

ANNUAL PRODUCTION SALE

*New Date* THURSDAY, FEBRUARY 6, 2025  
ST. CHARLES, MN 1:00 P.M.

# WE WELCOME YOU

As I sit down to write this letter, I find myself reflecting on the past year—how much has changed and how far we've come. Our summer, our kids, our crops, and our cattle are all remarkably different from just a year ago. It feels like life is moving at light speed, but within that fast pace lies an exciting future. With record-high cattle prices continuing to hold strong, from feeders to culls, it truly is—and always will be—a great time to be in the cattle business.

It's with great pride and gratitude that we present what we believe to be an exceptional offering of cattle for your appraisal. First and foremost, we want to extend a heartfelt thank-you to all our customers and friends. Without the calls, connections, and relationships built over the years—or the new ones yet to come—none of this would be possible. Your support drives us forward, inspiring us to continually improve our cattle and our operation.

This year's cattle are no exception. Each one has been carefully evaluated to ensure they will stand the test of time and produce for years to come. Among the offering, you'll find full and maternal siblings—both bulls and heifers—reflecting years of thoughtful breeding and selection. Sorting the bred heifers was no easy task; we're committed to offering you our best, even as we recognize the potential impact some of these could have made within our own operation.

This is one of the largest, deepest, and most impressive sets we've put together to date. Many of the bred heifers have the pedigree to move straight into a donor pen, supported by generations of proven genetics. The bulls, both Angus and Simmental, represent what we believe is our strongest lineup yet, with multiple full and half siblings from our top donors. No matter your needs, there's something in this offering that will elevate your herd.

The cattle market continues its upward trend, with feeder calves, cull cows, and bulls selling at all-time highs. As cow herd numbers dwindle, now is the perfect time to invest in the next generation of genetics to enhance and expand your herd. Of course, none of this would be possible without the incredible support system we have around the farm. Craig Schaufler has been with us for two years now, and his help has been a tremendous blessing. Ralph, who manages day-to-day operations at my uncle's, consistently goes above and beyond, lending a hand even when he isn't asked. To our family and friends who step up when the days get long, your contributions never go unnoticed. And to my wife, Shelby—your unwavering dedication and behind-the-scenes work keep this entire operation running smoothly, even when it's like pulling teeth or I lose track of what needs to be done.

We warmly invite you to visit our farm on **Thursday, February 6th**, or stop by anytime to view this exceptional offering. Thank you for your continued support, and we look forward to seeing you!

**SETH KAEHLER**

## BROADCAST:

Justin Dikoff, DV Auction ..... (605) 290-0635  
**WWW.DVAUCTION.COM** Sale will be available to registered bidders via the Internet at DVAuctions for real-time internet for individuals who cannot attend in person. All absentee bidding will be done via internet to a ringside sale representative. All bidders must register for, and be approved, for a bidders number to be issued prior to the sale. Early registration (at least 1 day prior to sale) is recommended. Call (402) 316-5460 for assistance.

## CREDITS:

Adam White, Sale Photos & Videos ..... (608) 732-8449

**HOTEL ACCOMMODATIONS:** approx 20 miles from the farm  
Numerous hotels are available in Rochester MN

Country Inn & Suites by Radisson ..... (507) 473-4804  
Rochester (south), MN  
Candlewood Suites, an IHG Hotel ..... (507) 512-1696  
Rochester Mayo Clinic Area  
Hampton Inn; Rochester, MN ..... (507) 287-9050

## TRUCKING:

Craig and Dick Coleman ..... (765) 461-0954  
Free delivery to customers within a 350-mile radius of St. Charles, Minnesota. K-LER Cattle covers the first \$200 trucking elsewhere in the United States. \$100 discount per animal if you haul home day of sale.

## TERMS & CONDITIONS:

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals are removed.

## SEMEN INTEREST:

Seller retains 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block.

## HALF EMBRYO INTEREST:

The seller will retain a half embryo interest in the designated lots, as noted in the catalog. The seller and buyer will either split embryos equally at the tank or alternate flushes. Possession of the animal will remain with KLER Cattle unless an alternative arrangement is made with the new partner. The resulting natural calf will be owned entirely by the party managing the animal and covering its day-to-day expenses.

## RISK:

Each animal becomes the risk of the purchaser for loss or injury as soon as sold. We strongly recommend a mortality insurance policy be taken out on any animal left to be wintered. Any bulls left past April 1, 2025 will incur a \$5/Day feed charge.

## LIABILITY:

Neither owners nor sale management assume any liability for accidents or injury that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents

## BOARDING:

Bulls will be wintered at no additional charge until April 1, 2025. Bulls are guaranteed to pass a breeding soundness exam prior to breeding season.

## SUPPLEMENT SHEET:

Announcements from the auction block will take precedence over statements in the catalog. Disclaimer: The information in this catalog is subject to change. Planned mating EPD's will be available for the bred heifers the week of the sale.

# Brand Guarantee

## 1. Four-Year Feet and Semen Guarantee

All bulls sell with a four-breeding season guarantee on feet and semen. If the bull's feet or semen limit the bull's breeding due to genetics or structure, we will provide a sliding-scale credit for the breeding seasons left to complete. The sale credit amount issued will be the purchase price minus salvage value, with a 25% value reduction for each breeding season completed. Feet and Semen are covered for unsoundness NOT caused by illness, foot rot, neglect, or other cattle. A veterinarian semen test or soundness examination certifying that the bull is in good health and condition is required. Sale credit can only be used on one animal and must be used within one year.

## 2. Feeder-Calf Marketing Program

We have feedlots wanting to buy calves out of our genetics. Contact Seth if you would like to get a bid on your calves – at the farm or the sale barn. Early notice will help us get loads in order.

## 3. Female Guarantee

All females sold as open animals are guaranteed to breed or they will be replaced with another animal, or with sale credit towards another female. Sale credit must be used within one year.

## 4. Sight-Unseen Purchase Guarantee

All cattle bought sight unseen- If you don't like the animal once delivered, you don't own it. Warranty will be issued for the appropriate value as sale credit towards another animal and must be used within one year.

**5. If you have an issue with an animal purchased from us, please let us know, and we will find a solution.**

# INNOVATION

— AgMarketing, LLC —

The Kaehler family name has been tied to production agriculture for well over a century. The multi-generational agricultural entity comes with a reputation nationwide for a product that is unrivaled. There would be several family members involved in the operation who are instrumental in making the outfit continue in its evolution. Seth and Shelby are a great young couple who share a great eye for livestock and a passion for the seed stock sector of the industry. They have the desire to be the best and work diligently to applicate improved ideas and technology to make a product suitable for all aspects of the industry.

The cattle make big strides annually in quality and in the genomic and recorded data. The pressure becomes applied within any operation that is willing to haul their livelihood for healthy competition to “The Yards” for the annual pen show at the National Western Stock Show. Some breeders do not value the showing aspect of the business, but that is possibly because they do not have the skill set or know people with the skill set to get the stock presented in the manner that they must, to be able to compete. Or it simply may be that they aren’t willing to see where they truly stack up and are afraid of comparison. Seth, for as long as we have known him, doesn’t back down from a competitive event. We believe it’s what drives him and that is the reason the product continues to improve from all aspects involved in the art of breeding livestock.

We challenge you to name anyone more open minded in the industry when it comes to researching ways to make an end product more valuable and easier to market than Seth Kaehler. His frame of mind is similar to a blue or red heeler pup as he shows no fear in pushing the envelope. He has a resilient understanding that success doesn’t come easy, and to get to the top, one may experience getting knocked down first and then again before one achieves the summit.

The 2025 offering is certainly slated to be the best yet! It will feature a variety of different matings by several of the elite SimGenetic A.I. sires in the business introduced to the very youthful and potent female base of the KLER brand. One of the more noteworthy genetic combinations would be the featured brother to the very popular Angus stud, KLER Formula 1, an Angus sire that is in the top 1% of the breed for marbling and ranks in the top 1% for five profit indexes in the Angus data base. As an added caveat, a 50% embryo interest in the donor dam of Formula 1, Riverbend Queenie C353 sells as well! These cattle are of absolute intrigue and worthy of your search time and visual analysis. A prime example of the continuation to forge this program into a “go-to” for all of one’s seed stock needs that keep the commercial segment of the industry in every forethought.

Please consider this your invitation to join us at the farm on February 6, 2025. Make note of the new and earlier date and mark those calendars to make the trip to southeast Minnesota for a very elite and genuine offering of SimGenetic and Angus bull and female power. If you should need any assistance or guidance with your purchases or need additional information about the offering, please reach out to any of the Innovation Ag Marketing team as well. We will see you at the sale!

Without question, an impressive individual to lead off the 2025 KLER class of bulls. The length and aesthetic appeal of this rascal can't be overlooked, while still packing the essentials of power and structure into a smooth, top notch total package. He stems from one of the freshest matings in the program, combining the 2023 high selling KLER Elusive 2117K with a young donor you are going to hear plenty more about, Five Star Janae J9. He too is the heaviest weaning bull in the offering at an astonishing 926 lb., with a set of EPD figures that make the grade in several traits. M139 is one of the members of our contingent of Denver bulls and is Homozygous polled. He ranks top 5% CW, top 10% REA, MILK, top 15% DOC, top 20% WW, YW, top 25% ADG, TI, and top 30% MARB.

Deep, proportional, and with the look of a masculine herd bull, M137 hits all the talking points you seek in your next herd sire. Another product of the flush of Five Star Janae J9 to the \$40,000 rising star KLER Elusive 2217K, these young standouts are making their mark on the breeding program producing sons like M137 and his brother. He was pounds heavy at weaning, mashing the scales at 878 lb and is a high growth bull genetically, that still combines calving ease and carcass into his profile. He is both homozygous black & homozygous polled. He ranks top 5% CW, top 10% WW, YW, ADG, MILK, TI, top 15% DOC, top 20% MCE, top 25% MARB, top 30% API, top 35% CED, REA.

for growth and carcass. Dynamic M83 is a Denver pen bull and is both homozygous black and homozygous polled. He ranks top 10% STAY, CW, top 15% WW, REA, top 25% YW, API, TI, and top 30% MARB.

Look in as we showcase a set of flush brothers that are full brothers to the 2023 high-selling bull, and sire of Lots 1 and 2 in this year's sale, the \$40,000 KLER Elusive 2117K. As his name implies, KLER Dynamic M83 combines a multitude of qualities into a high-class, dynamic herd sire prospect. Long bodied and loaded with shape, he will be a favorite of many in the sale pens. Maternally he is backed by the leading donor K-LER Rain Marie, and sired by the quality promoting, KBHR Revolution H71. The genetic power in this lad is apparent when you study how he compares

The calving ease, carcass quality driven brother of the pen, KLER First Rate 1M3 is smooth in his build and carries himself with herd bull stature. Pushing 800 lb. on his weaning weight, this guy combines performance with top of the breed calving ease and marbling EPDs. He is homozygous black and homozygous polled. He ranks top 15% BW, top 25% MARB, and top 30% CED, MCE, API.

*Suitable for use on heifers.*

One of the phenotypic standouts of this year's sale bulls, he will command your attention when you study him. He is square built, deep sided, and eye catching in his makeup, it's hard to pick a hole in this stud. He leads the charge of the ultra-impressive KBHR Revolution H071 sons in this sale that will be admired by cattlemen all over. He come to the weaning pen to mash the scales at 881 lb. weaning weight, one of the heaviest in this year's crop. The icing on the cake is his impressive genetic quality in his EPD rankings. M3 will be on display at the NWSS and we were pleased to find out that he is both homozygous black and homozygous polled. His rankings include top 10% DOC, CW, top 15% MILK, MARB, TI, top 20% API, top 30% BW, YW, and top 35% WW, ADG.

KLER Montana M25 leads this group of bulls for high growth genetics, coupling that with upper tier marbling and API index. Balanced in his design with the characteristics you expect in a herd sire, M25 carries shape and dimension and a 915 lb. weaning weight. Backed by a top-end Angus matron on the bottom side of his pedigree to add to his maternal prowess. A quality individual with loads of genetic potential. He is homozygous black and ranks top 2% WW, YW, TI, top 3% ADG, and top 10% for DOC, CW, MARB, API.

KLER Freight Train M62 is a prime example of a powerful performance bull. He is perhaps as stout featured as any bull in the offering yet does so with a very distinctive style and balance. Turn to his data sheet to find emphasizes on growth and carcass traits. We think M62 will put your herd on the right track. He tested homozygous polled and ranks top 10% TI, top 15% WW, MILK, MARB, REA, top 20% YW, top 25% API, and top 35% ADG.

**WRS HEAT'N UP H010** DAM OF LOT 24

KLER Greater Good 2064K sired a top trio of bulls in this initial offering of sons, and M72 brings the quality up another notch. He carries more than ample shape in his ribcage, while being full of meat along his top and into his quarter. He ties all this dimension together in a package that is easy on the eyes and presents his case a front pasture breeding bull. Finding homozygous polled, red hided herd bulls built like this guy is a tough ask!

ANGUS

S: VIRGINIA TECH STATESMAN  
D: RIVERBEND QUEENIE C353

**Bred AI on 4/26/24 to Virginia Tech Statesman (ASA: 20085208). Due 2/2/25. Safe AI.**

Riverbend Queenie C353 is the foundation of our Angus division at K-Ler Cattle Company. Bred in the historic Riverbend program of Idaho. The dam of C353 is a member of the CRU Cattle Company program, tracing to the influence of G A R Ext 721, a proven matriarch that is responsible for countless herd sires and individuals of influence produced at the Gardiner Angus Ranch. C353 is sired by Sitz Top Game 561X, one of the great Boyd New Day 8005 derivatives in the breed. In the Simmental registry she ranks top 5% WW, top 2% YW, top 2% ADG, top 10% Milk, top 10% MWW, top 15% Marb, and top 1% CW. In production she has distanced herself from the crowd with an impressive resume of revenue generation. Just this past fall, two daughters of C353 by Baldrige War Cry K041 sold for \$49,500 and \$11,500. Her running average of progeny sales over the past 4 calving seasons is \$23,464. She is best known as the dam of the \$60,000 KLER Formula 1 AI sire that is owned by Genex and Express Ranches. He remains one of the most elite \$ profile Angus bulls in the business. She averages 9 grade 1 embryos per flush, and records an impressive 55% conception rate on implants at KLER Cattle. KLER Cattle Company realize the importance of high caliber females, and for that reason are diving deep into the Riverbend Queenie C353 influence through a phenomenal set of daughters that have been retained. **Selling 50% embryo interest.**

## PLANNED MATING

PB SM

S: KLER GENERAL 2116K  
D: KLER BARBIE 455B

**PE from 5/15-7/1 to KLER General 2116K (4096043). Due 3/23/25.**

Certainly one of the most recognizable and potent maternal influences in the history of the KLER program sells here in her entirety! KLER Barbie 455B has built a legacy of excellence through a predominate list of both sons and daughters that lead the business. She is an impressive specimen, being powerful, stout, and three-dimensional in her build, with a high quality skeletal base. She too is homozygous black. 455B is a leading daughter of the legendary GW Miss GPRD 028X, also known as "Dolly", making her a maternal sister to the dam of the \$180,000 W/C Fort Knox 609D. Progeny of 455B include the next generation producer, and \$30,000 high selling, KLER Barbies Order 970G that has a strong representation of sons and daughters in this sale. KLER Barbie 007J was the \$20,000 selection of Dennis Moore out of the 2023 Production Sale. Other progeny includes, KLER Revive 974G owned by Justin Cave, KLER Barbie 44G owned by Lu's Moos Registered Simmentals and the \$19,500 high selling son of CDI Trustee 387F from the 2022 Sale, KLER Stellar 031J. She records a \$11,366 average on her lifetime progeny sales and 8 grade 1 embryos per flush. Being just a generation away from raising Purebred stock has always given tremendous mating flexibility and value to this dominant producer.

**Bred AI on 5/9/24 to Five Star Jackson J10 (ASA: 3947790). Due 2/18/25. Safe AI.**

Here is feature blaze faced female that represents the future of our breeding program. Super impressive in the flesh and backed by a pedigree destined for stardom. She will be one of the first direct daughters of the \$620,000 STCC Tecumseh 058J to enter production, and we think they are bound to set the business on fire if they all carry this female's quality as she approaches calving. Maternally she is supported by a standout WS Revival daughter of the legendary, K-LER Barbie 455B, so you can count on there being generations of maternal excellence lining the pedigree of this donor prospect. Her 929 lb. weaning weight shows off the power and performance she is set to pass on and she comes with the added caveat of being homozygous black. *Selling 50% embryo interest with the option to double the hammer price and purchase 100% interest. If this is the case, the seller retains the right to two flushes with a minimum of twelve quality embryos.*

Bred AI on 6/29/24 to KLER Premium Grade 3025L (ASA: 4228829).

PE from 6/29-9/1 to Swain Phenom C303L (4225304). Due 4/11/25. Safe AI.

Here's one that you don't want to miss on sale day, as she will make the favorites list of many buyers. She combines power and eye appeal as well as any heifer in the offering and is a maternal sister to the \$15,000 selection of Rolling S Ranch (TX) from last year's sale. She features a low birth weight and high marbling genetic profile with top 20% BW, and top 30% MARB.

## PLANNED MATING

PB SM

S: ROCKIN H CAPTIVATE J75  
D: KLER JANAE'S SECRET 3158L

Bred AI on 3/28/24 to Rocking H Captivate J75 (ASA: 3991776). Due 1/7/25. Safe AI.

KLER Janae's Secret 3158L is a homozygous polled, red hided, purebred Simmental that highlights this offering with her immense amount of phenotypic, genetic and maternal value. This female screams future brood cow with her combination of elegance, power, and udder quality. Her dam entered our program from Five Star Ranch, and she is already making her mark, selling progeny for \$11,500 and \$10,000 in her young career. Take advantage of the special twist on her AI service sire. She is certainly elite in her data set as well, as she ranks at the very top of the breed for carcass traits, growth, and the API and TI indexes including top 1% REA, TI, top 2% WW, YW, CW, MARB, top 5% API, top 10% MILK, ADG, and top 25% DOC.

*Selling 50% embryo interest with the option to double the hammer price and purchase 100% interest. If this is the case, the seller retains the right to two flushes with a minimum of twelve quality embryos.*

A homozygous polled, KLER Surplus J3 daughter that will be a favorite of many for her massive ribcage, feminine features, and the start of an excellent udder she is developing. She excels in both carcass and growth genetic merit, making her the kind to be a future herd bull producer. And the added coupon she sells with will be on the ground early with her December due date. She ranks Top 5% CW, top 10% REA, top 30% WW, YW, REA, top 35% ADG, TI.

PE from 4/25-5/18 to Swain Phenom C303L (4225304). Due 2/17/25.

302L brings us a bit of a different twist, being a purebred Angus female. You won't find many Angus females that can match the powerful skeletal construction and massive rib shape of this North Camp Doc Holiday 7305 daughter. She's carrying what will be one of the first calves by Swain Phenom C303L. That is sure to be an exciting SimAngus calf.

Angular and feminine, you will like the looks of KLER Lady 3055L, she presents a strong case as the kind of female that is built with longevity and the opportunity to return dividends year after year. Don't overlook this high-quality KLER Surplus J3 daughter, because what she may lack in generations of cow family, she makes up for in real world quality and performance.

Bred to Swain Phenom C303L for a February calf that will be one to watch for next spring.

# DONATION LOT

This year, we are honored to donate half of the proceeds from KLER Lady 3055L to St. Matthews Community Lutheran Preschool. St. Matthews is a cornerstone in our small community, providing a nurturing Christian environment where children learn the values of friendship, trust, and respect while discovering their worth in God's eyes and developing a love for learning.

Our son Creed has already benefited from the enriching experience at St. Matthews, and we are excited for Colt to join next year and Haven to follow. The proceeds from this donation will help fund STEM equipment, transportation repairs, and facility upgrades-important resources that are typically supported by fundraising within our community.

Supporting this lot is not only a way to enhance your operation but also an opportunity to make a lasting impact on our children's future and our community.

# COMMERCIAL FEMALE

This year, we are proud to offer another exceptional set of commercial females from two outstanding customers, Tate Pearson and Luke Laufenberg. These heifers represent the top cut from their replacement pens, showcasing the very best of their programs.

Sired by KLER bulls, these females are built to thrive in any operation, developing into phenomenal, long-lasting cows that will produce high-performing calves sure to command top dollar in your local market.

They will be sized, sorted, and presented with weight averages for each group. All heifers will be Bangs vaccinated and ready to join your herd. They will be sold in groups of five, with the winning bidder having the option to roll down and take multiple groups in order if desired.

*All are guaranteed open and breedable. If the new owner wants to AI these, we will supply 1 unit on any of our Calving Ease sires.*

## Customer Testimonials..

**BRAD BALSLEY**  
**FLOYD, IOWA**

*"The bulls and feeder cattle from KLER Cattle are high-performing, good-looking, and healthy. They're well taken care of, and I've always felt like I'm getting top-tier animals. You really have to like them in both the pasture and the feedlot. Seth and the crew are always responsive when I have questions or concerns, and they take care of any issues that come up without hesitation.*

*The folks at KLER Cattle are easy to work with. Good cattle and good people."*

*"We have known Ralph and Seth for a handful of years and have purchased multiple bulls and heifers from them. We are consistently impressed with the quality of their livestock. We bought our first bull 3 years ago; we used him on a couple of cows to assess him. They were great-growing calves, so we put him on a whole pasture in 2023. They were born in February/March of 2024; most were Simmental-Angus crosses. By early September, after being weaned off the cow, they averaged an impressive 651 pounds. We loved how that bull performed so much that we purchased another bull on their 2024 sale! Our farm's mission is to raise a healthy growing calf that will go on to succeed in the feedlot and marble well for a finished protein in the next phase of its life. We can do that through the bulls and genetics we use from K-LER Cattle."*

## QUICK EPD REFERENCE

**Expected Progeny Differences (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Listed below are the units ASA EPDs are expressed in:

**ALL-PURPOSE INDEX (API):**

Dollars per cow exposed under an all-purpose-sire scenario.

**AVERAGE DAILY GAIN (ADG):**

Pounds of post weaning daily weight gain.

**BACK FAT (BF):** Inches of backfat.

**BIRTH WEIGHT (BW):** Pounds of birth weight.

**CALVING EASE (CE):**

Percent of unassisted births when used on heifers.

**CARCASS WEIGHT (CW):** Pounds of carcass weight.

**DOCILITY (DOC):**

Percent of offspring achieving a docile [1] score.

**MATERNAL CALVING EASE (MCE):**

Percent of unassisted births in first-calving daughters.

**MILK (MLK):** Pounds of weaning weight due to milk.

**MARBLING (MRB):** Marbling score.

**MATERNAL WEANING WEIGHT (MWW):**

Pounds of weaning weight due to milk and growth.

**RIBEYE AREA (REA):** Square inches of ribeye.

**WARNER-BRATZLER SHEAR FORCE (WBSF):**

Pounds of force required to shear a steak.

**STAYABILITY (STAY):**

Percent of daughters remaining in the cowherd at 6 years of age.

**TERMINAL INDEX (TI):**

Dollars per cow exposed under a terminal-sire scenario.

**WEANING WEIGHT (WW):** Pounds of weaning weight.

**YEARLING WEIGHT (YW):** Pounds of yearling weight.

**YIELD GRADE (YG):** Yield grade score.

**\$ INDEXES:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**ALL-PURPOSE INDEX (API):**

Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**TERMINAL INDEX (TI):**

Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**USING API AND TI:**

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an allpurpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population.

*For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.*
