**We believe in the power of long-lasting, maternally-focused, easy-fleshing bulls
that will put the COW back in your cowherd.**

Welcome to the Sale!

Welcome to the Flat Water Red Angus Gang's 16th Annual Bull Sale. It is with great excitement and pride that we bring this set of bulls to sale day for your evaluation and consideration. Again this year, we will have the bulls on display prior to the sale and available for viewing at the Broken Bow Livestock market. We feel that this change allows for easier viewing of the bulls and a more desirable buying experience for our customers.

Cooksley Red Angus membership number is 25621, and they became association members in 1989. Sandbur Ridge membership number is 48779, and they became association members in 1996. The point of this is to let, you, our customers, friends, neighbors, and fellow cattlemen know that we have been working on and striving towards problem free, well balanced, multi-faceted, cattle production for 35 and 28 years respectively. This commitment of time, research and investment is to bring you the best, most well-balanced product available in the industry today!

We have seen a steady improvement in our cow herds using a balanced approach to seedstock production. The fertility of the cow herds, the ability to breed, wean a calf, survive multiple years of harsh weather, and do it all over again year after year for 10 years and more is evidenced by the number of older cows represented in the catalog. We have seen a steady improvement in the scrotal circumference's and strength of the semen evaluation, in our yearling bulls, as well. The commitment to our customers to deliver the best product we can for the long-term profitability of your operation remains unwavering and our most important objective.

The bulls have been developed for sustainability and soundness. We are very pleased with the expertise and service we receive from Mitch Ziebell and the entire crew at the Darr Bull Development Center, near Cozad NE. Mitch and crew are very accommodating to having visitors stop in and look over the bulls. There are several breeds of bulls developed annually at Darr, and we encourage you to stop in and look things over if you are near the area.

We are genuinely thankful and appreciative of the people that we serve and the relationships we have. Please reach out to us with any questions. Our goal is your success, and we would enjoy helping you find the right bull for your operation. We invite you to join us on March 17, 2025 in Broken Bow, Nebraska for an offering of Red Angus bulls that we believe to be the highest quality set of herd bull prospect that we have ever brought to town! NEW in 2025, the Knott family of Sandbur Ridge Red Angus will offer a hand selected set of registered Red Angus replacement heifers straight from the heart of the breeding program for your appraisal. This is a unique opportunity to tap into decades worth of disciplined breeding decisions!

Thank you for your interest and we look forward to seeing you on sale day and all throughout the year!

Fellow Red Angus Enthusiasts,

It is our distinct pleasure to welcome you to the 2025 edition of the Flat Water Gang Red Angus Bull Sale in the heart of cattle country, Broken Bow, Nebraska! Despite many of the challenges that we have faced over the course of the past 5 years it is safe to say that exciting times in the beef business are on the horizon and red hided cattle continue to surge in demand!

This offering of bulls is comprised of the efforts and years of strategic breeding decisions that have been made by both Ross Knott and Ben Cooksley, with the common goal of improving their customer's bottom line. Seems simple, right? Fast moving trends, and fads may come and go in the cattle industry, but one thing you can count on with this set of Red Angus herd sire prospect is that they are backed by a female that has earned her keep the old fashioned way! These bulls are supported by females that are required to calve unassisted, re-breed within the same interval, raise a big calf, and maintain their flesh while doing so. Flat Water Gang Red Angus is truly where "Maternal Matters"!

Sandbur Ridge Red Angus and Cooksley Red Angus take great pride in the fundamental basic principles of hoof quality, skeletal integrity, fertility, pounds of calf weaned, and overall balance and phenotype. The sires of these bulls are selected after much evaluation and pressure application to traits of industry importance that affect the outcome of the end product phase for each and every operation. A problem free calving experience, growth achievement to weaning time, and ultimate carcass improvement are all factored in this offering. The people backing the bulls are very disciplined and customer service focused as they have a devout understanding of the seriousness of your bull selection and the impact this purchase will have on your program over the next 10 years, literally.

We have listed the age of the dams that are responsible for this year's offering to give you a better understanding of the longevity, durability, and fertility that these cattle represent. Genetics don't cost, they pay... so invest in the type and kind of cattle that will leave a lasting impact on your program for decades to come.

We invite you to Broken Bow the 17th of March for the Annual Flat Water Gang offering. We are sure that your expectations will be met by the cattle in this offering. However, if you need any assistance or information prior to the sale please feel free to reach out to any of the sale staff to assist with your prospective purchases. Again this year, the bulls will be on display at Broken Bow Livestock. They will still sell on video at the One Box Convention Center that is attached to the Cobblestone Inn & Suites.

NEW this year! The team at Sandbur Ridge Red Angus have elected to offer a hand selected group of elite registered Red Angus females from the heart of their maternally focused breeding program for your benefit and appraisal. These females are supported by generations and years of dedication, disciplined, and strict culling practices. These females are bred to be profitable, functional, and long lasting brood cows that will stand the test of time. Invest with the utmost confidence!

Please feel free to reach out to Ben, Ross, or any of the sale staff associated with this great set of Red Angus beef bulls and top shelf registered replacement females. We look forward to seeing each of you in Broken Bow, Nebraska!

Broken Bow Livestock

614 N B Street - Broken Bow, NE 68822

Delivery and Load-out:

We are offering free delivery to all points in Nebraska. Delivery to other states will be at the lowest cost possible from the seller's base operation. Bulls not delivered by April 15 will incur a \$5 per day feeding cost thereafter. A \$100 credit will be offered for bulls taken home on sale day by the new owner.

In Herd Semen Use:

Seller(s) reserves the right to in herd semen use on all bulls in the offering. Collection will be negotiated with the new owner. All costs associated with the collection of in herd use semen to be covered by the seller.

Photography:

John Reasor: (423) 290-6002

Advertising and Catalog Design:

THM Promotions - Tracy McMurphy: (806) 679-0231

GGP 50K:

Over 10 years of genomics research is distilled in the new GGP 50K. Detects gene markers that have the greatest influence on economically important traits and the most impact on key traits that cattle inherit from their parents. All bulls with the GGP logo on their pedigree box have had DNA submitted and  are on file at the Red Angus Association of America.

Bull Guarantee:

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the Red Angus Association of America, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

Terms and Conditions:

The Auctioneer will settle any bidding disputes and his decision on such matters will be final. All sales are cash in U.S. funds unless prior arrangements have been made with the sellers. Any announcements made on sale day take precedence over printed material. Health certificates will be furnished for shipment anywhere in the United States. Any death or injury after the animal is sold is at the buyers' risk. Anyone attending this sale attends at his/her own risk. A retained interest by the seller will be designated as such in the sale. The buyer receives full possession and full salvage value on all bulls with a retained ownership interest. All registered cattle sell under the suggested Sale Terms and Conditions set forth by the Red Angus Association of America.

Online Bidding:

We are pleased to bring you real-time internet bidding and a live broadcast of this sale through DVAuction.com. If you are unable to attend for any reason, you may bid online at dvauction.com. Please register for bidder number at www.dvauction.com anytime prior to 12 Noon on Friday, March 14 to accommodate the approval process. After this date/time, bidder approval may be delayed. Approved bidders will be issued bidder number and access prior to the sale. For questions or sale bookings call the Office M-F 8am-6pm CT: (402) 316-5460.

The Cornerstone Cow

The Cornerstone cow program is a tool for producers to utilize when selecting seed stock for their operation. The word Cornerstone is an architectural term meaning the first stone set in construction. The stone in which all the building depends. For our purpose, the Cornerstone Cow is a measure of the following:

$$\text{Fertility} + \text{Production} + \text{Longevity} = \text{Profitability}$$

This scoring model ranks the components of fertility, production to weaning, and longevity, within a herd and age group of females. The categories being scored are based upon the actual data submitted to the American Red Angus Association as a part of total herd reporting. **Any cow scoring 90% or higher earns the title of a CORNERSTONE COW.**

By scoring our cow herd we are attempting to provide you with an easy-to-understand value for each female in our herd. The Table below summarizes the scores for each age group of cows in production:

Age of Female	Best Possible Score	Top 25%	Top 50%
9 + years old	35	26.25	17.5
8 years old	33	24.75	16.5
7 years old	31	23.25	15.5
6 years old	29	21.75	14.5
5 years old	27	20.25	13.5
4 years old	25	18.75	12.5
3 years old	23	17.25	11.5
2 years old	21	15.75	10.5

The definitions on the next page explain the criteria that is used in the scoring model.

MPPA

7	108 or higher
6	105-107.9
5	103-104.9
4	100-102.9
3	97-99.9
2	94-96.9
1	93.9 or Less

MOST PROBABLE PRODUCING ABILITY (MPPA) – An estimate of a cow's future productivity for a trait (such as progeny weaning ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

CALVING INTERVAL

6	368 or less*
5	369-375
4	376-397**
3	398-417
2	418-439
1	440 or more

CALVING INTERVAL – The amount of time (days or months) between the birth of a calf and the birth of a subsequent calf, both from the same cow. *Calving interval of 368 or less is assigned to Donor females that are 6 years old and older. **Calving Interval of 376 to 397 is assigned to Donor Females that are 5 years old and younger.

RATIO CHANGE

6	+15 or more
5	+7 thru +14
4	0 thru +6
3	-1 thru -7
2	-8 thru -14
1	-15 or less

RATIO CHANGE – The difference between the birth weight ratio within a known population to the weaning weight ratio within the same population of individuals. Ratio change for this measure is the difference between the cows actual average birth ratio of all her calves and the weaning ratio of all her calves.

AGE

8	9 plus
7	8
6	7
5	6
4	5
3	4
2	3
1	2

AGE OF COWS – Cows can live for over 20 years, but on commercial farms the age at slaughter varies considerably. Farms with poor management, high-yielding cattle or high disease rates will slaughter their animals at a much younger age, normally after four lactations (around 5-6 years old), but sometimes after 2 or 3. Cows should be able to consistently breed and rebreed through about 8 years of age and performance should be maintained until around 12 years of age, that is when you might see a steeper decline in reproductive performance.

OF NATURAL CALVES

8	8 plus
7	7
6	6
5	5
4	4
3	3
2	2
1	1

NATURAL CALVES – These are the calves that are conceived either by artificial insemination or natural service. These calves are carried by the dam and raised by the dam within the population of the operation. The number of natural calves is an indicator of the cow's ability to raise a calf and rebreed within their environment over a longer period.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

The 2025 Bull Offering

LOT 1 - RIDGE RANCH HAND 4521

- The inception to this year's bull offering is a standout any way you want to look at him, starting with his burly, stout featured phenotype.
- Loaded with rib shape and volume and a powerful top, he jumps out at you as a feature herd bull prospect.
- His performance data is the envy of many: 104 WW ratio, 105 YW ratio, and the #2 IMF scan in the sale.
- Genetically, he is hard to top, as he carries the #1 ProS and #2 Herd Builder in this year's sale with numerous other top ranking EPD values on his ledger.
- When they do so many things as well as he does, it's easy to make them Lot 1.
- Top 1% ProS, HB, STAY, top 2% CW, top 4% GM, MILK, top 5% REA, top 15% MARB, top 20% HPG, top 25% CEM, top 30% WW.
- One of the most elite individuals to EVER carry the Sandbur Ridge Red Angus brand!
- *Sandbur Ridge Red Angus would like to collect Ridge Ranch Hand 4521 prior to pick-up/delivery following the sale. Terms Announced Sale Day.*

- She's sure to catch your eye in the pens on sale day. A powerful female that puts it together in a superbly balanced package.
- She's the right kind.
- Females like 4138 will be a solid foundation for the future of your herd.
- Top 40% DMI.

**LOT 119****RIDGE AQUILA 2087-4542**

- Ridge Aquila 2087-4542 posted solid weaning performance and is a heifer worth studying.
- Elite calving ease genetics but still packs some growth punch at weaning and yearling.
- Top 1% CEM, top 2% CED, top 10% BW, MILK, top 15% HB, top 35% ADG, top 40% WW, YW.

**PIE CAPTAIN 057**

Paternal Grandsire of Lot 119

**LOT 120****RIDGE BEAUTY 629G-4099**

- 4099 is a deep bodied female that is so proportional in her profile design.
- The only chance you have to buy a KUHNS Max J192 daughter.
- You will want her after you study her brothers in the bull offering.
- Top 10% DMI, top 35% MILK.
