44TH ANNUAL PRODUCTION SALE

TUESDAY, FEBRUARY 11, 2025 | NOON | EMERY, SOUTH DAKOTA

A black and white photograph of a man wearing a cowboy hat, glasses, and a light-colored work shirt. He is looking down at a catalog or brochure he is holding in his left hand. He is standing in a field with hay on the ground. In the background, there are several dark-colored cattle, likely Simmental, standing in a line. The background is slightly blurred, showing a fence and some trees in the distance.

WELCOME

As the second generation to purchase seedstock from the Werning's, we have always looked to them for industry elite bulls and females. Their guidance has helped us produce a cowherd that is fertile, functional, and has the ability to withstand all the industry fads. Their genetics have allowed us to market feeder calves that are stout, high performing, and have that extra "look" to them that buyers commend. Knowing that they stand behind their product and help you market yours makes purchasing from them an easy decision. In our case, that is over forty years of trust and friendship with the Werning family!

CRAIG SCHNABEL

PARKSTON, SOUTH DAKOTA

In the fall of 2010 we were looking at our calves and thinking that we needed more guts and butts in our herd. So we attended the 2011 Black Hills Stock Show, and I looked at a Simmental cross bull that Steve Eichacker was showing and knew that Simmental was the direction that we wanted to head. Steve told me that Dale Werning was about the only person he knew that had a few two year old bulls and that was what we were looking for. So that February my wife Heather and I attended the Werning Cattle Company sale and purchased 10 Simmental cross bulls and 3 Angus bulls. That is where our association with the Werning family began. We bred those first bulls to some F1 Blady cows. I remember our very first calf was really small, and I wondered if I had made the right choice, but when I went back to check on the old cow, she had two calves nursing her. By branding time I knew that the Werning genetics were going to be just what I was looking for, improving the phenotype of our herd. That fall we weaned the heaviest steers and the best replacement heifers we had ever raised so it only made sense to return to Werning Cattle Company to purchase our bulls because of the differences we had seen in just one calf crop. The Werning family's integrity and service to their customers is second to none as well, so we have become great partners in the business that we all love. We have purchased bulls at the Werning's nearly every year since 2011, except for 2-3 years when we just didn't need any bulls. Dale was concerned, but I told him that the longevity of the Werning bulls was just so good that we weren't needing to replace them as often. A few years back a family friend purchased our steer calves, ran them on grass through the summer and sold them in Aberdeen, SD where he was awarded a jacket for selling the most desirable steers at the sale! The Simmental breed and the Werning family are creating some of the best cattle at any market. I'm sure happy that I get to take advantage of these record prices!

THE KIME FAMILY

VALENTINE, NEBRASKA

WELCOME TO WERNING CATTLE COMPANY'S 44TH ANNUAL PRODUCTION SALE

We thank the many customers who have supported us over the years. It has been a great privilege to work with you. It is exciting for us to share with you our continued commitment and dedication to making cattle better. The offering is a very elite group of performance cattle with proven maternal power plus being attractive and enjoyable to work with.

We have been blessed with a cow herd that consistently produces offspring that excel in the production of predictable breed leading genetics. We have identified the real leaders in our cow herd and are multiplying their genetics through our extensive embryo transfer program. We will show you many full and maternal siblings on February 11th.

History is being written as cattle prices march higher. Every live calf has great value -cattle with weight and quality have extreme value. The cattleman that have cows that are willing to do the work are in the drivers seat for years to come. I see our cow numbers staying steady in the future- the average age of us cattleman is getting higher with fewer young people wanting to do the work of calving. For me, I thought calving season was the most exciting time of the year.

This year's bull offering is the deepest set of burly, massive herd bull prospects we've ever presented. They are attractive, dimensional bulls that will sire cattle that will push the scale- steers with weight and heifers that will make mamas. When I was starting and building my herd 50 years ago, I was hoping for one great bull calf every year. Now I want 100 great ones.

We again had the distinct privilege of having Jeff Schoenfelder come and carcass ultrasound the bulls. We have DNA genomically tested the bulls, but we wanted to know for ourselves what they really have under the hide. We were incredibly excited about the results. The pen averaged 17.11 for REA, 2.56 for IMF, with backfat at 0.21. We feel this is a great testament to our rigorous herd sire selection criteria that goes into our buying decisions.

The bred heifers are again a very impressive group. These are maternally bred cattle that have power, pedigree, predictability, and are very attractive. Beautiful easy keeping ladies bred to stellar calving ease sires including the \$40,000 high seller from Triangle J. I don't know where you can find cattle with more predictability.

I, Scott and the rest of the team here at W/C are proud of the fact that 218 head in this sale were born and raised on our farm. The other 28 head were raised by top notch outfits that adhere to the same herd health protocols that we do. We enjoy and appreciate Plagmann, Neeser, and Sumption Families for doing an outstanding job raising embryo transplant calves for us.

We would like to thank our family, friends, and neighbors who help us in so many ways during the year and at sale time. We thank you for the trust you have in our ability to supply performance and maternal genetics for your herds. It is our privilege to serve the greatest beef producers in the world. We thank each and every one of you for your business, friendship and trust. It takes special people to love this business- people that work with their hands and talk from their heart. We welcome your visit to the ranch at any time. Our sale facility has been a tremendous addition to our operation, and we invite you to join us for a great beef dinner before the sale. We also encourage you to come Monday, February 10th for all day viewing with food and refreshments. This gives us a great opportunity to learn more about your operation and help with your genetic selections. We thank you for your interest in W/C genetics and invite any and all questions. We have a lot of great things happening here- thanks for being a part of it!

Dale Werning

Scott Werning

Quality has never been more valuable than it is today. The cow/calf producer has enjoyed unprecedented returns over the past 18 months, and the outlook continues to shine with opportunities for the foreseeable future. Across the industry, progressive firms are seeking high-quality, improved seedstock options and are turning to reputable operations like the Werning family of Emery, South Dakota.

For over 50 years, Dale Werning has exemplified dedication and excellence in the livestock industry. His journey began in 1972, when he attended South Dakota State University, joined the collegiate livestock judging team, and took his first steps toward becoming a visionary in cattle breeding. That same year marked a turning point for the industry with the birth of the first Simmental-influenced calf in Emery. A decade later, the Werning family hosted their first production sale, cementing their name as leaders in the field. Their reputation reached national acclaim when the Champion Market Steer of the Ohio State Fair, exhibited by the Sutherly family, showcased the superior influence of the Werning breeding program.

The 1980s were challenging for agriculturalists, with widespread droughts and soaring interest rates testing the resilience of farming and livestock operations nationwide. Yet, Dale and his wife, Joan, persevered. Joan, a registered nurse, balanced her career while contributing tirelessly to the farm and ranch, ensuring their operation thrived during those tough years. Their perseverance paid off, and in 1989, the Werning family was honored as South Dakota Cattlemen of the Year—a testament to their unwavering commitment to quality and innovation.

In 2001, Werning Cattle Company made history by selling some of the first SimAngus bulls in the U.S., becoming the “birthplace” of this now-popular genetic cross. This pivotal moment solidified their reputation for innovation and excellence. Over the years, their breeding program has remained profit-driven and customer-focused, continuously acquiring elite Angus females and impactful bulls to meet the demands of an ever-evolving industry. Standout acquisitions like S A V Blackcap May 4136D and S A V Blackcap May 6644 exemplify their commitment to building a legacy of power cows for the future. Bulls like RFS Heavy Hitter H45, RSF Herald H104, TSN Statesman K006, and TJ Sandhills Swag 816L represent the firm’s ongoing pursuit of performance, maternal strength, and carcass quality without compromising on phenotypic excellence.

Their dedication has yielded influential cattle like Miss Werning 534R, her renowned daughter Miss Werning KP 8543U, and standout bulls such as W/C United 956Y, W/C Loaded Up 1119Y, W/C Bankroll 811D, and W/C Executive Order 8543B. These animals continue to enhance the pedigrees of their annual offering and have left an indelible mark on the breed.

The Werning family’s commitment to excellence spans generations. Scott and Ashley, along with their children Creighton and Thatcher, are carrying the torch with the same passion and vision that have defined their operation for decades. Scott, a former SDSU Livestock Judging Team member and a recipient of “Cattle Business Weekly”’s “Top 20 Under 40,” is well-regarded for producing cattle with skeletal quality, structural integrity, and a balance of end-product and maternal focus. Creighton, a driven young man with big aspirations, is already leaving his mark, having excelled at the AJSA Summer Classic. His influence is evident in the family’s selection of top-tier genetics, such as TJ Sandhills Swag 816L, furthering the Werning legacy.

This year’s offering of bulls and females is the densest and most impressive to date. The females, a source of immense pride for Dale, showcase unmatched maternal excellence. The bulls are stout, rugged, and designed to perform, representing some of the heaviest and most powerful herd sire prospects to bear the W/C mark of distinction. These animals are equipped to elevate seedstock programs and deliver exceptional results for both commercial and registered breeders. Many past buyers have reported record-breaking success, achieving premium prices and enhanced profitability thanks to the genetic potential of W/C cattle.

Mark your calendar for February 11, 2025,— as your opportunity to invest in the future of your breeding program with one of the industry’s most respected operations occurs. Recently voted as one of “The Best Beef Operations in the U.S.” by Sullivan Supply in both 2023 and 2025, the Werning Cattle Company stands behind every animal they produce and is committed to your success.

We encourage you to contact the Werning family or any member of the Innovation Ag Marketing team for more information about this year’s exceptional offering. Join us at the climate-controlled sale facility on the ranch to experience outstanding Southeast South Dakota hospitality, complete with lunch, dinner, and an unparalleled lineup of genetics.

VIEWING OF CATTLE

Cattle can be viewed at the farm any time before sale day.

INSURANCE

We take every precaution for the care and safety of your purchases. Yearling bulls can be kept free of charge at your risk until April 15th. Insurance available sale day.

SEMEN INTEREST

Werning Cattle Co. will be retaining at least one-third revenue sharing semen interest in all bulls selling. This means if we would like to collect semen on the bull for our own use, we would have the option to do so. Also, if semen is sold we would retain one-third revenue. The new owners of the bulls will have full possession and full salvage value.

TERMS

Terms of the sale are cash, check, or credit card payable immediately upon conclusion of the sale and before animals will be removed. 4% user fee for credit card payment.

VOLUME DISCOUNT

Purchased by one firm, discount starts with your 3rd bull as follows: 3 bulls = 3% discount; 4 bulls = 4% discount; 5 bulls = 5% discount; etc. 10 or more bulls = 10% discount. No discount on bred heifers.

FEEDING + DELIVERY

All bulls will be kept free of charge until April 15th. At that time we will semen test, give pre-breeding shots, pour, worm, and freeze brand. We will then arrange delivery to you. We offer free delivery within 300 miles. For buyers beyond that point, we will assist in the coordination and delivery of those animals. Since each animal becomes the risk of the purchaser as soon as sold, we strongly recommend mortality insurance be taken out on any animal left to be wintered at the ranch.

We would appreciate pick up or delivery arrangements of the bred heifers to made within a few days of the sale. Bred heifers will not be removed from the ranch until payment has been made.

\$100 discount if you take your bull sale day.

FALL-CALVING OPERATIONS

With our growing number of fall-calving customers, we are now offering those of you to add \$500 to the purchase price of your bulls and we will feed them until the fall.

Delivery will then be arranged.

ON ORDER PURCHASE POLICY

If you are interested in some of the cattle selling and are unable to attend the sale, we can purchase the cattle for you on order. We guarantee your satisfaction, or you don't own them. Please call early so we have time to visit about the offering.

GUARANTEE

BULLS | Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the American Simmental Association, we will provide the first breeding season (90 day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute for poor management. The purchaser assumes all risks for injuries due to running bulls together and management decisions outside of genetic control. We will not be responsible for the loss of any females not serviced. For this guarantee to apply, we ask that you contact us as soon as a condition is observed and before an animal is sold. We will do our best to correct any problems that may occur.

BRED HEIFERS | The bred heifers are pregnancy checked and guaranteed to calve within the reasonable time period printed.

Werning Cattle Company reserves the right to 1 successful IVF or conventional flush or a minimum of 6 grade 1 embryos, whichever is greater, on every female in the entire offering. The embryo work is to be done at the buyer's convenience and sellers expense.

LIABILITY

Purchaser understands and agrees that any animal purchased is purchased as is and with all faults—both visible and latent. Werning Cattle Company makes no representations as to the welfare and health of the animal, including, but not limited to, whether the animal has any latent disease or health issue. Werning Cattle Company expressly disclaims all liability upon sale of the animal and makes no warranty as to the animal, which includes either express or implied warranties. All persons attend this sale do so at their own risk and owners or sale personnel assume no liability for accidents.

SELECTED TO INCREASE PAYWEIGHT, PERFORMANCE, PHYSICAL QUALITY AND ULTIMATELY OUR CUSTOMERS PROFITABILITY!

- Heavy Hitter and Herald are Full Brothers
- Both bulls rank high within the breed for WW, YW, REA, & ADG
- Both bulls only used exclusively by the owners, NO SEMEN was offered to the public!
- They come from a sensational Remington Lock N Load 54U Dam
- Heavy Hitter is currently the #8 Sire in the breed for Weaning Weight!

In a never-ending pursuit to try and create the most ideal and profitable bull product for our commercial customers we came across these two studs and knew they needed to make their way to Emery, SD! Both bulls rank high for the important economical traits vital to improving our customers bottom line and do it in an impressive physical package. We have been fortunate to breed and/or own some of the greatest growth bulls in the breed and these two are next in line. We feel the sons of these sires will allow you to sell more pounds on sale day whether that be at weaning, backgrounding, or the kill floor.

LOT 1

An impressive beast of a bull to lead this incredible sire group that is double bred for breed leading growth with W/C Bankroll 811D on his dam side. 879M is loaded with thickness from end to end with that extra pizzazz that sets him apart. As much shape and depth as we can make and the kind of bull to quickly impact a set of calves and the herd he is used in. Herd bull look with herd bull figures!

LOT 2

A brilliant blend of data, powerful phenotype, and predictable pedigree. He is double stacked for growth being from a top young W/C Revolution 65G dam who excels for length, rib shape, and udder quality. This bull is so long, smooth and athletic. He's one we certainly want to use back in the program as he was a standout from early on. He ranks 1st for weaning weight amongst the natural calves. Top 1% growth genetics never looked so good!

W/C REVOLUTION 65G

MATERNAL GRANDSIRE OF LOT 2

LOT 3

A special blaze faced bull who represents much of what we are trying to put together here at W/C. He will give you that heavy set of steer calves that stand out from the crowd yet make a special group of replacement females. This cow family excels for udder quality as well and puts calves right near the top every time. This guy does a lot of things right!

LOT 4

A true beef bull from every angle with added rib shape and capacity. He supports a great set of data with seven traits in the top 20% of the breed. He comes from the great Miss Werning 534R cow family that is responsible for much of the success of the W/C program. This is the kind of bull that is built to keep the pedal down in the right direction for any progressive cattle operation.

MISS WERNING 534R

LEGENDARY MATRON OF INFLUENCE

Pick your favorite from this duo of studly full brothers from one of the rising stars in our cowherd. 978G has absolutely cranked them out this far. Sons are working for Raml Cattle, Long Simmentals, Bill Jansma, and Scott Weber. This mating to RFS Heavy Hitter H45 may be her best yet. Both of these guys were big at weaning and have the look of real herd bulls. Power in the blood!

Here is a powerful individual that is sired by RFS Herald H104, a full brother to the great RFS Heavy Hitter H45. The dam of this stud is a first calf heifer sired by "Triple Threat" that did a tremendous job during her rookie season of production. 113M is a top shelf calving ease option that ranks among the top 20% of the breed for CE and top 15% BW. He offers curve bending genetics!

**W/C MISS WERNING 978G**

DAM OF LOTS 5 & 6
 GRANDDAM OF LOT 7

POWERFUL FULL BROTHERS

Wow what a set of full brothers! A trio of powerhouses from the 971G donor cow. These three are absolutely ripped with muscle as they are big topped and big quartered. Lot 8 is the natural calf of 971G, and lots 9 & 10 are the result of embryo transfer. All three really spread the numbers with negative BW to high weaning and yearling EPDs. If you want to make your next calf crop heavier without adding any extra birthweight look in here.

MISS WERNING 757E
MATERNAL GRANDDAM OF LOTS 8-10

THE W/C X SAV X 534R COMBINATION

These three bulls are highly related with nearly identical pedigrees. All three are from young 534R daughters sired by SAV America 8018 and SAV Raindance 6848. SAV America 8018 is the world record selling Angus bull who was the talk of the country. We love nothing more than trying to make the perfect commercial bull by blending W/C and SAV bloodlines. These guys represent so much good and are the result of generations selected for both performance and maternal excellence. Sell their heavy steers and keep their daughters or sell them for a big premium!

MISS WERNING 534R

LEGENDARY MATERNAL GRANDDAM OF LOTS 11-13

LOT 14

Big time herd bull prospect with one heck of a cow and story behind him. 161J was the 2023 sale highlight where she commanded \$70,000 to Colton Plagmann. 161J is what we feel is as close to the ideal Simmental female as we have made at W/C. She is totally massive, yet elegant with awesome feet and legs. Her first bull calf sold for \$30,000 to Ferguson Cattle Co in Ohio last year they call W/C Satisfied 161L. 161M is cut from the same cloth with strong figures, elite phenotype, and a predictable pedigree!

LOT 15

A real-world beef bull in every sense of the word. He represents just how wide and massive RFS Heavy Hitter H45 makes them. We love this bull's bold and robust body type that is complimented by tremendous muscle shape. He was a drink of water away from cracking 800 pounds at weaning. If you want to add more rib, muscle, and shape to your calves, then you will have this bull marked on sale day. We would take a whole load just like him!

A typical RFS Heavy Hitter H45 son that is ready to inject length, muscle, and breed leading growth to your next calf crop. His dam has a great udder and has done a great job. Lots 19, 20, and 21 are peas in a pod and are the kind we like to sell to add value to our customer's bottom line.

Double bred for length and growth here being out of a Rubys Turnpike 771E sired dam that is very good. She herself was one of the best on that 2020 born heifer crop. He boasts an awesome genomic profile, being near the top of the breed for WW, YW, and REA! This guy can make a real impact in a short amount of time!

A pasture favorite all summer and another that I think will have a bunch of friends on sale day. He is impressive on paper and in the flesh. He's backed by an awesome MR SR 71 Right Now E1538 dam and an impressive Angus grandam. A tremendous set of figures backed by a stout phenotype make this bull a candidate for the most particular cattleman. Herd bull figures with a herd bull look!

Same pedigree as lot 22 being sired by RFS Heavy Hitter H45 and out of a daughter of MR SR 71 Right Now E1538. A very nice set of genomically enhanced EPDs to go along with an awesome look in this baldy bull. He can sire those fast growing feeder cattle that make order buyers pay attention when they come into the ring.

25

26

27

STOUT UNIFORM CONSISTENT

A trio of three-quarter blood sons of RFS Herald H104 that are all cut from the same cloth and all from proven W/C bred dams. All three of these guys have great muscle shape with added eye appeal. A great place to consider if you want to tie some brothers together that look similar and read similar on paper too!

THE BEST OF BOTH GENEPOOLS SIMANGUS HALF-BLOOD SONS OF HERALD & HEAVY HITTER LOTS 28 - 37

In conversations with our customers and talking to producers, some have expressed that the number of half-blood SimAngus bulls available in the marketplace is not what it used to be. We have noticed that as well and have made a conscious effort to provide a nice selection of SimAngus bulls from some of the best Angus genetics we have found to cross with our W/C Simmental cattle. There are 27 half-blood SimAngus bulls in this sale as well as a large amount of 3/4 Simmental 1/4 Angus bulls to find the perfect blend for your operation and to best suit your cowherd.

What a way to start this SimAngus section of this sire group. He is backed by a true power Angus cow that is building a great resume and is the grandam to the good lot 22 bull. Lot 28 puts together a "no holes" package that blends phenotype, cow power, and EPD profile in one easy to look at package. He represents the kind that are fun to raise and the kind we like to offer in volume to our customers!

Check out this set of data! He cranks seven traits in the top 10% of the population as well as many others in the top 30%. He weaned off his good proven Angus dam very heavy and is the kind of bull to quickly make a positive impact for his new owner. A full brother sold last year to Terry Wicks.

LOT 30

A real beef bull that packs a punch. He is so massive and wide bodied which propelled him to the 3rd highest weaning weight among the natural born calves. A big-time performance bull with the EPDs and the actual data to back it up!

LOT 31

Another rancher bull with impeccable genomic enhanced EPDs. He ranks in the top 2% and 3% for four economically important growth traits. Another SimAngus bull from a highly proven Angus dam who has stood the test of time. Another bull who impresses on paper but also in the pen.

A trio of similar designed RFS Herald H104 sired SimAngus bulls that are blended with highly proven Angus genetics from their dam's side. All three rank well among the breed for WW, YW, ADG, and REA. This group can make those highly sought after steers, yet the heifer mates will be the keeping kind year after year!

This bull comes highly recommended for any of you trying to make the ultimate replacement female that can turn into a highly prolific cow. This cow family is moderate in size with the absolute best 10 score udders. The 149Y cow in this pedigree is a 2011 model and still in the herd. With all this being said the steer mates will still be the kind feeders demand and want.

A striking bald faced bull with an awesome set of EPDs. We love his low BW to high growth spread on paper. A really neat genetic package and a bull that should develop into a real stud come turn out time.

A neat marked brockle face bull here that offers more calving ease and lower birthweight. He still weaned off heavy and ratioed 103 among the natural calves.

THE IMPRESSIVE SECOND CROP FROM THE \$110,000 OMF JOURNEYMAN J24!

Selling 28 sons of OMF Journeyman J24 as lots 38 – 65! Every OMF Journeyman J24 son in this sale is the result of our vigorous embryo transfer program from our very best cows. Lots 38 – 52 are Purebreds and lots 53 – 66 and three-quarter bloods. You will find many full and closely related bulls throughout this group with many of them going back to Remington Lock N Load 54U on their dam side. These next 28 bulls have been an absolute treat to raise, and watch develop. Don't get us wrong, we were very happy with this sire group a year ago, but early visitors agree that this year they are on another level!

How about this for a herd bull pedigree? OMF Journeyman J24 out of one of the very few full sisters to W/C Bankroll 811D! He looks exactly how you would draw him up. 73M is stout, wide made, and good looking. 7058E has been knocking it out of the park with every sire we have used in her. She is the dam of Creighton's popular Reserve Champion bull at Junior Nationals that leads the fall bull division in this sale. Daughters sold for \$13,500 and \$10,500 this past fall and have already found the purple for Benson Van Winkle in Happy, Texas. A perfect blend of pedigree, phenotype, and EPD profile!

POSSIBLY THE BEST SET OF FLUSH BROTHERS TO EVER SELL AT W/C!

SELECT FROM SIX FULL BROTHERS!

JOURNEYMAN X 964G

An extensive embryo transplant program isn't the easiest or cheapest way to make better cattle but when you we get results like this it makes it all worthwhile. Without a doubt one of the most impressive sets of flush brothers we have ever offered. Their dam is one of our brightest new stars and we identified her as the best heifer of the 2019 calf crop. This Turnpike daughter is just stunning to look at and has proven to be a great genetic piece for us to make the kind of cattle our customer's demand. 964G's first natural calf was an excellent Right Now son that sold to Wade Horstman of Parkston, SD for \$20,000. We have even more 964G ET calves coming in 2025 and hopefully the 2026 sale will be filled with her progeny. We can't wait for you to step in the pen with these guys. They are wide bodied, good looking, and chuck full of muscle. Pick out your favorite and take him home or put a few brothers together. A true sale highlight on February 11, 2025!

STOUT & ATTRACTIVE FLUSH BROTHERS

JOURNEYMAN X 6175

Full brothers to the \$29,000 W/C Tradesman selected last year by Wheatland in Canada and the impressive FAB FIVE bred heifers selling this year in the female division. An awesome trio of full brothers from one of our very best cows who is also a granddaughter of 534R. 6175 is also the dam of our 2022 top seller W/C Dabo. These bulls all have the extra muscle shape found in both of their influential parents. They put together a nice set of data to go along with their championship caliber phenotype. Pick out your favorite and take him home or if you want to run a couple full brothers home this is a nice group to consider.

A striking pair of flush brothers from one of our tried and true donors, 793E. Fifteen sons of 793E have crossed our sale block and are working for top cow outfits around the country. Including the lead off age advantage bull that sold for \$20,000 last year to the Heim Ranch. They blend real muscle shape, attractive build, and a nicely balanced EPD profile to a very high degree.

The wait is finally over for the 1003J progeny to start making their presence known. 1003J was the \$57,000 half-interest selection of Cole & Talli Jackson in our 2023 Sale. She is the popular full sister to the \$202,000 W/C Bank On It 273H bull that we own with Griswold Cattle Co. and Gustin Cattle Co. She was identified early on as one of the top heifers of that impressive 2021 born crop and this sale will feature her first progeny. If these three sons are any indication of how good she can make them, then we are all in! We have gone back and forth on all three of these as to which our favorite is, but we will tell you that they all have an impeccable presence to them and exhibit true stoutness with a real look of quality. Pick your favorite on February 11, 2025!

\$202,000 FULL BROTHER TO DAM OF LOTS 50-52

THE COWBOY'S KIND WITH EXTRA FRAME & LENGTH

Within this set of 5 ET bulls you will find them to be out of two full sisters. Both 7040E and 0149H are sired by Remington Lock N Load 54U out of the great 036X cow who is a 2010 model and still in the herd. Her mother, K36U, also stayed in the herd until 15 years of age. This type of longevity seems to be hard to find and hard to replicate these days, but these genetics have it stacked throughout! They are bred to sire extra growth without a need for extra feed or management. You will be hard pressed to find bulls bigger, longer, or heavier muscled than these brothers.

In our quest to make the perfect commercial bull we fully realize that every producer has their own version of that. With that being said we really like what these five put together in terms of being great all around genetic packages that can improve a wide range of traits is very close to where we want to be. These rascals are long, thick, and backed by another great 534R daughter. Another interesting fact is that they came back ranking 1,2,4,5, and 15th for IMF! This set of flush brothers are worth the trip to Emery!

OUTSTANDING FLUSH BROTHERS FROM A PROVEN COW FAMILY

63

64

65

Another trio of ET flushmate brothers that fit right in with the two previous sets cataloged in front of them. This is the first embryo transplant progeny from the 2016 model 689D who we elected to flush well into her production. She is one of the most beautiful cows on the place that stays fat all year round. These three brothers pack a punch with major growth and muscle. If you want to add pay weight, these guys can get it done.

EPDs **VS.** ADJUSTED/ACTUAL WEIGHTS

We often get asked the question of what we consider most important - weights or EPDs? In our opinion, adjusted and actual weights can vary greatly between herds. Management practices, diet energy levels, and breeder integrity can greatly affect adjusted weights. Therefore, EPDs become a more reliable tool to compare cattle raised in different herds and environments.

All Simmental and Angus bulls selling in this sale are DNA tested. The EPDs printed in this catalog are genomically enhanced.

When you buy W/C bulls you immediately brand your cattle in the marketplace. W/C sired feeder cattle have earned a reputation for being fast growing, high conversion, and high choice. We will help promote your cattle through our relationships with feed yards, order buyers, and local auction barns. You are here for us on our sale day, we want to support you on your sale day!

Elite combination of calving ease, cow family, data, and phenotype in this trio of Statesman sons. 964G has quickly become an absolute force to be reckoned with as she has clicked with yet another sire. She makes her presence known with every flush and every calf and we are trying to inject as much of her influence into our herd as we can. 964G has 11 sons selling in this sale. If you are looking for that special purebred calving ease bull you have just found the right place. Whether you want to sell semen, make productive cows, or improve carcass traits; we see major potential in these studs.

TSN STATESMAN K006

SIRE OF LOTS 66-78

We have been patiently waiting for this opportunity to share with you this first crop of Statesman sons. He has been one of the best sire additions we have ever made. We have yet to find something that he can't do. He supports one of the most incredible EPD profiles you will find in the breed that keeps getting more impressive as more data comes through. He originally was at the top of the breed for calving ease, maternal longevity, and carcass but has recently moved into the top 1% of the breed for WW and top 4% for YW. The most elite phenotype you will find in Top 1% API & TI genetics.

LOT 69

Study the data, study the power, and study what this cow has done to date. We are just going to start calling her the "herd bull maker". 978G has absolutely cranked them out this far. Sons are working for Raml Cattle, Longs Simmentals, Bill Jansma, and Scott Weber. Lot 69 is one impressive individual, he brings the power on paper and in person. No doubt he will carry on the tradition that 978G has built. He spreads a whale of a set of numbers with a real herd bull look!

LOT 70

971G made an impressive set of RFS Heavy Hitter H45 sons in lots 8 – 10, and we are equally excited to show you this TSN Statesman K006 son. You almost can't draw up a better set of EPDs. He puts 11 traits in the top 15% of the breed. In the pen he is long sided, big topped, and big ended. 8063M has a lot of things going for him and is built for the most progressive cattle operation to help move a wide variety of traits.

W/C MISS WERNING 757E

MATERNAL GRANDDAM OF LOT 70

LOT 71

A favorite from early on and we liked him so much as a calf we elected to flush his young dam to make full siblings for next year's sale. A model Simmental bull that is stout and dense from one of our most promising young cows. He's backed by the great 174Y and 534R cows on his bottom side. Additionally, he offers a "no holes" EPD profile and also scanned with excellent marbling in a big ribeye. This bull can really cover the whole spectrum from making the next generation of mamma cows or value added feedlot cattle.

LOT 72

One you will definitely want to find in the pen, as his picture doesn't portray how good he really is. He supports a brilliant EPD profile that just adds to how special we think this bull is. His phenotype will meet the demands of the most discriminating cattlemen, and you won't find a better set of data on a bull that looks this good. Seven traits in the top 10%! This guy can read and write.

W/C MISS WERNING 800F

W/C MISS WERNING 2337K
DAM OF LOT 73

74

75

Lots 71 - 77 are all out of first calf RFS Herald H104 & RFS Heavy Hitter H45 daughters. An awesome opportunity to put together a set of closely bred brothers. Impeccable EPDs backed by both genomics and actual data supported by phenomenal physical quality. We love what these TSN Statesman K006 sons bring to the table for our customers to advance their programs. Couple that with the fact they are from the first crop of potent RFS Herald H104 & RFS Heavy Hitter H45 daughters just adds to the excitement!

MATERNAL GRANDDAM OF LOT 73

GENETIC FULL BROTHERS - LOTS 75-77

A set of bulls that are all out of genetic full sisters as they all go back to the great 174Y donor cow who is still in the herd as a 2011 model. So much good stuff bred in here with the addition of TSN Statesman K006 on the top side. The fact that the cows stacked in this pedigree have stayed in the herd to 15 years of age on a consistent basis is hard to find and then we combine that with the top 1% Stayability EPD from TSN Statesman K006 on the sire side. These bulls really put it all together with CE, maternal ability, carcass, and performance!

LOT 79

A pair of really long bodied baldy studs to lead this popular sire group, and to be frank we just can't get enough of these MR SR 71 Right Now E1538 sired cattle. Simply put, we have just not found a big hole in these cattle yet. They are true curve benders that come small, grow fast, and the females are as good as we have ever had. MR SR 71 Right Now E1538 is a true outlier for siring calf vigor and udder quality without sacrificing growth. He is a true cow maker that still allows you to sell those heavy feeder cattle.

AN IMPRESSIVE SIRE GROUP

LOT 81

One cool cucumber and one we are certainly considering using back in the program. First off, this bull has captured us from early on with his tremendous phenotype, then after all the data has been collected he absolutely jumped through all the hoops. His dam was considered one of the best of the 2022 born crop and half-interest sold last year to our good friend Chad Ruda in Nebraska. 217K shares the same dam and is a three-quarter sibling to the \$202,000 W/C Bank On It 273H bull in the Griswold and Gustin herd sire battery. He posted these impressive stats among the natural calves being the #1 for IMF, #8 for YW, and #9 for REA! It's a rare feat for a bull bred for calving ease and phenotype to put up data like he did. He makes it really easy to get really excited!

Another stout MR SR 71 Right Now E1538 son from another time tested cow family. We love this bull's rugged build combined with coming from the awesome "Susanna" cow family. He is a keep every daughter kind of bull. He scanned well for marbling and his two year old dam is a top young W/C Relentless 32C x DW Susanna 763T daughter.

MISS WERNING 534R

GRANDAM OF LOT 82 AND MATERNAL GRANDAM OF LOTS 84 & 85

84

An impressive pair of brothers bred to be the cowboy kind. Again, you will find yet another S A V Raindance 6848 x Miss Werning 534R young cow getting the job done. Their dam, 206K, is one of the very impressive females from that great 2022 born group of replacements that exhibits extra depth and capacity. They represent a very fault free type of animal that had added calving ease and maternal, yet the male progeny will not take a back seat. A great disposition on this pair and the MR SR 71 Right Now E1538 sire group as a whole.

A pair of really good looking OMF Epic E27 sons from first calf heifers. They both have extra shape and front end extension. Lot 86 DNA tested with excellent growth and his EPDs really shot up after the genomics went through. Lot 87 is a no doubt heifer bull whose dam had a perfect udder with extremely small teats. He's a keep every daughter kind of bull. A nice option for some customers looking for some outcross genetics to our typical W/C bloodlines!

A nice blaze faced bull here from a first calf heifer with an impeccable udder. He goes back to one of our best old WAGR Dream Catcher 03R cows. They consistently weaned off heavy calves without any special management.

W/C VIP 005G
MATERNAL GRANDSIRE OF LOT 88

88

LOT 89

Wow, what a set of numbers!! A real stud with “off the charts” EPDs that puts 11 traits in the top 15%! This guy is absolutely ripped with muscle shape. We selected him and his mother as a pair from the Eichacker program. His mother is very good, but we may have been after the pair for this bull calf! He really puts it all together in a “no holes” type of package. Bulls that look this good with this kind of EPD profile are not that easy to find. This bull can improve a wide range of traits, and he is a joy to have around.

LOT 90

A real powerhouse here that weaned off heavy from a young future star in the cow herd. 2312K was flushed this spring and is one of our most promising young cows. She is sired by a Canadian bull we sampled, so he offers some outcross genetics for those of you looking for a different twist. His sire, “Triple Threat” has been a mainstay to our program and improves a wide variety of traits. This bull weaned heavy and scanned a big ribeye.

W/C MISS WERNING 2312K

DAM OF LOT 90

STRONG AGED W/C NIGHT WATCH 84E SONS!

A trio of big, stout, older W/C Night Watch 84E sons. Lots 92 & 93 are actually born in the fall of 2023 and are the natural calves from long time donor cows 036X and 174Y. All three rank high for calving ease and birthweight yet are packed with muscle. W/C Night Watch 84E is a past \$142,500 high seller and continues to see widespread use across the country for his ability to be heifer safe with excellent thickness. If you're looking for low birthweight cow makers that can still sire thickness and power look no further. Additionally, with their extra age advantage they should be able to really cover some country and service a large amount of females.

W/C

UNMATCHED QUALITY & COMMANDING HERD BULL PRESENCE

The W/C Kaiser 240J revolution! These W/C Kaiser 240J sired cattle have been getting very popular and well liked for all the right reasons. Six full brothers sold last year to top cowboys across the Midwest. This set of W/C Kaiser 240J sons are the modern day brand of W/C Simmental genetics. Simmental cattle that look like this are not easy to find and not easy to replicate. These four are wide bodied, bold sprung, smooth, and attractive. We would take this kind by the truckload whether it be heifers or males. Yet another set of brothers from the great 964G cow and lot 97 is from the proven matriarch 7040E. They are the right kind built to make the next generation of Simmental cattle better.

LENGTH MUSCLE FOOT QUALITY

THE TURNPIKE TRADITION

A pair of Rubys Turnpike 771E sons from yet another good S A V President 6847 x W/C half-blood cow. 1056J is Dad's favorite heifer of the 2021 born calf crop and we elected to flush her. We have not yet got enough of the Rubys Turnpike 771E cattle. They do so many things right and the females are proving to be worth their weight in gold. We have and will continue to use Rubys Turnpike 771E for years to come for a wide range of reasons. They offer tremendous growth with length and muscle, yet will be some of the most athletic cattle you will find.

Another striking MR HOC Broker son from our great 7143E donor. She flat out stamps them and has produced a pile of high selling females for us. Her daughter's highlight the bred heifer division again this year. He is a younger ET calf that I think will mature into one very impressive herd bull when it is all said and done. This one has the parts and pieces to contribute to a lot of different production scenarios.

A natural HRC Hondo calf from an awesome full sister to W/C Fort Knox 609F. His mother is very, very good with a picture perfect udder. This guy fits right in with lots 102 and 103 for type & kind. Another excellent choice to make those highly sought after females that are valuable and versatile.

CHAMPIONSHIP CALIBUR PHENOTYPE BRED FOR THE BIG LEAGUES

Wow, what a treat we have in store for you here! Absolutely incredible phenotype from the great 7143E cow. Their full sisters will highlight the bred heifer offering next year. You want to talk about putting together cattle with the extras in terms of muscle, extension, and stoutness from a dominant cow family. RJ Trust Fund 212K has had a great rookie crop with multiple extreme high selling daughters this past fall. Whether you want a bull to promote or have a very good one running your pasture, take advantage of finding an awesome pair of sons in a Purebred package to make the next generation, or give your program a leg up on the competition!

TIMELESS BANKROLL GENETICS

ENHANCED WITH MATERNAL & PERFORMANCE

A special pair of brothers that combine the best of both breeds to a very high degree. They represent what good cattle are supposed to be and exactly what we expected when mating two cattle that have as much influence and relevance in the Purebred cattle business as any. The W/C Bankroll 811D cattle continue to gain popularity, and we have talked to multiple high profile breeders that say they are going back to W/C Bankroll 811D after taking a few years off. The quality W/C Bankroll 811D sires in a consistent way is simply undeniable. Throw in 6644 to the mix and its lights out! 6644 has had over 150 progeny cross the S A V sale block for a \$13,000 average including the \$350,000 SAV Panther 1906. A full brother sold last year to our good friend Forrest Nelson in Colorado. A full sister sells as lot 231!

A SUPERSTAR SIMANGUS PEDIGREE

We take great pride in building various blends of SimAngus cattle to meet the demands of our fast-paced customers. 6175D has been a rockstar donor for us and this mating to the \$345,000 SAV Magnum 1335 is outstanding. They are massive, thick, and deep. All four ET flushmate brothers scanned well for IMF. They are all supported by outstanding genomic enhanced EPD profiles with great spread from birth to growth. Real world rancher bulls with an impressive combination of calving ease, growth, and a herd bull look!

We love this this half-blood bull and sadly we lost his sire to a leg injury, so this is likely the only shot to get these genetics. He comes from two great parents. His sire was our \$27,000 selection from Ruby's 2023 sale. His dam is a stellar W/C Bankroll 811D daughter who looks to be a key foundation female. He is backed by a great set of numbers with twelve traits in the top 40% of the breed. Certainly one that can be used on heifers but still has enough punch to go on cows. If you retain your own replacement females, here is another one to put high on your shopping list.

Here is a unique SimGenetic stud sired by STAG Good Times 201 ET that is supported by the influence of the impressive 6105D donor, a full sister to the iconic W/C Executive Order 8543B. He offers tremendous eye appeal, skeletal quality, and a maternal foundation that is second to none!

THE BRAND FOR RESULTS

W/C

LOT 120

A stud from every angle and one that you need to put your eyes on in person, I'm not sure his photo or video will do him true justice. There was a lot of discussion on which bull to take to the Junior Nationals, and let's just say Creighton got his way. We think this bull is really good both genetically and physically. He can satisfy the most discriminate cattleman. 30L is ultra-attractive, awesome muscled, and great haired. This 7143E donor is really something special, she clicks with everything. Check out her daughters as lots 200 & 201. Somebody is going to get a good one here!

As many of you know our young cattleman loves showing bulls at Junior Nationals, and this was his pick of the fall bull calves to take to Tulsa, Oklahoma this past summer. He was well received and came home with the Reserve Champion Purebred Simmental Bull banner as a young fall calf. His genomically enhanced EPDs tell us he is the potential heifer bull of the flush. He has since matured into a real powerhouse. As an added bonus we are offering him with two flush brothers. Lot 123 is a spring born and lot 124 is another fall born. Both brothers on the next page are stout made and loaded with muscle. Pick out your favorite on February 11, 2025 in Emery, South Dakota!

COMING TWO YEAR OLD AGE ADVANTAGE BULLS

LOT 125

We named this bull W/C Prototype 068L. He is a great representation of what we feel is the prototype SimAngus bull. The Heim Ranch of Wessington Springs, SD was kind enough to let us keep this bull to run ourselves after we discovered we were a little short on herd bulls to run our own cows. We ran this bull clean up on a group of 40 cows and will be getting calves sired by him this spring. He truly offers the best of both worlds and is backed by the highest income generating cow in the beef business. A power bull and one of our very favorites from the 2023 born bull crop.

W/C Prototype 068L sells with 100 units of frozen semen.

Check out this guy and check out his pedigree. He shares the same dam as our top selling bull last year W/C Truth Be Told 6038L. 90L is so robust and thick made. We love his color pattern, and he should sire a large amount of blaze faced calves on Angus cows. A genuine beef bull backed by one incredible W/C Bankroll 811D dam who is off to a fast paced production career with another daughter commanding \$11,500 to Clear Water Simmentals of Indiana.

BLAZE FACED RANCHER BULLS WITH NUMERIC EXCELLENCE!

All three of these bulls are backed by impressive first calf heifers. They all offer a tremendous look of quality and when you look to the paper you are not disappointed. All three are negative for BW and offer a nice spread to yearling time. They all rank well in their indexes and look to be key cow makers that still have the ability to make fast growing feeding cattle.

STOUT KAISER SONS THAT WILL ADD POUNDS

An impressive pair of W/C Kaiser 240J sons backed by a royally bred donor dam. Their grandam is the great Y770 donor who produced the \$202,000 W/C Bank On It 273H. The W/C Loaded Up 1119Y cattle on their dam side have proven to be valuable contributors in making heavy muscled cattle with a real look of quality. Sired by W/C Kaiser 240J who is really getting it done in all phases for us. W/C Kaiser 240J was one of the top selling bulls in the 2022 sale going to The Resolution Group from Texas. They also purchased the dam of these bulls on our 2018 sale. A really uniform pair of flush brothers who I'm sure would love to stay together and sire you an incredibly consistent calf crop!

THE RED HERD SIRE DIVISION

LOT 143

What a way to start the red bulls! This bull has been a joy to watch develop and now is his time to be shared with the public. He is backed by one heck of a cow that we own with Joel DeNio and sired by the same bull that produced our high seller last year, W/C Truth Be Told 6038L. This bull has many similarities to his popular brother with a white face and that nice deep red coat color. Cattle that are built this balanced, are this stout, and this good structured will never go out of style!

A big and stout fall born bull here. This bull offers tremendous muscle shape and extension that he gets from a tremendous pedigree. His grandam, 42B is responsible for one of the best flushes we have ever had here at the W/C and produced the \$32,500 W/C BF MS Simple Man. From a pedigree standpoint this bull stacks in some awesome maternal and performance. He can make a positive contribution to any red herd and will be able to service a large amount of females in big country.

W/C TRUTH BE TOLD 6038L
\$140,000 PATERNAL BROTHER TO LOTS 143-144

LOT 145

We don't care what color this bull is, he is a must see on sale day! So much mass and power in a sound package. We thought long and hard about showing this bull at Junior Nationals because he is just that good. He is the kind we could send anywhere in the country sight unseen, and we are confident the new owner will love him coming off the trailer. If you want a bull that is wide, stout, and cool that will sire a ton of red baldies you just found him. This bull could really change a set of red or black cows for the better. A must see on Feb 11, 2025!

LOT 146

An original MR HOC Broker son and yet another stud from the great 7143E Donor. This bull is one cool rig and blends two very big time phenotype parents. The look and extension this bull brings is incredible. Couple that with the fact he is the result of two highly influential black parents make him a very neat red genetic package.

W/C ANGEL 7143E

DAM OF LOT 146

FULL BROTHERS TO W/C BF MS SIMPLE MAN THE 2023 TOP SELLER!

The consistency and potency of this mating is unparalleled. Four full brothers averaged \$15,000 in our 2023 sale and the flushmate heifers were equally as good. An incredible combination of attractive build, balance, and ripped muscle shape. Their time tested dam is still in the herd and will wean an outstanding fall calf here shortly. This cow line stems from our first ever National Champion in 2008, 715T. So much positive in this pedigree makes these bulls an awesome choice to contribute to the next generation of good red hided cattle that are built to excel in every facet of the business!

An age advantage Angus bull with pedigree and quality that's hard to find. We have been nothing short of amazed by the quality we have gotten from S A V Blackcap May 6644 who recorded 160 progeny sold to date at SAV for an average of \$13,387 including the \$350,000 S A V Panther 1906. Schaff's Angus Valley has also retained 23 daughters in their herd. A three-quarter sister to this bull by DB Iconic G95 will sell as lot 276 and will be one of the best females to ever sell at W/C! 6644 was also the only sister in the world record selling flush of bulls and she was the highest YW heifer of that crop at S A V. This stud offers a world of pedigree, performance, and maternal strength put into one impressive strong aged Angus bull!

DB ICONIC G95

Another Wilks Regiment 9035 son that ranks well among the Angus database for weaning and yearling weight. He's chuck full of muscle yet smooth in his design. We like both of these Wilks Regiment 9035 sons and they offer a tremendous amount of performance, muscle, and maternal!

THE W/C FEMALE DIVISION

A TRADITION OF EXCELLENCE!

W/C MISS WERNING 088H

This female was purchased by Griswold Cattle Company in 2022 for \$15,000. She was a sale feature in the "Classic" Female Sale in December of 2023 where she sold for \$45,000 to Barber Family Farms of Georgia!

W/C MISS WERNING 652D

"W/C Miss Werning 652D was Cate and I's first purchase together from the W/C program. It was our first year of marriage, first year of coaching NJC, and we lived in a little tiny house on 5th street in Sterling, Colorado. Cate had a long list of breds she'd like us to buy and those all went on to be high sellers on a tremendous day for the Werning's. Colby Taber was there bidding for me and said, "man I know she's not on your list, but this one is your speed". I rubbed two nickels together and got her bought. I went to pick her up and Dale said, "Young man, I am not sure how you got this one bought for so cheap, but you have the buy of the sale". He may not remember that or even the heifer, but she has changed the entire trajectory of how we breed cattle. Sons have topped sales and been featured by ABS. Daughters are tremendous producers. No questions here, get in!"

- Curtis Doubet, Doubet Cattle Company

"TRIFECTA"

MR W/C TRIFECTA 975J

Dr. Karl and Nicole Neeser of Red Wing, Minnesota purchased W/C Miss Werning 975G for \$23,000. The calf she was carrying that day was MR W/C Trifecta 975J who sold for \$47,500 to Western Cattle Source!

THE W/C FEMALE DIVISION

ONLY BRED TO THE *BEST!*

TJ Sandhills Swag 816L was the \$40,000 top selling bull of the 2024 Triangle J Bull Sale. He was one of our best finds of the 2024 sale season and his value and popularity do nothing but grow by the day. His service to the bred heifers in this sale is a special sale attraction. An exciting individual!

ELITE DONOR CANDIDATES!

LOT 200

W/C Angel 3105L initiates one of the deepest and most dynamic sets of bred females that have ever been offered by Werning Cattle Company! The "Angel" cow family is a derivative of the legendary Miss Werning KP 8543U matriarch, one of the most dominant producing females in the history of the Simmental breed. Her extra look, style and presence is complimented by unsurpassed maternal prowess. Her maternal granddam, W/C Miss Angel 2870Z, was a many times National Champion. Power in the blood would be an understatement!

The FAB FIVE are led off by the very impressive W/C Miss Werning 3110L, a stunning baldy that is massive from every angle of evaluation. These five ET flushmate sisters are sired by the \$110,000 OMF Journeyman J24, one of the most consistent and reliable breeding bulls that the Simmental breed has seen in some time. The dam of this powerhouse flush is the impressive W/C Miss Werning 6175D matron, one of the most prominent young cows in Emery, South Dakota. Several brothers to this dynamic set of females will also highlight the Werning Cattle Company 44th Annual Production Sale! The dam of 6175D is W/C Miss Werning A3175, an own daughter of the iconic Miss Werning 534R, one of the most influential females in the history of Werning Cattle Company! 534R is of course the dam of the \$8 million+ production Miss Werning KP 8543U matron. The cow power that lines the pedigree of these 5 future breed matriarchs is nothing short of astonishing!

DONOR COW ALERT!

LOT 218

W/C Miss Werning 357L is a captivating female that offers a perfect blaze face to compliment her extra look, style, and skeletal quality! A daughter of the very impressive CDI CEO 281D that is supported by the ultra-powerful W/C Miss Werning 964G donor, a daughter of the performance specialist known as Rubys Turnpike 771E. The pedigree that supports this female aligns the strong maternal influence of Miss Werning KP 8543U, Rubys Miss Cleo 240Z, and Plattemere Queenie 825. The foot quality, udder design, fleshing ease, and maternal functionality that supports this cow family is second to none!

W/C Miss Werning 306L is a moderate framed, huge ribbed, stout hipped, sound built female that offers the credentials of a tremendous brood cow in the making. This WS All Aboard B80 daughter is loaded with mass, dimension, and capacity through the center portion of her body. In addition to her maternal body style, this powerful female offers an elite number profile that offers curve bending capabilities! She too offers tremendous carcass merit to compliment her functional body style. A very unique red hided female that offers unlimited earning potential with tremendous mating flexibility!

THE UNCOMMON COMBINATION OF THE NUMBERS & THE LOOK!

LOT 234

Numerically speaking there is no denying the genetic potency and unrivaled generating power that stands behind W/C Miss Werning 304L! This daughter of the \$100,000 CLRS Guardian 317G is further influenced by a first calf heifer dam sired by "Triple Threat", the calving ease and carcass merit specialist that was bred in the Bar CK Cattle Company breeding program. Her elite number profile is complimented by her ultra-broody body style and overwhelming center body mass. She ranks among the elite 1% of the Simmental breed for MARB, API, and TI. There is no denying the generating potential and mating flexibility that lies within this elite breeding piece. With a 200+ API, this female is also a curve bender from birth to weaning. This is your chance to invest in a female that will be on the bottom side of pedigrees of influence within the Simmental breed for years to come!

3197L is another standout from the W/C Lock Down 206Z sire group that deserves serious consideration on sale day! This solid black female is loaded with mass, capacity, and extra volume. We love the skeletal quality and fleshing ease that you can expect from the “Lock Down” sire group. The dam of this female is a hard working first calf heifer sired by the \$1.51 million S A V America 8018 and is supported by W/C Miss Werning 6175D. 6175D is a female that has become one of the cornerstone matrons within the program over the last few years. 6175D is most commonly known as the dam of the \$100,000 W/C Dabo 703J, a resident herd sire at Windy Creek Cattle Company.

INVESTMENT OPPORTUNITY! What a pair of females that come supported by the immortal influence of the legendary Miss Werning KP 8543U. In fact, this duo are direct daughters of the clone to the late and great 8543U. 331L and 334L are ET flushmate sisters sired by TJSC King Of Diamonds, the son of the iconic KLS Diamond W516, a female that is also of royal status in the Simmental breed. KLS Diamond W516 was the 2011 NWSS Grand Champion Purebred Simmental Heifer. She has produced well over the \$1 million mark in progeny sales. TJSC King Of Diamonds was the 2019 NAILE Grand Champion Purebred Simmental Bull. 8543U has produced well over the \$8 million mark in sales with countless individuals of influence within the Simmental breed. The number of sons that 8543U has put into stud is astonishing to say the very least. The phenotype that this duo offers are top shelf, offering a premium blend of elite cow family generating potential. This is your opportunity to select one or two daughters of the matriarch 8543U to add to your donor arsenal on February 11, 2025!

W/C Miss Werning 3011L is a striking blaze faced female that is heavy duty in her basic build and body shape. We love the genuine power, width, and squareness of build that this female offers. She is a long sided, deep bodied, powerful female that is out of a direct daughter of the iconic 534R matron. Her pedigree aligns the influence of Remington Lock N Load 54U, W/C United 956Y, R&R Warehouse K609, and Miss Werning 534R. Her pedigree has armed her with the genetics to make a lasting impression on the operation that has the winning bid on sale day!

338L is another RFS Herald H45 daughter that offers elite performance data, which compliments her extra power and substance phenotypically. This female is supported by the Reck Bros. Simmentals "You're Right" cow family, a genetic line that has been the foundation of their established breeding program in Iowa. One of the most notable members of this cow family is the Weis Cattle donor known as "Rudy", a matron that has produced countless high sellers and National Champions. She sells safe in calf to a sire that we are "all-in" on, the very impressive TJ Sandhills Swag 816L!

A dynamic pair of ET flushmate sisters from the iconic S A V Blackcap May 6644, one of the all-time great daughters of the legendary S A V Blackcap May 4136. S A V Blackcap May 6644 is a FULL SISTER to S A V President 6847, S A V Rainfall 6846, and S A V Raindance 6848! There is no doubt that this is a truly rare opportunity to invest in cutting edge genetics of this magnitude. 6644 is also the dam of the \$350,000 S A V Panther 1906. This pair of daughters are sired by the impressive Sitz Barricade 632F, one of the finest AI sires ever produced in the historic Sitz Angus breeding program. This pair of females are built for the real world, they are built to last! Both are broody, big ribbed, deep flanked, easy fleshing females that bred early to the HUGE numbered and impressive phenotype Purebred Simmental stud known as TSN Statesman K006. These females are trait leaders for performance, and both ranks among the top third of the breed for \$C. Invest in elite pedigreed Angus females that are engineered to stand the test of time!

Here is an elegant build daughter of tried and true ALC Hazel K36U, one of the cornerstone Angus matrons that has served as the foundation of the Angus and SimAngus breeding programs at Werning Cattle Company. K36U is undeniably one of the most productive, fertile, easy fleshing, docile, and sound built females to ever call home to Emery, South Dakota. Between her and her daughter, D W Hazel K36U, they account for well over 100 head of direct progeny recorded with the American Angus Association and American Simmental Association. Countless individuals of influence trace to this time tested and proven cow family! This is a cow family that you can bet the farm on!

THE BRAND FOR RESULTS

LOT 279

We initiate the small, but mighty Red Angus division with a daughter of the widely popular and proven EGL GCC Red Eagle E7194! WCCO Duchess 21K is a huge footed, stout boned, square made female that is loaded with quality and dimension. This dynamic female is a maternal sister to the \$102,000 high selling Red Angus bull in the 2015 NWSS Western Heritage Sale. AHL Duchess 42W, the dam of 21K, sold for an impressive \$72,000 in the Power Forward Female Sale for \$72,000 to the Nathanson family. There is no denying the genetic potency that stands behind this incredible red hided brood cow prospect!

W/C RAZZLE 11J

\$18,000 DAUGHTER OF WEBR RAZZLE 892

The opportunity to select from a trio of elite status Red Angus females will present itself on February 11, 2025 in the Werning Cattle Company 44th Annual Production Sale! Over the last several years an elite Red Angus arsenal of donors has been established in Emery, South Dakota with the same goals, principles, and stipulations that are in place within the Simmental and Angus divisions. Foot quality, fertility, fleshing ease, docility, and strong maternal strength are at the top of the priority list and strong selection pressure is applied! The choice will be yours to select one of three females from this proven donor battery. Lot 283A is the impressive WEBR Razzle 892, a highly proven and productive female that has produced several high sellers during her tenure. Lot 283B is WCCO 9026G, an ET flushmate sister to WCCO 9028G that is supported by the influence of the iconic Pelton Miss 361B. 361B is the maternal granddam of the \$140,000 W/C Truth Be Told 6038L, one of the most impressive SimGenetic bulls ever produced at Werning Cattle Company. Lot 283C is WCCO 9028G, the other widely popular daughter of the \$210,000 valued 4MC King of The Cowboys 706 that has produced several high sellers, which would include a half blood daughter by the name of W/C GCC S-H Miss SoDak 2609K. She sold for a \$60,000 hammer price in the Griswold Cattle Company "Classic" Female Sale. Let's not forget about WCCO Unique 9028L, the very impressive Red Angus stud that topped the Red Angus division of last year's sale at \$18,000. This is your fast pass to success within the Red Angus breed. Regardless of your program's production goals, there is no denying the return on investment potential that awaits the winning bidder!

The top seller of the 2023 Sale! He was the lead bull in one of the most impressive flushes ever born at W/C. A more powerful version of his popular sire. The ET flushmate sisters highlight this year's bred heifer division, check them out.

Owned with Bill Fulton and Tom Manske.

After losing this bull too soon and realizing he was ahead of his time, we have pulled this semen off the open market and are using him again heavily in our program. As good as you will find to make championship phenotype and great numbers. He was also the top bull of his calf crop for IMF with a 173 ratio!

The new star of the W/C donor pen!! Her very first natural calf commanded \$20,000 and her crop of ET calves in this sale are so impressive. Check out her flush of W/C Kaiser 240J sons selling in this sale! We have all these mating's coming here in 2025. She is quite a beef cow, and this is only the second time we have ever offered her frozen genetics!
