8th Annual Bayou Creek Ranch Production Sale at 1:00 pm

SALE LOCATION

91 Fox Creek Road - Lone Grove, OK 73443

BAYOU CREEK RANCH
— RED ANGUS —

We would like to welcome you to our 8th Annual Production Sale at Bayou Creek Ranch. Our goal at Bayou Creek Ranch is to produce the best Red Angus bulls possible to offer to our friends and neighbors. The desire of every successful cattleman and rancher is to develop the best overall cattle – created through a commitment to hard work, dedication and superior genetics. It is our belief that we at Bayou Creek Ranch have done just that. We would like to share our success with you. At Bayou Creek Ranch, we take great pride in producing what we believe are the best Red Angus cattle offered anywhere in the market today. We are confident that you will find exactly what you are looking for in purchasing Red Angus cattle from Bayou Creek Ranch. We appreciate each and every one of you and look forward to meeting your needs for quality Red Angus cattle.

Please join us on Thursday, October 1, 2026, at the ranch in Lone Grove, Oklahoma for our 8th Annual Production Sale. We look forward to seeing you on sale day!

Sincerely,

Ken and Becky Swan

Bayou Creek Ranch

Bayou Creek Ranch has etched its place in the Red Angus circle with a name tied to integrity and quality. These cattle have been tested and challenged to withstand the extremes of weather, drought scenarios, and harsh terrain. As the customer base continues to grow, that growth comes from repeat customers referring the program to their neighbors and friends. Although still growing, the number of cows that get exposed to the annual bull offering would be astounding, with sizable and progressive ranching firms gathering up the herd sire power they need on an annual basis.

This cattle market has allowed outfits to be more aggressive in acquiring the bulls they want instead of having to settle for need, but the development and sorting pressure applied to this offering has not wavered. Kent Shankles develops these studs on grass from weaning to yearling before nutritionally supplementing. Even then, the cattle are fed less than 2% of their body weight. Bulls are expected to travel long distances to water and endure the sandy, rocky ranch setting outside of Lone Grove, Oklahoma. We can promise you this: if they have passed the chosen development methods and conditions employed by the management team, they are suited to run anywhere from the Gulf Coast plains to the Nevada desert, to the northern plains, and the fescue belt. We can say this because that is where these bulls consistently go outside of the Texas and Oklahoma region, and they thrive when they leave the native environment. Customer service is first and foremost. It is something that is crucially important to ownership and management, as you can trust that they will do all in their reasonable power to make sure your investment is exponential to the future of Bayou Creek Ranch.

Ken and Becky Swan are incredible people with a passion for the beef business and their focus on the red-hided stock. The initiating cow base was assembled by acquiring the fundamentally best cattle with a desired blend of maternal and performance. They continue to sort the base and have identified those females with strong production and maternal instinct values. Annually, the outfit acquires a top-notch set of herd sires from programs that align with the ranch's production and phenotype values to trail the red-headed beauties on spring and summer pasture. The class of 2026 bull offering bearing the BYU prefix is as deep in uniformity and consistency as has ever been offered, with a deep assortment of quality for calving ease or performance alike. We believe that the foot quality and structural integrity are as good as ever, thus enhancing the likelihood that buyers will retain some daughters back for those valuable replacement females that are best suited where raised.

The female offering at Bayou Creek Red Angus is loaded with talent and future as well. The ranch team will feature a set of productive, experienced producing females with an outstanding set of bred heifers. The mature cow offering will include dams of the bulls being offered as well as the bred heifers. We are certain that many will be impressed by the udder quality of the proven females and equally impressed with the overall depth and quality within the bred heifer offering. These ranch-raised, heat-acclimated type bred females should be in high demand as many ranchers across fire and drought-stricken areas look to repopulate with general interest at an all-time high. Who wouldn't want to consider hardy developed stock to ensure longevity in production, especially in these blessed and record times?

The sale management team of Innovation AgMarketing is excited to kick the "fall bull sale season" off with this phenomenal offering of red-hided seedstock. The annual pleasure of working for this cornerstone firm is a privilege, as most of the customer base has experienced. If you have not made the trip to Lone Grove or ever studied the offering, we encourage you to do so, as the wealth of opportunity to advance any program is between the covers of this sale book. If you should need any guidance or assistance making your selections or would like to bid over the phone, we are willing and able to assist. We hope to see you at the sale or look forward to hearing from you if your schedule doesn't allow you to make it.

Enjoy the cattle,

Graham Blagg Jared Shipman Tim Anderson Tucker Wagner

SALE ORDER

Cattle will not sell in catalog order. A sale order will be available the week of the sale.

DNA

All Bayou Creek Ranch herd sires have had DNA submitted to the Red Angus Association of America.

EPDs

The EPDs in this sale catalog were pulled from the Red Angus Association of America on August 20, 2026. For updated EPDs please visit RedAngus.org

SALE LOCATION & DIRECTIONS

91 Fox Creek Rd - Lone Grove, OK 73443

- From US Hwy 70 turn south onto Cheek Road just west of Lone Grove, OK
- Travel 5 miles south on Cheek Road, turn right onto Rio Grande Road
- Travel 1.1 miles west on Rio Grande Road, turn left onto Fox Creek Road
- Travel 0.5 miles to Bayou Creek Ranch entrance on the right side of the road
- Once entering the ranch's overhead entrance follow the sale signs to the auction facility (approx. 2 miles from the entrance).

TERMS & CONDITIONS

Cattle will sell under the standard Terms & Conditions as recommended by the Red Angus Association of America. All sales are final, and the cattle will become the property of the buyer when the auctioneer says "SOLD".

HERD HEALTH

All animals in the sale are on a complete herd health program. The bulls have received Vista 5 (VL5), Vision 7, Dectomax in the spring of 2026, Safeguard in the fall of 2026, and Multimin. All cattle will be accompanied by proper health certificates for immediate interstate shipment.

BREEDING SOUNDNESS EXAM

All bulls will be fertility tested and trichomoniasis tested prior to the sale and guaranteed to be breeders.

SEMEN INTEREST

Bayou Creek Ranch will retain 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block. The buyer will receive 100% of the salvage value of their purchase.

LIVESTOCK TRANSPORTATION

Load out will be available at the sale facility following the sale. We will assist customers with trucking arrangements as needed. Our facility has a loading chute to accommodate semi-trucks. We will be offering FREE trucking to buyers who purchase 5 or more bulls. We will do our best to assist you in transporting your bulls following the sale. Below are a list of recommended professional trucking options:

Jared Utley: (918) 869-0804

SUPPLEMENTAL INFORMATION

A supplement sheet will be provided the week of the sale with updated breeding information, pregnancy status, corrections, and addition information. All announcements made from the auction block will take precedence over printed materials associated with this sale.

LIABILITY

By participating in any event planned and controlled by Bayou Creek Ranch, you agree to the following:

- Bayou Creek Ranch events are provided with no special warranty either express or implied. The Organizers, including but not limited to Bayou Creek Ranch, its employees, Ken and Becky Swan, and Innovation AgMarketing, LLC assume no liability for any loss, theft, damage, or injury to property or persons, including death, whether arising in contract, negligence, equity, or otherwise.
- You assume all risks when participating in Bayou Creek Ranch events. All participants must obey all rules and regulations of Bayou Creek Ranch and the laws of the State of Oklahoma. Participants must comply with all requests made by employees and agents of Bayou Creek Ranch. Bayou Creek Ranch reserves the right to eject any participant who does not comply with this section, and further, refuse entry to any participant. Refunds for any reason are at the discretion of Bayou Creek Ranch.
- All participants agree to indemnify and hold harmless Bayou Creek Ranch and The Organizers listed without limitation for any and all legal action arising from or related to a Bayou Creek Ranch event.
- All participants expressly give Bayou Creek Ranch authorization to use and post any photographs, videotapes, recordings, or any other record of our events, including full names of any participants, before, during, or after the event for promotional use reporting to the media, and to publish on our website or blog. Participants are not entitled to compensation for Bayou Creek Ranch's use of their name or image.
- We are not responsible for any typographical errors.

A Guide to EPDs

- HB** HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the postweaning period. (Pounds/Low Value)
- MILK** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Genetics Backed by GGP

The GeneSeek Genomic Profiler (GGP) products and services empower decisions in selecting, raising and selling elite cattle, enhancing profit and protecting your reputation for high-quality seedstock. Beef genomics is evolving fast. GGP provides advanced, wide range DNA testing for the real world of cattle production.

Using genomic-enhanced EPDs for selection of young breeding stock provides a level of precision and reliability that's never been available to producers before.

Bob Weaver
Kansas State University

Efficient selection of seedstock replacement heifers

Never before has such power been so practical. As breed associations add the GGP uLD to their DNA services, you can genomically screen and select replacements for your herd while adding value to heifers you sell.

- **Profile replacement heifers** – Use genomics to select the best and sell the rest
- **Raise elite cows** – Superior nucleus cows are the source of superior bulls
- **Market quality heifers** – Sell heifers with GE-EPDs helpful to commercial cattle producers
- **Verify parentage** – Confirm parentage of heifers for registration and marketing

The best 50K ever – Effective, affordable power to select, manage and market sale bulls

An ideal tool to test a crop of bull calves, the new GGP 50K is the most advanced 50K ever. Highly accurate. Highly affordable. Very versatile with built-in parentage and genetic-health screening. Nearly all major breed associations offer the GGP 50K as their workhorse profiler for routine use.

- **Genomic-assisted selection** – Identify the best bull calves for sire development or AI studs
- **Profiling bull calves for sale** – Affordable accuracy with GE-EPDs adds value in the sale ring
- **Reputation builder** – Verify quality for local customers and distant buyers
- **Fits modern methods** – Uses markers enhancing new “single-step” GE-EPD calculations

Setting a gold standard for the best of the breeds

The most powerful commercial seedstock profiler, the GGP HD150K is ideal for AI studs, donor dams and elite bloodlines. With its strategically chosen content, running the GGP HD150K on elite bloodlines improves imputation accuracy of pedigree genotypes.

- **Smart Design** – Contains 150,000 markers, filling in genetic details other tests miss
- **Modern** – Works synergistically with other GGP products in the “single-step” system
- **Imputation standard** – GGP HD150K data on parent and grandparent animals can sharpen GE-EPDs on their progeny
- **Unique content** – Impactful new markers for cattle performance, reproduction and quality

Watch the Sale on CCI.live!

*The best, the fastest and most
comprehensive marketing & bidding tool!*

How to Bid Online...

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
 - After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
 - CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

Bull Development

The bulls were developed at the ranch in Lone Grove, Oklahoma on rye winter pastures and supplemented with a bull ration that was formulated by Martindale Feed Mill. They have been maintained on a soy based pellet at a rate not to exceed 1.5% of their body weight to prevent structure and foot issues. By maintaining a slower and more precise development, these bulls are true athletes that are ready for heavy service. These bulls have never set foot in a feedlot. We confidently say that these bulls will endure more seasons in the breeding pasture.

The bulls have been handled both on foot and horseback. Bulls have been strictly culled based on performance, structural integrity, fleshing ease, fertility, and disposition. The bulls have had DNA submitted and will sell with genetically enhanced EPDs to facilitate you in making a more educated decision during the buying process. The bulls that carry the Bayou Creek Ranch brand will add terminal value to your calf crop and in turn contribute to your bottom line!

Bull Guarantee

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard terms and conditions of the Red Angus Association of America, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

Please contact Kent Shankles: (580) 276-7715 for further questions about how Bayou Creek Ranch can add value to your operation.

WELCOME

6	11	9	16	0.69	0.06	29	0.22	0.02	

- BYU Dynamic 5323 is a BIG TIME herd bull prospect and one that will see heavy use back at Bayou Creek Ranch! Sired by Bieber Dynasty H524, he posted a 107 WW ratio, 107 YW ratio, 107 ADG ratio and 103 WDA ratio. What makes that performance even more impressive is the fact that he was raised by a first-calf heifer.
- He recorded an adjusted yearling weight of 1,443 lbs., ranking him as the NUMBER 2 YW bull in the entire offering based on individual performance. That combination of growth, efficiency and maternal productivity gives 5323 the credentials to make a lasting impact.
- Numerically, he ranks top 3% Milk, top 14% GM, top 16% ProS, top 16% MARB, top 17% ADG, top 17% CEM, top 22% YW, top 24% BW, top 27% CW, top 28% WW, top 32% CED and top 33% REA.
- A legitimate herd bull to lead off the offering. He is the kind Bayou Creek Ranch believes strongly enough in to use extensively within their own breeding program.
- **TERMS ANNOUNCED SALE DAY.**

- Dark red and a warrior! BYU Leonidas 5306 really turned the crank after weaning, posting an impressive 121 ADG ratio along with a 101 YW ratio and 100 WDA ratio. A son of WEBR Spartan J21, he brings a different performance curve and plenty of post-weaning punch.
- Stemming from the "Boteet" cow family, his mother simply never misses the mark when it comes to producing marketable sons. A maternal brother, BYU Red Wave 4314, sold in 2025 to Bruce Bradley, while another maternal brother, BYU Fullback 3382, sold in 2024 to Nichols Ranch.
- He ranks top 16% DMI, top 27% FAT and top 31% ADG.
- For ranchers wanting a bull with added gain and a maternal track record behind him, 5306 deserves a hard look.

- Sired by DUFF Carload 275D 20205, BYU Carload 5342 is a herd sire prospect with a practical set of numbers for female retention. It's hard to deny his ranching value.
- He posted a 112 WW ratio.
- He ranks top 21% YG, top 24% HB, top 27% STAY, top 32% MILK, top 35% REA.

PARAMOUNT

Elevate to a more valuable female.

For over a decade, Red Angus females have commanded more at auction than all other breeds, including Angus. According to Superior Livestock data, Red Angus heifers brought nearly \$17/cwt more – **that equates to a \$92/head premium on a weaned replacement female.**

**To learn more about
industry-leading
stayability, visit
RedAngus.org**

RED ANGUS
RANCH TESTED. RANCHER TRUSTED.

The Female Offering

In the following two section of bred heifers and bred cows, you will find information regarding specific AI breeding dates and pasture exposure date ranges. The females will be preg checked prior to the sale and estimated due dates will be provided on the supplement sheet. We also wanted to provide information about the pasture exposure of these females here for your reference. All females that are carrying the service of a PE sire will need to have DNA submitted on the resulting calf to be registered with the RAAA.

All PE sires have had DNA submitted by Bayou Creek Ranch.

PE FROM 4/29/26 TO 9/24/26 TO SIRE GROUP 1

- BYU Fayette 5038 is one of the more compelling cow prospects in the offering. Her dam, BYU Fayette 2009 ET, is a maternal sister to the influential PIE One Of A Kind 352 and is backed directly by PIE Fayette 1160.
- That pedigree has already translated into sale performance. A maternal brother, BYU Fullback 4366, was a 2025 standout with a 114 WW ratio and a 110 YW ratio.
- On paper she reads with growth and longevity where it matters. She ranks top 23% STAY, top 25% WW, top 31% YW and top 35% YG.

- BYU Boteet 8018 is a daughter of RED U2 Rendition 340D that is supported by the great PIE Boteet 1233 cow family with the influence of RED SVR Gangster 14S on the maternal side of her pedigree.
- The strength of this family has stayed visible in the Bayou Creek Ranch sale lineup. A maternal brother to 8018, BYU Red Revival 4310, led the WEBR Red Revival 78H sire group in the 2025 offering, reinforcing the consistency behind this branch of the pedigree.
- She ranks top 1% DMI, top 16% ME and top 30% REA.
