

The Third Annual
JARED WERNING CATTLE
PRODUCTION SALE
February 14, 2025
Parkston, South Dakota

SIMMENTAL | SIMANGUS™ | ANGUS

On behalf of Kassi & myself, it is our privilege to welcome you to our 3rd Annual Production Sale. We are humbled & honored to be considered by you as your seedstock providers & friends. 2024 marked another year of progress, and though it went by fast, it ended with great excitement for the beef business & record-high prices nationwide. It's great to see all your hard work & countless hours of being caretakers pay off. Though we don't get away often, it sure was rewarding for us to witness JWC customers have great success at local sale barns in December/January. Keen bull selection & genetic advancements, coupled with your management practices are putting more dollars in your pockets than ever before.

As you prepare to flip through this catalog, there are multiple topics we would like to talk about. First would be DNA. Here at Jared Werning Cattle, we are adamant that we Parent Verify & GGP 100K GE DNA every animal. The 100K DNA genomics provide you the most accurate & manipulation free data there is to offer. This allows you to buy with confidence knowing exactly what you are getting when the gavel drops. We guarantee it's the most transparent & straight forward way to present EPD data to you in the most accurate way possible.

Our herd health is another area of our business that we take great pride in. Years of experience & discipline have led me to the conclusion that as breeders, we must do herd health testing every year to ensure maintaining healthy & safe animals that you can be confident introducing into your herd. Annually we John's test every cow/herd bull & all sale animals 18mo. & older. Our recipient co-op herds are held to the same standard, running a full health panel on every recip prior to any embryos being transferred. Herd health starts long before day one. Great attention to detail of our feed/mineral program, veterinary care protocols, and things as simple as living environment - from lot management to daily hand-picking soiled bedding from the calving facility. While not feasible at every operation - in our mind, these practices are the only way to adequately approach herd health & sure helps us sleep at night knowing that we are doing our due diligence.

As always, you know how much we weigh on the phenotype of our cattle. As you view these animals throughout this catalog & in person, we think you will recognize the JWC difference. The structural integrity & eye appeal of the animals is meant to assist in longevity, productivity, and to leave lasting impressions on you & the buyers of your animals. Putting our DNA genomics work & matching it with our threshold of physical quality is what we take great pride in. It's our job to sort through EPDs on paper & actual do-ability & real-world function to make animals that can be utilized to make your herd profitable. It's easy to breed for the big numbers, but it's hard to do so & maintain fleshing ability, longevity, and eye appeal. I spend too many hours in a day looking at different matings, new bulls, analyzing EPDs, and dreaming about making cattle better. It's always an unfinished job & is never perfect but we sure have fun learning a little more each year how we can continue to push the needle in the right direction.

The most rewarding part of this business is being able to share it with you, our friends & customers. Some days are tough & others are incredible, being able to connect with you all, and together - share our experiences makes it all so worthwhile. A short few years ago I never dreamed of having our own sale or ever writing a sale letter, but we love the life of raising cattle & getting to do it with the help of you all. What this community & you as friends & customers have done for us the past two & a half years brings tears to my eyes. Nothing I can say will ever express how grateful we are for all of you, and how much more appreciation we have for the people in our lives.

About the cattle - the set of bulls we are offering is our proudest achievement yet. Come see them in person, ask questions, and make a game plan for what best suits your needs. This group of bulls has been the most enjoyable in terms of attitude, performance, health, and new genetics. I will never forget the bulls of 2025. The bred females every year must fill the shoes of the previous year. This group I think, did just that. It's fun for us to offer direct daughters & granddaughters of legendary cows of influence like 8543U, Angel 2870Z, Angel 9005G, Angel 7113E, Angel 7114E, Missie 810, and Victoria B396E. These donors have built the program & paid dividends for hundreds of cattlemen nationwide. The service sires to these females add even more excitement, featuring the service of ZTGC Just Cuz, Duff Rizz, and the highly anticipated 2/F JWC Unassisted 675K! To show our commitment to the bred heifer offering, we are selling every home raised bred heifer except two. The two we are keeping for donors will still be available via a choice flush lot in this very sale.

If it's possible for you to view these cattle before sale day we encourage that you do so - they are always available for viewing at your convenience. Again, thank you for considering us for your seedstock needs & thank you for giving us the opportunity & time of day. We are excited to see & visit with you on or before sale day February 14th!

*Sincerely,
Jared and Kassi*

To venture out on one's own takes grit, determination, and unwavering focus—qualities that empower a spirit to persevere toward the goals it sets. The right tools, equipment, and the solid foundation built from past experience help to guide the timing and scope of early successes. In today's world, with the current political climate and challenges within the banking industry, it might seem downright crazy to pursue any “fresh start” in agriculture. Yet, the agricultural industry is buzzing with young talent—individuals who are ready to sacrifice, show patience, and explore innovative options to secure their future and that of their families.

As you read through this sale book, you'll find an opportunity to do business with a couple who approach each move with strategy, poise, and enthusiasm. Jared and Kassi live with a fearless mindset, taking on each day with an “everything to gain and nothing to lose” attitude. It's contagious, and for those who have engaged with the JWC over the past three years, their energy is palpable.

The JWC brand is rapidly becoming a household name in the industry. Jared and Kassi are passionate animal agriculturalists, and as a young couple, they continue to carve their path into the beef business record books. Their shared vision is one of consistently producing quality livestock, always focused on the fundamental traits of build, structure, fertility, udder quality, and longevity. Jared understands better than most that the longer a cow performs her intended role, the more profitable she can be. W/C Angel 2870Z, a true matriarch, embodies the qualities that ensure a cow's longevity, just as her dam and maternal granddam did before her. If you're looking to invest in a timeless cow family with enduring influence, now is the time to consider the prefix that is quickly gaining traction in the industry.

This year's offering is the best Jared and Kassi have ever assembled in both quality and quantity. Once again, it will be infused with the dominant donor influence of 2870Z and her elite tribe of daughters, who make up the majority of the donor selection. 9005G will be the standout, but sisters like 7113E, with the same solid foundation, will be hard to outshine. The demand for their genetics continues to grow, and that momentum is showing no signs of slowing. One of the hottest bulls in the industry, JWC Living Proof—selected by Wheatland Cattle Company for \$75,000—is now producing his first set of calves. “Just Cuz” is making waves in calving ease genetics, and this is just a glimpse of what's inside this year's offering. Cow families dominate the pedigrees throughout, and that's why the bred females are in just as much demand as the herd sires. This is a program that represents a well-rounded approach—exactly as it should be.

We invite you to join us for this annual seedstock and commercial rancher event. You won't leave hungry or thirsty, and you're sure to enjoy the hospitality and fellowship. Should you need any advice or assistance, feel free to reach out to Jared, Kassi, or anyone from the Innovation Ag Marketing team. We look forward to seeing you at the sale!

God bless our nation and our troops. As always, enjoy the stock.

Sincerely,
Graham Blagg, Jared Shipman, Tim Anderson

The 3rd Annual Event

Sale Location

Dan & Patti Mogck Farm
1001 E. Glynn Drive
Parkston, South Dakota 57366

Ty Webster: (712) 551-7943

BULL DEVELOPMENT & DELIVERY:

All bulls selling can be left at Jared Werning Cattle at no additional cost through April 15, 2025. At that point we will semen test, administer pre-breeding shots, worm, pour, and freeze brand your bull. Jared Werning cattle assumes full responsibility of injury or death loss while animals remain in our care.

TRUCKING:

Jared Werning Cattle offers free trucking to customers in South Dakota and surrounding states. We will gladly assist in coordinating delivery beyond these boundaries at the expense of the buyer.

With many of the bred heifers coming close to their due dates we would like to arrange trucking and/or pick-up within a few days following the sale. We recommended the following trucking options that will provide a professional, cost effective, and reliable transportation of your new purchase(s).
Brandon Bertsche: (815) 867-0547, Dick Coleman: (765) 461-0954 or
Craig Kaisand: (641) 891- 9666

INSURANCE:

James Bessler: (815) 762-2641

SIGHT UNSEEN GUARANTEE:

If you are unable to make it to the sale, please feel free to reach out to anyone associated with Jared Werning Cattle or authorized sale representatives to help find the best fit for your operation. Please reach out to Jared Werning ahead of sale day to discuss the cattle in more depth. 100% customer satisfaction is guaranteed!

EVENT LIABILITY:

All persons who attend this sale do so at their own risk. Jared Werning Cattle, facility owners or sale personnel assume no liability for accidents.

LODGING:

Holiday Inn Express & Suites: (605) 292-9292 8
10 E Spruce St. - Mitchell, SD 57301

VIDEOS:

Videos of cattle will be available prior to the sale. The videos will be available for viewing at www.DVAUCTION.com and INNOVATIONAGMARKETING.com

TERMS & CONDITIONS:

All cattle will sell under the suggested terms and conditions of their respective breed associations. All registered Simmental cattle selling have been parent verified, DNA is on file and all have been tested via the GGP-100K qualifying them as AI sires and Donor Dams and supplying them with genetically enhanced EPD Data. Jared Werning Cattle also retains the right to the refusal of any/all bidders/buyers at any point during the conduction of the auction.

ANNOUNCEMENTS:

A supplement sheet will be available sale day with updated information, corrections, and additional information. This sheet and any announcements made sale day from the auction block during the sale, will take precedence over printed material associated with the sale.

BULL GUARANTEE:

We guarantee that all bulls sold through our sale are fertile. If a bull is injured anytime in the twelve months following the sale, that makes him functionally infertile, we will provide a replacement bull or issue a credit in following sales, equal to the purchase price minus the salvage value received for your bull. The sale credit can be used on bulls or bred heifers the following year. This is not an insurance policy. The guarantee is in addition to the sale terms and conditions of the American Simmental Association and American Angus Association which apply also. Jared Werning Cattle retains the option to clone all lots selling.

SEMEN INTEREST:

Jared Werning Cattle retains one-third semen interest on all bulls selling; meaning if Jared Werning Cattle should choose to collect semen on any sale bull, they would have the option to do so at the seller's expense. In addition, if semen is sold on any bulls that Jared Werning Cattle collects, revenue shall be split with seller retaining 1/3 of proceeds. Buyer will receive full possession and salvage value unless otherwise specified or announced.

BRED HEIFERS:

Bred heifers have been pregnancy checked by a licensed veterinarian and are guaranteed to calve within the catalog printed time-period. Jared Werning Cattle retains the option to clone all lots selling. JWC also retains the right to ONE successful flush (minimum of (6) transferable embryos) of all females selling unless otherwise noted in the catalog.

BRED HEIFER PARTNERSHIP DETAILS:

Jared Werning Cattle will be offering 50% embryo interest in a select few bred heifers that are noted throughout the offering. The buyer is ONLY purchasing 50% embryo interest, with no possession. Buyer will receive 50% ownership of the first born natural calf that is being sold in utero. It will be decided between buyer and seller what the best marketing route is for the first born calf. The 50% embryo interest being purchased will be structured in one of two ways:

1) IVF cycle/conventional flushes will be split evenly between the two parties involved and all costs associated with embryo production will be divided evenly.

2) The second option would be to alternate IVF cycle/conventional flushes if the sire choice is not able to be decided on between the buyer and seller. Costs will be distributed solely to the partner that the individual IVF cycle/conventional flush has been designated to.

For more details please feel free to reach out to Jared Werning at (605) 933-1661 to discuss the mating and marketing options that sell all-inclusive with this investment opportunity!

VOLUME DISCOUNT:

A volume discount can be applied if several bulls are purchased by one firm. The discount begins with your third bull and continues as follows:

3 bulls = 3% discount; 4 bulls 4% discount; 5 bulls = 5% discount; Etc.
10 or more bulls = 10% discount. There is no discount on bred heifers.

SALE CREDIT

Should sale credit be offered for any reason, it must be used within 12 months (1 calendar year) from the date of original purchase.

The Bulls

lot 1 JWC JOURNEYMAN 224M

Presenting the 2025 sale bull crop has been a moment that we have been excited for since the day we starting calving last spring, it is filled with the most powerful pedigrees we have been able to offer to date, and we think that the best cow families in the business all carry strong representations throughout this offering of stout, ranch ready bulls! Leading the charge is the potent combination of two cow families that are built around the premises of quality beef, and not only is this what you will find in the flesh, but they also build a strong case around this claim on the paper. OMF Journeyman J24 is breeding the kind that work in this business, the cattle come easy, grow heavy, and are built right. The combination behind the first seven bulls in this offering of OMF Journeyman J24 and W/C Angel 9005G has aligned the stars. The 9005G sons have been the most popular group of bulls the past two years with ranchers that demand pounds and pay weight. That is exactly what you will find here with 224M and 274M both genetically and with their own roar performance data. They rank in the top third of the breed or better for weaning weight and yearling weight, average daily gain and ribeye area. This pair that begins this mating not only bring pounds to the equation, but do it in a balanced and eye appealing package, and we think provide a dynamic option to an operation that looks to retain females or bulls, just as readily as they look to add value to feeder cattle.

JWC 9005 ANGEL 323L - Maternal Sister to Lots 1-7
Selling as Lot 106

lot 3 **JWC JOURNEYMAN 324M**

A homozygous polled and homozygous black stud that offers some added calving ease advantages and still remains in the top third of the registry for average daily gain. He personally recorded an impressive 743lbs. at weaning time and continued that trend towards maturity with over 1250lb. at a year.

OMF JOURNEYMAN J24
Sire of Lot 1-7

lot 4 **JWC JOURNEYMAN 354M**

This member of the 7 strong flush brothers has always been ahead of the pack, he came to the weaning pen with over 800lbs of payweight, and is one that will be easy to find on the trip to Parkston as he comes with a powerful muscle shape and stout, rugged structural build. This baldy faced stud is an absolute powerhouse from end to end, and has the genetic backing to inject serious ammounts of growth into his progeny.

The sons of 9005G have become very popular over the past couple of years, as they are not just built for the long haul from a structural and durability standpoint, but they are cattle that meet the performance and power checklist of the most astute, and profit driven stock people. This son offers the added consistency of being both homozygous polled and black. 154M stands out from a marbling standpoint among the brothers as well!

With over 700lbs. coming to the weaning pen, this blaze faced, expressive muscled purebred is one that catches the eye with ease. He comes with an intriguing look, top 2% REA ranking and both BW and YW figures among the top 40% of the database. He would complement an Angus based cowherd perfectly!

*lot* 7 JWC JOURNEYMAN 234M

lot 8 JWC FAVOR 184M

A trio of flush brothers that are geared for growth and pounds. In times like we are seeing now, and predict for the future, there has never been a more important time to add growth genetics and its versatile growth promoting bulls like these that come from the LCDR Favor mating on W/C Angel 9005G that need to be seriously considered. They rise to the top when it comes to comparing for the ability to inject pounds to their progeny, and consistently they offer top third of the breed of better, WW, YW and ADG figures. Full brothers to this trio include the \$10,000 JWC Favor 343L of Aaron Weber's and JWC Favor 363L that now works for Yardley Cattle. JWC Favor 184M has found many visitors of recent, he is maturing into a big ended, long spined and extra heavy duty herd bull prospect. He has added shape and width, along with a very impressive foot and bone design. Also take note of his very acceptable 73lbs. birthweight that flipped to a massive 1379lbs. yearling weight.

The burliest and huskiest shaped member of the trio of brothers is JWC Favor 244M. This blaze faced brute is wide ended, round bodied and very masculine in his look and shape. The powers of both the 9005G donor and the legendary WS Miss Sugar C4 matron have injected some serious quality in all three of these power bulls.

lot 11 JWC GUARDIAN 584M

The \$100,000 CLRS Guardian 317G has become one of the Simmental breeds most notable and reliable options for curve bending growth and carcass quality, he is the kind that can "do it all" from a genomic and EPD standpoint. His influence will go down as being one of the most versatile herd bulls in the registry with a EPD makeup that many would have thought would be unattainable, sporting top 5% or better rankings for BW, WW, YW, Milk, MWW, Stay, CW, MARB, REA, API & TI. The same all around quality and impressive trait dominance can be expected of the two sons that are represented in this 2025 sale draft. The most exciting part about these two is that not only are the genomics impressive of paper, but you will find that the real-world quantitative measurements they record reflect them accurately. A full brother, JWC Guardian 1023K sold for \$9500 in 2024 to Carl Baier of Delmont.

CLRS GUARDIAN 317G - Sire of Lot 11 & 12

lot 13 JWC RIGHT NOW 374M

There is no doubt that the heritability of feature and quality is strong with the mating of MR SR 71 Right Now E1538 on the dam of distinction, W/C Angel 9005G. These full brothers come as no surprise either, as they are just another feather in the cap to this mating that has been a reliable source of quality for a few years now. This pair are full brothers to the \$20,000, WC 9005 Angel 121J female that sold in the inaugural JWC Production Sale to Moore Land & Cattle. For several years now, MR SR 71 Right Now E1538 has been one of the most impressive combination sires in the registry, they are stock that come easily and the right shape, but then hit the gas all the way through to weaning and beyond. Combining these real world attributes with the impressive 9005G provides stock that are functional in their structural kind and impressive in their growth pattern. This pair of bulls offer a leading degree of versatility, and would be the perfect option for a stockman that is planning to keep an incredible set of replacement females from their service.

The next pair of brothers are FULL BROTHERS to the \$192,500 W/C Bet On Red 481H. The dam of this trio is W/C Angel 7113E, has emerged as one of the absolute most consistent and reliable producing daughters of the great 2870Z, as not only did she produce Bet On Red, but she is the dam of the 2024 high seller, JWC 2/F Living Proof 283L. High sellers, show ring champions, and individuals of influence descend from this proven and prolific cow family. Even though these brothers already come with a pedigree that stirs plenty of attention, their incredible build and unique features elevate them into a whole new realm of production potential. These ET flush mate brothers are consistent in the fact that they offer tremendous shape, dimension, and capacity and in the same breath, we appreciate the added look and extension that each of these bulls possess. A full sister to the pair, JWC Roulette 224K sold for \$43,000 in the 2024 Production Sale to Horstman Land & Cattle, and a full brother, JWC HARL Fort Knox 2217K sold in 2023 for \$10,500 to Hawley Cattle Company.

There is no stopping the maternal powers of the legendary, W/C Angel 7113E donor, regardless of the mating thrown her way she proves to have the genetic base to produce cattle that ooze quality. The mating with Next Level aligns two phenotypic leaders of the Simmental breed, and the synergy has proved to hit a home run with the trio of sons here that represent the flush. These three are consistently built with a square and flexible skeleton, round body shape and incredible amount of eye appeal. Maternal brothers to the Next Level sired brothers include the \$192,500 W/C Bet On Red 481H, the \$22,000 2/F JWC Hark 312L and the \$75,000 JWC 2/F Living Proof 283L. The combination of phenotype, pedigree, and presence that comes from the 7113E influence has become quickly evident, and introducing her influence via one of these impressive sons could help push your cowherd into the future.

Absolutely one of the most potent flushes on W/C Angel 7114E yet! This homozygous polled pair of brothers sired by Next Level have been exciting from day one! The purebred papered stock offer high quality options for cattleman from coast to coast, and choices and preferences can be made regarding their real world performance and EPD tabulations. The Next Level sired stock have been in high demand, with a list of daughters that includes prices tags at \$190,000, \$83,500, \$49,000, \$36,000, \$29,500, \$26,000, \$26,2000, and several more from \$10,000 to \$20,000! Two full brothers to this pair sold last year to average \$8,400 and sold to Hawley Farms & Tops Off Cattle Company. We think very highly of this set of brothers, and think each has their own ability to take your program to the. . . .Next Level.

You are in the right spot if you're looking for an elite phenotype, purebred herd bull to add to the battery because we have a variation of pedigrees supporting the impressive lineup of bulls. This W/C Bankroll 811D son is a full brother to one of the highlighting red hided bulls in the 2024 Production Sale, JWC Bankroll 203L, that was the \$10,750 selection of John Dixon of Washington. Additionally, a full sister to 194M sold in the inaugural sale for \$43,000 half interest, to Harrell Cattle Company of Illinois. Their dam, W/C Angel 7114E is the full sister to Angel 7113E that also has a strong representation in this sale. She is proving to be one of the most consistent generating females in program history, producing with surefire reliability and impressing in production, regardless of sire choice.

This purebred stud will make you stop in your tracks, because he is certainly impressive. Being a direct son of the \$300,000 TRCC Pandemic, he is a prime example of why that sire has a place in this business, because not only does he have the extras you would expect in regards to eye appeal, smoothness and structural integrity, but he offers the beef business plenty of good from a product and muscle standpoint as well. You will find he has an extra robust ribcage shape, impressive density of muscle and bone, attractiveness from the profile and menacing composition when viewing them from the rear.

lot 31 JWC INNOVATOR 884M

Innovator 533H is a CDI Innovator 325D son of the renowned, herd bull generator, WS Miss Sugar C4. He complies two of the best to have done it, and both have built reputations of quality around stockmen that are profit driven and rely on their cow calf operation to generate income. Combine this with the likes of W/C Miss Angel 2870Z, and we aren't sure on what more you could hope for in the equation. These two herd bull prospects have a pedigree that aligns the most iconic in the Simmental breed. If you are demanding added payweight then these two fit the bill as well as any, they have matured into big, husky, masculine prospects, that hit the scale heavy. Additions of WW, YW, CW, REA, MARB, and YG can be expected, along with not sacrificing too much calving ease at the same time. Truly a pair of full brothers that will catch the attention of stockmen that are looking to add profitability to their cowherd in quick fashion.

A herd bull that has always become the topic of conversation to visitors of the offering over the past year. This own son of the legendary, triple crown winning, MR HOC Broker is one that pushes the envelope from a burliness, power and ruggedness standpoint. He always has been and continues to be one of the widest based, boldest backed and expressively shaped creatures we have had the pleasure of raising and developing. Every angle of inspection here finds an impressive view. Needless to say, the pedigree that supports him only adds feathers to the cap of his ability to be a changer. Being a direct son of the highest revenue generating female known to the history of the Simmental breed, and a maternal brother to some of the most prominent and predictable AI sires ever utilized, he offers the security of consistency and known maternal power with his production abilities. Not only is he built incredible, but he has hit every stage of maturity with impressive numbers, and sports an EPD profile that reads with balance. A true standout of the offering that is worthy of an in-person inspection.

Either side of the direct pedigree of the pair reveals two divisions of royalty within the Simmental Breed. OMF Journeyman J24 has become a heavily desired source of paternal excellence, and as his progeny mature and dive deeper into their production careers, it's now that his influence is truly being realized and acknowledged. Maternally you will find the legendary WS Miss Sugar C4 who was purchased by Forest Lucas for \$210,000. She is without question one of the Simmental breeds most notable females, with over 150 progeny recorded in the American Simmental Association Herdbook that includes a long list of breed influencing sons such as, WS Proclamation E202, LCDR Favor 149F, KBHR Revolution H071, LCDR Progressive 106G, LCDR Impact 134F, HLTS/CLRWTR Ahead of Time K1 and KBHR High Road E283. Two of the breeds most potent forces come together, in the exclusive mating of OMF Journeyman J24 with WS Miss Sugar C4. This is a bull that can withstand the hype one would have when thinking about combining these genetic gems, being homozygous polled and black with outlier phenotype, genuine muscle shape, foot quality, masculinity, impeccable structural integrity and an EPD package that rivals the best in the business. You'll have to search hard to find a hole here.

lot 40 JBSF JWC MIKE 475M

JBSF JWC Mike 475M sports a lineage that is littered with several of the Simmental breeds most phenotypically impressive individuals, and we think the portion of his pedigree has delivered the goods with this herd bull prospect! Sired by a bull that we think has always been ahead of his time, W/C Relentless 32C and out of a very impressive full sister to the National Champion, America female that was campaigned by the Sullivan firm, it should come as no surprise that you are going to find an outlier in the flesh here. He sports a DNA package of being homozygous polled and homozygous black, and has answered any questions you may have about his potential to perform from his EPD package with very positive real world stats. There is no science that could comprehend the impressive specimen that Mike 475M has matured into.

W/C RELENTLESS 32C - Sire of Lot 40

lot 41 **JWC EPIC 564M**

An OMF Epic E32 son that is geared for added pounds! His dam, TBR Ms Sugar G027 is a LCDR Witness 541C daughter of WS Miss Sugar C4. He sports a top third of the breed TI, and top 10% WW, along with top 15% YW figures. This progressive stockmen's type of bull also comes with the security of being both homozygous polled and black.

OMF EPIC E27
Sire of Lot 41

lot 42 **JWC TURNPIKE 294M**

There are highlights all the way across the EPD profile of JWC Turnpike 294M. His injection of growth and power to a set of British based cows could prove to be a very profitable move for a cowherd that is looking to increase pay weight and red meat yields. He is a direct son of the 6026D donor that was the \$40,000 selection of Ferguson Cattle Company and is a three quarter sister to the \$202,000 W/C Bank On It 273H, another generation back he stems from the powers of the KS Miss Sequoia Y770 female. He is the result of an embryo purchase and was raised by our good friends at Sumption Farms. There was no question as to whether or not he was going to be sifted onto the load of JWC embryo calves when they came home this fall.

This set of bulls is by far the best representation of the donor battery that we have been building over the past couple of years here in Parkston, and the RJ JWC Sherri 0151H donor is certainly cementing her place among the females that are set to carry us on into the next generation. She is an exciting, young Profit daughter who is a role model in her build and kind. 4069M is a full brother to a set of bulls that were very well received last year, and proves just again that this is a mating that consistently makes them stout and high performing! He is heavy structured, thick stifled and wide backed, and still comes designed upon a sound set of feet and legs and read with longevity of build. This 2024 born model is homozygous polled and will offer the added growth and performance that comes from the W/C Kaiser 240J influence. The 7 full brothers that sold last year averaged \$7800 and topped at \$14,000 selling to Ben and Lacey Lodoen of North Dakota.

A pair of half-blood sons of W/C Bankroll 811D that stem from the incredible, Seldom Rest Lucy 0075 female that we think sets the standard of excellence from a look and design standpoint. She is one of the most impressive mature cows that you will ever lay your eyes on, and screams longevity and high productivity, her udder quality and structural integrity are of the utmost quality. It is pretty evident that she has passed this along to her sons in a very dominant fashion. A full sister to this pair sold for \$16,000 this past fall! They are both homozygous polled and homozygous black, built upon an incredible structural base and have a big and bold muscle shape.

lot 50 **JBSF JWC MOTO 481M**

The Revelation 2K sire group has become a very hot commodity after this rookie calf crop, show heifer prospects have found some serious price tags, and you can plan on there being a very strong representation this coming year as the semen sales have been rampant. JBSF JWC Moto 481M is a rugged built, massive footed, burly backed stud that has all the extra features that we are coming to expect from the Revelation influence. He came to the pen with a big 734lbs. weaning weight coming off his half blood, LLSF Pays To Believe ZU194 sired mother.

REVELATION 2K
Sire of Lot 50

lot 51 **JBSF JWC MELO 476M**

JBSF JWC Melo 476M is a homozygous black and homozygous polled, purebred that is backed by JBSF How Bout Me 015H, a young MR HOC Broker daughter that is steaming towards the front of the Bloomberg donor pen. His maternal granddam, JBSF Big Mama 3F was shown to success by Whitney Walker, and stems from the potent, W/C Relentless 32C x Brooks Steel Magnolia X57 mating. He has a trademark quality foot shape, impressive length of body and will inject overall phenotypic quality into his progeny.

A very neat built purebred that comes with a set of perfect markings. His dam is a direct daughter of the National Champion, Hook's Bella B72 that was the Grand Champion Percentage Simmental Female at the 2016 National Western Stock Show. She is an elite built Bankroll 811D daughter, that brings together unique phenotype with a set of EPD predictions that cross the bridge between phenotype and genomically driven cattle. Check in here to find favorable BW with big growth figures!

JWC Revolution 714M comes both homozygous black and polled, and sports an awesome set of curve bending birth to growth figures. With a top 10% CED that flips to top 15% WW, it should sure get the most progressive stockmen pondering his worth for their programs. His dam is a stout built, first calving WS Proclamation E202 daughter that did an awesome job weaning off 714M to record a 107 WWR.

lot 64 JWC CASINO 114M

A pair of purebred Angus studs that have us very excited about being in the business breed. These two full brothers stem from the synergy of the heavily sought after, KR Casino 6243 and our flagship Angus female, JCC Missie 810. The JCC Missie 810 donor has quickly built herself a reputation for delivering high quality, impressive phenotype progeny, that have real world shape and dimension. We could not be more proud to have her influence anchor our Angus program, and think that this pair of sons are set to promote her reputation even further. Maternal sisters to the pair include, Austin Foss' JWC Cruella 21J female that was the Supreme Champion Female at the Minnesota Beef Expo, and the pair of SCC SCH 24 Karat 838 daughters that were highlights of the 2024 fall sales of MPJ Cattle Company. We think this pair of Angus bulls offer the business a lot of good, they come with a good foot, heavy structure and high quality beef characteristic.

Angus royalty lines the pedigree here! 124M is a maternal grandson of the Kruse Missie Primo 147 donor that works for Schrag/Nikkel. Jake Nikkel showed her to success across the nation, and her show career was highlighted by being the 2018 NAILE Reserve Grand Champion Junior Angus Heifer. This past fall, a Maine Anjou sired daughter of 147 was their \$100,000 high seller, and has already hit the ring to find success for the Pryor family, and prior to this, Wyatt Lange and Tray Zabokrtsky campaigned a daughter to being the Junior National Champion MaineAngus and 4th Overall Supreme Breeding Heifer at the 2023 Cattleman's Congress. This Young Dale Honour 16H son is built with plenty of shape and turn to his hind quarter and ribcage.

Here we present a proven herdsire that leaves nothing to the imagination about his ability to propagate quality, because the proof is in the pudding, through the set of sons that you will find in this same sale! W/C Mainstay 885J was the high selling bull from our inaugural 2023 Production Sale. He is a rugged, stout featured, bold bodied half-blood herd sire prospect that is built to last, and has been a prevalent and impressive breeder. He too is homozygous black, and comes with an elite performance oriented number profile to complement his added shape, length, and dimension. We still have plans to use him in the spring, but just think he offers too much good to the business to be standing stagnant in the fall, and for that reason you will find his fall possession available for sale on February 14th! if you're serious about locating a SimGenetic herd sire prospect that has program enhancing credentials then pay attention here to this proven stud!

JWC Next Level 293L proves that quality sells all the way through this offering. A phenotypic standout, he is sired by the Next Level sired stud that has proved himself with two years of progeny that have been received incredibly across the business. Maternally, 293L finds support from the W/C Angel 7113E female that should need little introduction to Simmental enthusiasts. She is the dam of lots 16-21 in this sale, and full brothers to this homozygous polled stud sell as lots 19-21. This age advantage stud is built for the long haul, and we think has the capabilities to outproduce himself in the breeding pasture. Purebred Simmental, baldy faced and has matured with performance and growth, this stud is built to inject long term profits.

lot 70 **JWC 1883L**

It will not take long for you to find this phenotypic outlier! Check out the only son of the \$400,000 Profit to trade hands this year in Parkston. He is backed by a daughter of MR HOC Broker that is further influenced by the maternal excellence of the WAGR Dream Catcher 03R sire line. A purebred herd sire prospect that is unrivaled in terms of length, striking appearance and masculine feature. He is one that we admire from a structural integrity, and flexibility standpoint. A true athlete on the move! The dam of 1883L, WFR Reba E714, stems from the legendary, Oval F Nicolette N443 female that built the Adcock Land & Livestock program, she has 86 registered progeny, and was a very dominant champion. A high quality Purebred herd sire prospect that has the quality and pedigree to follow any AI protocol. Bid with confidence here!

PROFIT - Sire of Lot 70

lot 71 JWC AHIN BANKERS DREAM L310

A big and stout, high percentage stud that is not only powerful, but comes with advantages of structural build, look from the side and a very potent cow family backing. He himself was the Champion Percentage Simmental Bull at the North Central Simmental Regional Show, and Minnesota State Fair this past summer. His dam, was the Reserve Supreme Champion Breeding Female at the Minnesota State Fair, and stems from the same cow family that produced the legendary Colburn Primo 5153. His maternal granddam, was also a feature in the show string of Sara Sullivan's. A pedigree that is lined with some of the most popular, and accoladed cow families in the Angus and Simmental show cattle business.

JSUL SARA'S DREAM 0125H

Dam of Lot 71

lot 72 JWC HERALD 4183L

JWC Herald 4183L is a son of the full brother to RFS Heavy Hitter H45, RFS Herald H104. We love the masculinity, rugged design, and sheer performance that this half-blood herd bull prospect possesses. The dam of 4183L is sired by the industry icon, PVF Insight 0129 and traces back to the famed Lazy H Bar Forever Lady 5001, the cornerstone female of Barry Hageman's historic Angus breeding program. This baldy faced, half-blood is homozygous black. He is a performance oriented bull that records top third WW, and top 20% YW and ADG traits.

lot 73 2/F JWC PRIVATE STOCK 357L

The sons of HPF Victoria B396E are consistently super impressive in their confirmation, presence and structural kind. They too come with very moderate and acceptable birthweights, yet still offer value from a growth standpoint. The progeny of this maternal line have a look of quality that is accepted just as readily in the showing as it is by stockmen making money over the scale. Multiple daughters have won big banners on the chips of shows across the nation. This son of "Vicki" by Rocking P Private Stock H010 came light but has matured into a brute, and is certainly an impressive creature to find on sale day.

2/F JWC VIGILANCE 306L
Maternal Brother to Lot 73

lot 74 W/C JWC TRIDENT 9727J

This mature aged breeding bull has been one of the go to calving ease, heifer safe, herd bulls we have been utilizing over the past few years. He has done us an awesome job, and his predictions very accurately describe the real world data we have recorded when it comes to calving ease. He has sired over 20 progeny in the ASA database, and several of which we have marketed through this sale over the years, including the lot 27 bull and three bred heifers in this year's sale. Across the board profitability, and a build that still has many successful breeding seasons left in it, W/C JWC Trident 9727J sells ready for his next duties!

This pair of full sisters that lead off the bred heifer division are the kind you can build a program around, as they impress from every aspect, genetically, phenotypically, and from a pedigree standpoint, we think they tie it all together. Being direct daughters of the immortal, Miss Werning 8543U ties them genetically to a lineage of superstars within the breed. Her influence has built this offering, with five direct daughters, and 15 granddaughters. Her representation is even stronger in the bull divisions. These two females stem from a fresh mating on the legend, being sired by the \$110,000 OMF Journeyman J24, the sire of last year's high selling bull at \$75,000 to Wheatland Cattle Company, that was out of a granddaughter of 8543U. On the paper this pair impress across the board, as they both sport highlights for traits that directly influence profitability and convenience. In the flesh you will find them to be built with an elite level design, being wedged in their shape, bold in their turn and elegant about their silhouette. They truly offer a dynamic look of quality and set the foundations for a high level investment opportunity.

ZTGC JUST CUZ 52K

Service Sire to several females in the offering

The next daughter of the \$8 million producer is sired by the \$200,000, EC Rebel 156F. EC Rebel 156F would be seen by many as the leading son of the \$400,000 Profit in existence. While his usage has not been as wide spread as some of the most popular AI sires in the breed, his strike rate of quality is probably as high as any. As more breeders surround themselves with his influence, there is a realization that perhaps EC Rebel 156F is one of the best kept secrets in the business. Daughters of EC Rebel 156F have topped several of the most highly regarded production sales in the nation, with cowboys from many walks of life appreciating the undeniable quality that seems to come standard issue with the influence. This purebred female has an incredible presence and look of quality. She is built intriguing in her neck attachment, rugged in her structural build and valuable in her genetic makeup. Her mating to ZTGC Just Cuz 52K aligns the phenotype gods in our opinion.

This pair of sisters from the 8543U matron are sired by the \$175,000, FRKG CKCC Platinum 009H ET stud that topped the 2021 CK Cattle Production Sale, and has since become an intriguing option to add expressive shape, undeniable look and a high quality design. Those same descriptions can be used to describe the pair of full sisters that you will find selling here. They are direct daughters of the most prolific female to ever be blessed with an ASA registration number, Miss Werning KP 8543U who has generated in excess of \$8 million in her lifetime. They too have the backing of the best cow lineages that have built the Effling & Wager family cowherds, where you will find the likes of WS Pilgrim H182U, WAGR Panarama 204Z and 3C Melody M668 BZ in their paternal pedigree. This pedigree lineup ties them to just about every prolific producer in the breed. Lot 104 sells bred to ZTGC Just Cuz 52K with a purebred calf, while the incredible phenotype, donor prospect lot 105 sells open and ready for rampant embryo production!

RUBYS TURNPIKE 771E - Sire of Lot 106 & 107

Leading the daughters of W/C JWC Angel 9005G is a pair of full sisters that are sired by Ruby's Turnpike 771E. The Ruby's Turnpike 771E cattle have always been held in high regard when it comes to foot quality, structural ruggedness and dimensional phenotype. His daughters have built a long lasting legacy as over producers in the pasture now too, always coming back to the weaning pen with a leader of the pack. A flush mate brother to these females was a highlight of the yearling bull division last year, JWC Turnpike 303L was a popular choice between stockmen that were searching to add growth, carcass yield and ribeye area, and was eventually the \$11,500 selection of Wade Horstman. These purebred females deliver a high performance genomics package, along with an incredibly stout and rugged phenotype. The lot 106 female comes with the best predictions for WW, and is bred for a March born bull calf by 2/F JWC Unassisted 675K. Lot 107 comes both homozygous polled and homozygous black, and will have a Bridle Bit Recharge K256 sired heifer calf at side on sale day!

JWC GUARDIAN 584M - Full Brother to Lot 109 sells as Lot 11

JWC GUARDIAN 344M - Full Brother to Lot 109 sells as Lot 12

While building cattle that are phenotypically suited to thrive in our environment comes first, we sure realize the importance of maintaining a balanced set of EPD's can only help the profitability of our product for our customers. With that in mind it certainly will not take a geneticist to digest her genomic profile and find out that she offers an incredible set of traits that suggest excellence, along with being homozygous black! This daughter of the \$100,000 CLRS Guardian 317G fits the mold from both angles, as she excels just as readily on the hoof as she does on the paper. Genomically she ranks in the top third of the breed or better for 12 traits, and combines both calving ease and growth excellence. She is a full sister to the lot 11 & 12 bulls in this same sale and is the kind that fits several different production goals and she ties together lots of unique pieces in one package.

JWC 2/F LIVING PROOF 283L - Full Brother to Lot 112

A full sister to the high selling bull in the 2024 Production Sale, JWC 2/F Living Proof 283L. We think this female is going to be a prime piece of real estate once her older brother takes off as one of the most exciting new sires available to the Simmental breed. This is an influence that we are going all in on, especially after talking with our friends at Wheatland Land & Cattle about how Living Proof has continued to mature. They are proud to tell, that he remains one of the most phenotypically impressive bulls that they have ever been apart off, and that comes from a firm that has been involved with a long list of the most prolific herd bulls in the business. This purebred female is homozygous polled and homozygous black, curve bending about her growth trend, and set for success in production.

let 115 JWC 7114 ANGEL 316L

The foundations that build these two females is as solid as a rock. They are full sisters to the JWC 7114 Angel 114J female that sold for \$40,000 ½ interest in the Inaugural Production Sale to Harrell Cattle Company and has already started her production career with success. We love the ultimate level of balance and symmetry that these females are built with, and we think the toughest part is trying to pinpoint their faults. We love the silhouette that they paint, the smooth way that they tie together each of their fundamentals, and the reliability of pedigree that they offer. Obviously they offer choices about hide color, and calving period, but they both offer genuine quality.

let 116 JWC PGC 7114 ANGEL 3208L

let 117 JWC 7114 ANGEL 318L

The Next Level mating on W/C Angel 7114E is hitting with a high batting average. Between this sappy middle, feminine necked and big featured female, and the full brother that sold last year to Clay Hoff, it has become pretty obvious that this is a combination that lines up perfectly.

*let* 118 JWC HARL EDNA 333L

The first born daughter of the \$40,000 half interest, JWC 7114 Angel 114J that sold in the 2023 Production Sale to Harrell Cattle Company. She is a W/C Bankroll 811D daughter of W/C Angel 7114E that sets the standard of excellence from a type and kind standpoint. 333L has a perfect baldy face, long and barrel shaped ribcage and massive stature. She herself weaned off her first calving mother heavy and recorded a 107 WWR.

*let* 119 MOKE JWC MISS 3301L

MOKE JWC Miss 3301L is a three quarter blood female that is the first born daughter of JWC Angel 112J. 112J was purchased out of the 2023 Production Sale by Carter Moke, and is a full sister to 7113E, 7114E and 7110E being a W/C Relentless 32C out of W/C Miss Angel 2870Z. Miss 3301L is built even better than her mother, being extra square pinned, wide based and softer bodied. Numerically she steps it up a notch as well, with top 25% or better WW, YW, YG, BF and REA.

*let* 120 JWC HARL 152 ANGEL 335L

A direct daughter of the elite profitability and calving ease sire, Bar CK 4118B 8102F "Triple Threat". Her dam is the result of the potent MR HOC Broker x W/C Miss Angel 2870Z flush that also resulted in the \$28,000, JWC Angel 126J female that was purchased by the Reimann Ranch. 126J already had sons feature in their 2024 Pasture Sale that were very well received, particularly by those looking for a registered Simmental steer.

The WLE Copacetic E02 x HPF Victoria B396E mating has become one of our most trusted sources of incredible phenotype. The results typically push the boundaries of what Simmental cattle can look like. When referring to JWC Victoria's Secret 305L there isn't much more to say than that we idolize the type and kind of this elite phenotype female. She is so long and proper in her outline, eloquent and balanced in her silhouette and just oozes high quality livestock. The daughter of WLE Copacetic E02 is one of the finest daughters that HPF Victoria B396E has produced to date, and we feel that she is the kind that can carry this cow family onto the next generation. From generating high dollar show heifers to breed leading herd sire prospects, we think that Victoria's Secret is built with the same quality to become a desired source of the goods. The homozygous polled and homozygous black option of the pair is JWC Victoria's Charm 304L, and she is no slouch either when it comes to her striking look and appeal. Make note that they are both full sisters to the KC2 Miss Victoria 6H female that works for Weis and Lashmett, that produced their \$105,000 high selling female this past fall, along with multiple other females between \$20,000 and \$50,000 over the past three years. Selling ½ Embryo Interest on both Lots 121 & 122.

A very impressive female that stems from the first mating of ES Right Time FA110-4 on Victoria B396E. She has been a standout from early on, and not only because of the phenotype she sports, but the impressive amounts of real world quality both on the hoof and genomically she has been blessed with. Growth wise she elevates herself towards the front end of the pack, offering some very favorable predictions for WW, YW and ADG in her EPD set. She too is homozygous black, just like the two full brothers that sold last year as yearlings for \$14,500 and \$9,000 to Wade Horstman & Sam Tiede. Note that the day she fell pregnant, she was exposed to both of our heifer bulls, ZTGC Just Cuz 52K and 2/F JWC Unassisted 675K, so if you are looking to register this resulting calf we are more than happy to help with arranging parentage testing.

ES RIGHT TIME FA110-4

Sire of Lot 123

JWC 2/F RIGHT TIME 153K

Full Brother to Lot 123

JWC Vicki 308L is a direct daughter of the legendary HPF Victoria B396E that is sired by the \$109,000 JBSF Berwick 41F. Victoria B396E has become one of the most prolific, proven and consistent sources of quality in the ASA database, not only was she a champion in her own right but she has gone onto produce multiple champion progeny. The pedigree that supports this stout made, sound structured female aligns the stars in our mind. We love the natural turn to her rib cage, the extra stoutness that she offers from behind, and the ultra-maternal look about her front third. A three quarter sister to 308L, sold for \$33,000 half interest in the 2023 "Two is Better than One" Female Sale to the Heaton family!

lot 127 JWC SHERRI 328L

This pair of red headed, purebred females stem from the concoction of two up and coming stars of the breed. RJ JWC Sherri 0151H is making leaps and bounds towards the front of our donor pen, as she is proving to mesh the gap between high performance cattle and phenotypic excellence. Paternally you will find our \$90,000 high selling, W/C Red Bird 269J stud that still continues to gain momentum as one of the leading red hided AI sires available on the market. We think these two offer a world of good to a program focusing on developing the quality of their red hided cowherd, as not only do they offer some freshness from a pedigree standpoint, but they certainly don't hurt the situation when it comes time to inspect the science either.

lot 128 JWC SHERRI 329L

lot 129 JWC SHERRI 331L

Here is the flush mate sister to one of the most impressively consistent groups of herd bulls we have sold over the past few years. In 2024, 7 full brothers to 331L averaged \$7800 and topped at \$14,000 selling to Ben and Lacey Lodoen of North Dakota. Stockman from both near and far appreciated the added growth and performance that this genetic combination is creating, and will be just impressed in 2025 by this female and her full brother that sells as lot 47. Genomically enhanced predictions for high growth support the claims we have for this herd bull generator.

RJ PF RITA 8288F
Full Sister to Lot 130-131

A pair of full sisters to the \$164,000, NAILE Supreme Champion Breeding Female, RJ PF Rita 8288F. Many have made claim that 8288F, a W/C Bankroll 811D daughter, is one of the most phenotypically dominating SimGenetic females that has ever been exhibited. Another generation back reveals the EXAR Rita 5406 female that continues to be one of the high income generating females for RJ and Plamp. This is a cow family that offers unparalleled maternal excellence. A full brother to this pair is W/C Bankroll 1199F, the impressive herd sire prospect purchased by Eric Kroupa that is more commonly known as "Chinstrap". He is the sire of the \$25,000 W/C Craftsman 1424J that was purchased by Rosebud Cattle Company and Weis Cattle. Purple banners and dollar signs run through the veins of these sisters.

THOM MISS BROKER 857F
Dam of Lot 132

NMR MATERNAL MADE
Maternal Brother to Dam of Lot 132 & 133

These daughters of W/C Bankroll 811D come from a different maternal pedigree than you may have come to expect from the JWC, but you can trust that they certainly come with a story behind them! Their dam, THOM Miss Broker 857F has been one of the leading donors for Thompson Show Steers. She stems from the NMR 0-04X female that is responsible for raising the legendary \$300,000, NMR Maternal Made that still is a king of the Club Calf and Maine Anjou business. We feel like the options for generating potential are endless with these two females, and fit the bill for those looking to raise composite show heifers or show steers very well. We think that the mating of ZTGC Just Cuz 52K on both of these females for their first calf makes for a high chance at returning serious ROI in the near future.

We have always felt that the Missie cow family has been one of the Angus breeds most reliable sources of maternal value, show ring eye appeal, structural integrity and profitability. Yet when we purchased JCC Missie 810, we could have never expected the powerful influence that the Penners-CC Double Black 2257 daughter would have on the program. She combines all the ideals that we are assembling the cowherd around, and we are excited about her being the leading matron of the Angus program going into the future. She is the dam of Austin Foss' JWC Cruella 21J that was supreme at the Minnesota Beef Expo, and a pair of SCC SCH 24 Karat 838 daughters that sold this past fall at MPJ. This would be the first half blood daughter of 810, and she has us awfully pumped up for the dynamic abilities that she looks to have as a Percentage Simmental generator.

BCII SANDY 0215

Maternal Sister to Lot 135 & 136

Certainly a sale attraction sells here with this pair of direct daughters of K N C Cabin Creek Sandy 905. The now deceased, and limited inventory legend, Sandy 905 has proven that her generating ability is timeless. Nearly 16 years after her birth, she has continued to add high sellers to the list with multiple daughters between \$15,000 and \$50,000 over the past couple of years. What is even more impressive is how the 905 daughters have followed in their dam's direct footsteps in production. A long list of championships and impressive dollar figures can be attributed to the 905 legacy, two highlights include the Silveiras Style 9303 daughter known as "Roxi" that was selected as the Reserve Champion Angus Female at the 2017 National Western Junior Angus Show and the \$100,000 EOS promotional sire Wrigley. These W/C Bankroll 811D daughters look to be the kind to pass along the intangible pieces that have made this cow family an integral piece in show heifer history.

lot 138 S/N JWC KASSI'S DIAMOND 124L

This W/C Bankroll 811D daughter stems from the Dameron First Class sired, FCF SCC Phyllis 602. 602 is a daughter of SCC Phyllis 051, one of the most dominant producing Angus females of all time. Maternal sisters to 602 include the Bayer family's 2018 Supreme Female at the World Beef Expo, FCF Phyllis 770, FCF Phyllis 840 who was the 3rd Overall Female at the Illinois State Fair, and the Udell family's million dollar producing, FCF Phyllis 532, the dam of the \$280,000 half interest UDE New Heights 62/87. The power of pedigree here is overwhelming!

FCF SCC PHYLLIS 602
Dam of Lot 137

This W/C Relentless 32C female has a pretty special place in our hearts. S/N JWC Kassi's Diamond 124L is a daughter of the Schrag/Nikkel cornerstone Angus donor, Kruse Missie Primo 147. The Colburn Primo 5153 daughter has proven to out generate any expectation that they could have had for her, even though she was selected as the 2018 NAILE Reserve Grand Champion Junior Angus Heifer for Jake. This past fall a MaineAngus daughter of 147 was their \$100,000 high selling female that sold to the Pryor family, and has already been slapped as the 2024 Down 4 The Cause Reserve Grand Champion Female in Ring A and 3rd Overall Heifer in Ring B.

FRKG CKCC PLATINUM 009H ET

Sire of Lot 139 & 140

A new maternal pedigree is found here with these two purebred, FRKG CKCC Platinum 009H ET daughters. Their dam, Strawberry Shake 1F stems back to the maternal origins that created the Holtkamp CLAC Change Is Coming sire that has been a trending force in the showing over the past couple of breeding seasons. These two purebred females paint an incredible picture from the side, and come with an oversized set of running gear and super obtuse body cavity. Pay attention to the impressive set of growth driven EPD's that came back on the blaze faced, JWC HARL Reba 3008L after her DNA genomics were run. She herself has always been an impressive specimen, and offers donor potential in our opinion, supplying the "whole package" to a progressive Simgenetic breeder.

ROSE MISS STAR F904

Dam of Lot 141 & 142

There aren't many better options when it comes to reliable sire groups than Ruby's Turnpike 771E. Time has only added more validity to the quality of the Turnpike sired stock, as they mature with longevity and proved to be high production. These two daughters have the trademark quality foot shape, impressive length of body and genomic package that will inject growth with top third of the breed or better WW, YW, ADG & CW figures. They too are both homozygous polled and homozygous black. A full brother to this pair sold for \$11,000 in the 2024 Production Sale, and along with 3 other maternal brothers that averaged \$10,300. The ROSE Miss Star F904 is proving to be a potent source of quality, and these daughters look to follow in her lead.

Simmental enthusiasts will find very familiar faces on either side of this high level breeding pieces pedigree. For those that don't, she is a direct daughter of the \$210,000 WS Miss Sugar C4, C4 would be one of the only females of modern times that could compete with the AI herd sire producing capabilities of 8543U. Sons and daughters have been utilized across the nation to inject a potent amount of EPD excellence and genomic profitability. Her sire, CLRS Homeland 327H was a high seller from the Crystal Springs operation that sold to All Beef LLC, Black Summit Cattle, and ABS Global. Numerically, JWC Miss Sugar 342L sports excellence across the board, she excels particularly when it comes to propagating growth and performance traits, and has a very favorable combination of REA and Marbling numbers. This female deserves serious consideration from both a genetic progression and investment standpoint, the marketability of her pedigree and build aligns with the trends of the business, being a female that flawlessly combines genomic and phenotypic excellence.

We purchased the dam of L17 from the Eichacker program, she is a W/C Fort Knox 609F daughter that wowed us with her low maintenance body type, good looks and long term build. This first born daughter of hers is sired by CLRS Jefferson 951J, the leading red hided ABS owned, purebred sire. This red hided, homozygous polled, purebred female comes with a neat look from the side, being tight and angular about her front third, neat in her lines and balanced in her outlook. She will calve with a 3/4 blood calf by JWC Codigo 1530K when the grass is getting green.

**CLRS JEFFERSON 951J**

Sire of Lot 144

JWC HARL Miss 3602L is a purebred daughter of the \$300,000 TRCC Pandemic. She has the outlier phenotype that the paternal influence has been expected to generate, and seeing is believing here! We love the eccentric look and feature of this dark hided beauty. She is ultra durable in her structural build, dense and robust in her middle third and cocks off with undeniable presence. This one is fun to look at! We think her mating to DUFF Rizz 22271 has the makings to be a very valuable coupon once it comes time to cash. Her maternal pedigree stems back to the Baileys 415B donor female that raised the Hartman Cattle promoted, \$42,500 GPG Dynasty 415J, and is a direct daughter of the multi-million dollar producing, Bailey's Ms Dreamy 946W.

The results of combining two of the most trendy individuals in the Simmental database, the \$530,000 SO Remedy 7F and the multiple time major show champion female, America. America was crowned Reserve Champion Female of the 2020 National Western Stock Show, from there she went on that summer to win the 2020 AJSA National Classic and was also Supreme Champion Female at the 2020 Iowa State Fair Junior Show. If you have been studying the trends of the showing, we think it is becoming more common to find the push for cattle that are faultless, and extra balanced, we think this female is a prime example of those descriptions. Invest with utmost confidence and never look back, this is the kind that generates the high dollar show heifers you see selling across the nation.

lot 157 JWC PHYLLIS 2011K

JWC Phyllis 2011K presents her case as a high caliber donor candidate. Being a direct daughter of the influential Angus dam, FCF Phyllis 532, places her in a family tree that is littered with several of the most exciting and richest valuation Angus individuals to trade hands in the past couple of years. She has averaged over \$48,250 on 17 daughters sold through the Udell family's "The Advantage" sale over the past four years! Also a maternal brother to 2011K was the 18th Annual Embryos on Snow featured live lot, UDE New Heights 62/87, that commanded a \$280,000 hammer price selling to a syndicate of the industry's most progressive breeders. In the fall of 2024, another daughter of 532 was the \$300,000-second-high selling female in "The Advantage", UDE Phyllis 4019. Another maternal sister to Phyllis 2011K is Josie Phillips \$140,000, B C R Phyllis 092J, that went on to be the Grand Champion Owned Female at the 2022 National Junior Angus Show and 2023 FWSS ROV Grand Champion Angus Heifer. Long story short, this is a female that stems from the best in the business. We admire the extra power, mass and shape that this cow family has become so renowned for, and the there is no denying that her mating to some of the trendy sires in the business is set to yield big returns.

Two purebred Angus daughters of the JCC Missie 810 female, the donor that is leading the JWC Angus division. This is a lineage that is proving to appease the most progressive Angus seedstock producers, as her first daughters entering production have been delivering the goods! We think these two females offer the opportunity to secure a flagship matron shortly before she enters the prime of her producing years! This pair are maternal sisters to both Austin Foss' JWC Cruella 21J that was supreme at the Minnesota Beef Expo, and a pair of SCC SCH 24 Karat 838 daughters that sold this past fall at MPJ. The Silveiras Style 9303 sired JWC Missie 380L is built with some outlandish proportions! She has the trendy combination of a massive center body cavity and high tying, sleek neck attachment, we think her potential to generate high dollar show heifer prospects is high! The Black Ace Double Run 4/8 sired 379L offers an outcross pedigree to a large majority of the most popular AI sire options that has been producing the most demanded show heifers. In fact, 810 herself lacks the presence of any of the common pedigrees that you will find winning the breeds highest accolades. The closest tie to a "showring" pedigree would be via her maternal great granddam, PVF Miss Raptor 024 who is the maternal granddam of the legendary PVF Insight 0129.

Angus show heifer producers gather round here! As this pair of full sisters from Seldom Rest Lucy 0075 certainly offer themselves up as some very impressive breeding pieces and carry the maternal backing of some of the best to ever do it! Stemming from two of the most recognizable and potent show cattle producing linages, it comes as no surprise that there is an abundance of quality built in here. Their dam, Seldom Rest Lucy 0075 has been a force towards the goals of show heifer creation within our program. She is one that we think sets the standard of excellence from a look and design standpoint and is one of the most impressive mature cows that you will ever lay your eyes on. She too screams longevity and high productivity, with an udder quality and structural integrity are of the utmost quality. Her pedigree is built upon several champions, her dam, Seldom Rest BRMF Lucy 743 was a multiple time major show champion for Kathryn Coleman, and has now become a leading producer for both the Seldom Rest and Sierra Ranches programs. Another generation reveals the Dameron Lucy 868 female that Reserve Grand Champion Owned Cow Calf at the 2010 NJAS. Two females that supply ample amounts of maternal power, and stand up to the hype with their own impressive phenotypes.

A past champion, that is bound to produce champions! We know there are lots of paths you can go down when breeding cattle in this business, and while our passion is the Simmental business, we sure enjoy dabbling with some composite show heifer production. That's where you will find, Violets R Blue 23L, as a highlight of the bred heifer division. Not only will she stand out from a color and markings standpoint, but she is one of the biggest footed, biggest legged, biggest haired, biggest bodied females to sell on Valentine's day! The ideal proportions here are hard to make, but we think 23L ties them together incredibly well. This BMWC In Control 404F ET female was very successful show heifer for Hollis Fawcett this past summer, being crowned the Reserve Supreme Champion Female at the 2024 SD Summer Spotlight.

Open, ready to flush.

Show steer enthusiasts gather around if you want a donor that has the power, mass, shape and color to raise one's elite enough that it does not matter if they are showing haired or slick, because this "Gunsmoke" daughter has out of this world amounts of quality! It's no secret to anyone that color is the trend that is sweeping the Show Steer business, and we think this female magnifies the claim as to why these cattle have become so popular. She is a full sister to RJ's, "Kyra" 704E donor that has consistently yielded dollars and champions every year! Maternally she sports the likes of the legendary Who Da Man influence, one that is world renowned for injecting the most intriguing features. It's not until you see her in person that you can appreciate the immense density, power and dimension of this blonde bombshell. She sells open and ready to deploy immediately into an IVF program.

lot 165 W/C MISS WERNING 696D

This year we are offering the opportunity to purchase a small, hand selected group of mature females that are in the prime of their production careers. Leading the division is the four year old SC Donna H17 female that has most definitely proved her value through her impressive production record. You will find her daughter sired by Ruby NFF Up The Ante 9171G selling as lot 151 in the bred heifer division of the offering. And while this purebred female has the potential to generate value added cattle with her own genetic base, we are excited to offer her while carrying a heifer calf embryo pregnancy sired by WHF Greater Good and out of the leading lady W/C JWC Angel 9005G. We think this is an enthralling caveat to this prime aged, high quality female.

SC DONNA'S GIRL L32
Daughter of Lot 164 selling as Lot 151

The kind that got the ball rolling for our program, she is moderate, sow bellied and a brood cow deluxe! The W/C Lock Down 206Z influence has become a trademark name associated with quality in the Simmental business and his timeless quality and eye appeal shines brightly in this granddaughter. She is the dam of the \$15,000, Miss Werning 052H that was purchased by Luke & Emma Lieffring of LJL Cattle Co. Her mother, the Miss Werning 384A matron was a time tested producer with several progeny selling into some of the best cowherds in America, including W/C Alexis 89F that sold in the 2019 Spring Black Label. Cattle with this kind of build and genetics return on investment quickly.

We are proud to offer a set of commercial bred heifers that we hand selected from the Moke family's replacement pen. These are high quality females that we feel deserved more recognition and provide more quality than you could find available for sale elsewhere. These females would make up a great addition to any commercial cattleman's replacement pen that is looking to improve maternal strength, udder quality, structural integrity and longevity in the cowherd and you can trace the majority of these bred heifers back to W/C Bankroll 811D.

CHOICE FLUSH LOT

As we've offered every bred heifer for your appraisal each year this year remains no different; however, to keep bringing you the cattle we are proud to stand behind and advance with the times we are retaining 2 females to add exclusively to the JWC Donor Pen. We have very high expectations of these females that are backed by some of our favorite and most prominent maternal lineages. In order to uphold the expectation of every home raised female being offered to the public we have elected to offer a one of a kind choice lot. Offering the right to flush your choice of the next generation!

CHOICE LOT: 2/F JWC LORRI 302L OR JWC KAMRYN 326K

Buyer is guaranteed a minimum of minimum of 6 transferable embryos. Buyer pays IVF charges, semen cost and all freezing and/or transfer fees, with all embryos and freezing costs over 10 embryos being split odd/even between the buyer and seller.
