

ANNUAL PRODUCTION SALE

NOVEMBER 7, 2026 AT 1:00 PM

at the ranch in Mount Vernon, Missouri

Fellow Cattlemen and Cattlewomen,

With great excitement, we welcome you to our Annual Fall Production Sale on November 7, 2026. Our crew is proud of the set of bulls we have put together this year. This is the deepest, stoutest and most functional set we have ever offered, and we look forward to seeing what you think of them.

The cattle business continues to be a great place to be for the cow-calf producer. Despite the outside influences we all face, the market is in a good place, and we have the responsibility of feeding the nation with fewer cattle than ever before. These are exciting times, but they also come with their share of uncertainty. One thing we know for sure is that quality never goes out of style. From the top of the catalog to "the one in orange" at the end, these are bulls we are proud to call Moriondo Bulls.

We have always believed in balance, functionality and cattle that can get the job done in the real world. Whether you are looking for a bull that catches your eye in the pen or one with an impressive EPD profile, we believe you will find plenty to like in this offering. As you look through the catalog, you will also see how much emphasis we place on proven cow families. We have invested heavily in embryo transfer and continue to build sire groups around our best cows. Our philosophy has always been to build the bull from the cow, and it is rewarding to see that plan begin to pay off in the cattle we are offering today.

In our Simmental and SimAngus divisions, we have used proven sires such as KCC1 Walk the Line 076J, KCC1 Unanimous 2336K and EGL Firesteel 103F, along with some of the industry's up-and-coming sires, including OMF Ludacris L17, LCDR Patriot 8K and Iron Creek Never Say Never 9K. We have also used some of our own in-house genetics, including former sale topper MMR Topsy L410, now a resident herd sire at Hanel Black Simmentals. Throughout the catalog, you will find bulls tracing back to some of the breed's most widely used AI sires. We have put a lot of thought into this set, focusing on calving ease, longevity, power and the kind of functionality that matters when these bulls go to work. Our Angus offering is just as exciting, with plenty of power and dimension to run right alongside the Simmental bulls. Sires such as Chestnut Force 482, J Trademark 1037, Hoffman Summation 2414 and Raven Stand Alone are represented throughout the offering. Mila and McCoy have also brought us another ground-pounding Horned Hereford to add to the sale.

We are excited about the opportunities in front of us and believe this is a great time to improve or expand your cow herd. Once again, we will offer a nice group of commercial bred heifers from Moriondo Farms and the Ryan Post Family. The work is done on these girls. Take them home and let them start paying the bills!

None of this happens without a lot of hard work. We are thankful for the crew that puts in the long hours and extra effort to get everything ready for sale day. Family is the foundation of this operation, and I am especially thankful for Maranda, Mila, McCoy, Mom and Dad. Maranda keeps us all in line with the paperwork, and we appreciate everything she does. There is nothing quite like seeing your six-year-old son pull on his boots at 5:00 a.m. and get ready to saddle up to catch cows or watching your daughter spend a summer morning helping at the barn. Raising our kids in this way of life makes us appreciate it even more.

To our returning customers and those joining us for the first time, thank you for your interest and support. We know these bulls are more than just another purchase. They represent the future of your cow herd for years to come, and we take that responsibility seriously. We stand behind our bulls and our customers, and we will do everything we can to help you be successful. Thank you for being part of what we do. We look forward to seeing you on November 7. If you have any questions, don't hesitate to give Nathan Arnold or me a call.

God Bless,

Mark Moriondo

Welcome.

The commercial cow-calf sector is driven and motivated more than ever before due to the historic cycle we have experienced over the past three years. With the strength in the marketplace, most cow/calf operations have paid off or paid down debt, invested in infrastructure improvements to make the business more efficient, and several have taken advantage of the advanced improvements in genetics and technology. Research continues to improve the predictability of the genetics available for herd improvement, and progressive firms like Moriondo Bulls continue to implement such tools in their breeding program to bring you a more uniform and consistent product.

The Moriondo family is very aggressive in their approach to the beef business. This entity truly understands the needs of a cow/calf operation as the outfit runs well over 1,200 commercial units themselves. They approach the marketplace as many of you do at "yearling time," offering a big, heavy, healthy product that commands "top dollar" through their progressive auction market of choice, generally on video. Their product has a reputation that equates to a competitive bidding scenario, leading them to top the market on that selected day. It would make perfect sense to get on board with a program that knows and understands exactly what you need and what it takes to achieve and accomplish the end goal.

As you browse this sale book, a veteran customer will notice the firm is offering a few more bulls than usual. Growth needs to be anticipated as the general base of the registered cow herd continues to evolve and improve with each generation. Larry is certainly young at heart, while Mark is youthful in years, but they share the quest to become a bigger, more reliable source for the bulls that inject convenience, performance, and profit into their customers' programs. They intend to continue to grow their operation with the same genetics that are printed on the pedigree lines of this sale catalog, as their success is your success no matter how you look at the program.

These bulls are built and developed to thrive within the "fescue belt" and beyond. They have sent these bulls to a wide array of climates and terrains with positive feedback on the athleticism and longevity in service. The outfit believes in offering a product that can handle a large number of cows and never waver when service is needed, regardless of weather or resources. We promise you that this is a tough, hardy set of bulls that can acclimate quickly to their surroundings without sacrificing the little things that incentivize profit potential.

As you give thought to your breeding program and analyze your needs, we feel confident that there are several qualified candidates within the pages of this book that will drive profit and predictability into any cowherd looking to improve all things related to beef production. Larry and Mark Moriondo are two of the very best people that we get to work with throughout the course of the marketing year, and they sincerely understand your needs and appreciate your support of their progressive program. If you need any assistance with selection or purchasing, please do not hesitate to reach out to any of the Innovation AgMarketing team. Our desire is for your investment experience to be loaded with convenience and the results you desire, and we are here to assist. We appreciate your interest and your undivided attention to the cattle and the family operation.

Enjoy the cattle,

Graham Blagg

Saturday, November 7, 2026
Cattle available for viewing all morning
12:00 PM - Lunch & Refreshments
1:00 PM - Annual Production Sale

Watch the Sale on CCI.live!

*The best, the fastest and most
comprehensive marketing & bidding tool!*

How to Bid Online...

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
 - After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
 - CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

Viewed around the world!

**SALE CATALOG, VIDEOS,
and LIVE BROADCAST...**

all at your fingertips from the sale page at

Over 35 years in livestock marketing!

MISSOURI SHOW-ME SELECT REPLACEMENT HEIFER PROGRAM

The Show-Me-Select® Replacement Heifer Program uses the latest research on health, nutrition, genetics and reproductive science to ensure Missouri counties continue to be national leaders in providing quality beef. The program focuses on Missouri's farmers and is dependent upon active participation from regional extension livestock specialists and local veterinarians, each of which are critical components of the agricultural sector of this state.

This program is unique in that it is an educational program targeted at improving production efficiency through increased use of existing technology, coupled with the marketing component.

Program Objective:

Improved heifer development programs through a Total Quality Management strategy
Increased marketing opportunities for and added value for Missouri-raised heifers
Creation of reliable sources of quality replacement heifers based on management, reproduction and genetics

Genetic Requirements:

Sire requirements: Eligible sires must have known ID, be registered by their respective national breed registry, and have complete EPD (opens in new window) information. Sires will be evaluated for qualification in the program based on the EPD provided by their respective breed registry and not on EPD produced by progeny registration in any other breed or hybrid registry.

Angus minimum Calving Ease EPD of 7.0

Simmental and SimAngus minimum Calving Ease EPD of 14.0

*Our guarantee to you and
commitment to service.*

OUR GUARANTEE

We guarantee that all bulls sold through our sale are fertile to the best of our knowledge. If a bull is injured anytime in the twelve months following the sale, that makes him functionally infertile, we will provide a replacement bull or issue a credit in following sales, equal to the purchase price minus the salvage value received for your bull. This is not a life insurance policy. The guarantee is in addition to the sale terms and conditions of the American Simmental Association and American Angus Association, which will also apply.

CUSTOMER SUPPORT

We believe in the cattle we are producing here and believe in the cattle that you are producing at home. When the time comes for you to market your calves, however that may be, if interested call myself and let me know your plans with your cattle and see if we can assist or bid on your calves however you may sell them. Extending every dollar in the cattle business is how it is made, and we would love to help if we can.

- What an impressive white-faced stud and sire group to head up the Fall edition of the Moriondo Farms Annual Production Sale.
- OMF Ludacris L17 is a \$70,000 son of the \$230,000 KCC1 Countertime 872H, backed by the truly "timeless" dam for herd sire generation, OMF Time Less B100.
- On the bottom side he is backed by a dam that has recently earned her spot in the donor for her consistent quality in production, Long's Player H64.
- Imagine the mouthwatering set of baldy heifers!
- N111 is homozygous polled.
- Top 30% WW, YW, and CW, plus top 35% ADG.

- The production record behind HOF Sara 081H deserves attention. Her previous son MMR Unanimous M96 sold for \$8,500 to Dustin Dostal.
- The performance column shows that this bull coupled a 614 lb. weaning weight with 1,140 lbs. at yearling.
- N109 is homozygous black and homozygous polled.
- Top 20% WW and YG, top 25% BF, and top 30% YW.

- MMR Firesteel N121 is a SimAngus herd bull built for speed and ready for heavy service.
- For cattlemen focused on pay weight, this prospect delivered 648 lbs. at weaning and followed with 1,210 lbs. at yearling.
- His profile should work especially well on heifers when the goal is live calves, vigorous growth, and more pounds to sell at weaning.
- N121 is homozygous black and homozygous polled.
- Top 5% MARB, top 10% API, top 15% BW and STAY, top 20% \$GN, and top 25% CED and DOC.
