

THE BLACK LABEL

OCTOBER

10

2026

GRANDVIEW, TEXAS · 6:00 P.M.

Welcome

As time goes and worldly things progress, so does the beef industry. We are very fortunate as production agriculturalists to experience a way of life that is far greater than most. Those who do not experience what we have truly do not understand what they are missing out on. Probably the most significant value to what we do is being able to raise our families or expose those on the city blocks to what we do on a daily basis. From the care of the beef animal itself, to experiencing the end product on the plate, with the cycle it takes to connect the dots, no value can be placed on the experience. It is certainly not all roses and sunshine, but the life lessons that exist cannot be replicated by a textbook or a college professor. It is the experience that continues to make us all better stewards regardless of your program's own discipline or direction.

It is no secret the cattle business has been good for an extended cycle in recent years and there is little indication of drastic change or correction for at least the next couple of years. First generation and legacy ranching entities have experienced some of the very best times, allowing many to accelerate improvements in genetics and infrastructure that have been needed for some time. This additional competition in the genetic marketplace has certainly narrowed, or even closed, the perceived gap between the commercial and registered stock. Registered stock with broad industry appeal are worth as much as ever, with improved value across the board. As far as the recreational stock, the very best are worth as much as ever, but the gap between the top 5% and the good mid to upper level stock is as wide as ever. The quest for only the perceived best has more exhibition programs utilizing IVF technology as aggressively as ever, while the past tradition of using artificial insemination with hopes of improving the next generation continues to fall further behind. That creates challenges for marketing of those resulting bulls and females for premiums above today's commercial market. With that said, I believe there is room for someone to gather up these heifer calves that are full or maternal sibs to the top-shelf high sellers and place your operation in the driver's seat for what we do not know about the future. Good cattle will never go out of style and the good ones can out produce those to be considered "the elite" as youthful opens.

The past couple of years, the cattle from this annual and coveted sale offering have not been as dominant at the Texas Majors. Sure, we were able to get the Fort Worth Stock Show and Rodeo won with the DeBerry family, but we were shut out for the balance of the majors in 2026. On a more important note, the heifer that was exhibited by the

Mosely Family that won Houston Livestock Show and Rodeo and Rodeo Austin is from a female selected by the Metzler Family through the 2017 edition of The Black Label. JCBB Lady E3301 is responsible for the \$38,000 MTZ Lady Jewel J2101, a.k.a "Deuce," exhibited by Makenzie DeBerry that claimed the dark purple banners at both the 2022 Fort Worth Stock Show and Rodeo and San Antonio Livestock Exposition before meeting an untimely demise. E3301 has generated an arsenal of daughters that are being utilized to advance the aggressive Metzler operation. The success stories continue for Jared and Jeff Jackson with females they have purchased through The Black Label, as their selections have annually generated cash and highlighted their daily private treaty offerings. BLC1 Bar O Fresca 356F is responsible for producing the 2026 Supreme Champion Female at Rodeo Austin for the Wall Family with the full and maternal sisters an early hot commodity in Walnut Springs so far. The Jacksons have purchased multiple breeding pieces over the years and have been more than pleased with the cattle's ability to acclimate to their rough terrain and maintain a productive and profitable production career. If you think it is just Marketing 101, ask Jared or Jeff yourself, the Brandon DeBerry Family, and the Metzler will tell you they are more than satisfied with their investments through this sale.

We feel that this year's offering is saturated with cow family as much as ever. As you click through the digital catalog, flip through the hard copy on sale day, or come see the stock in person, you will notice that the number of cattle offered is nearly half of what we usually sell. We have made the conscious effort to focus on both physical and genetic quality rather than volume. Over 95% of the stock are native to Johnson County, Texas, with a few outside embryo transfer calves. For those who have followed the event annually, you will also notice that the largest influence of the KCC1 SWC Harmony 847H donor who was proudly campaigned by Megan Brown. "Harmony" was not a dominant champion herself, but she has proven to be a producer of those that can win and have the potential, when mated correctly, to produce those champions and high sellers, like the \$82,500 2026 AJSA National Junior Classic Champion Purebred Cow/Calf Pair, 3BCC KCC1 Harmony 4019M for Makenzie DeBerry. The potency of 847H is evident on the female side but the stars align when she is on the bottom side of a bull pedigree as well. The \$450,000 3BCC KCC1 Krypton 100K, the \$100,000 KCC1 3BCC Black Label 4016M, and the \$95,000 3BCC KCC1 Next Phase 4L represent the youthful dam's ability to be an impactful matron of influence. We understand that capturing banners can accelerate a program, but in recent years, very few of those that achieve that status produce herd sires as consistent as the KCC1 Havana 83E influence has proven to do. My challenge to you is to answer this question, which National Champion Purebred or Percentage female, both junior and open exhibition circles has produced

more than one noteworthy sire? How many of the chosen evaluators give thought in their final decision on what impact the animal they deem as the best will have on that breed or species in the future? The genetics matter and cattle that are constructed like the ones in this book, represent the kind of breeding cattle that are the tools needed to take your respective program to the next level of BEEF production.

My final supporting statement to my rant goes back to the early phases of semen marketing on MR HOC Broker. I was told that "the breed doesn't need another "Steel Force" son." I was told they were wild, and I was told they weren't good enough. That's fact. I was told that the "Broker" progeny were not good enough, but they most always generally WEIGHED UP enough to offset the difference if you did not like them. That is a true struggle today, as much of the "show bred" stock lack genuine performance. The strong cow families with the ability to produce quality regardless of sex are becoming more of a novelty than most realize that choose the route to banners. Short term, it may not matter, but the long game won't exist if the right stockmen or stockwomen do not stay the course to ensure that good cattle remain long in supply for the rest to correct the mistakes made. Go back and find Glen Martin's closing remarks from the 2025 Indiana State Fair Steer Show and give the business an honest assessment after listening to no truer words spoken in recent history.

For those who have been with us every step of the way, you are familiar with the strength of our relationships, and we appreciate you all more than words or actions can express. Those of you looking over the fence, climb on over and get to know us. We're fiercely competitive like you at heart and in spirit. I'll address a concern of some: we breed Simmental cattle and have a small nucleus of Angus cows as well, yes, our kids will show those two breeds because those are the breeds we believe in. Those are the breeds that are good enough for anyone, anywhere, and they are also big enough that there is plenty for all to win and sell to from a customer base viewpoint. I can promise you one thing: the older I get, the less I seem to know about what are considered to be champion caliber. I just know what I like, and the kind the industry needs in the grand scheme of things. Please come join us on October 10 at 6 p.m. for the 2026 edition of The Black Label and make plans to attend the Ladies of the Lonestar in Grand Saline, Texas, at Red River Farms sale venue on Friday, October 9th. Tyler Abney has done a masterful job of taking over the reins for Bob and Michael Mullion. The Mullions may have a California address, but don't let that fool you; as they are humble, hardworking agriculturalists with a great taste in seedstock as well. We hope you decide to make it a weekend as we look forward to seeing each of you soon.

Jared Shipman

The logo for Shipwreck Cattle Co. features a stylized, geometric representation of a ship's hull or a stack of blocks, composed of several horizontal lines of varying lengths that create a three-dimensional effect.

TRAVEL

ACCOMMODATIONS

The Black Label will not have a block of rooms available at any specific hotel this year, so we are offering multiple suggestions for your lodging and dining.

HOLIDAY INN EXPRESS

325 Village Park Dr, Alvarado, TX 817.783.7573

COMFORT INN & SUITES

400 Village Park Dr, Alvarado, TX 817.783.2900

Hillsboro, TX has several hotels including a newly remodeled Fairfield Inn and Suites and several restaurants as well for those who may be coming from the south. Hillsboro is a very short 25 minutes to the sale site.

AIR TRAVEL

We are located just under an hour from DFW Intl. and Dallas Love Field.

DIRECTIONS TO THE SALE

FROM THE WEST: via I-20 or from the North via I-35W: I-35W south to Exit 17 the 2258 Rd Exit. Cross back over I-35W after exiting then from stop sign proceed approx. 4.7 miles east to County Road 206, turn right or south on 206. Continue 1.1 miles to trailer parking on left or 1.3 miles to sale site.

FROM HILLSBORO/I-35W: Take Exit 15 the Grandview/Maypearl 916 Rd exit. Turn right on 916 and continue approx. 4.8 miles to County Road 206. Turn left/north on to 206 go 1.5 miles to stop sign, then turn back left/north continue 0.4 miles to sale site or 0.6 miles to trailer parking.

FROM WAXAHACHIE/I-35E: Take Highway 66 to Maypearl to the 157/66 JCT. Turn right/North on 157 continue approx. 5.5 miles to 2258. Turn left/ West on 2258 and continue 4.1 miles to County Road 206. Turn left/ South on to 206 and continue 1.1 miles to trailer parking or 1.3 miles to sale site.

FROM DALLAS: US 67 highway south to Venus, TX. At the Venus stoplight, (the US67/157 JCT), turn left/South on 157. Take 157 to 2258, turn right/West on 2258 and continue 4.1 miles to County Road 206 on left. Turn left/ South on to 206 and continue 1.1 miles to trailer parking or 1.3 miles to sale site.

TERMS + CONDITIONS

- All cattle sell under the terms and conditions of their respective breed association. Payment will be accepted in the form of CASH, CASHIER'S CHECK, OR A CHECK IN GOOD STANDING. If you prefer to pay with a credit card a 5% buyer's premium will be applied. ALL CATTLE MUST BE PAID FOR PRIOR TO RELEASE. The Black Label is not a lending institution or a bank, please submit full payment promptly any accounts not settled in full by November 1, 2026 will be assessed an additional 10% fee based on the purchase price of the animal. In addition, any cattle still on the premise of Shipwreck Cattle Company not settled for will be housed at a fee of \$10 per day until settled for and transported off of said premise unless arrangements were made and agreed upon prior to the date of sale.
- Once payment is made, registration papers will be transferred. If you are a Texas exhibitor and have tight validation requirements, please plan to pay in full on date of sale or we can assist with wiring instructions for the next business day to follow. PLEASE LEAVE SPECIFIC TRANSFER INFORMATION UPON SETTLEMENT.
- We will be selling 100% interest and possession, unless otherwise stated, in all females in the offering. However, Shipwreck Cattle Company and their partners will retain the right to two successful IVF or conventional cycles with a minimum of 6 transferrable embryos per cycle with an open top at the seller's expense and buyer's convenience within the first three years of production.
- Shipwreck Cattle Company will be selling 100% possession and retaining 1/3 revenue sharing semen interest in all bulls selling unless otherwise stated.
- For those who choose to bid on CCI.Live, we appreciate your interest in the offering and your intentions of doing business. If you just want to watch the auction and have no intent to do business, please do not log into your CCI.Live account. If you are logged in and you actively bid and win a lot or multiple lots you have entered a contract and you will be held accountable for that purchase or purchases. We expect prompt payment just as stated above. CCI.Live also offers a payment portal if you choose to utilize that service.

THE BLACK LABEL, SHIPWRECK CATTLE COMPANY, AND INNOVATION AG MARKETING ASSUME NO LIABILITY FOR INJURY, ACCIDENTS, OR DAMAGE TO PERSONS OR PERSONAL PROPERTY.

2023 FWSS GRAND CHAMPION JUNIOR
PUREBRED SIMMENTAL HEIFER
MATERNAL SISTER TO DAM OF LOT 1

We initiate the KCC1 SWC Harmony 847H offering with a set of sisters born in the Spring of 2026 and the Fall of 2025. Three full sisters sired by WHF/JS/CCS Woodford J001 lead the pack.

107P is the late January born full sister to the Makenzie DeBerry 2026 Fort Worth Stock Show and Rodeo Champion Junior Simmental Female, 3BCC KCC1 Harmony 4019M. This female has been a standout throughout her development in terms of length, femininity, and her glass like transitions.

Like nearly all of the cattle from this cow line, her feet are impeccable, her skeleton practical and built with the assurance of longevity. There has not been one of these sisters alike in the history of the mating but quality will never be an issue with the potent cow families that are attached to both sides of the genetic ledger.

SWC 3BCC KCC1 PIPPA 307P
OFFERED BY: 3B CATTLE, KEARNS CATTLE, & SHIPWRECK CATTLE CO

A beautiful, star headed creature that is very square and proportional in her build. Her body shape is ideal, muscle abundant in comparison, and substance more than adequate. She will be a tank in production, huge barrel shape, big and open in her upper rib, soft flanked, with a very maternal and productive look. Just like lots, 1 and 3, she will always be a full sister to the \$82,500 3BCC KCC1 Harmony 4019M and the \$100,000 KCC1 3BCC Black Label 4016M. Tie on with confidence and get into these things early.

SWC 3BCC KCC1 NEONN NIGHTS
OFFERED BY: 3B CATTLE, KEARNS CATTLE, & SHIPWRECK CATTLE CO

- We were not as aggressive as we should have been at getting our fall heifer calves marketed. In fact, we had full intentions of keeping these next four daughters of 847H, but curveballs can get thrown in partnership scenarios and so here we are.
- The final daughter of WHF/JS/CCS Woodford J001 is loaded with as much potential and future as any. She is closer to the appropriate age for aspiration and will be ready to mate to the bull of your choosing by November putting that future return a bit more in reach.
- 147N has always had that charismatic draw to her presence and kind. She hits the surface with big feet, complemented with plenty of dimension of skeleton as she sets wide and true with utmost flexibility off of both ends. We admire her long, bold rib design and her genuine and quality silhouette.
- We think she is very similar to her big sister owned by the DeBerry family that might give up some mass to 4019M but is tweaked more ideal through her front skeleton. This mating has been consistent for quality and as the calves by "Black Label" become more in number, it will become more proven to bring the "goods."

CE	BW	WW	YW	MILK	API	TI
10	1.5	79.1	117.9	21.1	124.5	76.8

We could have arguably started the book with this full sister to the \$95,000 KCC1 3BCC Next Phase 4L! - The Next Level sire group has taken its fair share of criticism from the exhibition breeders, but if you place value on consistency for true growth, scale weight, and substance, the cattle get the job done. Our success with the sire group has been very good by our standards. Besides this female and her full brother, we were fortunate enough to breed a red blaze faced son of Next Level that commanded plenty of attention in Denver on display in the Hartman pens. He went on to bring a final gavel price of \$150,000 to KT Ranches of British Columbia. The cattle offer plenty of size and scale and when things line up as they should, you get an end result such as this impressive yearling female.

If the boys were a bit more serious about the cattle game, this one could have been wearing a leather lead in Grand Island and would have held her own with her legit birthdate amongst those that were age advantaged in the fall calf division. When cattle come with genuine performance from cow families with a history of producing herd bulls, there's no need in losing the calving records.

The gal comes with a big set of feet and running gear, she is long sided and ideally deep in her rib design even with her extra frame. She too comes with plenty of back shape, is set wide in her pins and tracks genuine and wide to the ground. One of the many loose built, sound constructed creatures with real world production value combined with phenotype in the offering.

\$49,000 MATERNAL BROTHER TO LOTS 1-6

The cattle by TSN Statesman K006 have been well accepted by the masses! A mating we made on 847H with the hopes for a breed changing herd sire with phenotype and numeric acceptance fell short with these two heifer calves. Creighton Werning did the homework and bought the bull from the TSN Simmental program with a stellar set of numeric values that are nearly ideal across the board. One of the highest selling bulls in the world was a son of K006, W/C El Jefe' 3044N commanded \$295,000 as the selection of Steve Ford of Texas in the 2026 Werning Cattle Company Production Sale.

This duo of paternal sisters to the worldly 3044N have a ton of genetic merit to offer to those who have a bull business. Not only do they have a more than acceptable number profile, but they have the phenotype that balances the equation.

We are firm believers in the ability of the KCC1 Havana 83E matriarch and the quality of the daughters that are in production in general. Besides KCC1 SWC Harmony 847H there are other daughters like SWC KCC1 Lavonna 383L that have been sale features through The Black Label. In her rookie year of embryo transfer she has set her own bar for her own page in the 83E Production Archives.

This is the Freshman Year for the progeny by the \$100,000 KCC1 3BCC Black Label 4016M. The cattle have been met with praise for their legit calving merit, calf vigor, and growth and performance as weaning time draws closer. 4016M matured into a very smooth patterned, long bodied, square, deep quartered breeding bull with added bone and foot shape that is a challenge to find in any heifer safe option, especially in one that ranks in the top 2% for CE and the better 3% for BW.

As we evaluate this duo of IVF flush sisters, we value their build and kind as they come with extra length of side and offer an extended look of elegance through their front one third. When set into motion they take to the pen effortlessly as they plant with authority on all four corners and remain collected in their pattern lines.

These cattle were raised in the driest spot in the continental United States. Every day of maturity will be their best asset. This cow family is later in their maturity pattern with the very best days of their development closer to that calving date.

The tandem was not quite ready for picture day, but be sure to check in for their video.

One from the most popular sire group when it comes to shooting for those backdrop opportunities, TJSC Coping With Destiny 9K. When Brandon and Amber committed to aspiring their two selections from the 2023 edition of The Black Label we settled on two sires, the rising star from the Kearns lineup and the proven, many time champion, "Coping With Destiny".

Both sets of the "Coping With Destiny" calves come with a wealth of shape, body, substance, and look. The disposition factor favors the daughter of 83E which allows this female to be up for appraisal. She is one of the "good actors" within the lineage, and she offers the quality to go with it.

9K added the center body shape 383L always needed, and he complemented her front skeleton as well, adding a bit more angle to the set of her shoulder and flex to the knee. 0330P is one to analyze and appreciate for her mass and added substance.

There will be more to come from this youthful donor dam, so one may as well get in early.

FULL SISTER TO DAM OF LOTS 11 & 12

- This is the natural calf from Burke's 2025 Reserve Champion of the San Antonio Livestock Exposition Junior Simmental Show. JSUL FTZS Lady Red 303L is one of those we have campaigned in recent years that we thought a lot of and felt like she should have gathered more hardware and backdrop opportunities than she did, but we'll put that on the integrity of the system and continue breeding good livestock as evident in her two daughters in this offering.
- This solid colored, satin black hided female is sired by a son of RJ Trust Fund 212K out of the KCC1 SWC Harmony 847H donor dam, WEIS Mr. Brightside 215M. 215M is a resulting Embryos on Snow purchase made by Willie and Nikki Weis that sold through the 2025 TC and Weis Bull and Bred Female Sale for a final hammer price of \$20,000 as the selection of Walrod Cattle and Shipwreck Cattle.
- Her red hided dam can flat out raise a calf as she gives it all and settles right back first service A.I. while doing so.
- This prospect has maintained an awesome haircoat even through the eight plus weeks of triple digit heat we experienced late summer.
- She comes with a flawless build and pattern with smooth and seamless transitions complemented by her bold rib cage, ideally drawn underline, pin width, legitimate shape, and substance of skeleton. When set into motion it stays as good as when on the profile. Great running gear with the foot shape that buys longevity at no extra charge.

- Here she is! The ideal red colored breeding piece with the near perfect blaze facial feature that is incredible in her overall kind!
- The second of a duo backed by the legendary Peine/GS Rosie 677D cow family, this animal offers the proven pedigree and generating potential to leave a long-term impact when blended with the likes of the great Hara's Kim Kardashian 1C (a.k.a. "Lady Killer") through the direct influence of the RJ and Cowan owned stud, RJ Trust Fund 212K!
- There is a strong resemblance between her and her dam. Besides color and markings, her impeccable balance and maternal shape to her rib design, a captivating presence and silhouette on the stand and flawless design about her running gear. We like this version maybe just a bit more in her lower body design and a few more extras that come inclusive with this captivating creature.
- She has a great disposition and feel that she is definitely one that will surface as a big bred female with the competitive edge as a calf as well.

CE	BW	WW	YW	MILK	API	TI
6.1	3.7	81.4	121.5	16.5	95.5	68.6

We proudly offer a trio of females that are the result of an Embryos On Snow embryo purchase from the very popular female of the 2023-2024 show season, UDE Hayleigh 5K. 5K was selected as the Champion Simmental Female of the 2023 Fort Worth Stock Show and Rodeo, the Iowa State Fair, both junior and open shows of The American Royal, and the National Champion Simmental Female of the North American International Livestock Exposition of Louisville, KY. After the turn of the year, she was selected as the 2024 Reserve Champion Simmental Female of the National Western Stock Show of Denver, CO and ended up being awarded the PTP Ring of Champions Show Heifer of the Year.

5K's resume' continues to build in production as she shows no signs of wavering away from competition as her freshman class of females continues to compete with two of them breaking into The Top 20 at the most recent AJSA National Classic in Grand Island, NE.

This daughter of the most popular bull for the tan bark circles, TJSC Coping With Destiny 9K, reminds us so much of her dam at this stage of maturity. She comes with the extra big features in terms of size, scale, and substance in a very flexibly constructed package of body shape and true width. She is the one that will mature as her dam did and come together when it matters most when she closes in on that calving window.

SWC PHOENIX 305P
OFFERED BY: SHIPWRECK CATTLE CO

Here is the first of two daughters of 5K sired by the Wheatland Cattle Company stud, JWC 2/F Living Proof 283L.

305P had the privilege of nursing one of the very best recip dams on the place and she took full advantage of that opportunity. She has never wavered since birth always maintaining that maternal, brood cow presence that tells us she will be a warrior and generator when given the opportunity in production.

Bold, wide centered, genuine built with a flawless, loosely hinged skeleton that will afford her longevity in profitable fashion. Not only will she prove to be the kind that will outproduce her expectations, but she should leave a legacy much like her dam's.

Her neck ties ideally from her blade as she transitions with shape and correctness to her spine with the same distinct advantage to her pin set. She might be a pinch plain through her throat line and shoulder but so was her dam at this stage and KCC1SWC Harmony 847H was as well. The great ones don't always win shows, but they do make money!

SWC PEARL 315P
OFFERED BY: SHIPWRECK CATTLE CO

This is the sharp featured, proud built, arrogant sister of the JWC 2/F Living Proof 283L x 5K sisters!

315P has been a standout since birth in terms of her elevated build quality. She offers a smooth seamless design with the ideal structural foundation. She is the most chiseled and refined of the 5K tribe of this offering as she is set high from her blade, bold in her forerib, stout in her muscle design, with more than enough skeletal substance to go around.

Right now, in mid-August, she is the one who appears to be the more popular selection to be campaigned at any level. However, time and maturity are the most valuable things needed to bridge the gap and allow for the other to catch up. Only time will tell come sale day, so you can make the call on your own accord.

FULL BROTHER TO LOT 16

- Ladies and gentlemen, we present to you a full sister to Revelation 2K that was raised by our friends at Sheffield Ranch. Her full brother has created his own path of success and legacy in his service for the very progressive, industry leading firm of Hagerstown, Indiana, Schaeffer Cattle Company. A pair of daughters of the proven sire follow his full sister here in the next two lots in this offering.
- This female was weaned a little later and did not get the start that she needed, but she gains ground every day, and we expect big things from her as a bred heifer next fall and the spring of '28.
- She is very confident at the surface, when stops to pose her neck ascends high from the top side of her blade with a very unique skull attachment. You will love her shoulder and how she transcends to her center body shape with depth to her rear rib and flank. From hooks to pins down to her hindleg, all sharp, crisp, and desirable for her ultimate balance.
- Keep in mind that the females sired by Revelation 2K that sold in the recent "Elite Female Sale" at Schaeffer Show Cattle on September 12 averaged just shy of a record setting \$100,000!

SWC PLATINUM WICKED 225P

OFFERED BY: SHIPWRECK CATTLE CO

- I am very pleased with the small sampling of the Revelation 2K cattle we were fortunate to have this year. The rising Schaeffer and Bowling owned stud continues to blaze a trail of quality wherever his service is utilized.
- NFF Wicked B125 has been a reliable and consistent producer of quality. She has been responsible two Fort Worth Stock Show and Rodeo Champion Females and Reserve Champions at both San Antonio Livestock Exposition and the Houston Livestock Show and Rodeo.
- This female reminds us of the 2020 Fort Worth Champion, SWC Ruby Wicked Fran, exhibited by Bodie Shipman that was selected by the late, great cattleman, Jim Bloomberg. She is so refined and feminine about her front third, yet robust in her rib design, tucked high and neat about her chest, and offers a desired progression of depth into her rear rib and flank. 225P is elegant about her shoulder, clean about her neck and skull, with exceptional skeletal integrity and quality.
- From the ground up, this female is one that will gather fans by October 10, and I can assure you when she enters production, she will get her job done annually with generating capabilities.

OFFERED BY: SHIPWRECK CATTLE CO

- Here is the younger Revelation 2K from the proven donor, NFF Wicked B125, that may favor the power, width, and broodiness that comes from her dam.
- From birth to weaning, we can tell you that she was on the bubble of making the sale, but post weaning, she has turned it on and continues to impress the crew daily.
- Her disposition is suitable for any age showman. She has skeletal width advantages over her older sister as she is wider from the top side of her blade back into a wider, stouter pin set.
- Whether you choose to show this heifer or value her as a replacement for your natural calving cowherd, you will not be disappointed in the merit that the daughters of B125 offer in seedstock production.

CONLEY SHEZA STAR 219K
2024 NWSS GRAND CHAMPION
JUNIOR PUREBRED SIMMENTAL HEIFER
MATERNAL SISTER TO LOTS 19-21

- We continue with the RJ Trust Fund 212K influence and introduce another member of the donor pen, Conley Sheza Star Z32. I remember when Limestone, LLC purchased the flush opportunity on SVF Sheza Star S803 in one of the famed Hudson Pines Farms production sales, and they made the mating to the timeless BC Lookout 7024 that gave birth to an exciting set of SimAngus females. Kyle Conley spent time, early in his career employed by Chris McCutchen and being the sharp cowman that he is, he bought into the pregnancies the year Limestone offered them, and the rest is history.
- This lead-off double bred three quarter blood female represents the density and power offered up by this SimGenetic cow family.
- She is exceptional at the surface as she is set wide and true off both ends of her skeleton. Her rib cage bold and deep, her upper rib is impressive with spinal integrity that leads to a wide and level pin set.
- 101P is not the biggest or the longest of the mating, but she ties genuine substance and shape with a very good look of quality from every angle.

SWC PAID IN STARS 100P

OFFERED BY: SHIPWRECK CATTLE CO

- Here is the second of the trio of sisters by 212K from the Z32 donor dam. These females would be maternal sisters to the \$120,000 D3 donor that was selected by Linskov LT Ranches and Aces Wild from a past Conley Cattle Production Sale.
- The Z32 donor did so many things right in her tenure at Conley's and that's why we were more than happy to get to own this proven female late in her productive years. She defines longevity and production merit, and we have more on the way so buckle up as her time is not quite done.
- We love the symmetry and balance of this baldy female, and we are certain that you will as well.
- Her build is very correct as her long, flat neck sets ideal from her very smooth blade, as she transitions seamlessly to her fore and center rib. Her upper rib shape is bold with a deep, quality underline that is uniform from heart to flank. She is very strong and correct in her blade to spine transition and level and true to her pin set. In motion, there no place to fault her as she moves with collected grace.
- She is the front pasture kind and has the genetics behind her to go the distance.

SWC PAINTED STAR 102P

OFFERED BY: SHIPWRECK CATTLE CO

- This January purebred baldy will have a multitude of fans come sale day.
- Her disposition is suitable for any age showman at any level of experience.
- This female was raised by our good friends over at Hidden Oaks Cattle of Canton. She is the result of a bred heifer purchase from the Walrod program of Kansas through the Legends of the Flint Hills bred female sale series.
- GCC Night Owl 3104L is the striking son of "Private Stock" bred in the Griswold program that serves as a calving ease specialist with quality. Her dam is a direct daughter of W/C Red Bird 269J that is proven himself to be a sire of sensible calving merit, and his daughters are extremely maternal in production with suitable fertility and milk production.
- We really admire the genuine skeletal width and dimension this one has to her own. She is a big centered, huge bodied, thick ended one that sets soft and pliable to the surface on a near perfect hind leg and big soft feet. Caiden has put the time in on her haircoat, and it will be advantageous to whomever invests in this very good creature.

When we had the opportunity to see "Trust Fund" as yearling in the summer at Nichols Cryo Genetics I was very impressed with how he matured in terms of legit performance, frame, and his overall shape and power. We know that W/C Bankroll 811D and MR HOC Broker are complementary sires in a genetic reading, but the "Lady Killer" donor dam brought it all together.

BLC1 Evelyn 476E is a red hided donor dam we have owned with Hidden Oaks Cattle. Her embryos have highlighted the past "Sim Magic on Ice" sales and are a feature in "The Only One" at the National Western. Those frozen genetics have averaged a shade over \$2000 annually and are very sticky when transferred. She is a direct daughter of the proven W/C Executive Order 8543B and from a daughter of WS Pilgrim H182U from the prolific 3C Melody M668 BZ cow family that has built the CK and Wager programs of South Dakota. Her power, mass, and dimension are unmatched and her tenure in production is more than satisfying.

I have always been amazed with the smooth, silky build this red baldy has to her own. One that is long bodied, flexibly hinged, correct in her skeletal build with enough body and shape. She was not on the best recip dam, but the strides she has made since weaning have been impressive.

This creature reminds me so much of her maternal granddam at this age that it proves how strong proven, maternal genetics built on longevity and annual production records can last from generation to generation. Mike Moser of North Dakota runs a maternal brother to this female in his herd bull battery and loves the calves for their overall quality and performance.

LEGENDARY MATERNAL
GRANDDAM OF LOTS 24-26

- The next IVF trio of females are sired by the Featured Live Lot of the 18th Annual 2024 Embryos On Snow Oklahoma City the \$150,000 TLAC Hits Different 1409L ET. There is no question that this is one of the absolute hottest sire groups of the show cattle industry as he continues to experience aggressive use across breed lines and rightfully so. The cattle are gifted incredible features for hair, skeletal quality, genuine shape, and just sheer quality.
- Their dam would be LDSC Koko 1K, the BBR Memphis Mafia 3E ET sired female from the famous LDSC Lot 1. She is a full sister to multiple, high revenue earning and generating females but most notably the \$610,000 duo of LDSC Stella 152K and LDSC Shirley 155K owned and campaigned by the Gensini Family of Illinois.
- SWCB November Koko 358N, a daughter of Rose Apex 3204L, was selected by Jaleigh Hurst of Georgia from the Fitz and Weis Two Is Better Than One Sale offering. She has gone on to be the Supreme Champion Female of the Georgia Beef Futurity this summer with multiple breed titles, and has yet to finish outside of the top 5 of any show she has exhibited at. A full sister will be one of the many quality features at Coor Cattle of Ohio this fall as well.
- 450P is the dark cherry red female that comes with the extras for power, shape, and substance of bone. She is loosely hinged as she glides on the move, as she sets her skeleton down with utmost confidence. Her feet are extra big with ideal toe shape and spread that will only add to the list of extras she has to offer.

SWCB PERFECT KOKO 480P
OFFERED BY: SHIPWRECK CATTLE CO

480P is the elder of the two, LEGIT May born sisters. She offers the stunning look and presence from the side with seamless, ultra smooth transitions that lends to her high-end quality when viewed from the side.

490P is extremely young, but she has always had the power and substance equal to her red hided sister. She is in that stage that all cattle go through but still maintains that awesome set to her hind leg with plenty of bone, shape, and general quality. We expect to mature like she was in comparison to the day she was born, a burly, powerful creature with added bone and hip and back shape. She has a great disposition and we expect her to make an ultra-competitive bred female!

- This November born herd sire prospect has the size, scale, and equipment to handle a small set of heifers for any fall calving entity but will have a distinct size and maturity advantage to handle a bigger set in the spring season!
- He is the second calf from a young and productive daughter of KCC1 Havana 83E sired by the \$60,000 OMF Hard Right H21. 967K would not be the first cow that you would point out on a herd visit, but she will impress you in production. Her first born was a female sired by 3BCC Kash Money L21 that just laid down as a two year old and had her own herd sire prospect in 105 degree heat and hasn't missed a beat. That daughter of L21 from 967K is impressive in terms of balance, phenotype, and will have the milk and maternal instinct that the 83E cow family is accustomed to.
- WHF/JS/CCS Woodford J001 has been very good to the breed over the past few years. The cattle calve unassisted, have the necessary vigor, and most often are loaded with phenotypic quality that allows for easy marketability. The sire group has been very good to us here especially when combined with this cow family.
- 967N is robust in his rib and muscle design. He sets to the surface on a very good set of running gear and is very masculine featured. These heifer safe options with quality and shape are not on every corner, so if that is something your operation needs tie in early and you won't be disappointed.
- **Selling 100% Possession and 2/3 Semen Interest.**

Night Vision's Rhythm has been the tenured heifer safe herd sire at Shipwreck Cattle for the past two and a half years. He is a proven sleep all night, calving issue free, certified, card carrying, heifer bull!

- He is the service sire to many of the bred heifers in the offering as well. His calf reports have been very positive and favorable by those who have invested in the bred cattle the past two years that were safe to his service.
- His dam is from the prolific and high earning RUBY NFF Rhythm 2124Z that is the tenured donor dam of the Ruby program for all things beef production. 2124Z is one of those females in the business that never misses and will have multiple progeny in the sale reports with daughters leading the production pastures for the Ruby program of Murray, Iowa.
- This stud has never had a foot issue or had his feet trimmed. He sets with plenty of surface area, heel, and maintains that perfect toe shape and spread. His joints are clean, flat, and ultra flexible to further enhance his athletic build and presence in the breeding pasture. His masculine, chiseled skull is attached to a long, smooth neck design that ascends from the top side of his blade. We appreciate his long smooth muscle pattern, and the stud has always maintained a big rib cage.
- For those with a big set of heifers or young cows that are short on calving labor or if you just simply need a herd sire that will delete calving issues, set that satchel down.
- **Selling 100% Possession and Semen Interest.**

Four years ago, Syann Young (Foster) reached out to me about a yearling bull they had in way out Floyd County, Texas, that she wanted me to look at. I made the short five hour trip, looked through the cowherd a bit, and then she took me to the bull development to show me the bull she had called about. As soon as we pulled into the pasture, I noticed a good looking, flexible, stout, athletic stud and I just knew that was him until she pointed out a different one. Too late, I already had my mind dialed in, and I asked what the arrogant, sound, stout bull was, and so here we are four years later dissolving our partnership and interest in this elite herd sire that owes us nothing.

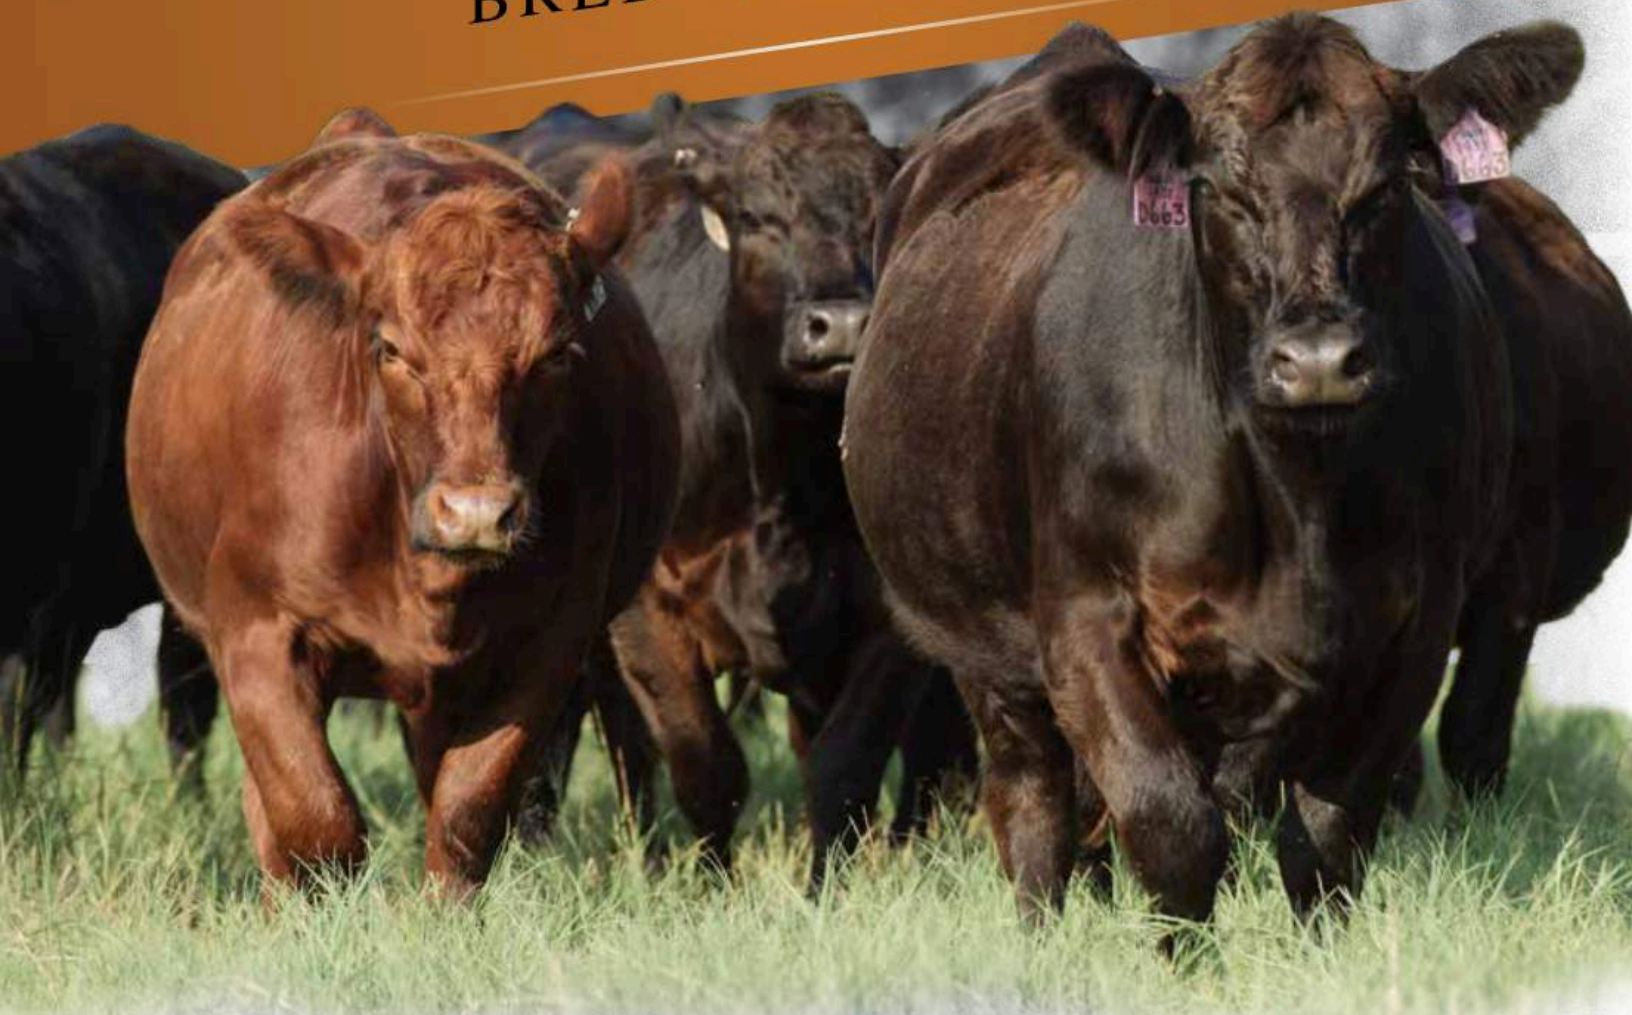

FBFS SWC Jordan 23J has been a great investment as we engaged in a very simplistic partnership with one of the great family ranching entities known to the exhibition industry. 23J's dam is from the very last mating I made before leaving my employment at Foster Brothers in the fall of 2009. FBFS X-Clamation 076X is the 2011 National Champion Simmental Female of the North American International Livestock Exposition. Her influence is nearly the entire mature female base at Lockney and Vigo Park, TX and for all the right reasons. "Jordan's" JSSC Wide Body 090W sired dam is a past Simmental Breed Champion of the San Antonio Livestock Exposition that has experienced quite the decorated career in production as well.

The cow family behind this bull is stacked for generations, and it continues to surface in the upper echelon stock that call home to the small West Texas communities. Dams of distinction laced with udder quality, fertility, with substance of bone, and power of center rib design and muscle is how the family consistently reads for type and kind.

This herd sire was responsible for our very best fall born heifer calf from KCC1 SWC Harmony 847H and was selected by the Meyring Family in a private treaty transaction. His cattle are consistent for pride and arrogance on the stand or in motion. They bring the "goods" for undeniable skeletal quality with a loose hinged build that sets on incredibly consistent quality feet. They have plenty of poise but it's the power that moves the needle in the right direction. This bull has the ability to breed a big set of cows and when everything cooperates, he will get the calving window tightened up. Owning a herd sire of this caliber has been a privilege, and he will be tough to replace especially in today's competitive market place.

Selling 100% Possession and Semen Interest.

- BRED TO CALVE 11/1/26 TO KCC1 3BCC BLACK LABEL 4016M (ASA: 4444386).
- Here is the lone fall bred female of the offering. She is the full sister to the \$38,000 3BCC SWC KCC1 Kavanna Kay that was selected by Blount Show Cattle of Hamilton, TX from the 2022 edition of The Black Label.
- The mating of MR HOC Broker back on 847H needs to be done again due to the sheer consistency when the two collide. It yields cattle that are long and elevated for size, the females are exquisite and feminine featured with spinal strength and integrity complemented with a beautiful hook to pin design and the ideal shape and set to that hock and rear leg assembly. The feet are true and the skeletal integrity unrivaled.
- This blaze faced female sells safe in calf to the \$100,000 KCC1 3BCC Black Label 4016M. We know the gene pool is tight but we had intentions of keeping this breeding piece until the course was altered. We believe strongly in the cow family and its ability to generate consistently and we have zero reservations about the future of the mating or the production value in store for this future donor prospect.
- This is the largest offering of direct daughters of KCC1 SWC Harmony 847H to date, so take full advantage of what we offer to you in this event.

LEGENDARY MATERNAL GRANDDAM OF LOTS 30 & 31

SWC 3BCC KCC1 HARMONY 350N

OFFERED BY: 3B CATTLE, KEARNS CATTLE, & SHIPWRECK CATTLE CO

BRED TO CALVE 3/1/27 TO NIGHT VISION'S RHYTHM (ASA: 4395796).

There is a pair of these full sisters in Grandview, TX, and we are offering the one that pregged safe in calf to the Night Vision's Rhythm herd sire that is featured in this year's sale offering.

I would expect that they will produce cattle of the same winning merit who not only have the ability to out produce those before them but maintain generating power beyond expectations.

We certainly expect nothing short of above statement from this direct daughter of KCC1SWC Harmony 847H. She has been the standout of the mating since day one as she is set wide at the corners with genuine width of chest and center body while remaining square and true from her hock to the surface. One that is hinged with utmost flexibility and maintains a powerful spread of rib cage and muscle.

There is no doubting the production value of this creature and based on kinds, this mating should yield nothing but the strong probability that she will owe you zero a year from sale day.

DAM OF LOT 32

A-C NOSTALGIC 2511N

OFFERED BY: SHIPWRECK CATTLE CO & ANDERSON CATTLE

BRED TO CALVE 1/10/27 TO ROXI'S REDEFINED 2007N (ASA: 4589081).

Here is a product of cattle purchased through The Black Label!

Her dam was purchased as an open female by VanHove Cattle Company of South Dakota and was remarked as a featured sale highlight through the Dakota Classic as a bred female as the selection of Schaeffer and Lambright. This bred heifer is the result of an embryo purchase made by Anderson Cattle.

She entwines MR HOC Broker, W/C Loaded Up 1119Y, and the proven and timeless J&J Queen 414 on the maternal side of her ledger, and she is sired by the \$530,000 SO Remedy 7F.

We believe that she will be a favorite of those who come view the offering in person. One that is hug barreled, wide constructed with a great build and impeccable skeletal quality.

SWC 3BCC NASTIA 355N

OFFERED BY: 3B CATTLE AND SHIPWRECK CATTLE CO

- BRED TO CALVE 1/13/27 TO KCC1 3BCC BLACK LABEL 4016M (ASA: 4444386).
- This female offers a proven genetic twist that is proven to be successful.
- Kayl Tassin of Mississippi selected 3BCC SWC Kali 613K from the 2023 edition of the Spring Sort. She went on to claim multiple banners including Supreme Champion Junior Female of the Mississippi State Fair.
- HILB Moana F13B was selected by Hendricks Cattle of Anadarko, Ok from the 2024 version of The Black Label, and they continue the legacy with no signs of shutting down with mass producing the good kind that she started off with during her tenure in Grandview anytime soon.
- 355N comes with a bit of chrome, but that will not hold her baldy production back and it does not affect her overall quality and kind in the least bit. She's feminine and refined about her front third as her smoothly laid blade transitions into a bold forerib in textbook form. Her center rib is deep with a very uniform underline as she ties correctly from blade to spine with strength and integrity. She is near perfect from hooks to pin set and maintains a very useful set and carriage to her hind leg.
- She's the productive kind that will make a return on investment.

MR COUNTESS 13N

OFFERED BY: SHIPWRECK CATTLE CO.

- BRED TO CALVE 3/1/27 TO NIGHT VISION'S RHYTHM (ASA: 4395796).
- If you need a female that is dense, powerfully constructed, and broody by design, do not overlook this direct daughter of the popular 4/B Dynamo.
- "Dynamo" has stayed the course and out produced the expectations of what the general public thought in the beginning of his career.
- The dam of this female blends the best of the old school, maternal Simmental genetics nearing the twenty year mark in terms of age. The "good stuff" never goes out of style when they have the ability to bring heavy calves of quality to the weaning pen.
- 13N is stout at the surface, sound and problem free in motion, with tons of rib shape and genuine width from end to end.

CONLEY DS CLEAR CUT 0510
2021-2022 ROV SHOW BULL
OF THE YEAR
SIRE OF LOTS 35 & 36

LOT 36: BRED TO CALVE 3/1/27 TO NIGHT VISION'S RHYTHM (ASA: 4395796).

The lone Angus pair of flush mate sisters sired by Conley DS Clear Cut 0510, the 2021-2022 ROV Show Bull of the Year, are from a direct daughter of Stevenson Turning Point and K Bar D Wendy 151E. K Bar D Wendy 86J is proportionally balanced at every turn and angle of evaluation. Her udder quality is as impeccable as her hoof integrity while maintaining a skeletal build of quality and eye appeal with true center width and dimension.

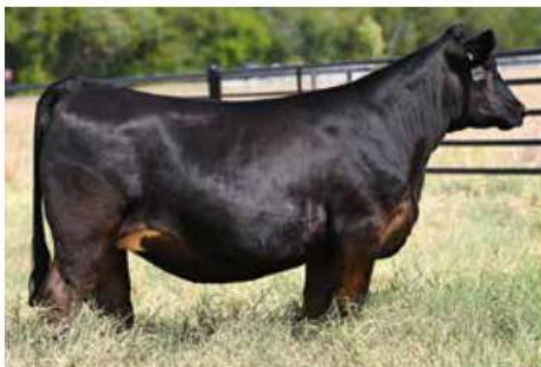

This pair of sisters have subtle differences but remain very consistent and true in presence and quality.

303N has been the one with the advantages in density and added power since they were calves. She has always been the low maintenance, robustly built female with the edge for base width and sheer mass.

LOT 37: BRED TO CALVE 3/16/27 TO NIGHT VISION'S RHYTHM (ASA: 4395796).

305N has been gifted more to her dam's side in terms of refinement and lady like qualities. She is a bit more chiseled about her skull, flatter and sleeker in her neck design and smoother laid at her blade. She's still plenty deep sided with outer turn to her upper rib with suitable width and shape as she leaves you.

I strongly believe that udder quality and calf raising ability will stay true to the strong, western bred maternal heritage that imprints the DNA on both females. The daughters of Conley DS Clear Cut 0510 are true to the breeding namesake, with maternal excellence embedded.

BRED TO CALVE 3/16/27 TO NIGHT VISION'S RHYTHM (ASA: 4395796).

Unless otherwise noted by sale day this female will sell without papers.

35N is a pedigree verified commercial female that is from a very impressive daughter of GCC Gold Standard X615. Her dam was not short on volume of milk or fertility. As a mature, productive female she was exceptionally big bodied, stout hipped, and big boned.

The influence of the full brother to KCC1 SWC Harmony 847H, KCC1 Countertime 872H, enhanced the length and feminine presence of 35N. This youthful spring bred female sells bred to the featured, proven calving ease sire, 420L.
