— SIMMENTALS —

February 22, 2025 · One O'Clock In The Afternoon

WORTHING, SD

**LET US HELP TAKE YOU
TO THE TOP OF THE HILL**
ONE BULL AT A TIME.

WELCOME

As I sit here writing this letter for our 10th Annual Production Sale, I can't help but realize how nice of a winter we have had here in South Dakota. This past week we had several days in the mid 50's which for the end of January is super rare.

We would like to personally invite you to this year's 10th Annual Bull and Female Sale on February 22nd at 1 O'clock hosted on the ranch here in Worthing, SD. We have assembled a great set of cattle for your appraisal and hope you can join us sale day. A lot of the females will have calves at side already so all the hard work has been done and they are ready to return profit! As you study the catalog you will notice that we put a lot of thought into our breeding decisions, and its always rewarding to see how they turn out, but this year in particular we are beyond proud of the results.

We also put a lot of time and research into providing the cowherd with the best nutritional regime possible. We all know that good hay and silage is very important, but here at Hilltop Simmentals we put a lot of emphasis on our mineral program which I'm happy to say has moved our herd towards faster breed back, less open cows, better BSE scores on our bulls and most importantly the overall health of our cattle!

Developing bulls is something we take a lot of pride in. From the time we decide what bulls are going to be marketed in the sale, to how they perform on our ration. We believe in strong and proven genetics to back up our bulls. We have learnt first-hand that if the bulls have been developed on a hot ration, they will not hold up in the pasture. They are on a pretty basic, high roughage ration with a really good mineral program. Doing this we have heard countless times how impressed our customers have been with the bulls holding up and not melting away after the first breeding season. We believe that developing bulls in this way also results in very good fertility, which is exactly what we need for our customers to be successful.

We have made significant investment into the best herd sires and donor females we can possibly source, ones that provide power and consistency. A herd sire we currently run is ES Right Time FA110-4, a bull that is no stranger to Simmental enthusiasts. He has bred above and beyond our expectations, seeing how he is going to heavy influence our herd has us excited for the future. This offering features 12 son's and 7 daughter's. Which of these 19 head we believe there are multiple bulls that could find themselves working for progressive purebred breeders, along with daughters that will be headed right into the donor pen for their new owners.

We want to thank you for taking the time to read through the catalog, and would love to host you, you're family and friends on sale day!

A stylized, handwritten signature in white ink that reads "Jason". The signature is fluid and cursive, with a large loop at the end.

welcome

I'm not sure our ancestors could have ever imagined the markets that we are currently seeing as beef producers. Truly there has never been a better time to have ownership in beef cattle, and to invest in the performance of your product, as many in the know, still forecast the next few years to be as positive and bright as the attitudes of the men that stand behind the Hilltop Simmental firm. Truly if you have not yet taken the opportunity to tour the ranch or visit over the phone with Jaron, then take this as your opportunity, because he and his crew approach the business with an enthusiastic and driven mindset that is unrivaled. They take their role as your trusted seedstock provider very seriously.

As always, you can trust that the offering is backed by serious investment and cow families of significance that have made a substantial impact on the beef industry. Both divisions of the offering are led by sons and daughters of ES Right Time FA110-4, an industry icon that stands at the front of the Hilltop Simmentals fall sire battery and has become a household name in the business. After several seasons of progeny, it goes without saying that his name will be etched among the legends of the breed, siring a balance of quality, performance, longevity and customer satisfaction across a broad audience. Followers of the program will have noticed the absence of a Fall Female Sale in 2024, this was only done in an effort to bring together the offering into one big Production Sale in the Spring, and allowing the Hilltop crew to do what they do best and provide as much customer service as possible in calving out a large majority of the bred female offering. We are excited for you to see the calves at side of the sale females, as we think they provide a vivid snapshot into the future of several very exciting investments that are being offered up for the female buyers.

With Jaron and his families experience in the livestock nutrition business, it comes without question that the presale care and development of the bulls is first class. Developed with the intentions to create long-term relationships with the buyers, the crew at Hilltop Simmentals has fed this set of bulls with longevity, fertility, and functionality in mind. They have been slowly developed in order to preserve their structural integrity and foot quality. They are fit and ready for heavy service!

Consider this your personal invitation to join us on Saturday, February 22nd, 2025 in Worthing, South Dakota for a powerful set of Simmental herd bulls that will positively enhance your program's bottomline. Hilltop Simmentals is conveniently located right off I-29, the gateway to a majority of the South Dakota bull sales, so don't think twice about making a quick detour on your travels to investigate the impressive set of bulls ready for inspection. We believe that this offering presents the necessary diversity in terms of performance bulls, calving ease bulls, and aged bulls – there is truly something for everyone! We encourage you stop by the ranch or call and visit with Jaron about the sale offering. It won't take you long to recognize the passion that he has for the beef industry. We look forward to seeing each of you on sale day!

TERMS, CONDITIONS & GUARANTEE

In addition to the standard Terms and Conditions of the American Simmental Association we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling that are purchased for \$3000 or more. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. All animals selling are up to date with our vaccination program built with the assistance of Sweetgrass Veterinary Clinic. Announcements made sale day from the block take precedence over printed material in this catalog. Payment will be accepted in the form of cash, cashier's check, or check. All cattle must be paid for prior to release and transfer. Hilltop Simmentals will be retaining at least one-third revenue sharing semen interest in all bulls selling. This means if we would like to collect semen on the bull for our own use, we would have the option to do so. Also, if semen is sold we would retain one-third revenue. The new owners of the bulls will have full possession and full salvage value. Hilltop Simmentals is retaining the right to two successful flushes (for a minimum of 12 total, quality embryos) on each female in the offering. If this right were to be utilized, it is to be completed at the buyer's convenience and seller's expense.

RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

INSURANCE

We recommend serious consideration is taken about insuring your herd bull purchases. Insurance will be available sale day via James Bessler representing XL Catlin.

James Bessler, 815.762.2641

- HLTS Right Time L308 combines the best of both worlds from a genomics and phenotype standpoint! This direct son of ES Right Time FA110-4 is one that those searching for a purebred herd builder need to mark for inspection.
- His SVF Steel Force S701 sired dam has become a valuable member of the cowherd, with this being her second son to highlight the Bull Sale, in the 2023 event, her KBHR High Road E283 sired son sold to Joshua La Brun.
- Yet this new edition really stepped it up a notch, as HLTS Right Time L308 is one of the most exciting young herd bull prospects we will sell in 2025!
- He ranks top third for both calving ease and for yearling weight, proving he has the curve bending trends that are so desirable for stockmen in the real world. He is smooth jointed and flat shouldered; if you found him to be successful after a trial younger cows, we think he offers the potential to be utilized on heifers.

- Followers of the program know the quality that comes standard issue with the sons of the great ES Right Time FA110-4! 2025 comes as no exception to the rule, in fact this may very well be his best crop to date.
- This son of the tenured, Haleys Maroon B242 offers quality on either side of the flesh, and presents himself as a purebred herd bull option that is bound to inject quality and profitability into a programs bottom line.
- A full brother to lot 2 sold to Seth Bose in 2024.
- L396 ranks in the top 30% for ADG, API & DOC, top 35% for YW, MCE & Marb; and top 40% for CE, WW and TI. There is no denying the all-around cowboy kind and real beef characteristic of these Right Time sired sons. If you're interested in whole herd improvement then an investment here will be well warranted.

- The sons of ES Right Time FA110-4 are prime pieces of property in this business that not only demands high performance and growth but becomes profitable when the cattle are built with longevity and fertility. This one sets the standards when it comes to functionality and offering balanced quality.
- You will find the genomic package of HLTS Right Time L400 to sport advantages for better calving ease, lower birthweights, higher yearling weights, more growth and better carcass quality and yield.
- A purebred sire that always strikes a pose! He goes back to the prime producing, ADB Jody female that has longevity written all over her. She is one that was built with a beautiful hind leg and perfect bag at calving. This is the kind of cow family that keeps a cowman in business.

• This black herd sire prospect rounds out the sons sired by Mr. Consistent, ES Right Time FA110-4. His progeny are cattle that are functional with muscle, body shape, longevity in structure, and very productive on the female side of the progeny. M3 ranks among the top third of the breed or better for YW, ADG, Doc, YG, and BF.

- We absolutely love the cowboy logic behind this bold-bodied, loose-hinged, big-ended, blaze-faced herd bull! The Next Level influence is highlighted over the next 6 bulls, and you will notice that it comes with added power, shape, length, and sheer mass without sacrificing value on paper.
- He is backed by multiple Simmental matriarchs in his pedigree, being a direct son of the Haleys Sweet Clover A212 female that is a daughter of GLS New Direction. This influence only adds another degree of power and consistency of pedigree.
- His phenotype certainly makes him the complete and total package and believe he will contribute to a top shelf program of seedstock or commercial affiliation!

• HLTS Next Level L326 is one that has impressed us with each stage of maturity. He has matured with extra power and shape, and offers an outcross option that still provides a secure form of consistency from his time-tested pedigree.

• He offers excellence not only on the hoof but over the rail with positive trends for YG and REA. His mother has made for a great addition to our cowherd, always returning to the weaning pen in the fall with an impressive calf.

70	574	1205	35.5 CM	4.87								

- The first son of the very impressive HLTS/CLRWTR Sugar K5 donor that we own with Meyring Cattle of Alliance, Nebraska. She is a full sister to Ahead Of Time and Right On Time, being an ES Right Time FA110-4 daughter of the legendary, WS Sugar C4. When it comes to dams of distinction, it doesn't come much more prolific than what you will find here.
- He offers the consistency of being both homozygous polled and black.
- He sports an absolutely incredible set of genomics, ranking top 15% of the breed or better in 9 traits, including CE, BW, YW, REA, API and TI.

- Starting the four percentage studs from the DMCC Stockman 124J sire is the heavy weaning, 114 WWR stud, L408. He is already approaching 1500lbs of roar power himself.
- This one stems from a very familiar maternal lineage, being a grandson of the legendary, EKHCC Red Jewel 760 sire that has built an incredible reputation of quality through generations of progeny not just for the Hilltop program, but leaders in the Simmental business.
- He ranks in the top 15% of the registry for WW and YW, and is set to inject the potent pounds into a calf crop.

SIRE OF LOT 41

- HLTS Sheza Star L69 begins a powerful set of bred females that will go under the hammer on February 22nd. There is truly something for everyone in this offering, from elite EPD cattle, phenotypic phenoms, varying colors and different calving dates, yet one thing remains a constant, that the maternal backing is sourced from the best genetic linages the Simmental breed has the offer.
- The daughters of ES Right Time FA110-4 are what we are trusting to carry our program into the next generation. These are cattle that come with an incredible phenotype, reliable performance ledger and top tier maternal quality. We are excited to offer L69 as one of the most impressive to date. Phenotypically we aren't sure what changes you could want to make to this matron of the future.
- Her lineage stems from one of the most prolific cow families known in the existence of the Simmental breed in the Sheza Star's. This connects her to multiple National Champion's, six-digit producers and breed leading sires.

BULL BRED ESTIMATED DUE 3/15/25

BF VIDALIA
MATERNAL GRANDDAM OF LOT 43

- HLTS Panda L14 stems back to the maternal powers of the BF Vidalia cow that is a member of the “legacy donor” lineup at Sloup Simmentals. The SVF/NJC Built Right N48 daughter is a past NAILE Champion, and has a decade long resume of high dollar production for the firm.
- This new addition to the lineage looks to continue the tradition of excellence that has been set ahead of her. She is built with quality in mind, with a unique set of proportions that start big and wide about her rear end and end pretty and eloquent about her front third. She too comes with an extra degree of bone substance and foot size.
- We think she is bound to sire bull progeny that stand ahead of the pack, and daughters that carry on the family name to the next generation of superior beef production.

- HLTS Right Time L25 is another purebred, ES Right Time FA110-4 daughter that presents her case towards being a long-term investment that makes returns in the short term.
- She offers the complete package, being super balanced and impressive in her phenotypic makeup, handy in her genetic predictions and reliable in her pedigree.
- We think the prospect of her having a ZTGC Just Cuz 52K sired calf at side on sale day will make us question why she is even being given the chance to leave Worthing.

- ES Right Time FA110-4 remains one of the most trusted names in the Simmental business, and this purebred daughter epitomizes what started the reputation!
- This dense built, bolded ribbed, heavy structured and big footed female reads for impressive additions of weaning and yearling weight.
- If we hadn't made a promise to sell an elite group of bred heifers in this offering then you can count on the fact that this one wouldn't be for sale come February 22nd. There is a long production story to be wrote here.

- Notice the occurrence of the tenured PRS Spring Velvet X126 female as her maternal granddam.

HLTS MS VELVET C510
 MATERNAL SISTER TO LOT 45

- HLTS Side Step L77 is a purebred female that is deep bodied, extra round in her ribcage and looks like she will make an incredible brood cow! We love how opened up and exaggerated her middle third is.
- This is an ES Right Time FA110-4 daughter that will be easy keeping and always keep in good flesh, her early maturity pattern and powerful shape are what we try to breed for!

HLTS RED JEWEL J26
MATERNAL SISTER TO DAM OF LOT 54

- We truly think that this time-tested combination of EKHCC Red Jewel 760 with the legendary W/C Loaded Up 1119Y has resulted in one of her most impressive daughters to date! And that puts her among some very impressive company.
- Maternally you will find the iconic EKHCC Red Jewel 760, a female that has stood the test of time, generating the right kind for more than a decade now and regardless of the mating she proves to continually add breeding accomplishments to her resume. She may have passed but there is no question that her legacy will be long felt here in Worthing with her exceptional set of daughters.
- We think Red Jewel L141 might be the most unique and intriguing built member of the sisterhood. We love the dark cherry hide color, added length of spine, perfectly marked face, additional bone and foot size and the looseness of structure she possesses. Her silhouette is truly remarkable.
- Purebred cattle with this kind of build and pedigree are hard to find, and the fact that she is red hided only adds more esteem to her value.

HLTS JEWEL J051
MATERNAL SISTER TO DAM OF LOT 54

- A direct daughter of SS Fort Hayes H618 that is stamped with the trend of extra bone substance, foot size and body shape, that has made him a staple in the red hided bull pen. L28 even has an extra shot of good looks and presence about her, and she certainly demands a second look as she struts around the pen.
- She stems back to the Red Angus sire HXC Conquest 4405P on the maternal side, he built a strong reputation in the Red Angus world for siring cattle with moderation, that were deep sided, and bold sprung.
- A maternal sister to L28 sold in the 2023 Female Sale to legendary Simmental breeder, Bill Fulton.

- This homozygous polled, purebred female is a direct daughter of the iconic, KS Miss Sequoia Y770 donor that has been a dominate matron towards breed development. The production record of the KS Miss Sequoia Y770 female is close to unrivaled by any other red female with an ASA registration number. She is the dam of the \$202,000, W/C Bank On It 273H that is employed by Griswold Cattle.
- Not only does she stamp them phenotypically, she injects some growth and carcass attributes genomically. We love how loose and agile she is on the stride, and how neatly she balances and ties together from end to end.

HPF ORANGE CRUSH A378
DAM OF LOT 57-59

HLTS CRUSH H067
MATERNAL SISTER TO LOT 57-59

- A trio of impressive sisters from the one of the most recognized members of our donor battery, HPF Orange Crush A378, our selection from the historic Hudson Pines operation of New York. A378 traces back maternally to HPF Caliente cow family that helped immortalize this operations reputation. Progeny of Orange Crush have been employed by the Werning, KLER and Front Pasture operations.
- Sired by the hottest show business sire in the breed, JSUL Something About Mary 8421, you will notice a phenotype that comes standard issue with his influence, massive footed, massive boned, responsible frame score and cool design. These females are consistently dense in their muscle pattern and yet remain very flexible structural build.
- These three offer show heifer producers a neat pedigree to build from, and provide opportunities to make red or black one's dependent on sire options. There is a world of sire options that would line up here!
- All three of these females have already calved and will have Just Cuz 52K sired progeny at side, what a way to get their production careers started!

PE TO WHF ON POINT K344 (4209449) FROM 4/25/2024 TO 8/1/2024

BULL BRED ESTIMATED DUE 3/15/25

• The TJ Main Event 503B sire group has been a monumental one in the shaping of the Simmental breed, his quality has proven to be timeless, generating females that have stood the test of time and the fads and trends of the business.

• This direct daughter of the legend is a prime example of why these females have set the industry standard. L3 is built for the long haul, and will start her long breeding tenure with a WHF On Point K344 sired calf in the middle of March.

LOT 74A

438K CALVED 1/24/25. BLACK BULL CALF BY ZTGC JUST CUZ 52K (4063644).

TAG N53. 75LBS.

• HLTS K438 is one that will not only make her presence felt in the short term from raising high growth stock, but one that have a long breeding career because of the added ruggedness and functionality of her build. She is wide at her base, bold up high, and explosive in her stifle.

• Regardless of registration status this is one super impressive female!

LOT 75A

L108 CALVED 1/20/25. BLACK BLAZE BULL CALF BY WINC ALL RIGHT 213K (4100635). TAG N36. 58LBS.

- A sappy bodied, easy keeping, blaze faced beauty that is deep and extra maternal in her body shape. She looks like she will mature into a very useful female to add to the cowherd.
- She already has a WINC All Right 213K sired, black blaze faced bull calf at side that looks like a very valuable token to cash in on.

LOT 76A

K278 CALVED 1/23/25. BLACK BULL CALF BY HLTS/CLRWTR AHEAD OF TIME K1 (4158736). TAG N49. 67LBS.

- Even though HLTS Epic K278 comes close to rounding out the offering, she just proves that power of pedigree sells all the way through. HLTS Epic K278 stems back to the likes of the Brant Dont Ya Love Me donor. A maternal sister to the dam of K278 is one of the most sought after red hided females north of the boarder, HLTS Sammie.
- HLTS Sammie is the mother of the \$110,000 SVS Rancher 42H that has seen heavy use and successful results!

The background image shows a vast, flat, light-colored landscape, possibly a frozen body of water or a snow-covered field, under a sky filled with soft, white and grey clouds. The sun is visible as a bright, glowing orb in the upper right quadrant of the sky, casting a warm, golden light across the scene. The horizon line is low, separating the landscape from the sky.

RJ TRUST FUND 212K X HLTS/CLRWTR SUGAR K5

Two of the breeds most potent forces come together, in the exclusive mating of ES Right Time FA110-4 with WS Miss Sugar C4. HLTS/CLRWTR Sugar K5 that withstand the hype one would have when thinking about combining these genetic gems. She ticks all the boxes being homozygous polled and black with outlier phenotype, genuine muscle shape, foot quality, masculinity, impeccable structural integrity and an EPD package that rivals the best in the business. She defines curve bending genetics that accelerate towards impressive performance and growth. She was the featured donor in our 2023 Female Sale with interest selling to Meyring Cattle.

ROSEWOOD BELLAGIO 090 X TOD HAVEN 0610

This purebred Angus phenotypic outlier works on the front end of the Riverside program, and looks to be the perfect blend of maternal power and potent pedigree coming together to deliver the next generation of quality to come from their impressive donor battery. This mating to the red hot Angus sire, and son of KR Casino 6243, Rosewood Bellagio 090 is set to put your program on the cutting edge of the Angus show heifer world.

CLRS DAIRY QUEEN 606D

DONOR DAM OF LOT 104A-104C EMBRYOS

CLRS Dairy Queen is the purebred donor female that we purchased in the fall of 2023 from JS Simmentals. This proven donor female for them program is the absolute rare blend of ideal phenotype and curve bending genetic markers on paper. A female that can be mated to nearly any bull with substantial growth, but most of all, quality and still read relatively good on paper in comparison to contemporaries.
