WELCOME

FRIENDS, NEIGHBORS AND FELLOW CATTLEMEN,

From our family to yours, welcome to the 2nd Annual Nixon Family Farms "Crimson & Coal" Production Sale. It's hard to believe a year has already passed since we welcomed everyone to Floydada for our inaugural sale. We're incredibly grateful for the support we received that first year and for the relationships that have continued long after sale day. Seeing Nixon Family Farms genetics go to work for cattlemen across the country makes the work behind this program worthwhile.

This year has brought growth to our family as well. Keenan and Hannah welcomed their first child, Bowdie, adding another generation to Nixon Family Farms. Having multiple generations involved in this operation reminds us why we do what we do. We're not simply building a cattle herd for today, we're working to build something worth passing down.

That same long-term mindset guides our breeding program. We continue to invest in our Red Angus and SimGenetic programs, focusing on fertility, soundness, disposition and maternal ability without sacrificing the performance and pounds that keep an operation profitable.

We believe this year's offering is another step forward. From Simmental and SimAngus herd sire prospects to a deep set of Red Angus cattle and promising females, this offering represents the direction we want Nixon Family Farms to continue moving. These cattle are backed by the same genetics and cow families we rely on in our own operation.

We know purchasing a bull or female is an investment, and we don't take that responsibility lightly. We want to earn your confidence, stand behind the cattle we raise, and build relationships that last well beyond sale day.

Most of all, thank you to everyone who supported our first sale, purchased cattle, stopped by the ranch or followed along as we've grown this program. If this is your first time looking through a Nixon Family Farms catalog, we're so glad you're here.

We invite you to come and see the cattle Sunday, October 11, or join us Monday morning for coffee and breakfast. Lunch will be served at noon (thanks to TTU's Red Raider Meats for joining us again!), followed by the 2nd Annual "Crimson & Coal" Production Sale at 1:00 p.m. on Monday, October 12, 2026, in Floydada, Texas. If you can't join us in person, online bidding will be available through CCi.Live.

We look forward to welcoming you to Nixon Family Farms.

God Bless,
Nixon Family Farms

Kirby & Brooke Nixon

SALE ORDER
Cattle will NOT sell in catalog order. A sale order will be available the week of the sale.

DNA
All Nixon Family Farms bulls selling have had DNA submitted to the American Simmental Association and Red Angus Association of America.

SUPPLEMENTAL INFORMATION
A supplement sheet will be provided the week of the sale with updated breeding information, corrections, and addition information. All announcements made from the auction block will take precedence over printed materials associated with this sale.

TERMS & CONDITIONS
The terms of the sale are cash or good check payable to Innovation AgMarketing, LLC at the conclusion of the auction. Please contact Graham Blagg at (530) 913-6418 for Wiring Instructions or ACH Payment Information. Any person not completing payment will be pursued legally through the Texas & Southwest Cattle Raisers Association. The auction and registration will be videotaped. All cattle sell under the suggested terms & conditions of their respective breed association. All sales are final once the auctioneer says "SOLD". Cattle will not be released until payment has been made in full. After receiving any bred heifer(s), the buyer has 5 days to have them preg-checked by a certified veterinarian. Anything after that the buyer assumes responsibility of pregnancy status.

EPDs
The EPDs in this sale catalog were pulled from the American Simmental Association and Red Angus Association of America on August 25, 2026. Please visit RedAngus.org or Simmental.org for updated EPDs.

BREEDING SOUNDNESS EXAM
All bulls will be fertility tested and trichomoniasis tested prior to the sale and guaranteed to be breeders.

SEMEN INTEREST
Nixon Family Farms will retain 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block. The buyer will receive 100% of the salvage value of their purchase.

TRANSPORATION
Load out will be available at the sale facility following the sale. We will assist customers with trucking arrangements as needed. Our facility has a loading chute to accommodate semi-trucks. We will be offering FREE trucking to buyers who purchase bulls within 300 miles, anything beyond that we will assist with coordination and delivery options. We will do our best to assist you in transporting your bulls following the sale. The cost of delivery/shipping on all females will be the responsibility of the buyer. Bulls can be housed at Nixon Family Farms until November 1, 2026, after that date they will be charged $5/day.

VOLUME DISCOUNTS
3% - 3 Bulls
4% - 4 Bulls
5% - 5+ Bulls

ONLINE BIDDING
You will be able to view the sale live at www.CCi.Live. No login will be required. If you would like to bid on any lots, please request bidding credentials prior to 11 AM local time sale day. The auction will begin approximately at 1 PM on October 12, 2026.

LIABILITY
All persons who attend the sale do so at their own risk, legal or otherwise, for their safety or for behavior of the animals. The owners, sale management firm, and the sale staff assume no liability for property loss or any accident that may occur.

INNOVATION
AgMarketing, LLC

One of the more exciting things associated with production agriculture is the successful generational family operations. Gary and Robin Nixon both worked tirelessly assembling and maintaining a land base and the assets attached to it that could benefit the next generation, if that was their wish. When Kirby finished at Texas Tech, the plan was for him to come home, and the turnover of the operation was initiated. When Keenan decided that Floyd County was home as well, Gary stepped a little more away, and now it is in full motion. Of course, the boys know and understand the value of their parents' input, and it is taken in full respect today, but that torch east of Floydada, Texas, is fully lit and burning bright as the next generation assumes the reins of this successful family business.

As we have commented more than once for our other clients in West Texas, they are a resilient kind of people that are seldom dealt the good cards when it comes to receiving consistent moisture, but they are certainly professionals at adaptation. As the irrigation opportunities become fewer and fewer, the vast land mass that has been in cotton or some other row crops over the past century is going back to grass. Some of the larger farming entities in the region have started reseeding grass, putting up barbed wire where it once was and getting back to ranching. Although it is a big change for many, it is exciting to witness the repopulation of the best thing for the region and its resources.

The Nixon cow base has historically been tied to the Red Angus breed; however, through 4-H and stock show activities, the boys successfully campaigned and exhibited several nice Simmental and SimAngus females that represent that specific discipline of the program. They were aggressive throughout their college years in adding to those Simmental numbers, making a major private treaty acquisition that helped shape the SimGenetic program as it is today. At the same time, they have not wavered from improving the Red Angus side. making key acquisitions in elite donor females and the outstanding commercial bred heifers that are featured in this year's sale offering. Either way one looks over the fence, the boys have set that satchel down and have invested in the genetics to keep pushing forward, bringing you a product that is current genetically and adapted to the challenging climate and rigorous terrain.

We believe that you will find a better set of cattle between the covers of this sale book than a year ago. The red hided cattle are as consistent and uniform as they have ever been, with tons of options for both low-birth weight heifer projects to the "Red Baron" sons that will leave a set of heavy, good-feeding feeder cattle, and heifer mates that will build breeding programs. As mentioned, the young brotherly duo stepped out and stepped up in acquiring a mouth-watering set of commercial Red Angus open heifers of Nebraska and South Dakota origin. They will be a highlight of the female division, with several females safe to the AI service. The SimGenetic division offers a set of bulls that are heavier and deeper in quality as well, with the female division, much like a year ago, representing the aggressive embryo transfer program and the outstanding natural calving cows that do the heavy lifting on an annual basis. Either way, either hide color, one cannot go wrong on October 12, 2026.

The customer feedback from the 2025 edition has been very positive, with very satisfied customers near and far. We are enthusiastically charged about this year's offering and what the future holds for this young breeding program. There are some exciting things on the horizon at Nixon Family Farms that will take place in due time. This is an outfit to hang your hat on and stay along for the ride to come. Please plan to join the family on the evening of October 11, 2026, and stick around for the live sale offering on October 12, 2026. The hospitality will be first class, and the folks behind it a class above. We appreciate your interest, and the team of Innovation AgMarketing is here to assist with absentee bidding or to enhance your selection experience.

Enjoy the cattle,

Graham Blagg *Jered Shipman* *Tim Anderson* *Tucker Wagner*

WELCOME
to the Sale!

- The Nixon Family Farm initiates this 2nd annual offering with an absolute STUD! MR NFFS Network 103N is the lone OMF Journeyman J24 son in the offering, backed by an incredible CDI Innovator 325D dam.
- 103N is a dense made, wide built herd bull that has the skeletal build to get out and cover cows no matter the terrain. He does all the basics with added look and an extended build.
- He records an adjusted weaning weight of 895 lbs. and ranks NUMBER 1 for adjusted yearling weight at 1429 lbs. He is homozygous polled and homozygous black, further strengthening his usefulness across a wide range of females.
- Numerically, he ranks top 25% ADG and BF and top 35% YW and YG.
- He has the ability to answer the call and attain the goals of a variety of firms!

Lot 2

JBSF BERWICK 41F
$109,000 Sire of Lot 2

- Cow power runs deep behind this baldy specimen. MKCC NFFS Berwick 14N stacks JBSF Berwick 41F onto an impressive KCC1 Exclusive 116E dam that traces back to the Sandeen program.
- With adjusted weights of 867 lbs. at weaning and 1409 lbs. at yearling, he brings documented performance to the offering. His 1,400 plus lb. adjusted yearling weight adds meaningful individual performance to the package.
- His pedigree and performance are built to generate stout feeder cattle and valuable replacement females.

Lot 3

DWYER WALLSTREET 115J
Sire of Lots 3 & 4

- Here is an incredible son of Dwyer Wallstreet 115J, backed by a highly productive female that does not miss, and NFFS Wallstreet 534N is arguably her best work yet. For a herd bull with his punch, his structural assembly is to the highest degree of excellence.
- No bull in the Simmental division came to weaning with more pay weight. He ranks NUMBER 1 for adjusted weaning weight at 986 lbs. and records an adjusted yearling weight of 1401 lbs.
- On paper, he ranks top 35% CED.
- One of the most complete combinations of performance, pedigree, and phenotype in this deep offering.

- This three-quarter blood Simmental offers a different route to the Dwyer Wallstreet 115J sire group. Schooley Miss 6031 415B, a powerful SimAngus female, brings the influence of SS/PRS High Voltage 244X to the homozygous polled, homozygous black herd bull.
- 415B has put both male and female stock in both editions of the "Crimson & Coal" offering, further adding probability to this herd bull's equation.
- His added visual length and stretch translate to real pounds on the scales. The performance tabulation reads 711 lbs. adjusted at weaning and 1190 lbs. adjusted at yearling.
- Predictability pays!

- We are genuinely impressed with the SFI Longs In Charge K28 sire group for their added length, stretch, and real world performance. With the influence of the $530,000 SO Remedy 7F, the cattle combine performance with a look that's pleasing to any eye.
- MR NFFS In Charge 111N combines his length of build with added shape and substance to his body. His big legs hit the dirt with stout, good feet.
- From weaning to yearling, he advanced from an adjusted 869 lbs. to 1313 lbs.
- His numerical rankings include top 15% CW and REA.
- Take charge of adding yield and pounds to a calf crop with this stud on the roster.

- NFFS Next Level 519N is an extra dense bodied, big ended, and powerfully constructed son of Next Level that is backed by BFJV Ms Ledger G314, the Nixon family's selection from the 2021 Bruhn Cattle Company "Incredible" Female Sale.
- This homozygous polled SimAngus herd sire prospect is backed by the influence of the $250,000 TL Ledger on the maternal side of the equation.
- A surefire candidate to add stretch and quality to your next calf crop.
- His EPD rankings include top 10% YG and BF.

- The lone red hided Simmental bull is a true sale feature! He is supported by the stunning donor dam, KCC1 Tiara 131Z, a female that offers superior longevity, fertility, and skeletal quality. 131Z is a daughter of the maternal legend WAGR Driver 706T, a sire that has had integral role of female development in several of the nation's top breeding programs.
- 515N himself in incredible herd sire prospect with extra stoutness, shape, and eye appeal
- At the timepoints of measure, he adjusted to 823 lbs. at weaning and 1270 lbs. at yearling.
- Numerically, he ranks top 10% BF and top 15% YG.
- A tremendous herd bull option that is supported by a royal pedigree!

- Powerful, soft bodied, robust ribbed, and massive from every angle of evaluation!
- The dam of Lots 13 and 14 is a young and very productive daughter of Rocking P Legendary C918. The maternal side of her pedigree further traces to the influence of Ms TR Katinka 4715B ET, the MR HOC Broker sired daughter of the immortal matron, TR Ms Katinka 3208N, that was a cornerstone donor in the Thomas Ranch breeding program of South Dakota.
- Adjusted performance measures 781 lbs. at weaning and 1269 lbs. at yearling.
- On paper, he ranks top 30% YG and top 35% REA.
- A moderate built herd bull candidate that should be responsible for an elite set of replacements and fed offspring with real red meat and power.

- NFFR Trust In Me 505N is a stout pinned, round bodied bull that is smooth in his build. His dam, MF Julia 5376, comes from the same program that produced to name's sake of this stout sire group, MF Trust In Me 0636, lending predictability on top and bottom of the pedigree.
- His moderate 77 lb. birth weight combined with his calving ease figures suggest safety for a set of heifers without sacrificing performance.
- Individual performance adds further merit, with adjusted weights of 635 lbs. at weaning and 1113 lbs. at yearling.
- His numerical rankings include top 18% STAY, top 22% BW, top 29% DMI, top 31% CED and CEM, and top 35% HB and FAT.
