**We believe in the power of long-lasting, maternally-focused, easy-fleshing bulls
that will put the COW back in your cowherd.**

Welcome to the Sale!

Welcome to the Flat Water Gang's 17th Annual Bull Sale!

We sincerely appreciate your interest in this year's offering and are excited to present this outstanding set of cattle for your evaluation. The bulls and heifers will be available for viewing Sunday afternoon and Monday morning at Broken Bow Livestock Market. Lunch and the auction will be held at the Cobblestone Hotel & Suites.

Cooksley Red Angus has proudly raised registered cattle since 1989, and Sandbur Ridge since 1996. The focus of both operations has always been simple: provide commercial cattlemen with cattle that work for you. Our programs prioritize problem-free, fertile, and productive females. At the same time, we have placed strong emphasis on carcass merit and growth performance. By addressing all segments of the industry, our genetics are designed to fit seamlessly into any program and add measurable value to your profitability.

The cattle industry is currently experiencing exceptional demand and strong prices — some of the best conditions we have seen in years. As many producers look to retain heifers and potentially expand their cow herds, the importance of long-lasting, productive females becomes even more evident. The bulls we offer are bred to sire durable cows that breed back consistently and remain productive for years to come. Greater longevity in your cow herd means more heifer calves to market from each calf crop, strengthening cash flow and enhancing long-term profitability.

Our bulls are developed at Darr Bull Development Center near Cozad, Nebraska. Mitch and his team do an outstanding job every year, and they are always welcoming to anyone who would like to stop by and view the bulls prior to sale day.

We are truly grateful for you — our customers. We recognize that you have many options when selecting your breeding stock. Our commitment to customer service, honest evaluations, and accurate performance data remains the foundation of our operations. If you ever have concerns about any animal purchased, please contact Ben or me as soon as possible, and we will work quickly to make it right.

Additional information on this year's offering is available through DV Auction. Please don't hesitate to contact our sales team, Ben, or me with any questions.

We look forward to seeing you on the 16th of March in Broken Bow, Nebraska!

Fellow Red Angus Enthusiasts,

Vision, discipline, and perseverance allow one to take the path to success and goal achievement. A conservative business approach is necessary in the early stages of any business to allow for the experience to take hold, leading to healthy growth and the development of a product that will be resilient and profitable even when the market takes an unexpected turn. The ranching entities behind this annual offering of high caliber, Red Angus seedstock are from the exact approach described in the opening lines of this welcome letter. The outfits have proven their approach and mindset to be durable with substantial longevity in the volatile marketplace. We promise, these folks are not on cruise control during these highly successful times in the beef industry, as each of them is constantly seeking to improve the product they bring to you each year.

The foundation cowherd of the Flat Water Gang is annually pressured to meet the rigorous fertility and production requirements, guided by the long standing, disciplined management principles that the firms believe in equally. Females are expected to adapt to the grazing resources with limited inputs and supplementation beyond the basic salt and mineral requirements. In these native conditions, they must calve with minimal to no issues, supported by maternal instinct that encourages calves to get up and nurse within a short time postpartum. The female base must have the utmost udder quality and milk volume to wean a calf to significant, acceptable weight targets on grass with no creep assistance, while breeding back within the set calving window set by their respective home ranches. These are just a few of the many reasons that customer retention is known to be high on this annual bull offering. The no-excuses approach has allowed these outfits to carry the ball across the line not only for themselves but also for their customers, consistently and year after year.

For those reading this letter who have not refreshed your bull battery over the past couple of years, now is the time. Salvage values for older cattle are very, very good, as high as they have ever been, and as the national bull sale average continues to ratchet up, one should consider trading in the old for the new. Experts say this marketplace is in play for at least the next two years, allowing cattle sired by the next generation of genetics the opportunity to take advantage of current market conditions. The daughters by these bulls have the genetics behind them to advance any program in the right direction, minimizing inputs and maximizing production and longevity. The dams behind these bulls have proven they can meet any challenge and deliver profitability year after year. Ross Knott is not doing this for a hobby; his approach is with a disciplined passion to make his product more versatile and profitable at every turn. Ranching is one of the very best lifestyles, but it takes grit and discipline to establish the generational succession that many look forward to for the sake of the ranch's legacy.

We invite you to attend the 2026 edition of the Flat Water Gang Red Angus Bull Sale. The people behind the product are among the very best in the seedstock business, and the product itself is bred to enhance the future profitability and success of your program. If you should need any additional information about the offering, or assistance with selection or sight unseen purchasing, we encourage you to reach out to any member of the Innovation AgMarketing team. We will be more than happy to assist. Fellow cattlemen and women, times are very good for our industry, and we cannot stress enough the importance of doing what is necessary to hedge your risk and improve the profitability of your program through improved genetic selection for your program's future.

Thank you for your business, and we look forward to fielding your interest in this year's Flat Water Gang Bull Sale!

The bulls will be available to be inspected on Sunday, March 15 and Monday, March 16 at Broken Bow Livestock. Please call for details if you would like to view the bulls prior to the dates listed.

Broken Bow Livestock

614 N B Street - Broken Bow, NE 68822

Delivery and Load-out:

We are offering free delivery to all points in Nebraska. Delivery to other states will be at the lowest cost possible from the seller's base operation. Bulls not delivered by April 15 will incur a \$5 per day feeding cost thereafter. A \$100 credit will be offered for bulls taken home on sale day by the new owner.

In Herd Semen Use:

Seller(s) reserves the right to in herd semen use on all bulls in the offering. Collection will be negotiated with the new owner. All costs associated with the collection of in herd use semen to be covered by the seller.

Photography:

John Reasor: (423) 290-6002

Advertising and Catalog Design:

J. Maree Designs - Jeana Hurlbut: (605) 880-7601

GGP 50K:

Over 10 years of genomics research is distilled in the new GGP 50K. Detects gene markers that have the greatest influence on economically important traits and the most impact on key traits that cattle inherit from their parents. All bulls with the GGP logo on their pedigree box have had DNA submitted and are on file at the Red Angus Association of America.

Bull Guarantee:

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the Red Angus Association of America, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

Terms and Conditions:

The Auctioneer will settle any bidding disputes and his decision on such matters will be final. All sales are cash in U.S. funds unless prior arrangements have been made with the sellers. Any announcements made on sale day take precedence over printed material. Health certificates will be furnished for shipment anywhere in the United States. Any death or injury after the animal is sold is at the buyers' risk. Anyone attending this sale attends at his/her own risk. A retained interest by the seller will be designated as such in the sale. The buyer receives full possession and full salvage value on all bulls with a retained ownership interest. All registered cattle sell under the suggested Sale Terms and Conditions set forth by the Red Angus Association of America.

Online Bidding:

We are pleased to bring you real-time internet bidding and a live broadcast of this sale through DVAuction.com. If you are unable to attend for any reason, you may bid online at dvauction.com. Please register for bidder number at www.dvauction.com anytime prior to 12 Noon on Friday, March 13 to accommodate the approval process. After this date/time, bidder approval may be delayed. Approved bidders will be issued bidder number and access prior to the sale. For questions or sale bookings call the Office M-F 8am-6pm CT: (402) 316-5460.

The Cornerstone Cow

The Cornerstone cow program is a tool for producers to utilize when selecting seed stock for their operation. The word Cornerstone is an architectural term meaning the first stone set in construction. The stone in which all the building depends. For our purpose, the Cornerstone Cow is a measure of the following:

Fertility + Production + Longevity = Profitability

This scoring model ranks the components of fertility, production to weaning, and longevity, within a herd and age group of females. The categories being scored are based upon the actual data submitted to the American Red Angus Association as a part of total herd reporting. **Any cow scoring 90% or higher earns the title of a CORNERSTONE COW.**

By scoring our cow herd we are attempting to provide you with an easy-to-understand value for each female in our herd. The Table below summarizes the scores for each age group of cows in production:

Age of Female	Best Possible Score	Top 25%	Top 50%
9 + years old	35	26.25	17.5
8 years old	33	24.75	16.5
7 years old	31	23.25	15.5
6 years old	29	21.75	14.5
5 years old	27	20.25	13.5
4 years old	25	18.75	12.5
3 years old	23	17.25	11.5
2 years old	21	15.75	10.5

The definitions on the next page explain the criteria that is used in the scoring model.

MPPA

7	108 or higher
6	105-107.9
5	103-104.9
4	100-102.9
3	97-99.9
2	94-96.9
1	93.9 or Less

MOST PROBABLE PRODUCING ABILITY (MPPA) – An estimate of a cow’s future productivity for a trait (such as progeny weaning ratio) based on her past productivity. For example, a cow’s MPPA for weaning ratio is calculated from the cow’s average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

CALVING INTERVAL

6	368 or less*
5	369-375
4	376-397**
3	398-417
2	418-439
1	440 or more

CALVING INTERVAL – The amount of time (days or months) between the birth of a calf and the birth of a subsequent calf, both from the same cow. *Calving interval of 368 or less is assigned to Donor females that are 6 years old and older. **Calving Interval of 376 to 397 is assigned to Donor Females that are 5 years old and younger.

RATIO CHANGE

6	+15 or more
5	+7 thru +14
4	0 thru +6
3	-1 thru -7
2	-8 thru -14
1	-15 or less

RATIO CHANGE – The difference between the birth weight ratio within a known population to the weaning weight ratio within the same population of individuals. Ratio change for this measure is the difference between the cows actual average birth ratio of all her calves and the weaning ratio of all her calves.

AGE

8	9 plus
7	8
6	7
5	6
4	5
3	4
2	3
1	2

AGE OF COWS – Cows can live for over 20 years, but on commercial farms the age at slaughter varies considerably. Farms with poor management, high-yielding cattle or high disease rates will slaughter their animals at a much younger age, normally after four lactations (around 5-6 years old), but sometimes after 2 or 3. Cows should be able to consistently breed and rebreed through about 8 years of age and performance should be maintained until around 12 years of age, that is when you might see a steeper decline in reproductive performance.

OF NATURAL CALVES

8	8 plus
7	7
6	6
5	5
4	4
3	3
2	2
1	1

NATURAL CALVES – These are the calves that are conceived either by artificial insemination or natural service. These calves are carried by the dam and raised by the dam within the population of the operation. The number of natural calves is an indicator of the cow’s ability to raise a calf and rebreed within their environment over a longer period.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

The 2026 Bull Offering

LOT 1 - RIDGE RANCH HAND 5078

- This flush of STRA Ranch Hand 2010 x Ridge Hobo 016-9027 really rings the bell for quality Red angus breeding stock.
- Ratio of 113 for his impressive yearling performance.
- We love the EPD package he presents! He ranks as highly for ProS, HB, and GM across the board as any bull in the sale.
- The maternal side of his pedigree is supported by the everlasting impact of Ridge Hobo 016-9027, a female that is in her mid-teens! Longevity and predictability are all inclusive with this trio of ET flushmate brothers.
- Superior foot quality, structural soundness, flexibility, and fleshing ease. A trio of herd sire prospects that are sired by the red-hot STRA Ranch Hand 2010, a sire that has revolutionized the Red Angus breed.
- Top 4% ProS; top 8% HB, MARB; top 10% WW, YW; top 12% ADG; top 13% GM, MILK; top 16% STAY; top 29% CED.
- *Selling 100% Semen Interest and 100% Possession in the BUYER'S CHOICE between Lots 1 and 2. Whichever bull is NOT selected will be retained by Sandbur Ridge Red Angus. Sandbur Ridge Red Angus reserves the right to in herd use semen on whichever bull is selected at the cost of production.*

- Cooksley Jumpstart 503 gives you the look and quality you expect from a calving ease herd sire prospect with added genetic features.
- Moderate 65 lb. birth weight off of a first-calving female.
- A multi-trait improver on his genetic script. He checks a lot of boxes.
- Top 10% MILK; top 20% CED; top 25% MARB, YG; top 30% WW, YW, ADG, STAY; top 35% HPG.

LOT 11 - COOKSLEY JUMPSTART 503

LOT 12 - RIDGE FOREMAN 5404

- When we mated 5L Foreman 2174-370E to the A463 donor female, this is the kind of bull we were hoping. Backed by a proven donor female in the program, Jeffries Ms Tricia A463, 5404 is a functional herd sire prospect with a lot of good to him.
- From 65 lb. birth weight to a 664 lb. weaning weight that ratios at 103.
- You will appreciate his calving ease and maternally oriented EPD profile.
- Top 3% CED; top 4% HPG; top 10% CEM, YG; top 15% BW; top 25% HB; top 30% STAY, REA.

5L FOREMAN 2174-370E
Sire of Lots 12-16

LOT 13 - RIDGE FOREMAN 5409

- Another son of the A463 donor that has made quite the impact on the breeding program. The full brother to 5404 who showcases early growth with a more moderate yearling size.
- Showcased massive growth to weaning with a 755 lb. weaning weight, one of the tops in this sale.
- This sire group really excels for calving ease and maternal traits.
- Top 4% HPG; top 10% CED, CEM, YG; top 15% HB; top 25% WW, REA; top 30% STAY.

- Ridge Scale House 5072 is one of the mostly densely built, massive made bulls in this year's sale offering.
- Heavy 1,297 lb. yearling weight ratios at 109, along with a 3.48 WDA.
- Loaded genetic package, emphasizing growth traits throughout.
- Top 4% CW; top 15% WW, YW, ADG; top 20% GM, CEM, REA; top 25% CED; top 30% MARB.

S A V SCALE HOUSE 0845 - Paternal Grand sire of Lots 64-67

LOT 66 - RIDGE SCALE HOUSE 5117

- 5117 is a Ridge Scale House 2202 son, out of a young Ridge Crossfire 4009 daughter.
- His performance really kicked in from weaning to yearling weight time.
- A unique set of genetic merits: elite longevity and growth to weaning make him an intriguing prospect as a cow making sire.
- Top 3% STAY; top 5% WW; top 10% HB, HPG; top 15% YW, CW; top 25% ProS, ADG.

RIDGE MCCANN 3531
Maternal Brother to Lot 66

LOT 67 - RIDGE SCALE HOUSE 5119

- A Ridge Scale House 2202 son who should be a scale crushing sire.
- Posted a 669 lb. weaning weight, which ratios at 104 among the sale bulls.
- Carcass driven EPD profile that many will appreciate.
- Top 20% REA; top 25% CW; top 30% ADG; top 35% YW, HPG.

- Ridge Larkaba 2606-5197 is a high quality Red LWNBRG Exile 11K daughter.
- She will be worth noticing on sale day.
- Top 10% MILK, STAY; top 30% ADG.

LOT 108 - RIDGE SYBILLI 3386-5160

- The lone DVO Explosive 1117L daughter to sell this year is a high-quality female.
- Her dam has reached double digits and is still working in the herd.
- Genetically, she should be the kind to work hard and last a long time.
- Top 10% HB, STAY; top 20% HPG.
