KR Storm 900 son that we have always been waiting for! Truly one of the heaviest muscled, long spined, thick topped bulls we have raised to this point. Chestnut Storm 554 is packed full of roar power and red meat. He too has excelled from a growth perspective, packing on pounds and showing impressive growth from the onset.
- Chestnut Storm 554 comes with an impressive pedigree to match his phenotype. He is both a full brother to the \$11,000, Chestnut Storm 913 that sold last year to Cody Montgomery and is a maternal brother to the high selling feature from our 2021 sale, and member of the Champion Pen of 3 at the 2021 Cattleman's Congress, Chestnut United. These two studs have both matured into some of the most impressive mature bulls you could lay your eyes on. In the breeding pasture Chestnut United has obviously proven himself with sons, and sons of daughters highlighting the past several editions of this sale.
- With predictions for growth and the backing of generations of cow power, this is an opportunity add profit straight back into your pocket.

• Chestnut Connect 1124 is the impressively powerful, February born son of the \$18,500, Chestnut Connect 32 that sold in the 2023 Bull Sale to Gana Farms. Connect 32 is a calving ease son of Chestnut United that charted some impressive growth pre and post weaning time. A trait it seems he has passed along to this son!

• We love the design of this powerful beast, being extra square and wide at the ground, big footed, wide backed, bold middled and still eye appealing, the kind we set our phenotypic goals around. He recorded a 106 WWR coming off his second calving dam.

• His dam Chestnut Heather 15 is quickly building an impressive resume, with her only two sons born to date, both making the trip to the NWSS! Another generation back reveals the Chestnut Heather 759 female that was a performance standout of her class, recording a 120 WWR!

• A three-quarter brother to Connect 1124, was the \$21,000 selection of Kent & Sonia Aasby and Steve Thomas in the 2024 Bull Sale.

- We begin the sons of Musgrave Jumbo with one of the most impressive individuals we have bred in program history, and out of a young female that has stood up to the massive expectations set by her family name.
- The combination of EPD traits that this stud carries are ultra-impressive, and seldomly would you find a bull that is so impressive about their calving ease and birthweight figures that can remain so dominant about their huge growth predictions! This is a herdsire that is genetically designed to further the business towards profitability!
- This claim is also proven by the impressive set of profitability indexes that he sports, ranking top 20% for \$AxH, \$ AxJ, and \$M, top 15% \$B, top 10% \$C, top 4% \$F and top 3% \$W.
- Gather around here for a next generation producer that will appease stockmen and women from every walk of life!

		80		925					

- Chestnut MEGA 204 continues the trend of big shaped, extra powerful sons of Musgrave Jumbo that lead off this offering of performance driven, stockmen's bulls that we will sell in 2025!
- Check out the incredible 117 WWR this power bull received when he ran over the scale and recorded a 925lbs. weaning weight. He has been a leader of the class from early on, and still continues this impressive dominance on the cohort to this day. You will find him to be one of the longest spined, heaviest muscled and widest based bulls to go under the hammer on sale day.
- His maternal pedigree is built upon generations of cow power and Pathfinder's, including a full sister to the Chestnut Undisputed GLM sire that was purchased by Boyd Beef Cattle, Stierwalt Cattle, Hoffman Ranch, Cody Beck & Greg McConnell.
- There is no question that his influence will potently inject mass improvements of growth and performance genetics to an operation with goals of increasing scale pressure.

- Chestnut Major 374 found friends in Denver with stockmen that place their priorities with cattle that are heavy muscled, expressive and powerful. This long sided, and still attractive looking herd sire is an impressive specimen that demands attention.
- The Musgrave Jumbo sired sons have drawn a crowd, and we think have the build and maturity pattern that set them up to be long serving, athletic and powerful herd bulls for their new operations. All while injecting impressive pay weight and profits into their calf crops.
- You don't have to look far into the pedigree of lot 5 to find the legendary, Chestnut Peg 9589 WJ female that has built a family tree of impressive daughters that are employed by Chestnut Angus. When it comes to a reliable maternal backing, you won't find much better at Chestnut than the one in support here.

		77		909					

- Chestnut Jumbo 84 is massive and bold in his build, yet still delivers this muscle in an ultra-smooth and symmetrical package. If you are like us and prefer to breed cattle with an easy keeping, low maintenance look, that are robust in their ribcage then this stud will be your kind! He comes with the support of the Ruby cow family, one that has reigned supreme here at Chestnut for raising herd changing sires!
- He is a very versatile breeding piece that delivers massive growth, but not by sacrificing calving ease. He entered the world with a mere 77 pound birthweight and is supported by top 15% CED and BW. He then flips to top 20% WW and YW figures.
- A herd bull that will add performance in just about every breeding situation he is thrown, he ranks among the performance breed leaders for WW, YW, HP, \$M and \$F. Check out his impressive 115 WWR ratio that he recorded with over 900lbs. at the weaning pen.

CHESTNUT RUBY 14
MATERNAL SISTER TO DAM OF LOT 6

CHESTNUT JUMBO 84

CHESTNUT JUMBO 14

- Chestnut Jumbo 14 is a deep sided, bold sprung stud that checks boxes in a wide range of areas! He breaks the rules in regard to the combination of calving ease that flips to growth, with top 15% of the breed rankings for CED, and then sits top third of the breed for weaning weight and yearling weight traits.

- Long gone are the days that you have to sacrificing calving ease to get paid a premium at the end. These next generation Jumbo sons allow you to have your cake and eat it too.

CHESTNUT JUMBO 194

- We aren't sure if you could build a more impressive set of EPD's than you will find in this Musgrave Jumbo son. He sports 15 traits that rank in the top quarter of the breed. Additionally, he ranks in the top 10% of the breed for CED, WW and YW, you couldn't ask for much more than that!

- These curve bending trends are reflected in his real-world figures, going from his 73lbs. birthweight to an impressive, 113 WWR that was the result of bringing almost 900lbs. to the weaning pen.

- More impressive is the fact that this genomic standout is also built with shape and power, so not only does he read impressive, but he has a phenotype to suffice the strictest checklists when on the search to find a herd builder!

CHESTNUT SAVANNAH 629
MATERNAL GRANDDAM OF LOT 8

- We couldn't be more impressed with the real-world performance bulls that Musgrave Jumbo has sired in this 2024 born crop of herd bulls. Not only have they grown impressively post weaning, but they came easily and have impressed with every stage of maturity.
- We admire the functional build, powerful muscle type and fleshing ability of these Jumbo sons. We think that they will sire the easy keeping type that suits a wide range of environments and management situations.

CHESTNUT REGIMENT 702
 MATERNAL BROTHER TO LOT 13

• Chestnut Prolific 844 is the perfect combination of style and stoutness. He is long sided, cool necked and has the big flexible running gear that will allow him to have a long and comfortable breeding tenure. The added eye appeal and soundness of build allowed for 844 to make plenty of friends in the yards of Denver this year. But don't take his good looks as the only point of conversation on this leadoff Prolific son.

• His genomic tabulations suit the trends that the "Business Breed" is set for! Not only is his combination of growth impressive, but he sports an elitist top 1% \$M, an index that predicts profitability of a sire in a program where replacement females that are retained in herd and the remainder of the cull females and all male progeny are sold as feeder cattle. Additionally he ranks top 1% for Claw and top 2% for Angle, a pair of traits that are becoming necessary to pay serious attention to.

• His dam, CN DJ Annie Oakley 565 has been a strong force in the breeding pasture for approaching a decade now. She defines what the role model female in production should be, highly productive, fertile, built for longevity and profitable. She has raised maternal brothers to lot 13 that include the Chestnut Regiment 702 bull that in the 2023 Bull Sale to Robert Ford.

- Chestnut Prolific 944 is genetically and phenotypically geared for performance. His young dam, Chestnut Wetonka 027 is a leading future matron of the program, stemming directly from Chestnut Wetonka PF WJ 32.
- Turn to his genomically enhanced EPD traits to find his elite growth predictions that rank him among the top 3% of the breed for WW & CW and top 10% for YW, YH, MH, \$M and \$F.
- Without a doubt this is the kind of sire prospect that will add value to the program if your marketing scenario involves running your calf crop over the scale. He himself registered a 107 WWR, with just shy of a 4.00lbs WDA.

- Chestnut Prolific 1114 offers himself up as a leading promoter of potent growth and performance across the entire offering! You will find elite rankings across the entire charter of genomically enhanced traits that he offers.
- He ranks among the elite 1% of the breed for WW, Doc, Claw, Angle, and \$M, and in the top 5% or better for YW, HP, and \$W.
- Check out the impressive real-world data he recorded as well, coming of his dam to record a 117 WWR.
- His maternal brother, Chestnut Strut 182 sold to Doug Simons in the 2023 Bull Sale.
- Phenotypically he is the rancher approved kind that is athletic and masculine. He has a build that will allow him to cover ground and service lots of cows!

CHESTNUT STRUT 182
MATERNAL BROTHER TO LOT 15

CHESTNUT PROLIFIC 1114

- The high growth bulls just keep coming with Chestnut Prolific 694. He follows suit and even pushes the needle further with his impressive projections for implementing top 1% WW, HP, MH, Claw, Angle, CW and \$F. Additionally his YW, YH, MW, RE, \$M and \$C all rank in the top 5% or better of the Angus registry.
- His young dam is kicking it out of the park in production, as this isn't her first time generating a son of acclaim. She too is recognized as the mother of the Chestnut Benchmark 423 stud that is a service sire of the bred female offering of this sale.
- Check out his incredible 122 WWR that was recorded with his 957lbs. weaning weight, he sure clears up any queries as to whether the science is accurate with his own roster of performance.

- Those coming to Chestnut to find breed leading growth and performance will need to start the search with these Ellingson Prolific sons.
- Chestnut Prolific 1204 is a leader of the pack when it comes to the genomic ability to inject weaning weight in his calf crop, as his triple digit WW number places him among the breeds most elite.
- He came back to the weaning pen with well over 900lbs. of scale pressure, and has continued that impressive growth trend all the way towards sale day.
- Note that his dam is a maternal sister to the impressive, Chestnut Enlist 812 stud that has a set of sons in this offering.

CHESTNUT ENLIST 812
MATERNAL BROTHER TO THE DAM LOT 17

////////////////////////////////////// **CHESTNUT PROLIFIC 1204**

- As you have realized, the Ellingson Prolific sons are breed leaders when it comes to their ability to inject growth. There is no better time than now to increase the genetic potential of your calf crop for growth, as every single pound is receiving serious premiums.

- 804 is backed by a daughter of H A F Bragging Rights 1725 that is proving her worth in production, a maternal sister to lot 18, would be a standout of the 2021 born female crop.

- He is appropriate framed, heavy muscled and deep bodied, he hits us with a true beef bull look.

- The sons of Connealy Craftsman have done nothing but impress at every stage of development. We have always had high anticipations for his service ever since inspecting him at stud, yet seeing is believing here, as you will find with both this son that made the trip to the NWSS, and those that held the home front down they are consistently high quality and cattle that are right for the times.

- The genetic combination that Chestnut Craftsman 144 brings to the table is absolutely impressive, he combines a top third CED number with top 20% WW & YW ranking figures. From a curve bending perspective, he is most definitely one of the most appealing to sell this year! You will find this trend a constant across his real-world measurements as well, where he recorded a contradicting, 94 BWR to a 109 WWR.

- Additional to the flip from calving ease to growth traits you will find he sports a top 1% Milk and \$W figure, along with top 2% \$M.

- A program building, phenotype standout that is bound to make an impressive splash for the programs who make the invest in the future of their cowherd with this all-around, high-quality herd bull.

CONNEALY CRAFTSMAN
SIRE OF LOT 29-44

CN BLACKBIRD SUSAN 722
A DAUGHTER OF THE
CN BLACKBIRD SUSAN 522 INFLUENCE

- Chestnut Craftsman 54 is a maternal brother to the Chestnut Perfect Timing 43 “Relax” stud that sold last year to Griswold Cattle. Relax is a calving ease prospect that should be on everyone’s radar to use this coming season.
- This year’s model is built with more growth in mind, but yet that is not the only thing that he brings to the table, as he is an impressive animal in the flesh, being big backed, and powerful, and there are members on both sides of his pedigree that suggest he will generate the type of females that will be retained in herd for years to come.
- The Kramers Enforce 5006 daughter that raised both Perfect Timing 43 and Craftsman 54 is a testament to the maternal prowess her sire group is renowned for.

		73		835					

- Chestnut Craftsman 64 is an all-around high-quality beef bull. While he doesn’t hit the extremes on either end of the growth or calving ease spectrum, he excels positively for growth and performance. And trends ideally with his low ratioing 76lbs. birthweight and high ratioing, 835lbs. when coming to the weaning pen.
- Sometimes for long-term sustainability, sticking to a more wholistic approach to EPD selection results in the most efficient way to reach goals. Across the board you will find lot 31 to rank top third of the breed or better for every single one of his profitability indexes, and 10 other traits of importance.

CN QUEEN LUCY 745
MATERNAL GRANDDAM OF LOT 31

CHESTNUT QUEEN HERSELF 840
MATERNAL GRANDDAM OF LOT 32

- Chestnut Craftsman 74 is one of the premier growth promoters of his sire group, sitting top 10% for WW and top 15% for YW.
- The cow family he stems from is littered with high performing, power cows that have had a strong influence on this Bull Sale over the past several generations.
- Chasing back through the maternal lineage will reveal the CN Queen Herself 042 matron that would be one of the most potent maternal sources in Chestnut Angus history.

CN BLACKBIRD SUSAN 722
MATERNAL GRANDDAM OF LOT 33

- A similar story can be written about this next son of Connealy Craftsman, as he too sits in the top 10% of the breed for WW and top 15% for YW, along with a wide swath of traits that sit in the top 20% of the registry.
- He also comes with the backing of a long serving, and high production cow family in the Chestnut Blackbird Susan's. His maternal grandmother, CN Blackbird Susan 722 sold for \$10,500 in the 2023 Female Sale to Mark Moriondo of Missouri.

LOT 35 CHESTNUT CRAFTSMAN 214

- Who says that performance cattle can't be good looking and athletic! This is an ultra-good looking Connealy Craftsman son that has caught our attention at every stage of development.
- He trends ideally in the raw data, recording a below average BW of 74lbs. and then came heavy and well above average with his 861lbs. weaning weight that scored him a 109 WWR.
- Check out his very impressive, top 1% ranking \$M index and top 2% Milk trait.

**CHESTNUT SOLUTION 621**
SON OF A MATERNAL SISTER TO DAM OF LOT 37

- More pounds, and more power will come from the implementation of Chestnut Craftsman 334 into the bull battery.
- This husky fella came with over 800lbs. to the weaning pen, and is maturing with added length, muscle shape and power than his classmates.

CHESTNUT SAFE & SOUND 893
MATERNAL BROTHER TO LOT 38

- The Connealy Craftsman sired cattle are consistently heavy! Lot 38 weaned off his dam to record an impressive 827lbs that translates to a 105 WWR. In fact this brings his second calving dams WWR average to a 111. He continues on an upward trajectory of growth and will be one that's easy to find and be impressed with on sale day. The maternal brother to Chestnut Craftsman 394 that sold last year went to Cal Swedzinski for \$9,000.
- He stems back to the Conley Queedy 535 donor dam that has a long list of productive daughters in the cowherd, they are plain and simple high-quality stock!

• The Connealy Craftsman influence is strong this offering, with 16 sons that will go under the hammer on February 23rd. You can make some decisions about the amount of roar performance or the amount of calving ease that you would like, but what is most impressive about the sire group is their consistent quality of structure, maturity pattern and look of longevity.

• We don't think you can go wrong with the Craftsman sons, as they look to consistently offer the ability to increase profitability to a ranchman's cowherd.

- Chestnut Haus 574 is an ideal blend of performance, carcass, and power with that is going to add growth in an automatic fashion! This bull is a true standout from a phenotype standpoint, and offers a look of quality that no scientific calculation could translate.
- The sons of the \$50,000 Chestnut Haus 231 are bound to impress, as he passed along his large frame, long spine and impressive growth potential to each of these sons.
- Lot 45 stems from a line of maternal excellence, his first calving dam, Chestnut Daisey Beauty 114 is a standout of her class and looks to be set for an exceptional production career after starting out with this heavy weaning stud. He came to the pen with 843lbs of weaning weight, and hasn't taken his foot off the gas, even making the cut to take a trip to the NWSS.

HF SAFE & SOUND 019
SIRE OF LOT 50

CHESTNUT FANNIE 429
A DAUGHTER OF THE
CN FANNIE 9509 INFLUENCE

- Just a single representative of the HF Safe & Sound 019 sire group for this 2025 Bull Sale, but we wish that wasn't the case, as Chestnut Safe & Sound 174 is sure to get sale day visitors stirring, just like he did as a member of the Champion Carload at the NWSS.

- Chestnut Safe & Sound 174 is a surefire calving ease option! His incredible +11 CED number ranks him among the most elite 15% of the breed.

- Yet there is no need to sacrifice growth and payweight in your search for a sleep all night heifer bull candidate when the opportunity to purchase lot 50 is up for grabs! As he flips the scale positively towards a 90 WW figure and 127 YW figure that rank top 5% and 10% respectively. While you are looking into his genomics, pay attention to the 8 profitability indexes that rank him in the top 25% of the breed.

- He came small and unassisted at a mere 69lbs. And then exploded to wean off his first calving mother with a 113 WWR with an 889lbs. weaning weight. He made the trip to Denver and impressed onlookers with the unexpected shape and width you wouldn't typically find in a bull with such calving ease predictions.

- We believe the added look, feature and later maturing growth trend of this Safe & Sound son make him a sire prospect that is worth promotion, and with the maternal power of the Fannie family in support, the female retention of this stunner we think will be high!

- A trio of flush brothers from the influential, Chestnut Queen Eva 8104 donor that has been a center point of genetic advancement for us over the past couple of years. She is best known as the dam of the \$88,000 Chestnut Queen Eva 133 that was purchased by Moore Land & Cattle in the 2023 Female Sale, and the Chestnut Point Taken 180 herd bull that works for Nordlund Stock Farm.
- These brothers excel both in the flesh and on the paper for growth and performance. You will notice the impressive set of weaning weights they all turned in, and both lot 51 & 52 have grown with over 4lbs. of growth per day through weaning. There has been no slowing down on this trend either and that will be evident when you see them in the flesh on sale day.
- They are elite about their genomic predictions for growth promotion, all sitting top 10% or better for WW & YW. The profitability indexes of the trio also read very positively for \$M and \$W, meaning that they offer impressive opportunities to ranchers that sell off the cow, or may even retain some replacement females.

//////////////////// **LOT 56 CHESTNUT TETON 364**

- Chestnut Teton 364 offers the whole package, reading for growth on paper and is also built with shape and power. So not only does he read impressive, but he has a phenotype to suffice the strictest checklists when on the search to find a herd builder!
- A herd bull that will add performance in just about every breeding situation he is thrown, he ranks among the performance breed leaders for WW, YW, RADG, DMI, SC, HP, and \$M.

**CHESTNUT SOLUTION 579**
MATERNAL BROTHER TO DAM OF LOT 58

- Chestnut Teton 544 is a real-world performance bull that stacks the likes of the Queen Mab cow family with the likes of Tehama Tahoe B767, Deer Valley Growth Fund, and Chestnut Knock Out 204 into one package.
- The dam of lot 58 is a maternal sister to the Chestnut Solution 579 stud that Fox's Angus Farms bought for \$10,000 at the 2020 Watertown Farm Show.
- He ranks top 10% of the breed for WW, YW & RADG. Along with charting top third of the breed or better rankings for \$AxH, \$AxJ, \$W, \$F, \$B and \$C.

- The Long Teton 107 sired cattle have stood up to any level of hype we could have had about him since he burst onto the scene just a couple of years ago. We love the combination of growth and maternal quality that he looks to be going to inject through this consistently high-quality set of sons we are set to sell on February 23rd.
- The high growth bulls selling from lots 59-62 all come with impressive predictions to add gains and pay weight to their progeny. Turn to this sire group for a fresh pedigree of growth promotion than we have used in the past, so they should perfectly compliment a set of Chestnut Angus sired replacement females.

//////////////////////////////////// **LOT 63 CHESTNUT DETAIL 1164**

- A KR Detail 1299 son of a very promising, Blackcap first calving female that has always been pounds heavy, yet it's the prospect of his calving ease that is exceptional!
- The paperwork of Chestnut Detail 1164 very damningly states that he offers sleep all night, calving ease. His +17 CED figure ranks him among the absolute most elite of the registry. On top of that he reports very acceptable about his growth trends, and profit indexes.

//////////////////////////////////// **LOT 64 CHESTNUT ENLIST 684**

- Chestnut Enlist 684 is a herd bull that offers a dynamic combination of calving ease and growth in a high quality, eye appealing package. This son of Chestnut Enlist 812 is curve bending about his calving ease to growth predictions, going from a top 15% BW, to a top 30% WW figure.
- We love the combination of phenotype and EPD predictions that this stud has, he is stout in his feature, yet smooth in his structural design and powerful in his muscle shape.

**CHESTNUT FUSION 61**
SIRE OF LOT 65

- Chestnut Fusion 584 is a son of the promotional sire, Chestnut Fusion 61. 584 is blessed with a set of high growth predictions, that include top 20% WW and top 15% YW figures.
- He is big muscled, big bodied, wide based, thick topped and packed full of red meat. If you're in the business of marketing beef cattle that need to be powerful and profitable then you need to make sure you inspect this son of Fusion 61.

//////////////////////////////////// **LOT 66 CHESTNUT ENLIST 704**

- We welcome the sons of Chestnut Enlist 812 with wide arms as they offer the ideal combination of calving ease and growth promotion. Chestnut Enlist 704 combines the likes of top third of the breed CED with ultra-impressive top 10% WW, YW & RADG figures. Additionally you will find top a 4% MW rank.
- Few can come close to the flip from a 60lbs. birthweight to his 102 WWR that came with over 800lbs. of potent weaning weight.

//////////////////////////////////// **LOT 67 CHESTNUT ENLIST 764**

- Chestnut Enlist 764 is another Enlist 812 son from a Wildes Bomber 6118 influenced dam that sports very impressive curve bending ledger. He goes from top 30% CED, and top 20% BW, to top 10% WW, and top 10% YW. This dynamic breeding piece offers the joys of an easy calving season and some serious power and added payweight come marketing time.
- Pounds will come from not just a genomic package but also the added length of body and impressive muscle shape.

- This son of KR Detail 1299 ratioed a 104 at weaning with 822lbs. coming of his first calving Chestnut Wagon Boss 449 dam. He is certainly quite impressive on paper as well and is possibly as well balanced across the board as we have offered to this point in the offering.
- This stud should have the necessities to be a herd sire of longevity and leave a set of daughters to build around.

CHESTNUT ENLIST 812
SIRE OF LOT 69-71

- Chestnut Enlist 784 is a herd bull that brings together a blend of performance and calving ease in a long sided and big scaled package. He came with a very sensible 65lbs. birthweight, especially when you take into account the massive 827lbs. he brought to the weaning pen and ratioed a 105.
- Calving ease may be the number one selling point here, but he sure comes with a set of growth and performance predictions that make you feel very comfortable about the potential for adding dollars and profit in the long term.

• Chestnut Extensive 864 is built with extra power and has the advantages of added look and structural integrity. He stems back to the maternal influence of the Wetonka cow family that has been responsible for producing some of the most notable individuals of influence to be branded with the CN over the past couple of years.

• Chestnut Extensive 974 provides a phenotype that will inject extra shape and dimension. He looks like he will sire cattle that capture the attention of the most demanding feeder cattle buyers.

CHESTNUT RUBY 157
DAM OF LOT 74

- Chestnut Extensive 1064 continues the trend of high growth, and performance studs that build this offering. Something we have been pushing for generation after generation, because in the end, pounds are what we are getting paid on.
- This beast has always been towards the front of the pack, and has been one that you notice among his contemporaries because of his impressive growth trends and ground pounding stature. He recorded an impressive 113 WWR.

CHESTNUT PEG WJ 874
MATERNAL SISTER TO LOT 76

- Chestnut Extensive 1234 is a direct son of two of the most potent producers of the past decade at Chestnut, in Chestnut WJ Peg 436 and Chestnut Peg 9589 WJ. This Chestnut Extensive 12 son is one that you can turn out with mature cows to see a quick injection of mass, length and scale pressure to your bottom line!
- A maternal sister to lot 76 sold as a bred heifer in the 2024 Bull Sale for \$11,000 to Wade Wilson.

- This Connealy Guard Rail 923E daughter is stamped with a powerful frame and build, and yet she is the kind that that will have an extended career in the cowherd because of her impeccable structural build and added maternal quality.
- She follows the trend of her sire, with a combination of stout features, dense center third and intriguing presence, all parts that make her one we have high hopes for. Yet the power of her pedigree doesn't end there as her maternal granddam, Malsons Savannah 66Y is a well-known matron of the breed. The Malson Savannah cow family, traces to the iconic Greens Lori 5078. 5078 is the paternal granddam of \$400,000 Greens Princess 1012, one of the most prolific Denver Champions turned proven producer in the history of the Angus breed.
- The Savannah cow family is noted for countless accomplishments throughout the history of the Angus breed. The most current influence on the business derived from this potent cow family would be the everlasting impact that KR Casino 6243 has made on the business.
- 629 is a female that offers a pedigree truly lined Angus royalty from top to bottom. Here is a prime opportunity to add the maternal influence of the great Savannah cow family to your operation!

- We love the phenotype that Hoffman Thedford sired, his first daughters are just about to enter production, and we have high hopes for their future in the cowherd.
- The appeal of this female goes much further than phenotypically. She sports a set of EPD predictions that are geared for serious growth! Her WW & YW figures rank top 10% and her RADG & \$F sit in the top 15% of the breed.
- Chestnut Blackbird Susan 317 comes carrying an exciting pregnancy by our new herd sire, Schiefelbein Continental 473 and we think is set to create a quick return on investment.

- Chestnut Blackcap 375 is a standout phenotypically among this set of the bred heifer offering. She sets the standard in terms of maternal functionality, structural integrity, and fleshing ease. She is striking from every angle, offering a picture-perfect silhouette from the profile that is combined with the extra mass and dimension that we appreciate at Chestnut Angus.

- She stems back to the high production, Chestnut Blackcap 665 female that was a dominant force and always brought something of added value to the weaning pen. Maternal sibs to the dam of 375 include, Chestnut Eyes Onyou 651 sold for \$6,000 to Jeremy Ploetz of Minnesota in the Chestnut Angus 2022 Bull Sale, and Chestnut Blackcap 973, who sold for \$5,750 in the Chestnut Angus 2019 Female Sale to Black Pine Angus of Minnesota.

- Chestnut Beauty 372 is a powerful daughter of Chestnut United that is backed by the powers of the Beauty cow family and in turn, the female making Chestnut Royal Stockman 326.
- There is a long line of powerful matrons in the bottom side of the pedigree here, including the stout built, 634 female that sold to 5N Farms of Sutton NE in the 2022 Female Sale. Further back you will find the Pathfinder dam, the prolific CN PF Beauty 9349, that is a direct daughter of Chestnut Beauty 319.
- As precedence will show, you can expect a very impressive production record to be built by this future matron.

SERVICE SIRE CHESTNUT GROWTH FUND 281 (AAA 20095126) · DUE 3/23/25

- Chestnut Queen Lucy 340 is one of the first-born daughters of the Chestnut Fusion 61 sire that remains one of the most impressive mature herd sires we have had the pleasure of running. This lineage of this stock is stout built, and extra powerful.
- Her dam, Chestnut Queen Lucy 554 is a maternal sister to Chestnut Knock Out 204 and stems from the Chestnut Queen Lucy 028 matron. 028 would be one of the shining stars in program history and built the gold standard of cow families for the Chestnut cowherd. The maternal pedigree here is stacked with the good stuff!

- Chestnut Queen Lucy 258 is a daughter of the sire of attraction, Connealy Hayday. He has become a go to sire option in the Krebs program lineup and is doing a very nice job adding value to both his female and male progeny.
- Balance is what comes to mind when describing this female, both type and kind wise and from a genomic standpoint. It is hard to find a flaw here, both phenotypically and on the paper.
- Check into the science here to be impressed, she sports an impressive flip from top 40% BW and CED, to top 10% WW and YW.

**CHESTNUT ENLIST 764**
SON OF LOT 111 | HE SELLS AS LOT 67

- Chestnut Peg 2200 is a female that comes with the potential to propagate big growth progeny, and her EPD tabulations sit her among the top 15% of the breed for WW & RADG, along with top 10% for YW.
- We think her mating to the impressive, Chestnut Fusion 61 that she is due with is set to be a pounds heavy weaning, quick return on investment.

MATERNAL SISTER TO LOT 112

- We love the extra body shape, muscle pattern and density we are seeing from this sire group. And just as importantly, she reads for added growth genomically, and stems from a lineage that supports this with her dam weaning 4 at an average 105 WWR.
- Chestnut Ruby 264 goes back to a Barstow Cash granddaughter, and we foresee her breeding tenure to be successful due to her build of longevity, because in the end, that is a major component of profitability. She will calve to the exciting stud, Chestnut Benchmark 423.

MATERNAL GRANDDAM OF LOT 113

- Those who pay attention to the genomics will surely find delight when they check into the package offered by this Chestnut Redemption 38 daughter!
- Chestnut Sandy 17 sports an incredible set of curve bending EPD's, that place her in the top 15% or better for CED, BW, WW, YW, RADG, CEM, MW, PAP, CW, and \$F. This is a set of traits that directly affect the profitability of her progeny.
- She stems back to the powerful, Chestnut Sandy 647 female that was purchased by VZR Angus and raised the Chestnut True North 841 stud that was purchased by Plum Creek Angus.

- Chestnut Queen Mab 1105 is a new model edition of the beautiful Chestnut Queen Mab 748 that was a sale feature of the 2023 Fall Female Sale. She was one of the highest producing Chestnut Knock Out 204 daughters we had in herd. She passed along all the extras to this Brooking Asset 5065 daughter when it comes to bone, pin width, foot size and power. 1105 has already proven her production capabilities with her first son sold in the Bull Sale last year to Nick Shulze.
- As a heifer calf, 748 was a member of the Champion Pen of Three Angus Heifers at the 2018 National Western Stock Show. Her natural born son, and maternal brother to Lot 115, Chestnut Solution 579 was the \$10,000 selection of Fox Angus of Watertown, South Dakota in the 2020 Bull Sale.

**CHESTNUT BOND 523**
SON OF LOT 127

- The notoriety of the Blackbird Susan dynasty is justified by the influence that these females have made for the Chestnut program, year after year females of this lineage prove themselves of elite status in the cowherd.
- Chestnut Blackbird Susan 991 is an own daughter of Kramers R Stockman 4304 TL, the sire of several of the most impressive females to have worked for the CN. Phenotypically we think this female sets the gold standard of what a mature Angus female should look like.

SON OF LOT 129

- The influence of the Peg cow family will always be a backbone of the Chestnut program, it's hard to the sheer maternal power that this cow family consistently generates, generation after generation.
- A direct son of this QLC LaGrand Forum daughter featured in the 2022 Bull Sale selling to Melissa Rosendahl.
- She comes carrying a pregnancy by the extra high growth, Chestnut Benchmark 423 stud that was retained.

CN BLACKBIRD SUSAN 722
MATERNAL GRANDDAM OF LOT 130

- The three hand selected replacement females that we will offer are sired by the Griswold Cattle promotional sire, Chestnut Perfect Timing 341 "Relax". They offer the eye appeal and feature of being show heifer prospects, but the maternal value and functionality to be incredible producers in the pasture.
- Chestnut Blackbird Susan 466 is one that you need to lay your eyes on in the flesh! She is so burly and massive in her center body yet remains square and wide in her pin set and flawless on the move. You don't make cattle every day that have the combination of presence and power that you will find here.

CHESTNUT PEG 450

- Chestnut Peg 450 stems from multiple generations of high-powered matrons, and she herself sets the bar high from an impressive look and stoutness perspective. Her dam is one we purchased from Raml's, but her pedigree is built from generations of the best in the Chestnut program, stemming back to the legendary 9589 female.
- She casts a very dominating look from the side and comes with a presence and eye appeal that few could mimic. Check out the impressive set of EPD data she comes with too, she is much more than just a pretty face.

CHESTNUT QUEEDY 449

- Chestnut Queedy 449 has the added presence and intrigue that sets her apart, she is aware of her good looks as she struts around the pen and sets down her big and square feet comfortably. Her long and sleek neck elevates high from her withers, and her later maturity pattern projects our vision of her as a big and powerful show heifer that will catch the eye of even the most demanding stockman.
- She is daughter of Chestnut Perfect Timing 341, and out of a maternal sister to Chestnut Queedy WJ 633, meaning that her appeal is much more than just phenotypic.
- The powers of genetic consistency in production will be strong here.
