HOLTON

CATTLE COMPANY

THE FOURTH ANNUAL PRODUCTION SALE

MARCH 16, 2026 • 1 PM

AT THE RANCH IN CISCO, TEXAS

Welcome, and thank you for your interest in the 2026 Holton Cattle Company Bull and Female Sale. We are truly grateful for the opportunity to share our program with you and appreciate the time you take to evaluate our cattle each year.

Holton Cattle Company was established in 2001 as a small family operation built around a commercial cow-calf herd and feeder cattle. Over the years, our passion for the Red Angus breed steadily grew, leading us to intentionally transition our program toward Red Angus genetics. After more than a decade of focused selection and continued refinement, we are proud to present this year's offering, one that represents years of disciplined breeding decisions and a commitment to long-term improvement.

Our program is founded on proven genetics originating from C-Bar Red Angus. We have developed a strong donor base with established genetic merit, highlighted by females such as C-Bar Stony 720E and C-Bar Abigrace 635D, a flushmate sister to the renowned 9 Mile Franchise 6305. Building on this foundation, we continue to utilize an intensive AI and embryo transfer program designed to advance growth, carcass value, and structural integrity while preserving the maternal strength and longevity essential to productive cow herds. Many of the bulls in this year's sale stem from sires and dams raised right here on our ranch, and we believe this set reflects the consistency, functionality, and progress we strive for each year.

We recognize that none of this would be possible without the many blessings God has provided and the dedication of those who walk alongside us. We are deeply thankful for the support of our family and friends, including Jake and Ashley Saunders, Becky Holton, Shannon Lowrey, and Don and Brenda Lane. Though we continue to feel the loss of Donny, his wisdom and encouragement remain a lasting part of our program and our lives. We are especially grateful for our children, Carter, Casey, and Claire, who help keep ranch life moving while growing up alongside the cattle and traditions that mean so much to our family.

Our goal remains simple: to raise practical, high-quality cattle that combine performance, phenotype, and genetic value while working efficiently in real-world conditions. We invite you to visit the ranch, evaluate this set of bulls and females, and allow us to assist in finding cattle that fit your operation's goals.

To our returning customers, thank you for your continued trust and support. To those joining us for the first time, we look forward to building new relationships. We are honored to share this offering with you and hope you are as excited about this year's cattle as we are.

Paul and Ginger Holton

GRID MASTER

In Recognition of Outstanding Career Achievement presented to

Holton Cattle Co.

Presented on December 15, 2024 at the January Ball Process / Reception for the following Achievement: Holton Cattle Co. - 2024 Top Producer Award for 2023-2024 Top Producer

Year	Top Producer	Award Type & Amount
2023	[Name]	[Amount]
2024	[Name]	[Amount]

2024 GRID MASTER AWARD WINNER

STEERS & HEIFERS

The Grid Master award is presented annually at the Red Angus Association of America Annual Convention. It is in recognition of commercial Red Angus ranches and feedyards that continue to demonstrate their ability to combine superior genetics with precise marketing. It rewards cattlemen and women who have brought high quality cattle to harvest that excel in both quality and yield grade. It's a testament to one's breeding program and the dedication to making the end product the best it can be. It's one of the most honorable and prestigious awards given by RAAA year after year. Congratulations to Holton Cattle Company on their success.

The commercial sector of the beef business continues to thrive and succeed in these record-breaking times. Our markets have exploded over the past two to three years, and according to industry experts and veterans of market analysis, this trend is likely to persist for several years. Demand for U.S. beef continues to surge domestically and abroad, and the need for more of the most nutrient-dense form of human-grade, consumable protein remains on a rapid incline. As U.S. citizens, we are consuming more beef than at any other time in our nation's history. The American people love a great steak and indulge in a great burger, so now, more than ever, the need to step up the genetic base for the commercial cow herd has never been more significant. Ranchers across the nation have been rising to the challenge, especially with salvage values where they are today: shipping the old and getting paid for them like never before and investing in the next phase of improvement for their future cash flow.

Engaging in business with operations of a "like mindset" should appeal to almost any progressive, forward-thinking cowboy or cowgirl, and the Holton Family is of the commercial mindset. Paul and Ginger Holton started as a young couple backgrounding stocker and feeder cattle, which led to a commercial cow/calf operation. Over the years, Paul noticed that red-hided cattle acclimated better to the region's harsh terrain and summers better than other cattle, which spurred an interest in acquiring more of those genetics. Paul and Ginger did their research, selected the genetics they liked best, and set in motion the plan to build the Holton Cattle Company as you know it today.

As many already know, the cow base of Holton Cattle Company was solidified with only quality from the C-Bar Program of Kansas. These Red Angus cattle are unique among their contemporaries across the country, as they have a little more substance and sheer shape. Paul takes the utmost pride in hoof and skeletal quality; without the necessary equipment to handle the rough terrain that is native to the ranch, the program would not exist. The feet of these cattle can handle the most rigorous surface challenges Mother Nature throws at them, allowing them to do the job asked of them more efficiently. The female base is saturated with longevity, udder quality, and fertility, and it shows through the annual bull offering year after year. The bulls are weaned and developed on stockpiled forage or wheat pasture with limited supplementation, and that's why when they leave and go to work for you, they are ready for immediate turnout with minimized "melt factor". Paul is extremely passionate about making these cattle the very best he can year after year and knows the commercial side of the industry as well as any Red Angus seedstock supplier in the business, especially in the desert Southwest.

Paul and Ginger received the coveted Grid Master Award in 2024 from the Red Angus Association of America. Their relentless dedication to improving the end product continues to pay dividends for the firm and their loyal customer base that retains ownership. The firm continues to take the full scope approach to genetic and phenotypic excellence, as one will notice as they study the data portfolios and the video footage of the stock within this year's offering.

Ladies and Gentlemen, if you have not yet made it to Holton Cattle Company to satisfy your "Red Needs," we strongly encourage you to make the time to visit, as we know you will be impressed and become hooked, as those who attend annually. The operation is committed to customer service, as Paul and Ginger believe in the "Golden Rule" and uphold the utmost integrity in all they do. This outfit is truly one of the growing and elite, modern-day ranching institutions known to the industry and the Red Angus breed, as they are committed to the "long game" approach, with the intent of the next generation returning to extend the ranch's legacy. A great lunch will be provided, and hospitality will be as good as one can find anywhere on March 16, 2026, so make those plans to attend this great Red Angus marketing event at the ranch in Cisco, TX. If you should need any assistance with selection, additional information, or sight-unseen purchasing, do not hesitate to reach out to Paul or any of the Innovation AgMarketing team for assistance. We thank you for your interest and appreciate your undivided attention to this set of bulls and females.

GRAHAM BLAGG · TIM ANDERSON · JERED SHIPMAN

Welcome

TO THE 4th ANNUAL HOLTON CATTLE COMPANY PRODUCTION SALE

MARCH 16 • 1 PM

LOCATION

1108 CR 126
Cisco Tx, 76437

From Cisco Tx go west on FM 2945 for 7 miles
Turn north on CR 126 go 2 miles and the gate is on the left side.

SCHEDULE

SATURDAY, MARCH 14

10 AM to 6 PM View Bulls and Females

SUNDAY, MARCH 15

10 AM to 6 PM View Bulls and Females

6 PM Prime Rib Dinner

MONDAY, MARCH 16

11 AM Lunch

1 PM 4th Annual HCC Production Sale

Jesse Henson, Red Angus Association of American, 828.734.3451

TERMS & CONDITIONS

Cattle sell under the standard terms and conditions as recommended by the Red Angus Association of America. There will be a 5% buyer's premium. If payment is made in full with cash or good check within 10 business days or two weeks from March 16, 2026 (this means that payment in full must be made or received by the end of the day March 31, 2026), the 5% buyer's premium will be forgiven. If payment is made with a credit card or after March 31, 2026, then the 5% buyer's premium will remain applied in addition to the sale day purchase price.

BULL GUARANTEE

All bulls will have passed a breeding soundness examination (BSE) prior to sale day. Holton Cattle Company will guarantee all bulls for the first breeding season (a period of 90 days following turn out). We strongly encourage you to invest in a mortality policy as the Holton breeding season guarantee applies to functional fertility only. This guarantee is not a substitution or replacement for poor management and animal husbandry practices. Buyer will assume all risks associated with multi-sire turn out groups and or management decisions outside of genetic control. For application of the said guarantee, Holton Cattle Company requests that you contact Paul Holton immediately to notify him of the issue and when the animal is examined by a licensed veterinarian so that a proper solution can be agreed upon between Holton Cattle Company and the buyer. Once that solution is agreed upon then the animal can be returned to Holton Cattle Company or sold pending the agreed solution. Holton Cattle Company will attempt to provide a suitable replacement or issue a sale credit in a future marketing endeavor of Holton Cattle Company for the full purchase price less the salvage value of the animal.

All bulls have been genomically enhanced

All bulls qualify as Superior Livestock Progressive Genetics Sires
Cael Ross, 817.475.0561

Holton Cattle Company also retains a 1/3 revenue sharing semen interest in each bull sold.

VOLUME DISCOUNT

5% discount on purchase of five or more bulls.
No purchase discounts on females.

LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

TRANSPORTATION

Free delivery within 300 miles of Holton Cattle Co. In the event that one buys outside the 300-mile radius of Holton Cattle Co., affordable trucking will be arranged in some shape or form with a reputation firm.

BERWALD CONFIDENT 2044

Sire of Lots 1-7

C-BAR ABIGRACE Y11

Iconic 4th Generation Maternal Granddam of Lots 1 & 2

- One of the premier herd sire prospects in the entire sale offering that offers an elite look of quality, style, shape and real-world performance!
- This fault-free son of Berwald Confident 2044 comes so good in terms of his basic build. We are drawn to his functional body and structure while still maintaining substance and look.
- Supported by the influence of the legendary Y11 donor, the dam of the \$105,000 9 Mile Franchise 6305. He has calving ease genomics while still having top end growth and carcass metrics.
- His ability to sire offspring that will generate top dollar at weaning or selling on the grid offers great marketing flexibility in today's fast changing and profitable market.

C-BAR ABIGRACE 635D
Prolific Maternal Granddam of Lot 2

9 MILE FRANCHISE 6305
\$105,000 Full Brother to Maternal Granddam of Lot 2

- The next in a host of Berwald Confident 2044 sons is a stout, rugged herd sire built for long term service.
- 458M comes backed by a maternal grandam that is one of the all-time greats to roam the pastures in Cisco, C-Bar Abigrace 635D. Several of her daughters sired by the great female maker, Bieber Hard Drive Y120, are some of the great young females destined to follow in the matron's footsteps.
- He has heifer bull potential with his sensible CE and BW figures without sacrificing valuable growth and carcass figures.
- With a good mother, visual and numerical performance, he could answer the call for the goals of almost any program.

- Sired by the \$90,000 ABS sire Berwald Confident 2044, 468M comes with all the bells and whistles, phenotypically and genomically.
- The influence of SPUR Franchise of Garton on the maternal side of the pedigree has become a staple in the Holton Cattle Company program, and we see the rewards of his influence as the maternal grandsire of this standout.
- 468M is a stout herd sire prospect that comes with power pieces from every angle studied, yet he still offers a balanced, attractive look.
- Genomically, he stands out within the breed for carcass traits and the GridMaster index.
- For those that sale cattle with hide off this guy will no doubt yield big returns!

- Solid as they come!
- This son of in-house herd sire Holton Just Right 234K ET is so practical and functional in his structural build and body type. He comes with the appropriate attributes to sire cattle that are the low input, easy fleshing, profitable kind.
- Backed by a great cow, your next herd sire lies right here in 464M.

C-BAR MY OH MY MIMI 512C
3rd Generation Maternal Granddam of Lot 11

- 465M is sired by one of the good Lacy Collusion 115F sons to work in the program here at Holton Cattle Company.
- He is so good in the boldness to his body and hip while still being functional in his structure.
- In addition to his phenotype, he is balanced on paper ranking on the upper end for all Red Angus indexes.
- Value added offspring should surface come next calving season with 465M on the roster.

• STUD.

• This proud son of Bieber CL Energize F121 brings fundamentals – body, structure, stoutness – into a package that is incredibly “herd bull” and attractive. Big, good feet, stout bones, bold body, big hip, true muscle, and undeniable look – it’s all there.

• For those that believe good mothers are the foundation, he’s got one of those too, in the 5L Independence 560-298Y sired donor dam, C- Bar Stony 7010E, that has worked in the program effectively of years now.

• He comes with the figures as well. He mashed the scales at weaning at 770 pounds and lands in the upper third for CED, BW, WW, YW, ADG, and Milk.

• No matter the goal, 4075M has to the tools to achieve!

- Here is a dark cherry red hided stud that is sired by Bieber CL Stockmarket E119 and backed by the iconic maternal influence of T715.
- A long bodied, thick topped, big ended herd sire prospect that is backed by generations of proven and predictable cow families.
- We love the genuine mass and substance 4065M offers. He is a performance driven herd sire candidate that offers tremendous length of body, depth of rib and thickness throughout.

- 4067M comes with the backing with arguably one of the most impactful cows at Holton Cattle Company, C-Bar Abigrace 814F. She is a black/red carrier daughter of the great 9 Mile Franchise 6305.
- This Bieber Jumpstart J137 son is a maternal brother to last year's \$47,000 sale feature, Holton Brickhouse 3059L, that was selected by Intrepid Ranch.
- This long bodied, soft sided bull comes with a balanced, high-end genetic profile. He ranks in top third for all indexes and 14 individual traits.

PIE HOLLYWOOD 222
\$400,000 Sire of Lot 32

- The \$400,000 PIE Hollywood 222 offspring continue to impress across the country.
- This age advantage bull is a good structured, good-looking cat that comes with all the power and muscle in still what is a very smooth package.
- He comes with the Holton recipe for success – 9 Mile Franchise 6305 influence on the bottom of the pedigree.
- He offers an extremely balance data package that positions him at the forefront of the industry for several traits of economic importance.
- With growth and carcass numbers combined with good looks and a good mother, what can't he do?

33

- The kind the rancher's like.
- This PIE Quarterback 789 grandson has all the tools necessary for long term, effective service in whatever environment you put him in.
- Backed by a young daughter of Lacy Collusion 115F that is continuing to prove the validity of the "Collusion" daughters.
- His numerical work is high end as he lands among the most elite in the Red Angus database!

- Another high growth son of Holton Quarterback 2028K allows for the combination of the best cows that are in the confines of the barb wired fences of Holton Cattle Company. 2028K would be a direct son of the black-hided and income generator, C-Bar Abigrace 814F.
- On the bottom side of the pedigree, he comes with the influence of C-Bar Stony 720E, who Paul will tell you quickly is one of his favorites at the ranch.
- In addition to cow power, 460M comes with the figures in black and white, ranking him among the most elite herd sire prospects to sell this spring!
- His calves will yield premiums no matter the sex and no matter the marketing avenue.

C-BAR STONY 720E
Maternal Granddam of Lot 34

- This blood red, age advantage stud sired by ALT Regency 301E is big footed, stout, and dimensional with an added shot of length.
- With the backing on another impressive 9 Mile Franchise 6305 daughter there is no guess work in motherly influence.
- Stand out from the crowd on the video or in the sale ring with a stout set of calves next fall.

- We wrap up the age advantage offering with a black hided son of Berwald Completely 2056, one of the great sons of the \$190,000 KJL/CLZB Complete 7000E.
- This stout made stud comes with a solid set of genomics charting in the top quarter of the breed for the carcass profitability index, GM.
- We suggest being in the seats or on the clicker when this one sells on March 16, 2026!

BERWALD PVF OUTRIGHT 221L

Sire of Lots 47-54

C-BAR STONY 720E

Maternal Granddam of Lots 47-49

- In true Holton Cattle Company fashion of always offering cattle that are on the cutting edge of the industry, we are excited to offer one the early sets of bulls sired by the \$85,000 Berwald PVF Outright 221L.
- 221L is chocked full of muscle and true red meat from every angle studied, and he impressively matches that mass at the ground with big feet and legs that get out and cover country.
- He comes with a practical set of numbers with growth and carcass metrics in the upper quarter of the breed.
- Inject some power into the next generation with this stud!

48

- This Berwald PVF Outright 221L son is assembled correctly with added extension while still being genuine and square livestock.
- He offers an extremely uniform data package to accompany a cutting-edge pedigree.
- A diverse herd sire with the phenotypic build to rival any, regardless of if he is turned out on a set of well managed heifers or mature cows, his offspring are bound for premiums at marketing!

- Stout and rugged!
- Another son of Berwald PVF Outright 221L that comes with all the pieces of power and dimension.
- He also stacks an impressive set for growth and carcass numbers with multiple traits in the upper third of the breed.
- He is sure to sire a set of feeders that bring the pounds come sale day.

PIE JUST RIGHT 540
Maternal Grand sire of Lot 49

- I am not sure you could draw a Red Angus pedigree with more proven sires and donors, yet still at the forefront of red hided genetics.
- 5016N is a member of the freshman class of sons of the popular \$85,000 Berwald PVF Outright, who is a direct son of the \$190,000 KJL/CLZB Complete that has created quite the buzz over the last few years.
- His dam, C-Bar Stony 720E, is absolutely the specimen to be admired and is a direct daughter of the breeds poster girl, C-Bar Ms Stony A302.
- Although the pedigree is first class, 5016N himself is quality enough to solidify his value. Herd bull presence, bold and shapely power, incredible structural build – it is all inclusive here. Dig in!

Sire of Lot 57

C-BAR MS STONY A302
Iconic Maternal Granddam of Lot 57

- Here is another son of the dynamic donor dam, C-Bar Stony 720E, that is a favorite among the crew in Cisco.
- He is sired by the Pieper bred PIE Just Right 540, who has established himself for his quality females he has put into production across the country.
- With balanced figures and dominant females in his pedigree, we think 5018N should be relied on heavy for those interested in building the cow herd back better.

- If you are needing to add performance and growth to a set of feeders look in here!
- 553N had the best day of his contemporaries at weaning smashing the scales to ratio at 112 ratio and he continued his impressive days at the chute a few months later with a commanding 125 IMF ratio and 104 REA ratio.
- His predictive figures are strong with growth and carcass traits in the top 5%, and he finds himself among the top 5% for GM and top 9% for ProS.
- Pounds pay!

- The impact of Lacy Collusion 115F for us has lasted well past the sons he produced that have highlighted our sales in recent years. Seeing his daughters enter and thrive in production has exceeded our expectations. They are cows that maintain flesh, are beautiful uddered, and bring a big solid calf to the weaning pen.
- 556N is another bull in the offering that finds the "Collusion" influence on the bottom side of his pedigree, and we simply think you cannot go wrong with that influence.
- Tie into a product of the program. The guess work is done!

- This son of Berwald Wingman 3092 comes with some added look and presence as he moves around the pen.
- His dam traces back to the “My Oh My Mimi” cow family whose influence is on display through out the offering.
- 554N will add some stretch and look to your calf crop next spring.

- The lone son of Bieber Jumpstart 550N in the yearling bull offering is sure to impress.
- Bold bodied and big hipped, 550N comes with added dimension from every angle and maintains a look of quality that we come to expect from the sire line.
- Even with the added looks he still ranks in the top 1% for growth traits - WW, YW, and ADG.
- His daughters will sure stay at the ranch and male progeny will be head turners wherever marketed.
- One of the most impressive herd sire prospects in this year's offering that is supported by multi-trait excellence!

BIEBER JUMPSTART J137
Sire of Lot 64

- This next son of 4MC Youngblood 3043 is rugged built with added length of body and hip.
- Backed by a phenomenal Bieber Hard Drive Y120 daughter, 548N ranks in the top 15% for WW and top 25% for YW.
- He will add the stretch, the pounds, and the look to your next set of feeders!

- This dark red, practical built bull is sired by 4MC Youngblood 3043. "Youngblood" is a young son of the popular 4MC King of the Cowboys that was produced in the McEntire program in Oklahoma. We surely pleased with what he's producing with cattle like 538N!
- 538N is good and stout in his structural build with the right three-dimensional body. We see him and his daughters as the low maintenance kind that keep an operation profitable for years to come.

- Check out this dark red powerhouse!
- 536N is stout hipped, bold ribbed and big backed and is sure to inject that added stoutness into the next generation.
- He offers the best set of numbers, particularly index figures, within the sire group. He ranks in the top 12% for ProS, top 18% for GM, and top 21% for HB. For individual traits he ranks in the top 15% for STAY and REA, and top 20% for ADG and Marb.

DAMAR MIMI W085
Matriarch of the "Mimi" Cow Family!

- The next son of 4MC Youngblood 3043 has more bone and foot size at the surface while still maintaining a look of quality from the side.
- For his genetic predictors he lands in the upper third of the breed for WW and YW and should add some punch to a calf crop.

- We wrap up the “Collusion” influence with the natural calf from the C-Bar Abigrace 755E donor. She is a bold built power generator backed by the black hided sire, SPUR Franchise of Garton.
- He ranks in the top 1 % for REA, top 15% for ADG, top 20% for YW, and top 25% for WW and ultimately lands in the top 8% for GM.
- Another pick to land on if you are after adding growth and carcass quality to the next generation.

- The black/red carriers continue to offer opportunities to inject new genetics within the breed, and this son of Basin Keystone 2021 is as unique of any black hided one offered at Holton Cattle Company.
- Basin Keystone 2021 garnered a \$135,000 final gavel price in the 2023 Basin Angus Ranch Production Sale. He was admired for his phenotype with strong maternal and carcass figures.
- 5019N is a big footed, stout built, attractive son of donor C-Bar Stony 803F, who is direct daughter of the infamous C-Bar Ms Stony A302.
- He ranks in the top 1% for GM and CW, top 2% for Marb, top 3% for ProS, ADG, and Milk, and top 10% for YW.

- Something for everyone here at Holton Cattle Company. Here is a pair of commercial bulls that fit the standard established by the firm for bulls that go out and work for their respective buyers.
- This pair of rugged bulls have muscle, body, and the right structural build to service cow no matter the countryside.
- 5001 comes with a shot more scale and stretch for those looking to add weight to a calf crop via frame size.
- 5003 is a bit more moderate and chock full of red meat and muscle and will sure add stoutness to a set of feeders.
- Buy with confidence!

84

A close-up photograph of several brown camels in a herd. The focus is on the heads and necks of the camels, showing their thick, shaggy brown fur. The background is bright and slightly blurred, suggesting an outdoor setting. The word "FEMALES" is overlaid in the center in a white, serif font.

Maternal Grand sire of Lot 102

PIE HOLLYWOOD 222
\$400,000 Sire of Lots 101-103

- Another phenotypic stand out in the offering!
- This PIE Hollywood 222 daughter comes with the added growth, length, and substance we've come to expect from the \$400,000 valued sire.
- She is backed by an impressive Rojas TR Chivas 17109 dam from the Bruce Bradley program in Missouri.
- In addition to her looks on hoof she comes with a balanced set of carcass and growth figures. A female with true mating flexibility depending on the goals of your program.

- A moderate, soft centered PIE Hollywood 222 daughter found here in 503N.
- This dark red female is out of a young, impressive daughter of LACY Collusion 135J from the "Abigrace" cow family.
- Another female that comes with an impressive set of numbers with seven growth and carcass traits or indexes in top 10% of the breed.

- We love the softness and practicality this female has to her ribcage while still having density to her bone work, hip, and body. All the while, she is still attractive in her side view construction.
- You can never go wrong with an easy keeping, sound footed, productive female that is supported by a truly royal cow family!
- There is no question that 525N will produce herd bulls and replacement quality females!

119

- This daughter of C-Bar-RJ Tilly 595C is so impressive in her body shape and real-world stoutness.
- Sired by the up and comer Berwald PVF Outright 221L this female offers a balanced set of figures with eight traits in the top quarter of the breed.
- A female built for impact!

- It is with great excitement that we offer a direct daughter of the very impressive ALT Chardonay 131K matron that is sired by our PIE Quarterback 789 son, 2029K.
- 523N is an absolute beast from every angle of evaluation. We love her mass, power, substance, and elite brood cow look.
- The sire of 523N is a maternal brother to the \$47,000 Holton Brickhouse 3059L ET, a featured herd sire prospect in last year's sale offering that was selected by Intrepid Ranch of Cisco, Texas.

THE \$47,000 FEATURE

OF THE 2025 HOLTON CATTLE COMPANY PRODUCTION SALE
 Purchased by Intrepid Ranches of Cisco, TX

He offers a very suitable and balanced EPD profile with advantages to ensure premiums attached to the progeny he leaves behind.

COMMERCIAL RED ANGUS OPEN HEIFERS

100 commercial open Red Angus Females will be offered in groups of five head per lot. The winning bidder can take as many as they would prefer in increments of five up to 100. They have been calfhood vaccinated with Holton Cattle Company pre-breeding health protocol on board.

Every five to six years, Holton Cattle Company invests in a high-quality outside source of females to enhance genetic diversity and the longevity of their commercial division. Through a careful selection process, the Holton firm introduces different genetic sources that have been sorted and managed similar to the management practices in Cisco. The cows that raised these females have been evaluated for hoof quality, fertility, maternal instinct, calf-raising ability, and their ability to thrive in their respective environments. This strategic approach ensures a well-balanced, productive herd that excels in various environmental conditions while maintaining strong market share capabilities. In addition to strengthening the female base of Holton Cattle Company, the operation makes a select group of these heifers available to their customers, offering them the opportunity to access the same proven genetics that will enhance the productivity and profitability of their own herds. The Holton commitment to continuous genetic improvement enables the Cisco-based operation to produce high-performing cattle that meet the industry's standards for quality, consistency, and performance.

Holton Cattle Company will furnish one unit of semen per commercial heifer on the past sale feature, Holton Wishbone 2010K if the buyer chooses to do so. 2010K is a son of PIE Quarterback from the C-Bar Stony 720E donor dam that leads the proven sire battery for CED and BW. The progeny have proved to arrive unassisted with significant growth to weaning. He is a true commercial man's "do it all" sire.

**HOLTON CATTLE COMPANY WILL HAVE UPDATED INFORMATION
